#### MEMORANDUM

TO: Individuals Interested in the North Carolina Semiannual Dialysis Reports

FROM: Victoria McClanahan, Planner

Medical Facilities Planning Section

SUBJECT: North Carolina Semiannual Dialysis Report, January, 2010

DATE: January 4, 2010

The North Carolina State Health Coordinating Council and the Medical Facilities Planning Section are pleased to make the "January 2010 Semiannual Dialysis Report" available. This report is published pursuant to Chapter 14 of the 2010 North Carolina State Medical Facilities Plan. It applies the County Need methodology based on patient data as of June 30, 2009 and calculates utilization rates for implementation of the Facility Need methodology.

Certificate of need applications in response to the "January 2010 Semiannual Dialysis Report" are due on March 15, 2010 for review beginning April 1, 2010. The filing deadline is 5:30 p.m. on the Application Due Date. The filing deadline is absolute.

General questions about the Semiannual Dialysis Report may be directed to the Medical Facilities Planning Section at 919-855-3865. For additional information regarding the certificate of need application process, please contact the Division of Health Service Regulation, Certificate of Need Section at 919-855-3873.

### END-STAGE RENAL DISEASE DIALYSIS FACILITIES Semiannual Dialysis Report, January 2009

#### Introduction

The <u>2010 North Carolina State Medical Facilities Plan</u> requires semiannual determination of need for new dialysis stations in North Carolina. This approach calls for publication of "Semiannual Dialysis Reports" (SDR) during January and July. The <u>2010 North Carolina State Medical Facilities Plan</u> specifies that the Semiannual Dialysis Reports "...will use facility, station and active patient data as of June 30, 2009 for the 'January 2010 SDR,' and as of December 31, 2009 for the 'July 2010 SDR.' A new five-year trend line will be established in the 'July 2010 SDR,' based on validated data as reported to the Centers for Medicare and Medicaid Services (CMS) for the time period ending December 31, 2009." This document is the "January 2010 SDR." It reiterates the methodology and presents need determinations for the certificate of need review beginning April 1, 2010.

#### **Summary of Dialysis Station Supply and Utilization**

For purposes of the Semiannual Dialysis Report, as of December 30, 2009 there were 164 End-Stage Renal Disease (ESRD) dialysis facilities certified and operating in North Carolina (*i.e.*, facilities reporting patient data via the Southeastern Kidney Council), providing a total of 3933 dialysis stations. Certificates of need had been issued for an additional 209 dialysis stations, but the stations were not yet certified. Another 108 dialysis stations had been requested, but had not completed the certificate of need review and appeals process. The number of facilities per county ranged from zero to 13.

Utilization data as of June 30, 2009 are presented in the final two columns of Table A. Of the 162 certified facilities operational on that date, 72 were at or above 80 percent utilization (i.e., operating with at least 3.2 patients per station).

#### **Sources of Data**

#### **Inventory Data:**

Data on the current number of dialysis facilities and stations were obtained from the Certificate of Need Section and from the Licensure and Certification Section, Division of Health Service Regulation, North Carolina Department of Health and Human Services.

#### **Dialysis Patient Data:**

Data on the dialysis population by county and by facility as of June 30, 2009 were provided by the Centers for Medicare and Medicaid Services (CMS) through the Southeastern Kidney Council, Inc. (SEKC) and the Mid-Atlantic Renal Coalition, Inc.

County data are designed to include all North Carolina residents of each county who are receiving dialysis, regardless of where they are currently being served. The numbers of North Carolina patients being served in North Carolina, Georgia and South Carolina as of June 30, 2009 were provided by the SEKC on November 30, 2009. The SEKC noted that data in their report were based upon information provided to the SEKC by dialysis facilities in Network 6 and were represented to the SEKC as current as of November 20, 2009. The SEKC stated that these data are subject to change (*SEKC Disclaimer found on page 18*). County totals from the SEKC were supplemented by data from the Mid-Atlantic Renal Coalition indicating the number of patients residing in North Carolina counties and receiving dialysis in Virginia. Data for December 31<sup>st</sup> of 2004, 2005, 2006, 2007, and 2008 have been provided by the same sources for the five-year trend analysis.

Facility data include all patients being served by each provider as of June 30, 2009 regardless of the county or state of each patient's residence. These figures were also provided by the SEKC on November 30, 2009. Again, the SEKC noted that these figures reflect data provided to it by dialysis facilities in Network 6 and were represented to the SEKC as current as of November 20, 2009. The SEKC also stated that these figures are subject to change.

#### Method for Projection of New Dialysis Station Need

The 2010 North Carolina State Medical Facilities Plan (SMFP) directs the Medical Facilities Planning Section to "...determine need for new dialysis stations two times each calendar year, and...make a report of such determinations available to all who request it." The basic principles, methodology and timeline to be used were specified in the 2010 SMFP and are presented below:

#### **Basic Principles**

The principles underlying projection of need for additional dialysis stations are as follows:

- 1. Increases in the number of facilities or stations should be done to meet the specific need for either a new facility or an expansion.
- 2. New facilities must have a projected need for at least 10 stations (or 32 patients at 3.2 patients per station) to be cost effective and to assure quality of care.
- 3. The Medical Facilities Planning Section will maintain a list of existing facilities and stations, utilization rates and projected need by county that is up-dated semiannually. Updated projections will be available two times a year on a published schedule. Existing or potential providers interested in expanding in any area of the State may contact the Medical Facilities Planning Section for projected need in the area of interest. (Note: A dialysis station's service area is the dialysis station planning area in which the dialysis station is located. Except for the

Cherokee-Clay-Graham Multi-County Planning Area and the Avery-Mitchell-Yancey Multi-County Planning Area, each of the 94 remaining counties is a separate dialysis station planning area.)

- 4. Updates of the projections may target counties that have developed sufficient need to warrant consideration for facility expansion or for establishment of a new facility. Actual numbers are not published in the North Carolina State Medical Facilities Plan so they can be updated as appropriate by the Medical Facilities Planning Section.
- 5. Home patients will not be included in the determination of need for new stations. Home patients include those that receive hemodialysis or peritoneal dialysis in their home.
- 6. No existing facility may expand unless its utilization is 80 percent or greater. Any facility at 80 percent utilization or greater may apply to expand.
- 7. Facilities reporting no patients through the Southeastern Kidney Council for four consecutive Semiannual Dialysis Reports, beginning from March 1997, will be excluded from future inventories.
- 8. Quality of Care: All facilities should comply with Medicare and Medicaid regulations relating to the delivery and certification of ESRD services and with relevant North Carolina statutory provisions. An applicant already involved in the provision of end-stage renal disease services should provide evidence that care of high quality has been provided in the past. The following are considered indicators of quality of care and existing providers proposing to expand their operations should include in their applications data which include, but are not limited to, the following:
  - a. utilization rates
  - b. morbidity and mortality rates
  - c. numbers of patients that are home trained and patients on home dialysis
  - d. number of patients receiving transplants
  - e. number of patients currently on the transplant waiting list
  - f. hospital admission rates
  - g. conversion rates for patients who have acquired hepatitis or AIDS
- 9. Availability of Manpower and Ancillary/Support Services: The applicant should show evidence of the availability of qualified staff and other health manpower and management for the provision of quality ESRD services as well as the availability of a safe and adequate water supply, provision for treatment of wastewater discharge and a standing electrical service with backup capabilities.

- 10. Patient Access to In-Center ESRD Services: As a means of making ESRD services more accessible to patients, one of the goals of the N. C. Department of Health and Human Services is to minimize patient travel time to and from the center. Therefore,
  - a. End-stage renal disease treatment should be provided in North Carolina such that patients who require renal dialysis are able to be served in a facility no farther than 30 miles from the patients' homes.
  - b. In areas where it is apparent that patients are currently traveling more than 30 miles for in-center dialysis, favorable consideration should be given to proposed new facilities which would serve patients who are farthest away from existing, operational or approved facilities.
- 11. Transplantation Services: Transplantation services should be available to, and a priority for, all ESRD patients whose conditions make them suitable candidates for this treatment. New enrollees should meet with and have access to a transplantation representative to provide patient education and evaluation for transplantation.
- 12. Availability of Dialysis Care: The North Carolina State Health Coordinating Council encourages applicants for dialysis stations to provide or arrange for:
  - a. Home training and backup for patients suitable for home dialysis in the ESRD dialysis facility or in a facility that is a reasonable distance from the patient's residence;
  - b. ESRD dialysis service availability at times that do not interfere with ESRD patients' work schedules;
  - c. Services in rural, remote areas.

#### Methodology

Need for new dialysis stations shall be determined as follows:

- (1) County Need (for the January 2010 SDR Using the trend line ending with 12/31/08 data)
  - (A) The average annual rate (percent) of change in total number of dialysis patients resident in each county from the end of 2004 to the end of 2008 is multiplied by the county's June 30, 2009 total number of patients in the SDR, and the product is added to each county's most recent total number of patients reported in the SDR. The sum is the county's projected total June 30, 2010 patients.
  - (B) The percent of each county's total patients who were home dialysis patients on June 30, 2009 is multiplied by the county's projected total June 30, 2010 patients, and the

- product is subtracted from the county's projected total June 30, 2010 patients. The remainder is the county's projected June 30, 2010 in-center dialysis patients.
- (C) The projected number of each county's June 30, 2010 in-center patients is divided by 3.2. The quotient is the projection of the county's June 30, 2010 in-center dialysis stations.
- (D) From each county's projected number of June 30, 2010 in-center stations is subtracted the county's number of stations certified for Medicare, CON-approved and awaiting certification, awaiting resolution of CON appeals, and the number represented by need determinations in previous State Medical Facilities Plans or Semiannual Dialysis Reports for which CON decisions have not been made. The remainder is the county's June 30, 2010 projected station surplus or deficit.
- (E) If a county's June 30, 2010 projected station deficit is ten or greater and the January SDR shows that utilization of each dialysis facility in the county is 80 percent or greater, the June 30, 2010 county station need determination is the same as the June 30, 2009 projected station deficit. If a county's June 30, 2010 projected station deficit is less than ten or if the utilization of any dialysis facility in the county is less than 80 percent, the county's June 30, 2010 station need determination is zero.

#### (2) Facility Need

A dialysis facility located in a county for which the result of the County Need methodology is zero in the current Semiannual Dialysis Report (SDR) is determined to need additional stations to the extent that:

- (A) Its utilization, reported in the current SDR, is 3.2 patients per station or greater.
- (B) Such need, calculated as follows, is reported in an application for a certificate of need:
  - (i) The facility's number of in-center dialysis patients reported in the previous Dialysis Report (SDR<sub>1</sub>) is subtracted from the number of in-center dialysis patients reported in the current SDR (SDR<sub>2</sub>). The difference is multiplied by 2 to project the net in-center change for 1 year. Divide the projected net in-center change for the year by the number of in-center patients from SDR<sub>1</sub> to determine the projected annual growth rate.
  - (ii) The quotient from (2)(B)(i) is divided by 12.
  - (iii) The quotient from (2)(B)(ii) is multiplied by 6 (the number of months from June 30, 2009 until December 31, 2009) for the January 4, 2010 SDR.

- (iv) The product from (2)(B)(iii) is multiplied by the number of the facility's incenter patients reported in the current SDR and that product is added to such reported number of in-center patients.
- (v) The sum from (2)(B)(iv) is divided by 3.2, and from the quotient is subtracted the facility's current number of certified stations as recorded in the current SDR and the number of pending new stations for which a certificate of need has been issued. The remainder is the number of stations needed.
- (C) The facility may apply to expand to meet the need established in (2)(B)(v), up to a maximum of ten stations.

[NOTE: "Rounding" to the nearest whole number is allowed only in Step 1(C) and Step 2(B)(v). In these instances, fractions of 0.5000 or greater shall be rounded to the next highest whole number.]

Unless specific "adjusted need determinations" are recommended by the North Carolina State Health Coordinating Council, an application for a certificate of need for additional dialysis stations can be considered consistent with the need determinations of the 2010 State Medical Facilities Plan only if it demonstrates a need by utilizing one of the methods of determining need outlined in Chapter 14.

#### **Timeline**

The schedule for publication of the North Carolina Semiannual Dialysis Reports and for receipt of certificate of need applications based on each issue of that report shall be as follows:

Data for Period Ending	Due Dates for SEKC Report	Publication of SDR	Application Due Dates for CON Applications	Beginning Review Dates
June 30, 2009	Nov. 9, 2009	January 4, 2010	March 15, 2010	April 1, 2010
Dec. 31, 2009	May 10, 2010	July 1, 2010	September 15, 2010	October 1, 2010

Please be advised that 5:30 p.m. on the specified Application Due Date is the filing deadline for any certificate of need application in response to these dialysis reports. The filing deadline is absolute.

Note: Except for the Cherokee-Clay-Graham Multi-county Planning Area and the Mitchell-Avery-Yancey Multi-county Planning Area, each of the 94 remaining counties is a separate dialysis station planning area.

Application of the County Need Methodology resulted in no dialysis station need determinations for the January 2010 Semiannual Dialysis Report.

### Southeastern Kidney Council Disclaimer November 20, 2009

The Southeastern Kidney Council, Inc. is a nonprofit organization that contracts with the Centers for Medicare and Medicaid Services for the provision of information-related services with respect to End Stage Renal Disease Network 6. The data in this report are based upon information generated by dialysis facilities in Network 6 and provided by these facilities to the Southeastern Kidney Council, Inc. The information has been represented to the Southeastern Kidney Council, Inc. as current as of November 20, 2009. These data are subject to change without notice.

This report is made available by the Southeastern Kidney Council, Inc. to the Medical Facilities Planning Section, Division of Facility Services, North Carolina Department of Health and Human Services ("Department") solely for the Department's use. The Southeastern Kidney Council, Inc. takes no responsibility for the use by the Department of this report or the information contained in it for any purpose, including but not limited to any dissemination by the Department of the report or any information in it to other agencies or the public, or any use by the Department of the report or any information in it in preparation of the Department's Semiannual Dialysis Reports or any need determinations for dialysis stations. While the Southeastern Kidney Council, Inc. strives for as much accuracy as possible, it expressly disclaims any representations or warranties, whether express or implied, to the Department or any other entity or person regarding the accuracy or reliability for any purpose of the information in this report, including but not limited to any information provided to the Southeastern Kidney Council, Inc. by dialysis facilities.
