**Novant Health, Inc.**  
**Regarding a Certificate of Need Application**  
**Submitted on 10/15/2013 for 11/1/2013 Review Cycle**  
**by The Charlotte-Mecklenburg Hospital Authority**  
**d/b/a Carolinas Medical Center Mercy**  
**in Response to a Need Determination for**  
**40 Acute Care Bed in the Mecklenburg County Service Area**

## **I. Introduction**

In accordance with N.C.G.S. Section 131E-185(a)(1), Novant Health, Inc. submits the following comments regarding a Certificate of Need Application submitted by The Charlotte-Mecklenburg Hospital Authority d/b/a Carolinas Medical Center Mercy (CMC-Mercy) in response to a need determination for 40 acute care beds in the Mecklenburg County Service Area for the November 1, 2013 review cycle.

The following three CON applications were submitted in response to a need determination for 40 acute care beds in the Mecklenburg County Service Area in the *2013 State Medical Facilities Plan (2013 SMFP)*:

- F-10214-13: Novant Health Huntersville Medical Center - Develop 17 acute care beds in existing space.
- F-10215-13: The Charlotte-Mecklenburg Hospital Authority d/b/a Carolinas Medical Center Mercy - Develop 34 acute care beds that will be designated as medical/surgical beds in existing space.
- F-10221-13: The Charlotte-Mecklenburg Hospital Authority d/b/a Carolinas Medical Center-University - Develop 6 acute care beds that will be designated as telemetry capable medical/surgical beds in existing space.

The three CON applicants proposed a total of 57 acute care beds. It is not possible for the Agency to approve all three CON applications unless the Agency approves fewer acute care beds than requested by one or more CON applicant(s).

Based upon the institution specific historical inpatient day compound annual growth rate (CAGR) for each of the three hospitals applying for additional acute care beds, Novant Health Huntersville Medical Center has the greatest need for additional acute care beds as shown in the following table. The four year timeframe utilized in the following calculations was based upon the historical data timeframe provided in the CMC-Mercy CON Application. Historical patient days from annual SMFPs were utilized for FFYs 2010 through 2012. Estimated FFY 2013 data for CMC-Mercy and CMC-University was calculated from CY data provided in the respective CON Applications. Estimated FFY 2013 data for NHHMC was taken from the CON Application.

**Projected Acute Care Bed Need**  
**Applicants for Additional Acute Care Beds in Mecklenburg County**

	2012 SMFP	2013 SMFP	2014 SMFP	CON Applications	CAGR 2010- 2013	Projected				
	FFY 2010	FFY 2011	FFY 2012	FFY 2013 Estimated		FFY 2014	FFY 2015	FFY 2016	FFY 2017	FFY 2018
<b>CMC-Mercy</b>

Note: CMC-Mercy and CMC-University FFY 2013 calculated using CY data presented in the CON Applications (pages 60 and 59 respectively).

Source: SMFPs for FFY 2010-2012 for CMC-University and NHHMC; LRAs for FFY 2010-2012 for CMC-Mercy; CON Applications

As shown in the previous table, of the three applicants, NHHMC has the greatest need for additional acute care beds, with a need for 35 additional acute care beds by FFY 2018. NHHMC has applied for only 17 of the available 40 SMFP beds. The other two applicants, CMC-Mercy and CMC-University both project a continued surplus of acute care beds from FFY 2010 through FFY 2018 for nine straight years.

Only NHHMC has exceeded its target occupancy level continuously since FFY 2010.

## **II. Carolinas Medical Center-Mercy CON Application**

Effective October 1, 2013 as a result of a DHSR Declaratory Ruling decision, CMC-Mercy was “shifted from the Mercy Hospital, Inc./Pineville license (#H0042) to Carolinas Medical Center’s (CMC) license (#H0071).”<sup>1</sup> “The resulting CMC/CMC-Mercy license reflects CHS’s intent to operate the two facilities in a unified strategic fashion.”<sup>2</sup>

The following table shows the number and type of licensed acute care bed located at CMC-Mercy as reflected in the CMC-Mercy CON Application on page 7. Note that the data in the following table is not consistent with the CMC-Mercy/Pineville 2013 Hospital License Renewal Application as corrected by DHSR on 2/28/13 (**Attachment 1**).

**CMC-Mercy**  
**Licensed Acute Care Beds: October 1, 2011 – September 30, 2012**

Licensed Acute Care Bed by Type	Number of Licensed Beds*
ICU	30
Med/Surg	132
Total	162

Source: CMC-Mercy CON Application page 7

\*Does not include Substance Abuse beds

NOTE: Total licensed beds in the CON Application and subsequently in the above table are not consistent with the licensure renewal application as corrected by DHSR on 2/28/13, which shows 30 ICU beds, 168 acute beds, & 11 substance abuse/chemical dependency beds.

CMC-Mercy proposes to develop 34 acute care beds that will be designated as medical/surgical beds, for a total of 196 acute care beds. The proposed acute care beds will be developed in existing space on the 6<sup>th</sup> floor of CMC-Mercy<sup>3</sup> vacated by the development of previous approved Project I.D. #F-8161-08 and Project I.D. F-8764-11, both of which involved the relocation of inpatient rehabilitation beds<sup>4</sup>.

## **III. CON Review Criteria**

The following comments are submitted based upon the CON Review Criteria found at G.S.131E-183. While some issues impact multiple Criteria, they are discussed under the most relevant review Criteria and referenced in others to which they apply.

### **G.S. 131E-183 (1)**

*The proposed project shall be consistent with applicable policies and need determinations in the State Medical Facilities Plan, the need determination of which constitutes a determinative limitation on the provision of any health service, health service facility, health service facility beds, dialysis stations, operating rooms, or home health offices that may be approved.*

<sup>1</sup>CON Application F-10215-13, page 4.

<sup>2</sup>Id.

<sup>3</sup>CON Application F-10215-13, page 17.

<sup>4</sup>CON Application F-10215-13, page 6.

There is one *State Medical Facilities Plan (SMFP)* Policy applicable to the review of the three competing CON Applications for acute care beds in Mecklenburg County:

- Policy GEN-3: Basic Principles.

As will be discussed in the context of CON Review Criteria (3), (4), (5), (6), and (18a), CMC-Mercy does not demonstrate:

- A need for the proposed project;
- That the proposed project will promote equitable access; and
- That the proposed project will maximize health care value for resources expended.

As a result, the CMC-Mercy CON Application does not conform to Policy GEN-3 and CON Review Criterion (1).

### **G.S. 131E-183 (3)**

*The applicant shall identify the population to be served by the proposed project, and shall demonstrate the need that this population has for the services proposed, and the extent to which all residents of the area, and, in particular, low income persons, racial and ethnic minorities, women, handicapped persons, the elderly, and other underserved groups are likely to have access to the services proposed.*

CMC-Mercy seeks to justify adding 34 acute care beds to an existing facility with a current excess of acute care beds based upon the following three reasons listed on page 45 of the CMC-Mercy CON Application.

- The need for additional acute care bed in the *2013 SMFP*
- The need for additional [inpatient bed] capacity at CMC
- The dynamic population growth in Mecklenburg County, including the population over 65

First, the need in the SMFP is for 40 additional acute care beds in Mecklenburg County, not for a specific provider or system. While Carolinas Medical Center (CMC) in Charlotte did have an identified need in the *2013 SMFP*, CMC-Main did not submit an application on 10/15/2013 to meet that need. Of the three applicants for the 40 acute care beds in Mecklenburg County, only Novant Health Huntersville Medical Center has an identified need for additional acute care beds in the *2013 SMFP*.

Second, as will be discussed below, the projected shift in patient days from CMC to CMC-Mercy, which will allow for additional capacity at CMC, is overstated, unreasonable and unsupported.

Third, on page 57, CMC-Mercy states, “*Population growth trends in Mecklenburg County indicate that the demand for healthcare services overall will likely increase over the next several years.*” While CMC-Mercy provided qualitative information regarding the population growth in

Mecklenburg County and surrounding areas, CMC-Mercy did not provide any data, documentation or information which supports the statement that “*demand...will likely increase*” as a result. In particular, CMC-Mercy provided no documentation that the increase in population will result in an increase in utilization at CMC-Mercy. No information was provided regarding patient day use rates to support using the population growth rate to increase patient days at CMC-Mercy. In fact, as illustrated by CMC-Mercy in their Application on page 60, utilization at CMC-Mercy has not grown at rates consistent with population growth in the past. At CON Application page 60, the applicant’s assessment of Calendar Year CMC-Mercy annual patient days for CY 2010 through CY 2013 Annualized shows a negative CAGR of -3.1%.

CMC-Mercy seeks to justify adding 34 new acute care beds to an existing facility with a current excess of acute care beds. To achieve this CMC-Mercy uses unreasonably high growth rates to increase patient days at CMC-Mercy, which actually have declined from FFY 2010 to FFY 2012, and proposes to shift an unreasonable volume of patients from CMC to CMC-Mercy.

Unlike CMC-Mercy, Novant Health Huntersville Medical Center (NHHMC) has experienced consistent and constant growth in acute inpatient days year after year. Projected growth at NHHMC is based upon its own historical actual growth rate for NHHMC inpatient days and no assumed shifts in volume from other Novant Health facilities.

#### **A. CMC-Mercy has a Surplus of Licensed Acute Care Beds – No Need for 34 Additional Acute Care Beds**

The following table shows the utilization of licensed acute care beds at CMC-Mercy for the last three federal fiscal years (FFYs) as reported in its 2011 – 2013 Hospital License Renewal Applications.

**CMC-Mercy  
Acute Care Utilization: October 1, 2009 – September 30, 2012**

<b>October - September</b>	<b>FFY 2010</b>	<b>FFY 2011</b>	<b>FFY 2012</b>
ICU Med/Surg Days of Care	6,322	7,160	5,800
Med/Surg Days of Care*	27,896	30,343	25,555
Total Days of Care	34,218	37,503	32,877
ADC	93.7	102.7	90.1
Total Licensed Acute Care Beds	185	168	168
<b>Occupancy Rate</b>	<b>50.1%</b>	<b>61.1%</b>	<b>53.6%</b>
SMFP Target Occupancy Rate	66.7%	71.4%	66.7%
Licensed Beds Needed Target Occupancy	140	144	135
<b>Surplus of Licensed Acute Care Beds</b>	<b>45</b>	<b>24</b>	<b>33</b>

Source: CMC-Mercy LRAs 2011, 2012, 2013 (As corrected by DHSR Licensure Section on 2/28/13)

\*Includes progressive unit days of care

CMC-Mercy reported an occupancy rate of **53.6%** of its 168 licensed acute care beds in FFY 2012 as shown in the previous table. In the last three FFYs, CMC-Mercy's occupancy rate has been **significantly lower than the applicable target**, as shown in the above table.

As shown in the previous table, CMC-Mercy has a **surplus of licensed acute care beds** in each of the last three FFYs. Note that the surplus has declined only because CMC-Mercy transferred 23 acute care beds to CMC-Pineville. In FFY 2012, CMC-Mercy had a need for 135 of its 168 licensed acute care beds. CMC-Mercy does not have a need for the 34 proposed additional acute care beds when it had a **surplus of 33** licensed acute care beds in FFY 2012, the immediately prior Hospital LRA reporting year for 2013.

According to CMC-Mercy's internal data for inpatient days presented on page 60 of the CON Application, CMC-Mercy projects an annualized **CY 2013 occupancy rate of 53.9%**. CMC-Mercy's internal data shows a need for only 131 licensed acute care beds at a target occupancy rate of 66.7% in CY 2013 Annualized (Jan-June 2013), as shown in the following table.

**CMC-Mercy**  
**Acute Care Utilization: January 1, 2010 – December 31, 2013 Annualized**

<b>January - December</b>	<b>CY 2010</b>	<b>CY 2011</b>	<b>CY 2012</b>	<b>CY 2013 Annualized</b>
Total Days of Care	35,031	37,160	31,660	31,880
ADC	96.0	101.8	86.7	87.3
Total Licensed Acute Care Beds	185	168	162	162
<b>Occupancy Rate</b>	<b>51.9%</b>	<b>60.6%</b>	<b>53.5%</b>	<b>53.9%</b>
SMFP Target Occupancy Rate	66.7%	71.4%	66.7%	66.7%
Licensed Beds Needed Target Occupancy	144	143	130	131
<b>Surplus of Licensed Acute Care Beds</b>	<b>41</b>	<b>15</b>	<b>32</b>	<b>31</b>

Source: CON Application F-10215-13, page 60

\*Includes progressive unit days of care

CMC-Mercy does not have a need for the 34 proposed additional acute care beds when it estimates a **surplus of 31** licensed acute care beds in CY 2013 Annualized.

Lastly, the Acute Care Bed Need Methodology in the *2013 SMFP* and the *Proposed 2014 SMFP*, respectively, projects a surplus of acute care beds at CMC-Mercy/Pineville: a **surplus of 97** in **2015** decreasing slightly to a **surplus of 92** in **2016**. The Acute Care Bed Need Methodology did not separate the surplus by hospital because projections were calculated before the October 1, 2013 effective date for the license separation.

## **B. CMC-Mercy has a Negative Compound Annual Growth Rate – No Need for 34 Additional Acute Care Beds**

The following table shows the a decline in utilization of licensed acute care beds at CMC-Mercy for the last three consecutive federal fiscal years (FFYs) as reported in its 2011 – 2013 Hospital License Renewal Applications.

**CMC-Mercy**  
**Acute Care Utilization: October 1, 2009 – September 30, 2012**

<b>October - September</b>	<b>FFY 2010</b>	<b>FFY 2011</b>	<b>FFY 2012</b>	<b>CAGR</b>
ICU Med/Surg Days of Care	6,322	7,160	5,800	-4.2%
Annual Growth		13.3%	-19.0%	
Med/Surg Days of Care	27,896	30,343	25,555	-4.3%
Annual Growth		8.8%	-15.8%	
Total Days of Care	34,218	37,503	32,877	-2.0%
Annual Growth		9.6%	-12.3%	

Source: CMC-Mercy 2011, 2012 2013 LRAs

As shown in the previous table, CMC-Mercy has experienced a **CAGR of -4.3%** in its medical/surgical days of care and a **CAGR of -2.0%** in its total acute days of care over the last three FFYs.

CMC-Mercy's medical/surgical days of care **declined 15.8%** and its total day of care **declined 12.3%** in FFY 2012, as shown in the previous table.

On page 60 of its CON Application, CMC-Mercy calculates a **CAGR of -3.1%** in acute care days of care from CY 2010 to CY 2013 Annualized (January 1 – June 30, 2013). On page 61, CMC-Mercy calculates a CAGR of 6.9% for CMC-Mercy combined with CMC-Pineville. Consolidation may have been appropriate when CMC-Mercy and CMC-Pineville shared a common licensure; it is inappropriate effective October 1, 2013, when the hospitals no longer share a common license and when CMC-Mercy states in its Declaratory Ruling Request to DHR that “[t]he resulting CMC/CMC-Mercy license reflects CHS’s intent to operate the two facilities in a unified strategic fashion.”<sup>5</sup> So going forward from 10/1/2013, CMC-Mercy will presumably not be operated any longer in a unified strategic fashion with CMC-Pineville.

CMC-Mercy's acute inpatient utilization and growth rate must stand on its own.

On page 64 (2<sup>nd</sup> table), CMC-Mercy estimates a **one-year annualized growth rate of 0.7%** for its total days of care between CY 2012 and CY 2013 (January 1 – June 30), as shown in the following table.

---

<sup>5</sup>Id.

**CMC-Mercy**  
**Acute Care Utilization: January 1, 2010 – December 31, 2013 Annualized**

January - December	CY 2010	CY 2011	CY 2012	CY 2013 Annualized
Total Days of Care	35,031	37,160	31,660	31,880
Annual Growth		6.1%	-14.8%	0.7%
CAGR				-3.1%

Source: CON Application F-10215-13, page 64

The previous table shows that CMC-Mercy experienced a **14.8% decline** in its total days of care in CY 2012, which is **a loss of 5,500 days of care**<sup>6</sup>. In CY 2013 Annualized, CMC-Mercy estimates an increase of a mere 220 days of care<sup>7</sup>.

Even utilizing the historical one-year growth rate of 0.7%, projected utilization at CMC-Mercy does not support the addition of 34 acute care beds as reflected in **Attachment 4**.

### C. Use of CMC-Mercy LRA Data Overstates Acute Care Bed Need

On page 59 of its CON Application, CMC-Mercy compares historical Truven data to historical LRA data and concludes the data is comparable. However, CMC-Mercy/Pineville LRA data has historically been 2.4% greater than Truven data during the timeframe reflected in the CMC-Mercy CON Application as shown in the following table. While the DHSR Medical Facilities Planning Section requires additional information for facilities with a 5% or greater variation between Truven and LRA data, that request is utilized for planning purposes for determining SMFP acute care beds needed. A 5% variance is not an appropriate target for CON Application purposes. As illustrated below, a variance as low 2.4% results in a need for six additional acute care beds at CMC-Mercy.

**CMC-Mercy/Pineville**  
**SMFP/LRA Data Comparison**

Year	CMC Mercy	CMC Pineville	CMC Mercy-Pineville	CMC Mercy-Pineville	Annual Difference SMFP-LRA	Percent SMFP Lower	ADC	Beds
	LRA	LRA	LRA	SMFP				
FFY 2010	34,218	31,633	65,851	63,239	-2,612	-4.13%	-7.16	-9
FFY 2011	37,503	33,194	70,697	69,975	-722	-1.03%	-1.98	-3
FFY 2012	32,877	39,399	72,276	70,638	-1,638	-2.32%	-4.49	-6
Three Year Average Impact on Acute Care Beds Needed				69,608	67,951	-1,657	-2.44%	-4.54
								-6

Source: **Attachment 8**

<sup>6</sup>Calculation: (=37,160 CY 2011 patient days – 31,660 CY 2011 patient days)

<sup>7</sup>Calculation: (=31,660 CY 2012 patient days – 31,880 CY 2013 patient days)

Using LRA data as base data for CMC-Mercy's projections results in overstating the need for acute care beds by six acute care beds at a minimum from the very start of the methodology used by CMC-Mercy. See the table directly above. Because CMC-Mercy and CMC-Pineville data are combined in the Truven database, actual CMC-Mercy data cannot be compared.

Furthermore, using LRA data overstates the patient days proposed to be shifted from CMC in the CMC DRG subset (CMC-Mercy CON Application **Exhibit 24**). As illustrated in the following table, a variance as low 2.0% results in a need for 18 additional acute care beds at CMC.

**CMC**  
**SMFP/LRA Data Comparison**

	LRA	SMFP	Annual Difference SMFP-LRA	Percent SMFP Lower	ADC	Beds
FFY 2010	251,426	244,908	-6,518	-2.66%	-17.86	-27
FFY 2011	259,162	256,117	-3,045	-1.19%	-8.34	-13
FFY 2012	258,794	252,876	-5,918	-2.34%	-16.21	-24
Three Year Average Impact on Acute Care Beds Needed	256,461	251,300	-5,160	-2.05%	-14.14	-18

Source: [Attachment 8](#)

The DHSR Medical Facilities Planning Section utilizes Truven data for planning purposes. The annual *SMFP* need projections are based upon Truven data. CMC-Mercy should have taken into account the historical variance between their Truven data and their LRA data when projecting future utilization. Since they did not, projected utilization is unreasonable, overstated, and unsupported.

#### **D. Methodology to Project Utilization is Flawed – No Need for 34 Additional Acute Care Beds**

- **The CMC-Mercy Need Method Step 1 and Step 2 Projected CAGR of 1.7 % at CMC-Mercy is Unreasonable**

Step 1 and Step 2 project future utilization for CMC-Mercy's current patient population on pages 63-65 of CMC-Mercy's CON Application. On page 64 CMC-Mercy provides historical data which reflects a negative CAGR of -3.1% for acute inpatient days. CMC-Mercy then states that the slight increase of 220 annual patient days from CY 2012 to CY 2013 indicates that CMC-Mercy is "*rebounding and is likely to increase in the future, given overall CHS volume trends and population growth.*" CMC-Mercy provides no support for this assumption.

CMC-Mercy's patient day CAGR has been negative during the timeframe presented in the CON Application, while CHS patient day CAGR has been slightly positive. The positive growth in CHS overall has been in spite of the negative decline at CMC-Mercy from FFY 2010 to FFY 2012. CMC-Mercy provides no evidence to show this trend will reverse at the CMC-Mercy hospital facility.

In addition from FFY2011 to FFY2012 both CMC-Mercy and the CHS system experienced negative growth as shown in the following table, and CMC-Mercy inpatient utilization for FFY 2013 is projected to decrease as previously discussed in these comments. CMC-Mercy provided no documentation or assumptions regarding why patient days at CMC-Mercy would grow as other facilities in the system have. Therefore, it is unreasonable to assume the CAGR at CMC-Mercy will increase 1.7% annually for the existing patient population, in the context of historically negative patient day growth rates for CMC-Mercy.

**CMC-Mercy and CHS Historical Utilization  
FFY 2010 – FFY 2012**

	<b>2012 SMFP</b>	<b>2013 SMFP</b>	<b>2014 SMFP</b>	<b>CAGR 2010-2012</b>	<b>AGR 2011-2012</b>
	<b>FFY 2010</b>	<b>FFY 2011</b>	<b>FFY 2012</b>		
CMC-Mercy					
Patient Days	34,218	37,503	32,877	-2.0%	-12.3%
Total CHS					
Patient Days	328,810	346,410	344,089	2.3%	-0.7%

Source: SMFPs

The overall CHS historical growth in patient days is based upon growth at CMC and CMC-Pineville and not CMC-Mercy. Therefore, it is unreasonable to use the 1.7% CAGR in Step 1 and Step 2 of the methodology. The 1.7% growth rate applied to CMC-Mercy's future patient days is 480% higher than CMC-Mercy's actual historical one-year patient growth rate of 0.7%. One year of a modest positive growth rate does not a trend make.

On pages 64-65, CMC-Mercy chooses to “use the more conservative five-county service area<sup>8</sup> population CAGR of 1.7 percent annually.” As discussed above, CMC-Mercy’s use of a 1.7% population growth rate as applied to future patient day growth is neither conservative, nor reasonable in view of the decline in utilization of its licensed acute care beds experienced in the last three FFYs documented in Subsection B of these comments and the decreasing utilization at CMC-Mercy.

CMC-Mercy could have considered other supported and reasonable alternative growth rates. Changing the growth rate will impact the number of beds needed in the future as reflected in the following alternative.

Alternative 1: Projected utilization at CMC-Mercy utilizing its own institution specific CAGR of -2.4% from FFY 2010 to FFY 2013 results in significantly less patient days for the current patient population utilizing CMC-Mercy as shown in the following table. The impact of this alternative growth rate is 20 fewer acute care beds needed by CMC-Mercy in 2017 (Project Year 3).

---

<sup>8</sup>The CMC-Mercy 5 County service area is defined at CON Application page 64 to include Mecklenburg, Cabarrus, Union, and Gaston Counties in North Carolina and York County in South Carolina.

**CMC-Mercy Projected Patient Days**  
**Institutional Specific CAGR FFY 2010-2013 Growth Rate**

<b>CON Projections</b>						
<b>CMC-Mercy Projections Step 2 - Page 65</b>						
	2013 Volume	Growth Rate	PY 3 2017			
Total	31,880	1.7465%	34,166			
<b>Alternative 1.</b>						
<b>CMC-Mercy Projections Step 2 - Institutional Specific CAGR FFY 2010-2013 Growth Rate</b>						
	2013 Volume	Growth Rate	PY 3 2017	Difference PY 3	ADC	Bed Need at 71.4%
Total Days	31,880	-2.39%	28,943	-5,224	-14.3	-20.0

Source: **Attachment 4**

Use of an unreasonable growth rate is a deficiency that cannot be ignored, and is an error that infects the days of care provided by CMC-Mercy and overstates the acute care bed need for CMC-Mercy. CMC-Mercy did not justify the use of a 1.7465% population growth rate as applied to CMC-Mercy's historical patient days.

- **The CMC-Mercy Need Method Step 5 Days of Care Shifted to CMC-Mercy from CMC**

The cornerstone of CMC-Mercy's methodology is its assumption that CMC-Mercy will be the beneficiary of a very large increase in utilization when days of care are shifted from CMC. This is explained at pages 68-74 of the CMC-Mercy CON Application. The projected shift is so sizeable that it eliminates a 33-acute care bed surplus at CMC-Mercy in FFY 2012, documented in Subsection A of these comments and a proposed addition of 34 acute care beds in CY 2015.

The following table shows the utilization of licensed acute care beds at CMC-Main for the last three federal fiscal years (FFYs) as reported in its 2011 – 2013 Hospital License Renewal Applications.

**CMC-Main in Charlotte**  
**Acute Care Utilization: October 1, 2009 – September 30, 2012**

October - September	FFY 2010	FFY 2011	FFY 2012
Total Acute Days of Care	251,426	259,162	258,794
ADC	688.8	710.0	709.0
Total Licensed Acute Care Beds	795	795	795
Occupancy Rate	86.7%	89.3%	89.2%

Source: CMC-Main 2011, 2012 2013 LRAs

There is no dispute that CMC is a well-utilized tertiary/quaternary medical center, which is “the largest research hospital in the region and one of five teaching hospitals in North Carolina.”<sup>9</sup>

There also is no dispute that CMC had a **decline of 0.14% in total acute days of care** in the most recent FFY as shown in the previous table; and, is projected to experience an even greater **decline of 0.59% in total acute days of care** from CY 2012 to CY 2013 as reflected in Exhibit 21 on page 357 of the CMC-Mercy CON Application. Therefore, the projected CAGR of 1.6% utilized to project future patient days at CMC reflected on page 73 appears high. This is relevant since patient days are being shifted from CMC to CMC-Mercy which results in overstating the projected need for acute care beds at CMC-Mercy.

On page 70, CMC-Mercy projects a total volume of 22,696 medicine patient days at CMC for admissions from four physician practices which are appropriate to transfer to CMC-Mercy and CMC-University. To determine the volume to be shifted to CMC-University, CHS considers the zip code patient origin of the patients from CMC-University. CMC-Mercy does not perform the same exercise for its own zip code service area. Once the volume for CMC-University is subtracted, CMC-Mercy assumes that 90% of the remainder will shift to CMC-Mercy. CMC-Mercy does not provide any discussion or documentation of how they determined a 90% patient shift was appropriate for the remainder of patients admitted by the four medical groups identified.

CMC-Mercy did not adjust the DRG subset [CMC-Mercy CON Application **Exhibit 24**] volume such that it was specific to Mecklenburg County. CMC-Mercy did not adjust for admissions through the emergency room at CMC which would not then be transferred to CMC-Mercy and CMC-University. CMC-Mercy did not adjust based upon volume specific to the CMC-Mercy zip code service area. Any one of these adjustments would result in shifting less than 90% of remaining patients to CMC-Mercy.

Therefore, assuming that 90% will shift to CMC-Mercy is unreasonable and unsupported. This proposed shifted volume is from all over the remaining zip codes in Mecklenburg County, as well as other counties. Based upon the CMC 2013 LRA, 46.4% of total general acute care inpatients do not originate in Mecklenburg County. Therefore, it is reasonable to assume that 25% to 50% of all medicine patients treated by these four medical groups and included in the DRG subset being shifted, are from other counties and sought care at specifically at CMC for its tertiary level services. Thus, it is not appropriate to shift 90% of them from CMC to CMC-Mercy. CMC did not provide sufficient information to determine that the 90% shift is reasonable or supported.

Assuming that 90% will shift to CMC-Mercy is unreasonable. CMC-Mercy did not look at the underlying remaining zip codes to determine what portion if any of the 22,696 patient days estimated on page 70 of the CMC-Mercy CON Application would be appropriate to shift to CMC-Pineville. Based upon the projections included for CMC-Pineville in **Exhibit 20** starting on page 353 of the CMC-Mercy CON Application, CMC-Pineville will have 82 available acute care beds in CY 2014 (206 total beds less 124 ADC = 82 available (or unoccupied) acute care beds).

---

<sup>9</sup><http://www.carolinashealthcare.org/cmc>

Based upon Calendar Year Truven data for the DRG subset identified in **Exhibit 24** page 380 of the CMC-Mercy CON Application, included in **Attachment 9** to these Comments, over 25% of the total discharges and patient days for the identified DRGs are from the CMC-Pineville Zip Code Service Area identified in CON Project I.D.F-7979-07 (**Attachment 2**) and on page 354 in the CMC-Mercy CON Application.

**Carolinas Medical Center**  
**Calendar Year Volume for Exhibit 23 DRG Subset**  
**Volume Appropriate to Shift to CMC-Pineville**

	CY 2010	CY 2011	CY 2012	CY 2013

Source: **Attachment 9**

In addition, utilizing the same data included in **Attachment 9** to these Comments, approximately 30% of the total discharges and patient days for the identified DRGs are from the outside of Mecklenburg County and the CMC-Pineville Zip Code Service Area as shown in the following table. In addition, this patient population has a higher ALOS indicating a higher acuity level which may have been the reason the patient was admitted to CMC-Main in Charlotte in the first place.

**Carolinas Medical Center**  
**Calendar Year Volume Exhibit 24 DRG Subset**  
**Volume for Other Counties – In-Migration**

	CY 2010	CY 2011	CY 2012	CY 2013

Days	39,575	40,694	40,694	20,543
ALOS	4.86	4.78	4.59	4.78
<b>Percent Other Counties<sup>10</sup> of Total CMC DRG Subset Patient Days</b>	<b>30.9%</b>	<b>27.7%</b>	<b>29.8%</b>	<b>30.8%</b>

Source: **Attachment 9**

---

<sup>10</sup>This represents all other patients that are not in Mecklenburg County or in York County, South Carolina which is in the CMC-Pineville Zip Service Area (which has already been accounted for in the CMC-Pineville zip code analysis above).

It should be noted that the 22,696 patient days identified on page 70 of the CMC-Mercy CON Application, which are admissions by the four medical groups, is a subset of this volume. All four medical groups have office locations in Pineville and throughout Mecklenburg County as reflected in the discussion of these groups on pages 51 through 54 of the CMC-Mercy CON Application. All four medical groups treat patients at CMC-Main, CMC-Mercy, CMC-University and CMC-Pineville according to each of the respective websites for these physician groups. Therefore, it is reasonable to assume that zip code patient origin for these four groups is comparable to that of CMC for the DRG subset identified in **Exhibit 24** of the CMC-Mercy CON Application

Therefore, over 50% of the 22,696 patient days on page 70 for the identified DRG subset potentially would be better served at CMC or CMC-Pineville instead of CMC-Mercy or CMC-University. Assuming that 90% will shift to CMC-Mercy is unreasonable and unsupported.

#### **CMC-Mercy Projected Patient Days Patient Days Shifted Adjusted**

<b>CON Projections</b>							
<b>CMC Projections Step 5 - Page 73</b>							
	<b>2013 Volume (Less Volume Shifted to CMC-University)</b>	<b>90%</b>	<b>Growth Rate</b>	<b>2017</b>			
Total	19,866	17,879	1.55%	19,046			
<b>Alternative 1.</b>							
<b>CMC-Mercy Projections Step 5 - 50% Shift</b>							
	<b>2013 Volume (Less Volume Shifted to CMC-University)</b>	<b>50%</b>	<b>Growth Rate</b>	<b>2017</b>	<b>Difference PY 3</b>	<b>ADC</b>	<b>Beds</b>
Total	19,866	9,933	1.55%	10,725	-8,322	-22.8	-31.93

Source: **Attachment 4**

Decreasing the volume of patients shifted to only 50%, which is consistent with the previous discussion, represents a decrease in the number of needed acute care beds at CMC-Mercy by 32 acute care beds.

- **The CMC-Mercy Need Method Step 6 Projected Acute Care Days at CMC-Mercy (CON App pages 74-75)**

As discussed above, CMC-Mercy utilized an unreasonable growth rate and an unreasonable shift in patient days from CMC to CMC-Mercy. The following table illustrates the combined impact of overstating these two variables in the methodology. The following table does not take into consideration the high growth rate used to increase CMC patient days being shifted.

**Projected Days of Care at CMC-Mercy**  
**Project Year Three**

Facility	2017 Projected Patient Days	Impact of Overstated Growth Rate - Step 2. Alternative 1.	Impact of Overstated CMC Shift - Step 5.	Adjusted 2017 Projected Patient Days	ADC	Proposed/Approved/Licensed Acute Care Beds	Occupancy Level	Target Occupancy	Hits Target
CMC-Mercy	51,974	-5,224	-3,121	43,630	119.5	196	61.0%	71.4%	No

Source: **Attachment 7**

As shown in the previous table, CMC-Mercy fails to achieve the SMFP and CON Regulatory target occupancy level of 71.4% when growth rate assumptions and patient shift assumptions are adjust to a reasonable level.

For the reasons set forth above, CMC-Mercy fails to document a need by the identified population for an additional 34 acute care beds proposed, and has not demonstrated conformity with CON Review Criterion (3).

## **E. Physician Support Letters**

CMC-Mercy identifies four physician groups that will shift patient volumes from CMC to CMC-Mercy on pages 51 through 54.

Carolinas Hospitalist Group. This is the hospitalist group that covers all four CMC hospitals. The Carolinas Hospitalist Group website identifies 85 physicians in the group; 11 are identified as associated with CMC-Mercy; 15 are identified as associated with CMC-Pineville; and, 8 are identified as associated with CMC-University. Hospitalists admit patients referred to the hospital by other physicians in the market. They do not typically have an identified patient base that considers them to be their primary care or specialty physician. Support from the referring physician base is essential in shifting inpatient volume through the hospitalists. Therefore, since nearly 18% of these physicians practice in Pineville<sup>11</sup>, more than at CMC-Mercy or CMC-University, CMC-Mercy should have included a shift of additional medicine patients from the DRG subset to CMC-Pineville in Step 5 of the CMC-Mercy CON Application Need Method.

Charlotte Medical Clinic: This is one of the largest internal medicine and multi-specialty groups in the region with five locations in the Charlotte area (the main office is at CMC's Medical Center Plaza and the remaining four locations are in the Arboretum, Mint Hill, Pineville, and Waxhaw areas. Therefore, CMC-Mercy should have included a shift of additional medicine patients from the DRG subset to CMC-Pineville in Step 5 of the CMC-Mercy CON Application Need Method.

Sanger Heart & Vascular Institute (SHVI). This is one of the largest academic and research affiliated heart centers in the country with 132 providers. SHVI has provided world-class heart care for more than half a century. In Mecklenburg County, SHVI has locations near CMC, CMC-Pineville, CMC-Mercy, and CNC-University, and others. However, it is surprising that CMC-

---

<sup>11</sup>Calculation: 18% = 15 CHG Pineville Physicians/85 Total CHG Physicians

Mercy would request support from SHVI for the proposed project since the DRG subset that is to be shifted to CMC-Mercy does not include any of the Medical Diagnostic Categories routinely associated with medical cardiology or vascular services and total patients days in the DRG subset from SHVI physicians was only 802 patient days or 189 admissions, less than one patient per day. The MDCs included in the DRG subset in **Exhibit 24** are reflected below.

- MDC 4: Diseases and disorders of the respiratory system
- MDC 6: Diseases and disorders of the digestive system
- MDC 7: Diseases and disorders of the hepatobiliary system and pancreas
- MDC 9: Diseases and disorders of the skin, subcutaneous tissue and breast
- MDC 10: Endocrine, nutritional and metabolic diseases and disorders
- MDC 11: Diseases and disorders of the kidney and urinary tract
- MDC18: Infectious and parasitic diseases
- MDC 21: Injury, poisoning and toxic effects of drugs
- MDC 25: Human immunodeficiency virus infections

Furthermore, since cardiology services at CMC-Mercy were decreased significantly at CMC-Mercy when three cardiac catheterization laboratories and open heart services were shifted to CMC-Pineville, SHVI patients now are more likely to go to CMC or CMC-Pineville.

Therefore, while these physicians do support the project, it appears that they are not in a position to significantly influence the proposed shift of medical patients from the above MDCs from CMC to CMC-Mercy. In addition, since many of these physicians practice in Pineville, CMC-Mercy should have included a shift of additional medicine patients from the DRG subset to CMC-Pineville in Step 5 of the CMC-Mercy CON Application Need Method.

Mecklenburg Medical Group (MMG). This group has been committed to providing excellent and innovative patient care for over 75 years in North and South Carolina. The practice's mission is to promote the health of its patients while providing leadership and service to the communities it serves. MMG provides care at 10 locations in the Charlotte Metro area and in surrounding neighborhoods including Pineville. The practice consists of over 90 physicians trained in ten medical specialties. Since some of these physicians practice in Pineville, CMC-Mercy should have included a shift of additional medicine patients from the DRG subset to CMC-Pineville in Step 5 of the CMC-Mercy CON Application Need Method.

Also, on page 46, CMC-Mercy states that, “*Through its projects, CHS has undertaken steps to improve utilization at underutilized facilities and/or relocate underutilized beds to other facilities, while at the same time shifting appropriate inpatient volume from CMC downtown, out to its community hospitals.*” If this is the goal of CHS, then CMC-Mercy should have also shifted additional medical volume from CMC to CMC-Pineville, to better utilize the 82 underutilized acute care beds at CMC-Pineville. As reflected above, all four of the physician groups also practice in Pineville. CMC-Mercy should have included a shift of additional medicine patients from the DRG subset to CMC-Pineville which would have decreased the 90% shift proposed by CMC-Mercy in Step 5 of the CMC-Mercy CON Application Need Method.

## **F. CMC-Mercy is Non-Conforming to the CON Acute Care Services Criteria and Standards**

CMC-Mercy is non-conforming to the CON Acute Care Services Criteria and Standards at 10A NCAC 14C .3800. As discussed in detail in Section IV of these comments below. CMC-Mercy failed to provide reasonable and reliable information regarding projected patient days by county for CMC-Mercy for the first three project years.

In addition, CMC-Mercy failed to document the need for adding the proposed 34 additional acute care beds to the CHS inpatient system in Mecklenburg County. CMC-Mercy projected patient days were overstated as discussed in Section III.B of these comments above. The impact of overstating the growth rate is reflected in the following table in Column C. In addition, the impact of overstating the percent shift from CMC to CMC-Mercy, as reflected in **Attachment 4**, is included in Column D below.

CMC-University made similar egregious assumptions associated with projected growth in the concurrent application submitted by CMC-University for six additional acute care beds. The impact of overstating the growth rate for CMC-University is discussed in **Attachment 5** and also is reflected in Column C below.

Finally, the CON Application for 17 additional acute care beds submitted by NHHMC included projections for Novant Health Matthews Medical Center. Novant Health Matthews Medical Center submitted a CON Application for expansion of Women's Services concurrently with the NHHMC, CMC-University and CMC-University CON Applications. Since the Novant Health Matthews Medical Center is relocating existing acute care beds from within the Novant Health Mecklenburg County existing acute care bed inventory, it is not included in this competitive review. However, assumptions associated with the increased volume at Novant Health Matthews Medical Center will result in decreased patient days at CMC-Pineville. As discussed on page 26 of the NHHMC CON Application; Carmel OB-GYN will be switching 100% of its inpatient volume to Novant Health Matthews Medical Center in October 2013. The impact of this shift is reflected in the following table in Column E and is included in **Attachment 6**, which is Table 29 from **Exhibit 4** of the Novant Health Matthews Medical Center CON Application, Project I.D. # F-10214-13.

The following table combines the impact of these adjustments.

**CHS System Utilization in Mecklenburg County**  
**Project Year Three**

Facility	2017 Projected Patient Days	Impact of Overstated Growth Rate – Step 2. Alternative 1.	Impact of Overstated CMC Shift - Step 5. Alternative 1. 75% Shift	Impact of OB Shift to Matthews	Adjusted 2017 Projected Patient Days	ADC	Proposed/Approved/Licensed Acute Care Beds	Occupancy Level	CON Rules Target Occupancy	Hits Target
A	B	C	D	E	F	G	H	I	J	K
CMC	246,337				246,337	674.9	814	82.9%	75.2%	Yes
CMC-Mercy	51,974	-5,224	-3,121		43,630	119.5	196	61.0%	71.4%	No
CMC-Pineville	45,092			-2,650	42,442	116.3	206	56.4%	71.4%	No
CMC-University	25,364	-1,129			24,235	66.4	100	66.4%	66.7%	No
Combined	368,767				356,643	977.1	1316	74.2%	75.2%	No

Source: **Attachment 7**

As shown in the previous table, the Adjusted 2017 Projected Patient Days for CM, CMC-Mercy, CMC-Pineville, and CMC-University combined fails to achieve the required 75.2% target occupancy specified by this rule. The above table reflects a 75% shift when data presented above supports and even lower 50% shift. The above table does not adjust for the high growth rate used to increase the days shifted from CMC to CMC-Mercy and CMC-University, nor does it adjust the 90% shift to CMC-University, which also is overstated. Therefore, the impact of the overstated and unsupported assumptions utilized by CMC-Mercy is actually greater than that reflected above.

For the reasons set forth above, CMC-Mercy fails to document a need by the identified population for the 34 additional acute care beds proposed, and has not demonstrated conformity with CON Review Criterion (3).

#### **G.S. 131E-183 (4)**

*Where alternative methods of meeting the needs for the proposed project exist, the applicant shall demonstrate that the least costly or most effective alternative has been proposed.*

On pages 86 to 88 of the CMC-Mercy CON Application, CMC-Mercy discusses adding beds to other CHS campuses as an alternative. However, CMC-Mercy does not discuss shifting any of the 22,696 DRG subset patient days identified on page 70 (of the CMC-Mercy CON Application) to the underutilized beds at CMC-Pineville. In **Exhibit 20** of the CMC-Mercy CON Application on page 356, CMC-Pineville is projected to operate at only 60.0% in 2017, Project Year 3. This means that on any given day at CMC-Pineville an average of 82 beds are projected to be empty.

As discussed in Criterion (3) critique in these comments and reflected in **Attachment 9**, over 25% of patient days at CMC in the identified DRG subset originated from the zip codes in the CMC-Pineville Service Area. If 25% of the proposed 22,696 patient days identified on page 70 are from the CMC-Pineville Service Area, then 5,674 are more appropriately shifted to CMC-

Pineville than to CMC-Mercy and could be used to fill up to 15<sup>12</sup> of the available 82 surplus beds at CMC-Pineville.

As discussed in the context of CON Review Criterion (3), CMC-Mercy failed to demonstrate a need of the identified population for an additional 34 acute care beds proposed at CMC-Mercy.

Consequently, CMC-Mercy fails to demonstrate that it is the least costly or most effective alternative proposed, which demonstrates non-conformity with CON Review Criteria (4).

### **G.S. 131E-183 (5)**

*Financial and operational projections for the project shall demonstrate the availability of funds for capital and operating needs as well as the immediate and long-term financial feasibility of the proposal, based upon reasonable projections of the costs of and charges for providing health services by the person proposing the service.*

As discussed in the Criterion (3) section of these comments above, the future projected days for CMC-Mercy to justify the need for 34 new acute beds are overstated, unsupported, and unreasonable and thus non-conforming with Criterion (3). Thus, any CMC-Mercy CON ProForma Financial Projections based on these unsupported and unreasonable patient day projections are likewise non-conforming with Criterion (5).

### **G.S. 131E-183 (6)**

*The applicant shall demonstrate that the proposed project will not result in unnecessary duplication of existing or approved health service capabilities or facilities.*

As discussed in the context of CON Review Criterion (3) in these comments, CMC-Mercy fails to demonstrate a need by the identified population for an additional 34 acute care beds proposed at CMC-Mercy. Consequently, CMC-Mercy failed to demonstrate that the proposed project will not result in unnecessary duplication of existing or approved health service capabilities or facilities.

### **G.S. 131E-183 (18a)**

*The applicant shall demonstrate the expected effects of the proposed services on competition in the proposed service area, including how any enhanced competition will have a positive impact upon the cost effectiveness, quality, and access to the services proposed; and in the case of applications for services where competition between providers will not have a favorable impact on cost effectiveness, quality, and access to the services proposed, the applicant shall demonstrate that its application is for a service on which competition will not have a favorable impact.*

---

<sup>12</sup>Calculation: 15 = 5,674 annual patient days/365 days per year

As discussed above, CMC-Mercy fails to demonstrate conformity with CON Review Criteria (1), (3), (4), (5), and (6). Consequently, CMC-Mercy fails to demonstrate that its CON Application is non-conforming to CON Review Criterion (18a).

## **IV. North Carolina Criteria and Standards for Acute Care Beds**

### **10A NCAC 14C .3803 PERFORMANCE STANDARDS**

- (a) *An applicant proposing to develop new acute care beds shall demonstrate that the projected average daily census (ADC) of the total number of licensed acute care beds proposed to be licensed within the service area, under common ownership with the applicant, divided by the total number of those licensed acute care beds is reasonably projected to be at least 66.7 percent when the projected ADC is less than 100 patients, 71.4 percent when the projected ADC is 100 to 200 patients, and 75.2 percent when the projected ADC is greater than 200 patients, in the third operating year following completion of the proposed project or in the year for which the need determination is identified in the State Medical Facilities Plan, whichever is later.*

CMC-Mercy projected patient days were overstated as discussed in Section III.B of these comments. The impact of overstating the growth rate discussed above is reflected in Column C below. The impact of overstating the percent shift to CMC-Mercy is reflected in Column D below.

CMC-University made similar aggressive and unrealistic assumptions associated with projected growth in the concurrent application submitted by CMC-University for 6 additional acute care beds. The impact of overstating the growth rate for CMC-University is reflected in **Attachment 5** and is included in Column C below.

The CON Application for 17 additional acute care beds submitted by NHHMC included projections for NH Matthews Medical Center. NH Matthews Medical Center submitted a CON Application for expansion of Women's Services concurrently with the NHHMC, CMC-Mercy and CMC-University CON Applications. Since the NH Matthews Medical Center is relocating existing acute care beds, it is not included in this competitive review. However, assumptions associated with the increased volume at NH Matthews Medical Center will result in decreased patient days at CMC-Pineville. As discussed on page 26 of the NHHMC CON Application; Carmel OB-GYN will be switching 100% of its inpatient volume to NH Matthews Medical Center on October 1, 2013. The impact of this shift is reflected in the following table in Column E and is included in **Attachment 6**, which is **Table 29** from **Exhibit 4** of the NH Matthews Medical Center CON Application, Project I.D. # F-10214-13.

The following table combines the impact of these adjustments.

**CHS System Utilization in Mecklenburg County**  
**Project Year Three**

Facility	2017 Projected Patient Days	Impact of Overstated Growth Rate – Step 2. Alternative 1.	Impact of Overstated CMC Shift - Step 5. Alternative 1. 75% Shift	Impact of OB Shift to Matthews	Adjusted 2017 Projected Patient Days	ADC	Proposed/Approved/Licensed Acute Care Beds	Occupancy Level	CON Rules Target Occupancy	Hits Target
A	B	C	D	E	F	G	H	I	J	K
CMC	246,337				246,337	674.9	814	82.9%	75.2%	Yes
CMC-Mercy	51,974	-5,224	-3,121		43,630	119.5	196	61.0%	71.4%	No
CMC-Pineville	45,092			-2,650	42,442	116.3	206	56.4%	71.4%	No
CMC-University	25,364	-1,129			24,235	66.4	100	66.4%	66.7%	No
Combined	368,767				356,643	977.1	1316	74.2%	75.2%	No

Source: **Attachment 7**

As shown in the previous table, the Adjusted 2017 Projected Patient Days for CMC-Main, CMC-Mercy, CMC-Pineville, and CMC-University combined fails to achieve the required 75.2% target occupancy specified by this rule. The above table reflects a 75% shift when data presented above supports and even lower 50% shift. The above table does not adjust for the high growth rate used to increase the days shifted from CMC to CMC-Mercy and CMC-University, nor does it adjust the 90% shift to CMC-University, which also is overstated. Therefore, the impact of the overstated and unsupported assumptions utilized by CMC-Mercy is actually greater than that reflected above.

CMC-Mercy is non-conforming with this Rule and its proposed addition of 34 acute beds at CMC-Mercy cannot be approved.

- (b) *An applicant proposing to develop new acute care beds shall provide all assumptions and data used to develop the projections required in this rule and demonstrate that they support the projected inpatient utilization and average daily census.*

As documented in the context of CON Review Criterion (3), CMC-Mercy's assumptions and methodology are unreasonable, unsupported, and flawed, resulting in overstated projections. Those assumptions and methodology do not support the development of 34 acute care beds at CMC-Mercy.

CMC-Mercy is non-conforming with this Rule and its proposed addition of 34 acute beds at CMC-Mercy cannot be approved.

For the reasons set forth above, CMC-Mercy does not demonstrate conformity with North Carolina Criteria and Standards for Acute Care Beds.

## **V. Comparative Analysis**

### **A. Demonstration of Need**

The three CON applicants proposed a total of 57 new acute care beds. It is not possible for the Agency to approve all three CON applications, unless the Agency approves fewer acute care beds than requested by one or more CON applicant(s).

Based upon the institution specific historical inpatient day compound annual growth rates (CAGRs) for each of the three hospitals applying for additional acute care beds, Novant Health Huntersville Medical Center (NHHMC) has the greatest need for additional acute care beds as shown in the following table. The four year timeframe utilized in the following calculations was based upon the historical data timeframe provided in the CMC-University CON Application. Historical patient days from annual SMFPs were utilized for FFYs 2010 through 2012. Estimated FFY 2013 data for CMC-Mercy and CMC-University was calculated from CY data provided in their respective CON Applications. Estimated FFY 2013 data for NHHMC was taken from the NHHMC CON Application. See the table below.

**Projected Acute Care Bed Need**  
**Applicants for Additional Acute Care Beds in Mecklenburg County**

	2012 SMFP	2013 SMFP	2014 SMFP	CON Applications	CAGR 2010- 2013	Projected

Note: CMC-Mercy and CMC-University FFY 2013 calculated using CY data presented in the CON Applications (pages 60 and 59 respectively).

Source: SMFPs for FFY 2010-2012 for CMC-University and NHHMC; LRAs for FFY 2010-2012 for CMC-Mercy; CON Applications

As shown in the previous table, of the three applicants, NHHMC has the greatest need for additional acute care beds, with a need for 35 additional acute care beds by FFY 2018. NHHMC has applied for only 17 of the available SMFP beds. The other two applicants, CMC-Mercy and CMC-University both project a continued surplus of acute care beds.

In addition, using the annual growth rate specified in the *2013 SMFP* and in the *Proposed 2014 SMFP*, NHHMC is the only one of the three applicants that has an identified need for additional acute care beds as shown in the following table.

**SMFP Acute Care Bed Need**  
**Mecklenburg County – County Multiplier**

2013 SMFP – Table 5-A								
Hospital	Licensed Beds	Truven Data	County Multiplier	Projected Days	ADC	Target	Beds Needed	Surplus/Deficit
		<b>2011</b>		<b>2015</b>				
CMC-Mercy (CY data p 60)	168	37,160	1.0157	39,549	108.4	71.40%	152	-16
CMC-University	96	20,318	1.0157	21,624	59.24	66.70%	89	-7
NH Huntersville	75	19,540	1.0157	20,796	56.98	66.70%	85	10
Proposed 2014 SMFP – Table 5-A								
Hospital	Licensed Beds	Truven Data	County Multiplier	Projected Days	ADC	Target	Beds Needed	Surplus/Deficit
		<b>2012</b>		<b>2016</b>				
CMC-Mercy (CY data p 60)	162	31,660	1.0057	32,388	88.7	71.40%	124	-38
CMC-University	96	20,575	1.0057	21,048	57.67	66.70%	86	-10
NH Huntersville	75	19,893	1.0057	20,350	55.75	66.70%	84	9

Only NHHMC has continuously exceeded its target occupancy rate, as defined in the CON New Acute Bed Regulations, since FFY 2010. Thus, NHHMC is superior in terms of demonstration of need for new acute beds. The Agency should award 17 new acute beds to NHHMC and deny the projects of CMC-University and CMC-Mercy for new acute beds.

### **B. Access for Medically Underserved Populations**

Based on the applicant's responses to CON Application Question VI.15(a), regarding payor mix in Project Year 2, a comparison of service to medically underserved populations (Medicare, Medicaid, and Charity Care) is set forth below:

	Medicare	Medicaid	Charity Care/ Self Pay
NH Huntersville Medical Center*	50.05%	9.01%	3.64%
CMC-Mercy**	58.7%	10.2%	5.2%

\*NHHMC Component Payor Mix based on NHHMC Acute Inpatient Beds Only-Inpatient Days at CON Application page 110

\*\*\*CMC-Mercy Component Payor Mix based on Adult Medical/Surgical Inpatient Days at CON Application page 119

CMC-Mercy's payor mix assumptions provided in response to CON Application Question VI.15(b) at page 119 state that "*the projected adult medical/surgical payor mix is based on CMC-Mercy's Calendar Year CY 2012 payor mix.*" The CMC-Mercy payor mix information provided in response to CON Application Question VI.15(a) is markedly different than the "Inpatient Days of Care" for CMC-Mercy included in its 2013 LRA, on page 177 of the CMC-Mercy CON Application. See the table below.

**Payor Mix Information for CMC-University**  
**Comparison of LRA & CON Application Inpatient Days Payor Mix**

	<b>Medicare</b>	<b>Medicaid</b>	<b>Charity Care/ Self Pay</b>
CMC-Mercy 2013 LRA data	59.9%	10.3%	4.6%
CMC-Mercy CON App Data Q.VI.15(a) (pg119)	58.7%	10.2%	5.2%

As the above table illustrates, in its 2013 LRA CMC-Mercy reported a lower percentage of Medicaid (4.6%) than in the Oct. 2013 CON Application (5.2%). In addition, in its 2013 LRA CMC-Mercy reported a higher percentage of Charity Care/Self Pay (10.3%) than in the Oct. 2013 CON Application (10.2%). Also, in its 2013 LRA CMC-Mercy reported a higher percentage of Medicare (59.9%) than in the Oct. 2013 CON Application (58.7%). Also, in its response to CON Application VI.15(b) which asks the applicant “*to provide all assumptions and the specific methodology used to determine the projected payor mix,*” CMC-University indicates that its payor mix in response to CON Application Question VI.15.(a) is “*based on CMC-Mercy’s CY 2012 payor mix.*” The CMC-Mercy LRA Payor Mix for Inpatient Days of Care is based on FFY 2012, nine months of which overlap with CY 2012. Thus, CMC-mercy fails to address the differences between the LRA inpatient days payor mix for FFY 2012 and the CON Application CY 2012 inpatient days payor mix:

- The CMC-Mercy CON Application Medicaid payor mix for inpatient days is lower by 0.1 basis points than the LRA Medicaid payor mix for inpatient days
- The CMC-Mercy CON Application Charity Care/Self Pay payor mix for inpatient days is higher by 0.6 basis points than the LRA Medicaid payor mix for inpatient days
- The CMC-Mercy CON Application Medicare payor mix for inpatient days is lower by 1.2 basis points than the LRA Medicare payor mix for inpatient days

CMC-Mercy fails to address why these categories of payor mix for Medically Underserved Populations are so different, although they are for a substantially similar timeframe at CMC-Mercy. Thus, it is not clear that a valid comparison of CMC-Mercy and NHHMC payor mix information can be undertaken.

## C. Cost Per Patient Day or Per Patient Admission

- *Total Operating Cost Per Adjusted Patient Day*<sup>13</sup>

Based on information provided in each applicant's response to CON Application Question X.3, below is a comparison of each applicant's total operating cost for adjusted patient day.

### Total Operating Cost Per Adjusted Inpatient Day

Facility	PY1	PY2	PY3
NH Huntersville Medical Center*	\$2173	\$2227	\$2283
CMC-University**	\$1622	\$1638	\$1640
CMC-Mercy***	\$2503	\$2401	\$2297

\*NHHMC CON Application page 141

\*\*CMC-University CON Application page 136

\*\*\*CMC-Mercy CON Application page 138

NOTE: PY1 for NHHMC is CY 2017 and PY1 for CMC-Mercy is CY 2015.

However, since this cost comparison includes a blending of inpatient days and outpatient cases, it is not a useful point of comparison relative to the true cost per inpatient day for the competing applicants, NHHMC and CMC-Mercy.

This table shows that NHHMC's Total Operating Cost per Adjusted Patient Day is the 2<sup>nd</sup> lowest of the three competing applicants across the first three Project Years. However, since this cost comparison includes a blending of inpatient days and outpatient cases to derive the Adjusted Patient Day, it is not necessarily a useful point of comparison relative to the true cost per inpatient day for the competing applicants, NHHMC, CMC-University, and CMC-Mercy.

In addition, if the Total Operating Cost Per Adjusted Patient Day is compared for the same 12-month Calendar Year (CY), then NHHMC has the lowest Total Operating Cost Per Adjusted Patient Day. The three applicants overlap on one of the three project years. CY 2017 (Jan. 1 – Dec. 31, 2017). CY 2017 is Project Year 1 for Novant Health Huntersville Medical Center and CY 2017 is Project Year 3 for CMC-Mercy and CMC-University. The table below shows the comparison of all three competing applicants' CY 2017 Total Operating Cost Per Adjusted Patient Day:

Facility	CY 2017
NH Huntersville Medical Center*	\$2173
CMC-University**	\$1640
CMC-Mercy***	\$2297

---

<sup>13</sup>Note: based on the format used in the state's CON Application form for Question X.3, the term "Adjusted Patient Day" includes inpatients and outpatients served at the hospital.

NHHMC's CY 2017 Total Operating Cost per Adjusted Patient Day is less than that of CMC-Mercy by \$124. NHHMC's 2017 Total Operating Cost per Adjusted Patient Day appears to be higher than that of CMC-University; however, as discussed Novant Health's comments in Section V.D (pages 30-31) on the CMC-University project, CMC-University's 2017 Total Operating Cost per Adjusted Patient Day may only include the Room and Board costs for the additional beds on the 6<sup>th</sup> Floor at CMC-University and exclude the other costs of inpatient care such as expenses related to other aspects of inpatient care like salaries for lab, imaging, pharmacy, dietary, housekeeping, and certain nursing staff, etc. Thus, the comparison of CMC-University's and NHHMC's Total Operating Cost per Adjusted Patient Day may not be an apples to apples comparison. Thus, this would negate a valid comparison of these costs for the three competing applicants.

#### **D. Gross Revenue/Gross Charges Per Adjusted Patient Day**

Based on information provided in each applicant's response to CON Application Question X.3, below is a comparison of each applicant's Gross Revenue/Gross Charge per adjusted patient day.

Facility	PY1	PY2	PY3
NH Huntersville Medical Center*	\$8230	\$8559	\$8901
CMC-University**	\$8716	\$9229	\$9673
CMC-Mercy***	\$9820	\$9941	\$9946

\*NHHMC CON Application page 141

\*\*CMC-University CON Application page 136

\*\*\*CMC-Mercy CON Application page 138

*NOTE: PY1 for NHHMC is CY 2017 and PY1 for CMC-University is CY 2015.*

In Project Year 1, NHHMC's Gross Charge per Adjusted Patient Day is \$1590 and 19% less than CMC-Mercy's Gross Charge per Adjusted Patient Day. In Project Year 2, NHHMC's Gross Charge per Adjusted Patient Day is \$1382 and 16.2% less than CMC-Mercy's Gross Charge per Adjusted Patient Day. In Project Year 3, NHHMC's Gross Charge per Adjusted Patient Day is \$1045 and 11.7% less than CMC-Mercy's Gross Charge per Adjusted Patient Day.

In addition, if one lines up and compares the NHHMC and CMC-Mercy Gross Charge per Adjusted Patient Day for the same time period of CY 2017, which is PY1 for NHHMC and PY3 for CMC-Mercy, this comparison also shows that NHHMC's Gross Charge per Adjusted Patient Day at \$8230 is less than CMC-Mercy's at \$9946. The difference is that NHHMC's CY 2017 Gross Charge per Adjusted Patient Day is \$1716 and 15% lower than that of CMC-Mercy during the same projected 12-month period (CY 2017).

NHHMC, across all three project years and in a head to head CY 2017 comparison, has the lowest Gross Revenue/Gross Charge Per Adjusted Inpatient Day. Thus, NHHMC is the superior applicant in terms of Gross Revenue/Gross Charge Per Adjusted Patient Day.

## **E. Physician Support**

- *Novant Health Huntersville Medical Center Physician Support Letters*

In contrast to CMC-Mercy's physician support letters, NHHMC's physician letters of support from medical and surgical physicians with offices located throughout the defined NHHMC inpatient service area. See NHHMC CON Application **Exhibit 3**, at pages 207-244. In addition, the physician letters of support for the NHHMC inpatient bed expansion include letters of support from NHHMC Medical Staff Leadership, including the Chief and Assistant Chief of the NHHMC Medical Staff, both of whom are board-certified and actively practicing members of the medical staff. The referring physician letters of support also indicate that these physicians (cardiology, family medicine, emergency medicine, hospitalist medicine, obstetrics/gynecology, medical oncology, podiatric medicine) do and will continue to refer patients to NHHMC for inpatient admissions. Moreover, the primary care referring physician support letters (NHHMC CON Application pages 234-244) are signed by referring physicians with offices located throughout the NHHMC inpatient service area such as Huntersville, Cornelius, Mountain Island Lake, northern Charlotte//Highland Creek, Charlotte/University area in Mecklenburg County; Concord/Afton in Cabarrus County; Mooresville in Iredell County; and Denver in Lincoln County.

Finally the specialist and surgeon support letters indicate that these physicians and surgeons have existing relationships with patients in the service area, will continue to perform inpatient surgery and provide specialty consultations for NHHMC inpatients. These physicians and surgeons are all active members in good standing on the NHHMC medical staff and include orthopedics, anesthesiology, pathology, radiology, cardiology, gastroenterology, general surgery, nephrology, obstetrics/gynecology, neurology, medical oncology, ophthalmology, oral surgery, otolaryngology, podiatry, and urology. NHHMC's CON Application includes letters of support signed by 37 unique physicians in at least 18 medical and surgical specialties including primary care. In addition, these letters of support represent physicians practicing both as independent physician groups and as groups that are part of the Novant Health Medical Group.

- *CMC-Mercy Physician Support Letters*

CMC-Mercy's CON Application at **Exhibit 39** (pages 614-695) includes physician letters of support from mainly four types of physicians practicing with four physician groups: Hospitalist Medicine (~26 letters-Carolinas Hospitalist Group-employed physicians), primary care physicians (3 signed letters from Charlotte Medical Clinic), cardiac and vascular physicians/surgeons (41 signed physician/surgeon support letters from Sanger Heart & Vascular Institute), additional specialty physicians (4 signed letters from Mecklenburg Medical Group), 1 signed letter from the CHS Chair of Internal Medicine, 1 signed letter from a CMC Emergency Department Faculty member, 1 signed letter from a member of the CMC Intensivist Faculty, and 1 signed letter from the System Medical Director for Emergency Medicine Physicians. These CMC-Mercy physician support letters are virtually identical to the CMC-University physician support letters in terms of the physicians who signed the letters and the narrative included in the letters of support. There are ~78 Physician letters of support included in the CMC-Mercy CON Application.

As discussed earlier in these comments, it is unclear why the vascular and cardiac physician support letters are included with the CMC-Mercy CON Application. It is surprising that CMC-Mercy would request support from SHVI for the proposed project since the DRG subset that is to be shifted<sup>14</sup> to CMC-Mercy does not include any of the Medical Diagnostic Categories<sup>15</sup> routinely associated with medical cardiology or vascular services. Total patients days in the DRG subset from SHVI physicians was only 802 patient days or 189 admissions<sup>16</sup> (based upon a 4.2 ALOS calculated from total patient days and total admissions page 75 of the CMC-Mercy<sup>17</sup> CON Application), less than one patient per day.

It is unclear whether the 41 SVHI physician support letters, which represent 80% of the 51 signed physician support letters, pertain to patients that would actually be clinically appropriate to be shifted to CMC-Mercy. The list of DRGs (**Exhibit 24**) to be shifted to CMC-Mercy does not include any MDCs routinely associated with medical cardiology or vascular services.

Moreover, CMC's CON legal counsel has argued in the past the letters of support signed by physicians employed by the health system or part of the health system's medical group are somehow of lesser import than letters of support signed by independent physicians. While Novant Health does not agree with this characterization, it is interesting to note that the vast majority of the physician letters of support for the CMC-Mercy project are signed by physicians employed by CHS or serving as CHS faculty.

## **F. Conformity with Applicable CON Regulations**

- *.3803(c): Required Health System Target Occupancy Rate for Entire Commonly Owned Hospital Bed Inventory in the Service Area*

### The state's CON Regulations at **10A NCAC 14C .3803 (C) PERFORMANCE**

**STANDARDS** require that the applicant with hospitals under common ownership in the service area demonstrate all the beds at the hospitals under common ownership achieve a specified target occupancy rate (75.2% for CHS hospitals) for all system acute inpatient beds by the end of Project Year 3.

CMC-Mercy projected patient days were overstated as discussed in Section III.B of these comments. The impact of overstating the growth rate discussed above is reflected in Column C below. The impact of overstating the percent shift to CMC-Mercy is reflected in Column D below and in **Attachment 4**.

---

<sup>14</sup>The DRG subset to be shifted is defined in Exhibit 24 of the CMC-Mercy CON Application.

<sup>15</sup> See CMC-Mercy CON Application Exhibit 24 at page 380.

<sup>16</sup>See the CMC-Mercy CON Application at page 70 for the estimate of 802 days associated with SHVI admissions to CMC-Main for CY 2013 annualized. Calculation of patients per day < 1.0 = 189 patients/365 days per year = 0.52 patients per day.

<sup>17</sup>Since a larger shift in patient days, 87.5%, was projected for CMC-Mercy, the CMC-Mercy ALOS was used here. ALOS for CMC-University was 3.6 days based upon total patient days and total admission on page 76 of the CMC-University CON Application. The same DRG patient base is being shifted from CMC to CMC-University and CMC-Mercy, therefore there is no reason that the ALOS should be different.

CMC-University made similar aggressive and unrealistic assumptions associated with projected growth in the concurrent application submitted by CMC-University for 6 additional acute care beds. The impact of overstating the growth rate for CMC-University is reflected in **Attachment 5** and is included in Column C below.

The CON Application for 17 additional acute care beds submitted by NHHMC included projections for NH Matthews Medical Center. NH Matthews Medical Center submitted a CON Application for expansion of Women's Services concurrently with the NHHMC, CMC-Mercy and CMC-University CON Applications. Since the NH Matthews Medical Center is relocating existing acute care beds, it is not included in this competitive review. However, assumptions associated with the increased volume at NH Matthews Medical Center will result in decreased patient days at CMC-Pineville. As discussed on page 26 of the NHHMC CON Application; Carmel OB-GYN will be switching 100% of its inpatient volume to NH Matthews Medical Center on October 1, 2013. The impact of this shift is reflected in the following table in Column E and is included in **Attachment 6**, which is **Table 29** from **Exhibit 4** of the NH Matthews Medical Center CON Application, Project I.D. # F-10214-13.

The following table combines the impact of these adjustments.

**CHS System Utilization in Mecklenburg County**  
**Project Year Three**

Facility	2017 Projected Patient Days	Impact of Overstated Growth Rate – Step 2.	Impact of Overstated CMC Shift - Step 5.	Impact of OB Shift to Matthews	Adjusted 2017 Projected Patient Days	ADC	Proposed/ Approved/ Licensed Acute Care Beds	Occupancy Level	CON Rules Target Occupancy	Hits Target
A	B	C	D	E	F	G	H	I	J	K
CMC	246,337				246,337	674.9	814	82.9%	75.2%	Yes
CMC- Mercy	51,974	-5,224	-3,121		43,630	119.5	196	61.0%	71.4%	No
CMC- Pineville	45,092			-2,650	42,442	116.3	206	56.4%	71.4%	No
CMC- University	25,364	-1,129			24,235	66.4	100	66.4%	66.7%	No
Combined	368,767				356,643	977.1	1316	74.2%	75.2%	No

Source: **Attachment 7**

As shown in the previous table, the combined Adjusted 2017 Projected Patient Days for CMC-Main, CMC-Mercy, CMC-Pineville, and CMC-University fail to achieve the required 75.2% target occupancy specified by this rule for "licensed acute beds under common ownership with the applicant [CMC-University]." The licensed acute bed inventories at CMC-Main, CMC-University, CMC-Mercy, and CMC-Pineville are under common ownership.

CMC-Mercy relies on shifting volume from CMC-Main to achieve the patient days needed to justify the need for 34 additional acute care beds. Therefore, the projected growth rate used for those patient days being shifted must be analyzed and considered in determining the reasonableness of the assumptions for CMC-Mercy and the impact system wide in determining conformity with these rules.

In contrast, NHHMC's growth is based upon its actual historical experience and is not shifting days from another Novant Health provider to justify additional acute care days. Therefore NHHMC is conforming to this Rule, as discussed in the NHHMC CON Application in Sections II and III. And NHHMC is the superior applicant in terms of conformity with the CON New Acute Bed Regulation provisions in this review.

## **VI. Conclusion**

The CMC-Mercy CON Application does not demonstrate conformity with multiple CON Review Criteria and does not demonstrate conformity with multiple CON Regulatory Criteria and Standards for New Acute Care Beds. As a result, the CMC-Mercy CON Application should be denied.

All responses should pertain to October 1, 2011 through September 30, 2012.

**D. Beds by Service (Inpatient – Do Not Include Observation Beds or Days of Care)  
[Please provide a Beds by Service (p. 4) for each hospital campus (see G.S. 131E-176(2c))]**

Please indicate below the number of beds usually assigned (set up and staffed for use) to each of the following services and the number of census inpatient days of care rendered in each unit. NOTE: If your facility has a designated unit(s) for chemical dependency treatment and/or detoxification, please complete the patient origin sheet pertaining to Psychiatric and Substance Abuse Services. If your facility has a Nursing Facility unit and/or Adult Care Bed unit please complete the supplemental packet for Skilled Nursing Facility beds.
