Description:

Clarification of a previous exemption request (Record #1756) to construct a replacement hospital on the same campus as the existing hospital in two phases for a total of 65 acute care beds upon completion of the project

County:

McDowell

#### Dear Mr. Burgess:

The Healthcare Planning and Certificate of Need Section, Division of Health Service Regulation (Agency), determined that based on your letter of February 5, 2018, the above referenced proposal is exempt from certificate of need review in accordance with N.C. Gen. Stat. §131E-184(g). Therefore, you may proceed to offer, develop, or establish the above referenced project without a certificate of need.

However, you need to contact the Agency's Construction and Acute and Home Care Licensure and Certification Sections to determine if they have any requirements for development of the proposed project.

It should be noted that this determination is binding only for the facts represented by you. Consequently, if changes are made in the project or in the facts provided in your correspondence referenced above, a new determination as to whether a certificate of need is required would need to be made by the Agency. Changes in a project include, but are not limited to: (1) increases in the capital cost; (2) acquisition of medical equipment not included in the original cost estimate; (3) modifications in the design of the project; (4) change in location; and (5) any increase in the number of square feet to be constructed.

RE: Request for Clarification Regarding Notice of Exemption For The McDowell Hospital Replacement Hospital

Dear Martha and Julie:

I am writing on behalf of our client. The McDowell Hospital, located at 430 Rankin Drive, Marion. North Carolina 28752, Facility I.D. No. 943492, to request clarification of a Notice of Exemption issued by the N.C. Department of Health and Human Services, Division of Health Service Regulation, Healthcare Planning and Certificate of Need Section ("CON Section"), dated October 2, 2015, in which the CON Section confirmed that The McDowell Hospital's plans to construct a replacement hospital on the same site as the existing hospital ("the Project") was exempt from Certificate of Need ("CON") review pursuant to N.C. Gen. Stat. section 131E-184(g). For your convenience, I have attached a copy of our client's Notice of Exemption from CON review, dated September 23, 2015 and the CON Section's confirmation of the exempt status of the Project. See Attachments 1 (The McDowell Hospital's Notice of Exemption) and 2 (the CON Section's confirmation of the exempt status of the Project).

The Project is now nearing completion and our client is undergoing reviews and inspections by the Division of Health Service Regulation's Construction Section ("the Construction Section"). As you know, The McDowell Hospital is licensed for a total of sixty-five (65) general acute beds. When the Project was designed, our client elected to develop the Project in two phases, with Phase 1 including the construction of thirty (30) general acute beds first, followed by the Phase II construction of the remaining thirty-five (35) beds at a later date. This phased development was explained to representatives of the Construction Section back in 2015 and construction plans for both Phase I and Phase II were submitted to the Construction Section. At all times during the conception and development of the Project, The McDowell Hospital indicated its intent to preserve and ultimately develop and operate all sixty-five (65) of its licensed beds.

Consistent with that intent, The McDowell Hospital's September 23, 2015 Notice of Exemption to the CON Section indicated that The McDowell Hospital was licensed for sixty-five (65) beds and that the project "does not involve a change in bed capacity." See Attachment 1, p. 2. The Construction Section has suggested that we obtain clarification from the CON Section that, via the CON Section's confirmation of our client's Notice of Exemption, development of the Project in two phases, including all sixty-five (65) licensed general acute beds, was permissible.

# Poyner Spruill<sup>ub</sup> Poyner Spruill<sup>ub</sup>

Martha Frisone February 5, 2018 Page 2

As such, I am writing to request written confirmation that pursuant to the CON S9ection's October 2, 2015 acknowledgement of the Project's status as exempt from CON review, The McDowell Hospital was permitted to develop the Project in two phases, encompassing all sixty-five (65) of the hospital's currently-licensed general acute beds.

Please let me know if you have questions about this correspondence or need additional information. We appreciate your prompt response to this request.

Very truly yours,

Kenneth L. Burgess

Re:

Notice of Exemption for Replacement Hospital

The McDowell Hospital Facility I.D. No. 943492

Dear Martha and Julie:

Pursuant to N.C. Gen. Stat. § 131E-184(g), The McDowell Hospital gives this prior written notice of its intent to construct a replacement hospital on the same site as the existing hospital.

The sole purpose of the replacement hospital project is to replace on the same site an existing health service facility that is located on the main campus. The site map attached as Exhibit A shows that the replacement hospital will be on the same site and campus as the existing hospital, where clinical patient services are provided. As shown in its 2015 License Renewal Application, attached as Exhibit B, The McDowell Hospital is located at 430 Rankin Drive, Marion, North Carolina 28752, and this location is the main and only campus for the licensed health service facility. The address for the replacement hospital will remain the same. Carol C. Wolfenbarger currently serves as the President of The McDowell Hospital, and her office is located at The McDowell Hospital. Her role as the President of The McDowell Hospital includes the exercise of administrative and financial control of the Hospital and the grounds and buildings adjacent to the main hospital building.

The replacement hospital is needed because the existing hospital is over 30 years old and is becoming functionally obsolete. The McDowell Hospital assessed the possibility of significant renovations and determined that the limitations of the existing facility with regard to ceiling height, room size, electrical and mechanical systems, and HVAC systems make renovation impractical. The McDowell Hospital has evolved in recent years to have a significant ambulatory focus for its entire campus, and the existing facility, even with significant renovations, could not accommodate the needs of future patients, clinicians, and technology.

Martha Frisone, Assistant Chief of CON Julie Halatek, Project Analyst September 23, 2015 Page 2

The McDowell Hospital plans to continue operating the existing facility during the construction process, and it will work to minimize disruptions to operations and parking during the construction process. Because of its age and related operational challenges, the existing hospital will be demolished after the replacement hospital becomes fully operational, and the site of the existing hospital will be used for surface parking.

The proposed replacement hospital project does not constitute the development of any new institutional health service for the following reasons:

- The project does not involve a change in bed capacity. The McDowell Hospital is currently licensed for 65 acute care beds and does not plan to add any new beds. There will be no redistribution of beds from one category to another as part of this project.
- The project does not involve the addition of any operating rooms. The McDowell Hospital is currently licensed for three shared operating rooms and one dedicated C-Section operating room, and it expects to be licensed for three shared operating rooms and one dedicated C-Section operating room after the project is complete.
- There is currently one GI endoscopy room at The McDowell Hospital, and there will be one GI endoscopy room when the project is complete.
- The project does not involve the acquisition of any major medical equipment. The McDowell Hospital will transfer its existing imaging equipment, including a CT scanner and an MRI scanner, to the replacement hospital.
- The project does not involve the addition of a health service that is not currently offered at The McDowell Hospital.
- The project does not involve the addition of a health service facility.
- The project does not involve a change in a project for which a CON was issued. The McDowell Hospital does not have any CON projects under development or completed within the last year.

The McDowell Hospital plans to locate its three shared operating rooms and one endoscopy suite in leased space in a physician office building to be constructed on its campus and connected to the replacement hospital. A separate exemption notice is being provided by the developer of the office building. The leased space for the operating rooms and endoscopy room will be constructed according to applicable licensure and construction standards and licensed as part of the Hospital. Less than 30% of the surgeries performed at The McDowell Hospital are

Martha Frisone, Assistant Chief of CON Julie Halatek, Project Analyst September 23, 2015 Page 3

performed on inpatients, so the location of the operating rooms in the connected physician office building is designed to maximize their use and efficiency for ambulatory surgery while still making them easily accessible for inpatient surgery.

The capital expenditure for the replacement hospital project will exceed \$2 million. The current estimated capital expenditure for the replacement hospital, including the operating rooms and endoscopy room, is \$28.3 million.

Pursuant to N.C. Gen. Stat. §131E-184(g), we request that you confirm in writing that The McDowell Hospital's replacement of its existing, licensed hospital on the same site, which is located on its main campus, is exempt from certificate of need review. Please let me know if you have questions or need any additional information.

With kindest regards, I am

Very truly yours,

SMITH MOORE LEATHER WOOD LLP

a) Surgical Operating Rooms

Report <u>Surgical Operating Rooms</u> built to meet the specifications and standards for operating rooms required by the Construction Section of the Division of Health Services Regulation, and which are fully equipped to perform surgical procedures. These surgical operating rooms include rooms located in Obstetrics and surgical suites.

Type of Room	Number of Rooms
Dedicated Open Heart Surgery	0
Dedicated C-Section	
Other Dedicated Inpatient Surgery	0
Dedicated Ambulatory Surgery	0
Shared - Inpatient / Ambulatory Surgery	3
Total of Surgical Operating Rooms	4

	Number of Additional CON approved surgical operating rooms pending development:	0
	CON Project ID Number(s)	
b)	Procedure Rooms (Excluding Operating Rooms and Gastrointestinal Endoscop Report rooms, which are not equipped for or do not meet all the specifications for an operation performance of surgical procedures other than Gastrointestinal Endoscopy procedures.	
	Total Number of Procedure Rooms:	

20 Most Common Outpatient Surgical Cases Table - Enter the number of surgical cases performed only in licensed operating rooms by the top 20 most common outpatient surgical cases in the table below by CPT code. Count each patient undergoing surgery as one case regardless of the number of surgical procedures performed while the patient was having surgery.

29827	Arthroscopy, shoulder, surgical; with rotator cuff repair	0
29880	Arthroscopy, knee, surgical; with meniscectomy (medial and lateral, including any meniscal shaving) including debridement/shaving of articular cartilage (chondroplasty), same or separate compartment(s), when performed	0
29881	Arthroscopy, knee, surgical; with meniscectomy (medial or lateral, including any meniscal shaving) including debridement/shaving of articular cartilage (chondroplasty), same or separate compartment(s), when performed	14
42820	Tonsillectomy and adenoidectomy; younger than age 12	9
42830	Adenoidectomy, primary; younger than age 12	.3

#### d) Surgical Cases by Specialty Area Table

Enter the number of surgical cases performed only in licensed operating rooms by surgical specialty area in the table below. Count each patient undergoing surgery as one case regardless of the number of surgical procedures performed while the patient was having surgery. Categorize each case into one specialty area — the total number of surgical cases is an unduplicated count of surgical cases. Count all surgical cases performed only in licensed operating rooms. The total number of surgical cases should match the total number of patients listed in the Patient Origin Tables on pages 26 and 27.

Surgical Specialty Area	Inpatient Cases	Ambulatory Cases
Cardiothoracic (excluding Open Heart Surgery)		
Open Heart Surgery (from 7.(b) 4.)		
General Surgery	118	285
Neurosurgery		
Obstetrics and GYN (excluding C-Sections)	32	173
Ophthalmology		•
Oral Surgery		
Orthopedics	52	104
Otolaryngology		30
Plastic Surgery		
Urology	26	189
Vascular		
Other Surgeries (specify) PodiAfra	/	16
Other Surgeries (specify)		
Number of C-Section's Performed in Dedicated C-Section ORs		
Number of C-Section's Performed in Other ORs		
Total Surgical Cases Performed Only in Licensed ORs	318	797

#### e) Non-Surgical Cases by Category Table

Enter the number of non-surgical cases by category in the table below. Count each patient undergoing a procedure or procedures as one case regardless of the number of non-surgical procedures performed. Categorize each case into one non-surgical category – the total number of non-surgical cases is an unduplicated count of non-surgical cases. Count all non-surgical cases, including cases receiving services in operating rooms or in any other location, except do not count cases having endoscopies in GI Endoscopy rooms. Report cases having endoscopies in GI Endoscopy Rooms on page 12.

Non-Surgical Category	Inpatient Cases	Ambulatory Cases
Pain Management		289
Cystoscopy		90
Non-GI Endoscopies (not reported in 8. c)		
GI Endoscopies (not reported in 8. c)

74177	Computed tomography, abdomen and pelvis; with contrast material(s)	808

License No: H0097 Facility ID: 943492

9. Average Operating Room Availability and Average Case Times:

The Operating Room Methodology assumes that the average operating room is staffed 9 hours a day, for 260 days per year, and utilized at least 80% of the available time. This results in 1,872 hours per operating room per year.

The Operating Room Methodology also assumes an average of 3 hours for each Inpatient Surgery and an average of 1.5 hours for each Outpatient Surgery.

Based on your hospital's experience, please complete the table below by showing the assumptions for the average operating room in your hospital.

	Average Number of	Average	Average	
Average Hours per Day	Days per Year	"Case Time" **	"Case Time" **	
Routinely Scheduled	Routinely Scheduled	in Minutes for	in <b>Minutes</b> for	
for Use *	for Use	Inpatient Cases	Ambulatory Cases	
8	260	180	90	

<sup>\*</sup> Use only Hours per Day routinely scheduled when determining the answer.

Example for determining average hours per day routinely scheduled for use:

A hospital has two operating rooms routinely scheduled for use for 8 hours per day, and two other operating rooms routinely scheduled for use for 10 hours per day.

2 rooms X 8 hours = 16 hours per day

plus

2 rooms X 10 hours = 20 hours per day

equals 36 hours per day total

The average hours per day for the four operating rooms is calculated by dividing the total hours per day for all operating rooms by the total number of operating rooms. In this example, 36 hours divided by four operating rooms is 9 average hours per day for an operating room.

\*\* "Case Time" = Time from Room Set-up Start to Room Clean-up Finish. Definition 2.4 from the "Procedural Times Glossary" of the AACD, as approved by ASA, ACS, and AORN. <u>NOTE</u>: This definition includes all of the time for which a given procedure requires an OR/PR. It allows for the different duration of Room Set-up and Room Clean-up Times that occur because of the varying supply and equipment needs for a particular procedure.

The McDowell Hospital

#### Patient Origin - Inpatient Surgical Cases

#### Facility County: McDowell

In an effort to document patterns of Inpatient utilization of Surgical Services in North Carolina hospitals, please provide the county of residence for each inpatient surgical patient served in your facility. Count each inpatient surgical patient once regardless of the number of surgical procedures performed while the patient was having surgery. However, each admission as an inpatient surgical case should be reported separately.

The Total from this chart should match the Total Inpatient Cases reported on the "Surgical Cases by Specialty Area" Table on page 13.

# Patient Origin - Linear Accelerator Treatment

NA

#### Facility County: McDowell

In an effort to document patterns of utilization of linear accelerators in North Carolina, hospitals are asked to provide the county of residence for patients served on linear accelerators in your facility. Report the number of patients who receive radiation oncology treatment on equipment (linear accelerators, CyberKnife®, but not Gamma Knife®) listed in Section 11 of this application. Patients shall be counted once if they receive one course of treatment and more if they receive additional courses of treatment. For example, one patient who receives one course of treatment counts as one, and one patient who receives three courses of treatment counts as three. The number of patients reported here should match the number of patients reported in Section 11.a. on page 21 of this application.

# Patient Origin - PET Scanner

N/A

Facility County: McDowell

In an effort to document patterns of utilization of PET Scanners in North Carolina, hospitals are asked to provide county of residence for each patient served in your facility. This data should only reflect the number of patients, not number of scans and should not include other radiopharmaceutical or supply charge codes. Please count each patient only once. The number of patients in this table should match the number of PET procedures reported in Table 10d on page 19.

Project Description:

Construct a replacement hospital on the same campus as the existing

hospital

County:

McDowell

Dear Ms. Harris:

The Healthcare Planning and Certificate of Need Section, Division of Health Service Regulation (Agency), determined that based on your letters of September 25, 2015 and September 29, 2015, the above referenced proposal is exempt from certificate of need review in accordance with G.S 131E-184(g). Therefore, you may proceed to offer, develop, or establish the above referenced project without a certificate of need.

However, you need to contact the Agency's Construction and Acute and Home Care Licensure and Certification Sections to determine if they have any requirements for development of the proposed project.

It should be noted that this determination is binding only for the facts represented by you. Consequently, if changes are made in the project or in the facts provided in your correspondence referenced above, a new determination as to whether a certificate of need is required would need to be made by the Agency. Changes in a project include, but are not limited to: (1) increases in the capital cost; (2) acquisition of medical equipment not included in the original cost estimate; (3) modifications in the design of the project; (4) change in location; and (5) any increase in the number of square feet to be constructed.
