Exempt from Review

Record #: 4194
Date of Request: March 10, 2023
Business Name: IRCAD North America, Inc.
Business #: 3690
Project Description: Acquisition of a 0.55T Siemens Magnetom MRI scanner to provide a non-health service
County: Mecklenburg

Dear Mr. Qualls:

The Healthcare Planning and Certificate of Need Section, Division of Health Service Regulation (Agency), determined that the above referenced proposal is exempt from certificate of need review in accordance with G.S. 131E-184(a)(6). Therefore, you may proceed to offer, develop, or establish the above referenced project without a certificate of need.

It should be noted that this determination is binding only for the facts represented by you. Consequently, if changes are made in the project or in the facts provided in your correspondence referenced above, a new determination as to whether a certificate of need is required would need to be made by the Agency. Changes in a project include but are not limited to: (1) increases in the capital cost; (2) acquisition of medical equipment not included in the original cost estimate; (3) modifications in the design of the project; (4) change in location; and (5) any increase in the number of square feet to be constructed.

If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

Julie M. Faenza

RE: IRCAD North America, Inc.'s No Review Request and Exemption Notice for Non-Health Service Exemption

Dear Ms. Mitchell and Ms. Faenza:

Our client, IRCAD North America, Inc. (“IRCAD”),¹ seeks to acquire a 0.55 Tesla Siemens Magnetom MRI Scanner (the “Scanner”) and other equipment items (described herein) as part of the IRCAD North America Surgical Training and Research Center (the “Center”) located at 801 S. McDowell Street, Charlotte, North Carolina.

The purpose of this letter is to request a determination that:

1. the Center’s purchase of the MRI Scanner is either not reviewable in the first instance or is exempt from Certificate of Need (“CON”) review under N.C. Gen. Stat. § 131E-184(a)(6) as a nonhealth service; and
2. the Center’s other proposed activities and other equipment acquisitions are not a new institutional health service in the first instance (thus not requiring an exemption).²

¹ IRCAD’s sole member is The Charlotte-Mecklenburg Hospital Authority.

² If any of the activities or acquisitions described in Part I of this letter were -- for some reason -- found to be a new institutional health service, they would nevertheless be exempt under N.C. Gen. Stat. § 131E-184(a)(6) as a nonhealth service for the same reasons that the MRI Scanner is exempt (as discussed in Part II of this letter).

The Center will be a surgical training and research center, which trains health professionals where no live human patients or subjects will be treated, served, or otherwise involved. The Center will not be operated as part of any hospital or other health service facility. Thus, establishment of the Center does not trigger the new institutional health service definitions in N. C. Gen. Stat. § 131E-176(16)(a) or (b). Moreover, the discussion below shows that no other new institutional health service definitions are triggered, and, if they are, such activities are otherwise exempt.

I. No Health Service or Diagnostic Activities Are Implicated.

We are submitting this letter out of an abundance of caution simply because the Center is acquiring certain medical equipment for its training which might normally be reviewable (either alone or in the aggregate) if patients were being treated on such equipment. However, as explained below, the Center's medical equipment acquisitions should not be subject to CON review in this non-health service context. The Center's proposed equipment items³ are contained in the list attached as Exhibit 1.

Because no live human subjects are involved, the Center is not providing a "health service" as that term is defined in the CON statute. The presence of a health service is the trigger for CON reviewability in many instances.

"Health service" is defined as:

An organized, interrelated activity that is medical, diagnostic, therapeutic, rehabilitative, or a combination thereof and that is integral to the prevention of disease or the clinical management of an individual who is sick or injured or who has a disability. "Health service" does not include administrative and other activities that are not integral to clinical management.

See N. C. Gen. Stat. § 131E-176(9a).

Thus, because no individuals will ever be treated, the Center's development, acquisitions, and other activities do not trigger CON reviewability as a "health service."

³ The proposed MRI Scanner is discussed in Part II below.

Therefore, the Center's activities do not trigger CON reviewability under the "health service" language of the following provisions:

- a. **Section 176(7): Develop.** – When used in connection with **health services**, means to undertake those activities which will result in the offering of institutional health service or the incurring of a financial obligation in relation to the offering of such a service.
- b. **Section 176(14o): "Major medical equipment"** means a single unit or single system of components with related functions which is **used to provide medical and other health services** and which costs more than two million dollars (\$2,000,000)
- c. **Section 176(16)(b):** Except as otherwise provided in G.S. 131E-184(e), the obligation by any person of a capital expenditure exceeding four million dollars (\$4,000,000) to develop or expand a **health service** or a health service facility, or which relates to the provision of a **health service**
- d. **Section 176(16)(f):** The **development or offering of a health service** as listed in this subdivision by or on behalf of any person: 1. Bone marrow transplantation services. 2. Burn intensive care services. 2a. Cardiac catheterization services, except cardiac catheterization services provided on equipment furnished by a person authorized to operate the equipment in North Carolina pursuant to either a certificate of need issued for mobile cardiac catheterization equipment or a settlement agreement executed by the Department for provision of cardiac catheterization services. 3. Neonatal intensive care services. 4. Open-heart surgery services. 5. Solid organ transplantation services
- e. **Section 176(16)(s):** The furnishing of mobile medical equipment to any person **to provide health services** in North Carolina, which was not in use in North Carolina prior to the adoption of this provision, if the equipment would otherwise be subject to review in accordance with sub-subdivision fl. of this subdivision or sub-subdivision p. of this subdivision if it had been acquired in North Carolina.
- f. **Section 176(18): Offer.** – In connection with **health services**, the act by a person of holding out as capable of providing, or as having the means to provide, specified health services

Moreover, the definition of "diagnostic center," on its face, does not apply to the Center because, as shown in the quoted language below, that definition focuses on "medical **diagnostic** equipment **utilized** by the facility."

Diagnostic center. – "Diagnostic center" means a freestanding facility, program, or provider, including but not limited to, physicians' offices, clinical laboratories, radiology centers, and mobile diagnostic programs, in which the total cost of all the medical **diagnostic** equipment **utilized** by the facility which cost ten thousand dollars (\$10,000) or more exceeds one million five hundred thousand dollars (\$1,500,000). In determining whether the medical diagnostic equipment in a diagnostic center costs more than one million five hundred thousand dollars (\$1,500,000), the costs of the equipment, studies, surveys, designs, plans, working drawings, specifications, construction, installation, and other activities essential to acquiring and making operational the equipment shall be included.

See N. C. Gen. Stat. § 131E-176(7a).

The Center will not utilize any equipment for diagnostic purposes. No live patients will be diagnosed because no live human patients or subjects will be treated, served, or otherwise involved in any context at the Center.

Thus, the Center's proposed activities and equipment acquisitions -- other than potentially the MRI Scanner -- never rise to the level of a new institutional health service in the first instance. The MRI Scanner acquisition is separately addressed in Part II below.

However, if any of the Center's activities or acquisitions were -- for some reason -- found to constitute a new institutional health service, they would nevertheless be exempt under N.C. Gen. Stat. § 131E-184(a)(6) as a nonhealth service for the same reasons that the MRI Scanner is exempt (as discussed in Part II below).

II. The MRI Scanner

Because the *per se* reviewable equipment definition in N. C. Gen. Stat. § 131E-176(16)(f1) -- which lists MRI scanners -- does not contain any of the self-limiting terms addressed in Part I, we address the Center's acquisition of the MRI Scanner separately.

First, viewed in light of the CON statute's purposes, the Center's MRI Scanner acquisition cannot possibly be a new institutional health service. Even though N. C. Gen. Stat. § 131E-176(16)(f1) does not expressly contain terms such as "diagnostic," "therapeutic," or "health service" -- which would expressly exclude new institutional health service status here -- the Legislature certainly never intended to regulate the acquisition of such equipment for the

Center's activities, which are completely unrelated to treating live humans. For example, the CON statute's Findings of Fact constantly reference health services, health services facilities, or health care services as the targeted areas of legislative concern. *See* N. C. Gen. Stat. § 131E-175. Thus, the Legislature never intended to regulate equipment acquisitions by entities such as the Center, where the activities are outside of the Legislature's targeted concerns of providing healthcare services to live humans. The primary rule of construction of a statute is to ascertain the intent of the legislature and to carry out such intention to the fullest extent. *Buck v. Guaranty Co.*, 265 N.C. 285, 144 S.E.2d 34 (1965). This intent "must be found from the language of the act, its legislative history and the circumstances surrounding its adoption which throw light upon the evil sought to be remedied." *Milk Commission v. Food Stores*, 270 N.C. 323, 332, 154 S.E.2d 548, 555 (1967).

Second, even if one assumes that the Legislature intended to make MRI scanner acquisitions reviewable regardless of whether they would ever be used on live humans, the Center's acquisition is exempt under N.C. Gen. Stat. § 131E-184(a)(6) as a nonhealth service.

As described above, the Center will be a surgical training and research center, which trains health professionals where no live human patients or subjects are involved. "Nonhealth service" is not a defined term in the CON statute. However, as discussed above, the inverse term of "health service" is defined as:

An organized, interrelated activity that is medical, diagnostic, therapeutic, rehabilitative, or a combination thereof and that is integral to the prevention of disease or the clinical management **of an individual who is sick or injured or who has a disability.** "Health service" does not include administrative and other activities that are not integral to clinical management.

See N. C. Gen. Stat. § 131E-176(9a).

Just as in the Part I analysis above, because no individual who is sick or injured or who has a disability (i.e., no live human at all) will be receiving any MRI scans with the MRI Scanner, this must necessarily be the provision of a **non**health service. Thus, the Center's acquisition of the MRI Scanner is exempt as a nonhealth service under N.C. Gen. Stat. § 131E-184(a)(6) if it is considered a new institutional health service in the first place.

In fact, it seems as though the nonhealth service exemption in Section 184(a)(6) was intended for this very type of situation, where the strict language of a CON trigger suggests that the activity might be presumptively reviewable, but then the overall intent of the CON statute makes clear that the activity is intended as exempt. Specifically, the nonhealth service exemption is not needed where something is already defined as not a health service in the first instance. *See* Part I.

Therefore, the nonhealth service exemption in Section 184(a)(6) was intended to address something that is clearly not a health service, but which otherwise does not explicitly contain a threshold “health service” test in the new institutional health service definition itself. That is the case for MRI scanners and other *per se* reviewable equipment as defined in N. C. Gen. Stat. § 131E-176(16)(f1), if you determine it is a new institutional health service in the first instance, and therefore requires an exemption. Courts do not read segments of a statute in isolation. Rather, courts construe statutes *in pari materia*, giving effect, if possible, to every provision. *Rhynne v. K-Mart Corp.*, 358 N.C. 160, 188, 594 S.E.2d 1 (2004).

III. Conclusion

Based on the foregoing information, IRCAD North America, Inc. hereby requests that the Agency provide a written response confirming that:

1. the Center’s purchase of the MRI Scanner is either not reviewable in the first instance or is exempt from CON review under N.C. Gen. Stat. § 131E-184(a)(6) as a nonhealth service; and
2. the Center’s proposed activities and other equipment acquisitions are likewise not reviewable in the first instance or are exempt from CON review under N.C. Gen. Stat. § 131E-184(a)(6) as nonhealth services.

If the Agency needs additional information to assist in its consideration of this request, please do not hesitate to apprise us. We thank you for your consideration of this request.

Sincerely,

Gary S. Qualls

Micheala Mitchell

Good morning Tiffany,

Would you mind logging this and assigning to Julie?

Thanks,

Micheala Mitchell, JD

Micheala and Julie:

Attached for filing is IRCAD North America's No Review Request and Exemption Notice. I realize it is after hours on Friday. Therefore, next week, at your convenience, please confirm receipt for my records. Exhibit 1 is included as both a PDF and an Excel Spreadsheet for easier reading.

Thanks

Gary
