F 441	Continued From page 3 after using it for supplies during the dressing changes. The treatment nurse stated that she knew the over-the-bed-table should have been cleansed or a barrier should have been placed on the table before placing her treatment supplies and equipment on it. When asked about how she was trained to handle the scissors she removed them from her pocket and stated "I wiped them with a clean paper towel." Further discussion revealed that she " should have used a disinfectant before placing the scissors in her pocket. "  On 5/25/11 at 12:10pm an interview with the DON revealed that the treatment nurse had spoken with her regarding the observed dressing change. The DON stated this was unacceptable and that training had just recently been completed regarding infection control and treatments. The DON indicated the treatment nurse had attended that in-service. The DON stated "the table should have been cleaned before and after. The scissors should not have been wiped with a dry paper towel and never should be placed in a pocket. The scissors should have been disinfected before she left the room and then replaced on the treatment cart."	F 441
