F0550 SS = D	Resident Rights/Exercise of Rights CFR(s): 483.10(a)(1)(2)(b)(1)(2) §483.10(a) Resident Rights. The resident has a right to a dignified existence, self-determination, and communication with and access to persons and services inside and outside the facility, including those specified in this section. §483.10(a)(1) A facility must treat each resident with respect and dignity and care for each resident in a manner and in an environment that promotes maintenance or enhancement of his or her quality of life, recognizing each resident's individuality. The facility must protect and promote the rights of the resident. §483.10(a)(2) The facility must provide equal access to quality care regardless of diagnosis, severity of condition, or payment source. A facility must establish and maintain identical policies and practices regarding	F0550	: Preparation and submission of this POC is required by state and federal law. This POC does not constitute an admission for general purposes of general liability, professional malpractice or any other court proceeding. F0550 Resident Rights Facility failed to provide a dignified dining experience when the Speech Therapist (ST) stood in the hallway beside a dependent resident while assisting him during a meal. Step 1: Corrective Action Resident #70 had a psychosocial assessment completed on 1/20/26 by the Director of Nursing, resident remains at baseline with no evidence of mental anguish. In addition, one to one education was provided to the Speech Therapist on 1/20/26 by the Therapy Director regarding providing feeding assistance to residents in	02/10/2026

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See reverse for further instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F0550 SS = D	Continued from page 2 #70's right side giving him bites of food. In an interview with the ST on 01/22/26 at 1:20 PM she confirmed she fed Resident #70 the lunch meal on 01/20/26 in the hallway and stood during the entire time she was assisting Resident #70. She stated she did not see any chairs available and that was why she did not sit while assisting Resident #70. The ST stated Resident #70 normally ate in the dining room but ate in the hallway on 01/20/26 due to the flu/COVID-19 outbreak. An interview with the Director of Nursing (DON) on 01/23/26 at 11:12 AM revealed she expected staff to be seated when feeding residents. She stated she felt feeding residents in the hallway was a safer option than in their rooms because more staff were available if an emergency occurred. An interview with the Administrator on 01/23/26 at 12:11 PM revealed he expected residents to be fed in a respectful manner and for staff to be seated when they fed residents.	F0550		
F0552 SS = D	Right to be Informed/Make Treatment Decisions CFR(s): 483.10(c)(1)(4)(5) §483.10(c) Planning and Implementing Care. The resident has the right to be informed of, and participate in, his or her treatment, including: §483.10(c)(1) The right to be fully informed in language that he or she can understand of his or her total health status, including but not limited to, his or her medical condition. §483.10(c)(4) The right to be informed, in advance, of the care to be furnished and the type of care giver or professional that will furnish care. §483.10(c)(5) The right to be informed in advance, by the physician or other practitioner or professional, of the risks and benefits of proposed care, of treatment and treatment alternatives or treatment options and to choose the alternative or option he or she prefers. This REQUIREMENT is NOT MET as evidenced by: Based on record reviews and staff interviews, the	F0552	•Preparation and submission of this POC is required by state and federal law. This POC does not constitute an admission for purposes of general liability, professional malpractice or any other court proceeding. F0552 Right to be Informed/ Make Treatment Decisions Facility failed to obtain consent and inform resident or responsible party in advance of the risk and benefits of psychotropic medications prior to initiation. Step 1: Corrective Action: Upon identification, Resident #8, Resident #11 and Resident #16's Responsible Party was contacted by the Unit Manager, informed of risk and benefits of Depakote utilized in a psychotropic capacity and consent was obtained on 1/22/2026. Step 2: Identification of other residents: The Director of Nursing reviewed the order listing report for all residents receiving psychotropic medications and validated completion of consent by Resident or Responsible Party on 1/30/2026. Few additional residents noted requiring new or updated consent for a psychotropic medication. Needed consents were obtained by Director of Nursing or Unit Managers from Residents or Responsible Party by 1/30/2026.	02/10/2026

F0578 SS = D	Continued from page 10 a full code in the event of any emergency. An interview with Unit Manager #4 was conducted on 01/21/26 at 3:17 PM. Unit Manager #4 indicated that residents with DNR orders would have a DNR form completed by the Admissions Director when admitted to the facility. This form would be kept in the advanced directive notebook at the nurse's station for reference in the event of an emergency. The original form would go to the hospital with the resident if they were transferred. Unit Manager #4 indicated that Resident #8 was recently sent out to the hospital and her form must not have been returned with her. Unit Manager #4 explained that the nurse who received Resident #8 back from the hospital should have verified the form was in place. Unit Manager #4 verbalized she was responsible for checking the book weekly and had not recently checked it. Unit Manager #4 stated she did not check the notebook for the form after Resident #8 returned from the hospital. In the event of an emergency, the staff would follow the physician's order in absence of the DNR form. An interview was conducted with the Director of Nursing (DON) on 01/23/26 at 9:20 AM. The DON explained that if a resident was a DNR then there should be a DNR form in the advanced directive notebook at the nurse's station in case of an emergency. The DON verbalized that Resident #8 was recently transferred to the hospital and her DNR form did not return with her. The DON stated that Unit Managers should check the advanced directive books to ensure the correct forms were in place. The DON reported staff had not noticed the form was missing when Resident #8 returned from the hospital and the form was not replaced. An interview with the Administrator was conducted on 01/23/26 at 11:58 AM. The Administrator stated that the DNR forms should be available for facility and emergency staff in case a resident had an emergency.	F0578

F0644 SS = D	<p>Continued from page 14</p> <p>Resident #3 was seen for follow-up of 1) major depressive disorder, recurrent severe without psychotic features with severity level low and stable and 2) PTSD with severity level low and stable. The progress note indicated Resident #3 was prescribed citalopram (antidepressant) 10 milligram one tablet by mouth every day for the depression and to continue to monitor for symptoms of depression and PTSD.</p> <p>A care plan last revised on 01/13/26 revealed Resident #3 has possible history of unknown traumatic event/experience as manifested by signs and symptoms of PTSD and recent suicidal ideations. Interventions included assisting Resident #3 in meaningful activities that match the Resident's abilities and interests, reducing any known stimuli that is known to trigger Resident #3's trauma and utilizing techniques such as art (coloring) to reminisce on past positive memories.</p> <p>Review of Resident #3's medical record revealed there was no Level II PASRR evaluation.</p> <p>The facility was unable to provide documentation that a request for an evaluation for a Level II PASRR determination had been submitted for Resident #3.</p> <p>An interview was conducted with Social Worker (SW) #1 on 01/23/26 at 9:45 AM. The Social Worker reviewed Resident #3's medical record and reported that the Resident was admitted on 04/08/22 and did not have a diagnosis of PTSD. SW #1 stated the diagnosis for PTSD was added to the cumulative diagnosis listing on 03/14/24 and when the diagnosis was added she reviewed the medical record to see if Resident #3 was displaying any new behaviors which he was not, so she did not request a Level II PASRR screen. The SW stated she reviewed Resident #3's medical record to see if and when a request for a Level II PASRR evaluation had been submitted and could not find one. The SW stated she was employed at the facility before Resident #3 was admitted and she did not know of him to have any behaviors to warrant a Level II PASRR. The SW indicated if the Resident did require a Level II PASRR that he was already getting the psychiatric services that he would require.</p> <p>During an interview with the Administrator on 01/23/26 at 1:26 PM the Administrator stated his expectation was that a Level II PASRR's be requested when indicated of a new psychiatric diagnosis.</p>	F0644

F0658 SS = E	<p>Continued from page 15</p> <p>§483.21(b)(3) Comprehensive Care Plans</p> <p>The services provided or arranged by the facility, as outlined by the comprehensive care plan, must-</p> <p>(i) Meet professional standards of quality.</p> <p>This REQUIREMENT is NOT MET as evidenced by:</p> <p>Based on record reviews, and resident, family member, staff, and Medical Director interviews, the facility failed to ensure medications were administered as prescribed by the physician when Nurse #8 administered medications to Resident #83 prescribed for Resident #33 which included Metformin (an antidiabetic agent), Coreg (beta-blocker that affects the heart and circulation), Trazadone (an antidepressant), Melatonin (hormone that regulates sleep), Senna (plant-based product used as laxative) and Tizanidine (muscle relaxant). In addition, Nurse #6 administered medications to Resident #139 prescribed for Resident #23 which included Tylenol (an analgesic) and Buspar (an anti-anxiety medication). This deficient practice affected 2 of 6 residents reviewed for medication errors.</p> <p>The findings included:</p> <p>1. Resident #83 was admitted to the facility on 11/29/17 with diagnoses that included diabetes mellitus, hypertension, constipation, restless leg syndrome, hallucinations and major depressive disorder.</p> <p>Review of Resident #83's quarterly Minimum Data Set (MDS) assessment dated 10/05/25 revealed he was cognitively intact and received antidepressant and hypoglycemic medications during the look back period.</p> <p>Review of a Change in Condition form dated 11/06/25 and completed by the Director of Nursing (DON) indicated that the form was being completed because of a medication variation on the night of 11/06/25. Resident #83's vital signs were taken after the medication variation at 10:14 PM and recorded as blood pressure 130/62 (normal range is between 120/80 and 90/60), pulse 66 (normal pulse is between 60 and 100 beats per minute), respiratory rate 18 (normal range is between 12 to 20 breaths per minute), temperature 98.2 (normal body temperature is between 97.0 and 99.0), oxygen saturation 94% (normal oxygen saturation level is between 95% and 100%) and blood glucose 115 (normal blood sugar range is between 70-99 when fasting). The form noted Resident #83's allergies were penicillin and tuberculin solution. There were no changes in Resident</p>	F0658	<p>Continued from page 15</p> <p>professional malpractice or any other court proceeding.</p> <p>F0658 Services Meet Professional Standards</p> <p>Facility failed to ensure medications were administered as prescribed by the physician.</p> <p>Step 1: Corrective Action:</p> <p>Upon identification of the medication error on 11/6/2025 Resident #83 was assessed by a licensed nurse to include vital signs with no abnormal findings noted. The Licensed nurse notified the resident who is his own responsible party as well as the medical provider on 11/6/2025. The provider ordered blood glucose and vital sign monitoring every six hours for forty-eight hours and neuro checks every six hours for twenty-four hours. All monitoring was completed by licensed nurses with no abnormal findings noted.</p> <p>On 10/26/2025 Resident #139 was assessed by a licensed nurse post medication error to include vital signs with no abnormal findings noted. The Licensed nurse notified the resident who is his own responsible party as well as the medical provider on 10/26/2025. The provider ordered vital sign monitoring every six hours for twenty-four hours. All monitoring was completed by licensed nurses with no abnormal findings noted.</p> <p>Step 2: Identification of other residents:</p> <p>On 2/6/2026 The Director of Nursing, Assistant Director of Nursing and Unit Managers obtained vital signs on all current residents to ensure no adverse effects related to medication variance. Few resident noted with vital signs outside of normal limits, however in alignment with residents baseline. In addition, the Director of Nursing on 2/6/2026 reviewed the incident log for the previous 30 days for any medication errors in which residents received another resident's medication; no additional errors of that circumstance noted.</p> <p>Step 3: Measures to prevent Recurrence:</p> <p>Education was provided for all licensed nurses and medication aides by the Director of Nursing on 1/22/2026 related to the ten rights of medication administration, to include "right resident". Education will be provided to absent, newly hired or contracted licensed nurses and medication aides by the Director of Nursing or Assistant Director of Nursing upon hire, prior to receiving an assignment.</p>

F0658 SS = E	<p>Continued from page 16</p> <p>#83's mental, physical and behavioral symptoms. The Resident, who was his own responsible party was made aware of the medication errors and the on-call physician service was made aware of the errors and gave orders to monitor Resident #83 for changes. The form did not indicate what medications were given to Resident #83.</p> <p>Review of Resident #33's Medication Administration Record (MAR) for November 2025 revealed the following medications that were administered to Resident #83 in error on 11/06/25:</p> <ul style="list-style-type: none"> - melatonin (a hormone the body produces to regulate sleep-wake cycle) 5 milligrams (mg) tablet by mouth at bedtime for insomnia. - sennosides (laxative) 8.6 mg 2 tablets by mouth at bedtime for constipation. - tizanidine (muscle relaxant) 2 mg one tablet by mouth for muscle relaxant. - trazadone (antidepressant) 50 mg one tablet by mouth at bedtime for insomnia. - carvedilol (antihypertensive) 25 mg tablet by mouth twice a day for hypertension. - metformin (hypoglycemic) 1000 mg tablet by mouth twice a day for diabetes mellitus. <p>Review of a typed statement made by the Director of Nursing on 11/07/25 revealed the DON spoke with the second shift (3:00 PM to 11:00 PM) Supervisor #9 by phone who was present at the time of medication variation. Per Supervisor #9, Nurse #8 was assigned to Resident #83's and Resident #33's section and was in the process of completing her bedtime medication pass (on 11/06/25). When Nurse #8 arrived at Resident #83's and Resident #33's room, the Nurse pulled Resident #33's medications and mistakenly gave them to Resident #83. As soon as Nurse #8 realized that she had administered the wrong medications to Resident #83, Nurse #8 immediately informed Supervisor #9 of her mistake. Supervisor #9 then notified the on-call provider to let them know what had happened and received response from the on-call provider to monitor Resident #83 for any changes and notify the on-call provider of any changes. Per Supervisor #9, Nurse #8 checked Resident #83's vital signs twice within the first hour after the event occurred. Resident #83 was his own responsible party and was made aware of the situation. Nurse #8 informed the oncoming shift of what</p>	F0658	<p>Continued from page 16</p> <p>Step 4 Monitoring and Maintain Compliance:</p> <p>The Director of Nursing or Designee will observe ten licensed nurses or medication aides prepare and administer medications to a resident weekly for six weeks, then ten monthly for three months to ensure that medications are administered as prescribed.</p> <p>The Administrator and/or Director of Nursing will report findings of these audits to the Quality Assurance Performance Improvement (QAPI) Committee monthly for three months for tracking and trending purposes with all follow up action determined by the QAPI team.</p> <p>Date of Compliance: <u> 2/10/2026 </u></p>

F0658 SS = E	<p>Continued from page 18</p> <p>An interview was conducted with Supervisor #9 on 01/23/26 at 3:45 PM who explained that on 11/06/25 she was acting second shift Supervisor when Nurse #8 informed her of a medication error that she made by giving Resident #83 Resident #33's medications. Supervisor #9 continued to explain that she immediately called the on-call provider and reported the medication errors, and the doctor told her to monitor Resident #83's vital signs and to call them back if there were any changes. The Supervisor stated Resident #83 had no negative effects from receiving the wrong medications. She reported that Resident #83 was his own responsible party, and she explained to him that Nurse #8 gave him Resident #33's medications and encouraged him to report any changes that he may experience which the Resident did not report any changes. Supervisor #9 stated she reported the incident to the oncoming Supervisor #10.</p> <p>An interview was conducted with the third shift (11:00 PM-7:00 M) Supervisor #10 on 01/26/26 at 10:05 AM. The Supervisor explained that she remembered the night of the medication error 11/06/25 and was notified of the medication error by Supervisor #9. Supervisor #10 continued to explain that Resident #83 was monitored throughout the night and there were no changes in his vital signs that would warrant notifying the physician.</p> <p>Interviews were conducted with the Director of Nursing (DON) on 01/23/26 at 1:28 PM and 01/28/26 at 10:00 AM. The DON explained that on the night of 11/06/25 Nurse #8 administered Resident #33's medications to Resident #83 by mistake and immediately reported her mistake to Supervisor #9. Supervisor #9 called the on-call doctor and reported the medication errors to the doctor, and the doctor gave orders to monitor Resident #83 for any changes and to hold Resident #83's other bedtime medications. She continued to explain that Resident #83 had no negative side effects from the medication and in fact, Resident #83 was on some of the medications that were given to him by mistake. The DON reported the next day, on 11/07/24, the Nurse Practitioner saw Resident #83 and gave orders to monitor his vital signs and blood sugar every six hours for forty-eight hours and to monitor neurological checks every six hours for twenty-four hours and Resident #83 had no negative effects from the medication errors. The DON explained that the only explanation for the medication errors was that Nurse #8 who was an agency Nurse, did not check the five rights before she administered the medications to Resident #83. She stated Nurse #8 was immediately terminated from working at the facility for not following facility protocol for medication administration. The DON stated she expected all the nurses to practice safe medication pass such as</p>	F0658

F0658 SS = E	<p>Continued from page 21 24 hours. The family member and resident were notified of the error on 10/26/25 at 2:27 PM. The Assistant Director of Nursing (ADON) was notified of the medication error on 10/26/25 at 2:32 PM and the DON was notified of the medication error on 10/26/25 at 2:58 PM.</p> <p>Review of a typed statement dated 10/26/25 made by Nurse #2 revealed at approximately 2:20 PM Resident #139's family member approached Nurse #2 and asked her if Resident #139's medications had changed. Nurse #2 explained to the family member that she had not been assigned to Resident #139 earlier but she could check his electronic medical record (EMR) and review his current medications with her. Nurse #2 verified the family member was listed in the EMR as his emergency contact before providing the information. Nurse #2 informed the family member of the medications Resident #139 should have received and the family member then asked what he received after lunch and Nurse #2 stated he did not have medications ordered after lunch. The family member then stated to Nurse #2 that Nurse #6 had brought medications in for the resident after lunch and the cup was still in the room but said the resident had taken the medications. Nurse #2 told the family member that she would discuss this with the weekend supervisor and get back to her about the medications Resident #139 had taken. Nurse #2 made Unit Manager #1 aware of the situation, and they began reviewing the MARs of all the residents Nurse #6 had medicated during the 7:00 AM to 3:00 PM shift. Nurse #6 had been sent home when she had completed her medication pass and documentation and was not at the facility at the time the error was discovered. Nurse #2 and Unit Manager #1 discovered that Resident #139 had been administered medications that were ordered to be given to Resident #23 at 2:00 PM. Nurse #2 and Unit Manager #1 explained what had happened to the family member and Resident #23. Nurse #2 explained to them that the on-call provider was being contacted as well as the ADON and Director (DON) to inform them of the medication error.</p> <p>A telephone interview on 01/20/26 at 3:29 PM with Resident #139's family member revealed Resident #139 had received medications on 10/26/25 that were not prescribed to him. The family member stated Nurse #6 brought 4 pills (3 white oblong pills and 1 white small round pill) in a cup into his room around 2:30 PM and gave them to him. The family member stated she was not aware of him taking medications at that time of day, so she had gone out a few minutes later and asked Nurse #2 (could not find Nurse #6) what the medications were that Resident #139 had received. She stated Nurse #2 came back to her later and told her that Resident #139</p>	F0658

F0684 SS = D	<p>Continued from page 25 person-centered care plan, and the residents' choices.</p> <p>This REQUIREMENT is NOT MET as evidenced by:</p> <p>Based on observations, record review, and staff interviews, the facility failed to complete thorough skin assessments to identify and obtain orders for the care of a reddened area on the right palm caused by the resident's middle fingernail extending ¼ inch beyond the end of his finger and pressing into the palm of his hand for 1 of 3 residents reviewed for contracture care (Resident #24).</p> <p>The findings included:</p> <p>Resident #24 was admitted to the facility on 01/26/2024 with diagnoses which included chronic obstructive pulmonary disease, diabetes mellitus, contracture of left hand, contracture of right hand and dementia.</p> <p>A physician order dated 01/30/24 specified a head-to-toe skin assessment every Tuesday on 3:00 PM to 11:00 PM shift.</p> <p>Review of Resident #24's quarterly Minimum Data Set (MDS) assessment dated 10/16/25 revealed he was severely cognitively impaired and required total assistance with all activities of daily living except eating for which he required partial to moderate assistance. The assessment also revealed he was at risk of developing pressure ulcers/injuries but at present had no unhealed pressure ulcers or injuries or open lesions.</p> <p>Review of a physician order dated 10/23/25 indicated to apply bilateral palm guards as tolerated – check skin integrity prior to applying. One time a day per therapy services and removed per schedule.</p> <p>Review of Resident #24's care plan dated 10/30/25 revealed a focus area for the resident having an activity of daily living (ADL) self-care performance deficit related to disease process, risk for decline in physical function, chronic obstructive pulmonary disease, respiratory failure, diabetes mellitus, dementia and bilateral hand contractures. The goal was for Resident #24 to have all needs anticipated and met by staff through the review date of 01/30/26. The interventions included: Adaptive equipment to help resident to feed self – universal cuff (an assistive device that helps residents with weak grip or limited dexterity hold objects like utensils, pens or toothbrushes, promoting independence in daily activities by securing the item in a pocket on the</p>	F0684	<p>Continued from page 25 Step 1: Corrective Action:</p> <p>Upon identification on 1/22/2026 Resident #24 was assessed by the Director of Nursing with a mild indention of intact skin noted to residents right palm, hand hygiene and nail care were performed during assessment. On 1/28/2026 the wound care nurse practitioner assessed the resident and noted that Resident #24's skin was intact, no treatment orders initiated.</p> <p>Step 2: Identification of other residents:</p> <p>On 1/22/2026 The Director of Nursing and Unit Managers completed skin assessments with hand hygiene and nail care performed on all residents with contractures, no new skin alterations noted.</p> <p>Step 3: Measures to prevent Recurrence:</p> <p>Education was provided for all nursing staff by the Director of Nursing on 1/22/2026 related to completion of skin assessments, provider notification if skin alterations are noted, resident hand hygiene and fingernail care. Education will be provided to absent, newly hired or contracted nursing staff by the Director of Nursing or Assistant Director of Nursing upon hire, prior to receiving an assignment.</p> <p>Step 4 Monitoring and Maintain Compliance:</p> <p>The Director of Nursing or Designee will observe ten residents with contractures weekly for six weeks, then ten monthly for three months to ensure that no skin alterations are present, not indicated on skin assessment and that nails are an appropriate length.</p> <p>The Administrator and/or Director of Nursing will report findings of these audits to the Quality Assurance Performance Improvement (QAPI) Committee monthly for three months for tracking and trending purposes with all follow up action determined by the QAPI team.</p> <p>Date of Compliance: <u> 2/10/2026 </u></p>

F0684 SS = D	<p>Continued from page 26</p> <p>hand), dycem (a unique, grippy, antimicrobial polymer material available in mats or rolls used for non-slip stabilization) placemat and divided plate. The resident requires partial to moderate assist of one and divided plates with meals. Physical therapy (PT) and occupational therapy (OT) evaluation and treatment as per MD orders. The care plan also revealed a focus area for the resident having an alteration in musculoskeletal status related to contractures of bilateral hands. The goal was for Resident #24 to remain free of injuries or complications related to bilateral hand contractures through the review date of 01/30/26. The interventions included: Monitor/document/report as needed any signs or symptoms or complications related to arthritis, joint pain, joint stiffness, usually worse on waking, swelling, decline in mobility, decline in self-care activity, contracture formation/joint shape changes, crepitus (creaking or clicking with joint movement), pain after exercise or weight-bearing. Adaptive equipment for eating, bilateral hand splints per orders. Provide good hygiene and monitor skin. Notify provider of any complications. Review of Resident #24's weekly skin assessment dated 01/14/26 and completed by Nurse #3 revealed his skin was dry, he had a pressure-reducing device on his bed, he had no edema and his fingernails were cleaned and trimmed.</p> <p>Review of Resident #24's daily skilled nursing notes dated 01/01/26 through 01/23/26 revealed a progress note on 01/15/26 written by MDS Coordinator #1 regarding the resident. MDS Coordinator #1 indicated the resident had contractures to bilateral hands and had special devices he used to feed himself and bilateral hand splints per orders as well. She indicated in her note that although Resident #24 was at risk for skin breakdown that he currently had none.</p> <p>A telephone interview on 01/26/26 at 2:16 PM with MDS Coordinator #1 revealed she had completed the assessment on Resident #24 on 01/15/26. She stated that she typically assessed the resident herself and reviewed the notes in his electronic medical record. MDS Coordinator #1 stated she had not taken the resident's splints off his hands and observed his hands for skin issues and stated that she typically did not take his splints off to observe his hands when he had them on. She further stated she was not aware of any skin issues on his hands.</p> <p>An observation of Resident #24 on 01/20/26 at 9:15 AM revealed him sitting up in his high-back wheelchair in his room dressed for the day. The resident's hands were noted bilaterally to be contracted with the right hand</p>	F0684

F0684 SS = D	<p>Continued from page 27 greater than the left hand. His fingernails on the left hand were noted to be long and extended ¼ inch beyond the end of his fingers. On his right hand the thumb, middle, and pinkie fingernails were long and extended ¼ inch beyond the end of his finger. The middle finger on the right hand was bent at the proximal digit to the palm of the hand causing the finger and nail to press into the palm and the fingernail had made an indentation in the palm of the hand. Upon closer observation the middle finger had made a reddened area approximately 0.2 centimeters (cm) by 0.2 cm by 0.1 cm that appeared to have been open at one time but no longer open but red in color. The indentation was a match to his nail on the middle finger. The fourth finger on his right hand was bent at the distal digit with the bottom of the finger pressed into the palm of the hand and the nail on the fourth finger was thick and uneven on the top of the nail. Resident #24 stated he would like for his fingernails to be trimmed and said he didn't like for them to be long because they dug into the skin of his hand.</p> <p>An observation on 01/21/26 at 9:13 AM revealed Resident #24 sitting in his high-back wheelchair in the hallway with other residents participating in activity with snacks and drinks. The resident's fingernails remained long and appeared the same as on 01/20/26.</p> <p>An observation on 01/21/26 at 3:35 PM revealed Resident #24 resting in bed with clothes on with his universal cuff still on his left hand from lunch. The right hand had no palm guard on and the resident's right palm had a malodor coming from his hand. The resident stated the left hand splint (universal cuff) allowed him to be able to feed himself using built up utensils and stated the staff put the utensil in the pocket for him in his left palm. He stated no one had been in and talked with him about cutting his fingernails.</p> <p>Review of Resident #24's weekly skin assessment dated 01/21/26 and completed by Nurse #1 revealed his skin was dry and cool, he had a pressure-reducing mattress with no edema present and no new skin abnormalities noted. The document also revealed his fingernails were cleaned and trimmed.</p> <p>A telephone interview on 01/22/26 at 12:09 PM with Nurse #1 revealed she had completed Resident #24's skin assessment on 01/21/26. She stated she had not noticed any area on the palm of his right hand or that his nails were long and said maybe she "should have used a flashlight" so she could see his skin better when completing her assessment. Nurse #1 further stated she had noticed a malodor in his right hand before and had</p>	F0684

F0684 SS = D	<p>Continued from page 28 removed and cleaned moist exudate from the palm and put powder on his palm after cleaning it.</p> <p>An observation of Resident #24 and interview on 01/22/26 at 10:03 AM with Nurse #3 revealed the resident was not wearing his palm guards and when Nurse #3 saw the resident's fingernails he agreed his fingernails needed to be trimmed, and he stated he was not aware of the red area on the resident's palm caused by his fingernail. Upon closer observation the middle finger had made a reddened area approximately 0.2 cm by 0.2 cm by 0.1 cm that appeared to have been open at one time but no longer open but red in color. The indention in his palm was a match to his nail on the middle finger.</p> <p>An interview on 01/22/26 at 9:52 AM with Nurse Aide (NA) #1 revealed that she cared for Resident #24 frequently on 1st shift (7:00 AM to 3:00 PM). NA #1 stated she was caring for Resident #24 on 01/22/26 and that he had adaptive equipment that he used and a special splint that he used on his left hand that allowed him to feed himself. She stated they sometimes assisted him with his meals but said he liked to use his splint to feed himself. NA #1 further stated that Resident #24 usually got his showers on 2nd shift (3:00 PM to 11:00 PM) and said that was usually when staff trimmed his fingernails after his shower but said she didn't know the last time they were trimmed and filed. She further stated he was dependent for his care and said she had occasionally noted a foul odor coming from his right hand and had cleaned it good and dried it so there was no moist exudate in the hand. NA #1 walked into Resident #24's room and observed his fingernails and the reddened area on his right palm caused by his middle fingernail pressing into his palm and said his fingernails needed to be trimmed. NA #1 stated she had not noticed the area on his palm before 01/22/26. She further stated she would let the nurse know Resident #24's fingernails needed to be trimmed since he was diabetic, and she could not trim them.</p> <p>An observation of Resident #24 and interview on 01/22/26 at 10:23 AM with the Director of Nursing (DON) revealed the resident's middle finger on the right hand was bent at the proximal digit to the palm of the hand causing the finger and nail to press into the palm and the fingernail had made an indention in the palm of the hand. Upon closer observation the middle finger had made a reddened area approximately 0.2 centimeters (cm) by 0.2 cm by 0.1 cm that appeared to have been open at one time but no longer open but was red in color. The indention was a match to his nail on the middle finger. The DON stated the reddened area on his right palm from</p>	F0684

F0684 SS = D	<p>Continued from page 29 his middle fingernail pressing into his palm should not have happened and said that his fingernails needed to be trimmed and filed. The DON further stated the nurses should be checking his hands and palms daily and especially during their weekly skin assessments and should be removing the palm guards to thoroughly observe his skin. She stated it should have been recognized and reported to the Wound Nurse for treatment. The DON indicated she would get OT to see him to see what type of palm guards they could get him to prevent his nails from breaking the skin in his palm.</p> <p>An observation of Resident #24's palm and interview on 01/22/26 at 10:32 AM with the Certified Occupational Therapy Assistant (COTA) revealed the resident was not currently on caseload for OT but had been in the past. She stated when she had worked with him previously she had soaked his bilateral hands in warm water and cleaned them due to having moist exudate with an odor in his palm. The COTA observed his hands on 01/22/26 and noticed the reddened area caused by his middle finger nail and said he had an odor today in his right hand.</p> <p>An interview on 01/22/26 at 4:35 PM with Unit Manager #2 revealed she was not aware until today (01/22/26) that Resident #24 had a reddened place on his right palm caused by his middle fingernail.</p> <p>An interview on 01/23/26 at 12:14 PM with the Wound Nurse revealed no one had notified her of any skin issue on Resident #24's right hand. She stated if there had been an area on his palm the staff should have notified her so that she could put treatment in place for the area.</p> <p>A follow up interview on 01/23/26 at 3:35 PM with the DON revealed it was her expectation that the nurses assess resident's skin on the weekly skin assessments and identify any new skin issues and notify the appropriate discipline. The DON stated the Nurse Aides (NAs) and nurses caring for Resident #24 should have noticed the area on his palm caused by his fingernail and it should have been documented and treatment put into place to treat it and therapy consulted to evaluate him for a different type of palm guard.</p> <p>An interview with the Administrator on 01/23/26 at 3:50 PM revealed he was disappointed that his staff had not assessed and addressed Resident #24's reddened area to his palm. He stated it was his expectation that staff assess and address any skin issues on residents as soon as possible.</p>	F0684

F0804 SS = D	<p>Continued from page 33</p> <p>3. Resident #23 was admitted to the facility on 07/17/25.</p> <p>Review of Resident #23's quarterly MDS assessment dated 10/23/25 revealed Resident #23 was cognitively intact with no delusions, behaviors, or rejection of care.</p> <p>An interview with Resident #23 on 01/20/25 at 12:52 PM revealed he was not pleased with the quality or temperature of the food served on the meal trays. He described the meal trays as looking like "vomit" and stated most days the meals were cold when they arrived at his room.</p> <p>An observation of food temperatures on the meal service line completed on 01/21/26 at 12:02 PM revealed all foods were above the minimum holding temperature of 135 degrees Fahrenheit (F) and ranged from 161 – 185 degrees.</p> <p>After obtaining temperatures of the food items on the tray service line on 1/21/25, the Dietary Manager was informed of a request for two test trays, one of the main meal and one of the alternate offering meal. The test trays were plated at 12:23 PM and left the kitchen at 12:26 PM. The test trays arrived on the hall at 12:29 PM and the first tray delivered to a resident occurred at 12:32 PM with the final tray being delivered to a resident occurred at 12:41 PM. The following were the observations of the two requested test trays that occurred at 12:45 PM:</p> <p>Test Tray #1 consisted of sliced ham, broccoli, yams, and a dinner roll. When the dome lid was removed, there was no observable steam rising from the plate. The ham was observed to be warm, but not hot with good flavor and good texture. The broccoli was cool but had good flavor and still had some crunch, indicating that it had not been overcooked. The yams were mushy and no real flavor outside of what was already prepared when they were canned. The yams were also warm but not hot. The dinner roll was almost room temperature but had a good crust on the outside but remained soft on the inside.</p> <p>Test Tray #2 consisted of chicken tenders, diced cabbage, rice, and a dinner roll. When the dome lid was removed there also was no observable steam rising from the plate. The chicken tenders were warm but not hot, they appeared pale and the breading was soft and mushy. The diced cabbage was warm but not hot with an overwhelming flavor of butter when tasted, almost drowning out any flavor of cabbage. The rice was warm,</p>	F0804	<p>Continued from page 33</p> <p>Effective 1/24/2026, the facility implemented the following process improvements:</p> <p>Tray line temperature checks will be documented each meal service to ensure hot foods remain above 135 F prior to service.</p> <p>Nursing staff will begin tray pass promptly upon tray arrival to the unit and document time of tray arrival and completion.</p> <p>Dietary staff will review cooking methods for precooked frozen items to ensure optimal texture and appearance.</p> <p>Dietary and nursing staff received education from Administrator on 1/24/2026 regarding food quality, temperature standards, and tray delivery expectations. Newly hired, absent, or contracted dietary and nursing staff will receive education upon hire, prior to receiving assignment.</p> <p>Step 4: Monitoring and Maintaining Compliance:</p> <p>The Dietary Manager or designee will complete weekly audits of 5 resident trays for 6 weeks, then 5 monthly for 3 months to monitor temperature, appearance, and palatability.</p> <p>Administrator shall receive a weekly test tray for 6 weeks and then monthly for 3 months to monitor temperature, appearance, and palatability.</p> <p>Results of audits, resident interviews, grievance trends, and Resident Council feedback will be reviewed monthly at QAPI for tracking and trending purposes.</p> <p>Any identified concerns will result in immediate corrective action and re-education as determined by the QAPI committee.</p> <p>Date of Compliance: 2/10/2026</p>

F0804 SS = D	<p>Continued from page 34 tender and tasted like plain white rice. There was observable liquid bleeding from the cabbage and into the chicken tenders and rice. The dinner roll was almost room temperature but had a good crust on the outside but remained soft on the inside.</p> <p>An interview with the Dietary Manager on 01/21/26 at 12:53 PM revealed the test tray meals were not warm but that test tray #2 held the temperature better than test tray #1. She stated the exterior of the chicken tenders did look pale, soft, and not crispy as you would expect fried chicken tenders to be but stated it also could be from the type of breading used on the chicken tenders as they are precooked and shipped to the facility frozen. She also indicated that the mushy breading of the chicken tenders could be caused by steam from the meal getting trapped in the dome lid and causing the breading to become soft.</p> <p>During a follow up interview with Resident #9 on 01/21/26 at 12:32 PM, Resident #9 reported that his meal tray had broccoli and 2 chicken tenders. Resident #9 reported the chicken tenders were pale in color and reported overall, the meal was "just okay". Resident #9 declined wanting anything else or different from the facility's kitchen.</p> <p>During a follow up interview with Resident #10 on 01/21/26 at 1:12 PM, Resident #10 reported on a scale of 1 to 3, 1 being terrible and 3 being great, that he would rate his meal as a 1. Resident #10 reported he received a meal that consisted of chicken tenders, mashed potatoes, cabbage, a dinner roll and dessert. Resident #10 indicated that the meal was cool and did not have a good appearance.</p> <p>During a follow up interview with Resident #23 on 01/21/26 at 3:16 PM, Resident #23 reported his while his lunch meal was "better than it normally was", he did not eat all of it, but it still was not very appetizing and was not very warm.</p> <p>During the Resident Council group interview completed on 01/22/26 at 11:02 AM, the attending residents reported that there were issues with the food served from the kitchen. The interviewed residents (Resident #53, Resident #54, Resident #108, and Resident #111) reported their main food complaints had to do with lack of seasoning of food and the over or undercooking of various food items.</p> <p>During a follow up interview with the Dietary Manager on 01/21/26 at 1:26 PM, she reported the facility does have a Food Committee that consists of residents within</p>	F0804

F0804 SS = D	Continued from page 35 the facility and that they meet monthly to review any food concerns and to talk about what menu items are working or if there need to be changes made to the menus. She indicated that most of the complaints that she heard from the food committee dealt with individual preferences and stated that she believed that the majority of temperature complaints regarding the meal trays had more to do with how long the meal trays sat on the halls before the floor staff pass them out. The Dietary Manager continued, stating that for a resident like Resident #23, whose room was at the end of a hall, if the meal trays were not passed timely, it could result in his meal tray not being warm. During an interview with the Administrator on 01/23/26 at 3:54 PM he revealed he had received some complaints about the food served from the kitchen. He reported most of the complaints were preference-related and he felt they had been handled. The Administrator reported it was very difficult to please over 100 residents but stated there should not be as many complaints about the quality and temperature of the food as there had been reported. The Administrator stated he had not had a test tray from the kitchen in some time and stated with the amount of food complaints being brought to his attention, he should be requesting a test tray more often. F0808 SS = D	<p>Continued from page 36 with a diagnosis including hypothyroidism (underactive thyroid).</p> <p>Resident #10 had a physician order dated 07/09/25 for a regular diet with double portions for weight management.</p> <p>A summary of the Registered Dietitian (RD) note dated 11/04/25 was as follows: Resident #10 was seen for a significant weight change and skin review. Resident #10 had a good appetite with his current diet order (regular, cardiac/no salt, double portions) and usually ate 75-100% of meals. The RD note further stated she added double portions to all meals for weight management and increased kilocalorie (unit of energy) intake and this helped stabilize Resident #10's weight.</p> <p>The care plan for nutrition last revised 11/09/25 revealed Resident #10 had the potential for a nutritional problem related in part to a history of unintentional weight loss. Interventions included providing Resident #10's diet as ordered and monitoring his dietary intake.</p> <p>Review of the quarterly Minimum Data Set (MDS) assessment dated 12/31/25 revealed Resident #10 was cognitively intact, weighed 151 pounds, and had not had any weight gain or weight loss.</p> <p>An observation of Resident #10's lunch meal ticket on 01/21/26 at 1:12 PM revealed he was to receive a regular diet with double portions. An observation of Resident #10's meal tray at the same date and time revealed he received 2 chicken tenders, one serving of mashed potatoes, one serving of cabbage, and one dinner roll. Resident #10 had just received his meal tray at the time of the observation.</p> <p>An interview with Resident #10 on 01/21/26 at 1:12 PM revealed he was supposed to get double portions for meals, and he had only received double portions approximately twice since he was admitted. Resident #10 stated he could eat 4 chicken tenders if he had them.</p> <p>An observation of Resident #10's meal tray with the Dietary District Manager on 01/21/26 at 1:19 PM revealed Resident #10 had not received a double portion of chicken tenders on his plate. The Dietary District Manager stated double portions were considered to be two servings of protein and Resident #10 should have received four chicken tenders.</p> <p>An interview with the Dietary Manager on 01/21/16 at 1:26 PM revealed that since Resident #10 had a</p>	F0808	<p>Continued from page 36</p> <p>The tray line staff responsible for meal accuracy were counseled by the District Dietary Manager on verifying diet orders against tray cards prior to tray departure from the kitchen.</p> <p>Both residents were monitored for intake and offered additional protein portions to ensure dietary needs were met.</p> <p>Step 2: Identification of Other Residents:</p> <p>On 1/23/2026 a 100% audit was conducted by District Dietary Manager of all residents with physician orders for double portions or therapeutic protein modifications to ensure meal trays reflected ordered diets.</p> <p>Any discrepancies identified were corrected immediately and staff re-educated as needed by the District Dietary Manager.</p> <p>Step 3: Measures to Prevent Recurrence:</p> <p>Effective 1/24/2026, the facility implemented the following process improvements:</p> <p>The Dietary Manager or designee will be present on the tray line during meal service to monitor accuracy of therapeutic diets.</p> <p>A second check system was implemented requiring the final tray line staff member to verify protein portions against the tray ticket prior to tray delivery.</p> <p>Dietary staff received education from the Administrator regarding therapeutic diet orders, including double protein portion standards. Any newly hired, absent or contracted dietary staff will receive education upon hire, prior to receiving assignments.</p> <p>Step 4: Monitoring and Maintaining Compliance:</p> <p>The Dietary Manager or designee will audit 5 therapeutic diet trays per meal, weekly for 6 weeks,</p>

F0808 SS = D	<p>Continued from page 38 double protein portions and had end of life skin failure on the sacrum, left heel, right lateral midfoot, and right fifth toe. The RD noted Resident #2's current plan of care was ongoing, and the RD would follow-up as needed.</p> <p>Review of Resident #2's physician's orders revealed a diet order dated 01/17/25 for a mechanical soft diet with double protein portions.</p> <p>An observation of Resident #2's meal ticket on 01/22/26 at 12:48 PM revealed he was to receive a mechanical soft diet with double protein portions. An observation of Resident #2's meal tray at the same date and time revealed he received a chicken salad sandwich, a scoop of potato salad, a scoop of chopped broccoli salad, and mandarin oranges for dessert. The sandwich consisted of chicken salad placed between two slices of bread and was cut diagonally. The edges of all four sides of the slices of bread were touching, and the sandwich appeared uniformly thin without central bulging, indicating that Resident #2 did not receive a double protein portion.</p> <p>During an interview on 01/22/26 at 12:49 PM, Nurse Aide (NA) #1 confirmed she assisted Resident #2 with his lunch meal. NA #1 stated he received one chicken salad sandwich, but she could not state for certain if the sandwich had a double protein portion.</p> <p>During a phone interview on 01/23/26 at 11:35 AM, the RD stated Resident #2 was to receive double protein with his meals and when he was served a sandwich, it should contain double the meat. The RD stated the primary reason Resident #2 had a diet order to receive double protein portions was due to end-of-life skin failure and she would expect for him to receive double protein portions with meals as ordered.</p> <p>During an interview on 01/23/26 at 1:21 PM, the Dietary Manager explained for residents with a diet order for double proteins, dietary staff were to use a #8 scoop, equivalent to 4 ounces. She explained that when properly portioned, the meat should prevent the bread slices from fully meeting at the edges and should be visible between the slices of bread when the sandwich was cut. The Dietary Manager reported that she was usually present on the tray line to ensure meals were being plated according to the meal ticket; however, she</p>	F0808

F0842 SS = D	<p>Continued from page 42 was the acting second shift Supervisor when Nurse #8 informed her of medication errors that she made by giving Resident #83 Resident #33's medications. Supervisor #9 continued to explain that she did not document the medications that were given to Resident #83 in error on 11/06/25 because Nurse #8 should have documented the medication errors since she was the Nurse who made the errors. The Supervisor stated she was not aware that Nurse #8 did not document the medications she gave Resident #83 in error on 11/06/25.</p> <p>An interview was conducted with the Director of Nursing (DON) on 01/28/26 at 10:00 AM. The DON explained that on the night of 11/06/25 Nurse #8 administered Resident #33's medications to Resident #83 by mistake and immediately reported her mistake to Supervisor #9. The DON acknowledged that neither Nurse #8 or Supervisor #9 documented the specific medications that were given to Resident #83 by mistake on 11/06/25 in the Resident's medical record and stated the documentation should have been entered into the medical record at the time of the incident. The DON indicated she should have included all the medications that were given to Resident #83 when she completed the Change in Condition form on 11/06/25. The DON added that she expected the nurses to document accurately in the residents' medical record as situations develop and that included the specific medications that were given to Resident #83 on 11/06/25 in error.</p>	F0842
