

Chapter 14 compared to other SMFP chapters

CHAPTER 14 – ESRD DIALYSIS FACILITIES

- Provide/analyze data twice a year
- Data/need determinations published in SDR January 1 & July 1
- 2-pronged methodology: (1) county need based on county utilization; (2) facility need based on facility utilization
- If facility need identified, only the facility that generated the need can apply for CON
- SHCC does not review data in SDR nor does Agency submit SDR to Governor for approval

OTHER SMFP CHAPTERS

- Provide/data annually
- Data & need determinations published annually in SMFP
- Need determinations are for entire county (with a few exceptions)
- If facility need identified, any eligible entity can apply for CON
- SHCC reviews data and submits SMFP to Governor for approval

How does this change affect the Acute Care Services Committee?

- Get up to speed on methodology
- No workgroup
 - Adjust projection calculations to account for move from semi-annual to annual data reporting.
 - Address assumptions of methodology.
- Interested parties meetings
 - First held April 13, 2018
 - Next meeting November 14
