Regarding the Petition for Adjustment to Need Determinations for Mobile PET Scanner

Proposed 2011 North Carolina State Medical Facilities Plan

August 16, 2010

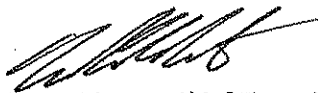

Swain County Hospital is requesting an adjustment to the mobile Position Emission Tomography (PET) scanner need determination contained in the Proposed 2011 State Medical Facilities Plan.

The plan currently being considered by the Medical Facilities Planning Section states that there is no need for an additional mobile scanner anywhere in the state. Swain Regional Hospital is requesting at least one additional mobile PET scanner for the west mobile PET scanner Health Services Areas 1, 2 and 3.

Swain County is a rural area, and patients in Swain County often lack access to PET services. There is currently only one mobile PET scanner for 18 hospitals in Western North Carolina and it is operating above capacity. Swain County Hospital receives mobile PET services only half-a-day every other week. That can create a hardship for patients who are ill and are forced to travel long distances along curvy mountain roads during winter months.

We strongly encourage the State Medical Facilities Planning Section to consider allowing for one additional PET CON for the West Mobile PET Scanner Planning Region.

Respectfully submitted:

Gene Winters, Chief Financial Officer

MedWest Health System
Harris Regional Hospital
Haywood Regional Medical Center
Swain County Hospital
