Dear Dr. Greene:

As a physician with Graystone Ophthalmology Associates, I am writing this letter in support of Graystone Eye Surgery Center's petition for an adjusted need determination for one additional operating room in Catawba County. I perform surgery at Graystone Eye Surgery Center, so I have first-hand knowledge of the growing need for local OR access. Last year, Graystone Ophthalmology surgeons performed over 6,000 surgical cases at the facility. The Center's two operating rooms currently operate above practical capacity. An additional operating room is needed to alleviate capacity constraints and to provide improved access for the elderly and other medically underserved residents.

Ophthalmic surgery is well utilized by individuals age 65 and older. Catawba County and the Unifour area have a large and growing elderly population. As this population continues to increase, and as employer/insurer incentives and technological advances continue to encourage patients to obtain services in more cost-effective outpatient settings, it is evident that a growing demand for outpatient ophthalmic surgical services will persist in our community.

Last year we petitioned the SHCC for this same adjusted need determination, and the Agency Report recommended approval of our petition. However, the Acute Care Committee encouraged us to reach out to the local hospitals to explore opportunities to better utilize their existing operating rooms. We have met with the Chief Executive Officers of both hospitals in Hickory. However, neither indicated interest in developing alternative solutions to better utilize the OR inventory in ways that will be more cost effective for patients.

My colleagues and I were disappointed that the revised Operating Room Methodology for the Proposed 2018 SMFP did not indicate a need for additional operating rooms in Catawba County. We maintain that there are unique circumstances in Catawba County with regard to ophthalmic surgical utilization which substantiate additional OR need. I encourage the SHCC to recognize these unique circumstances so that we may continue to provide appropriate outpatient surgical access for local residents.

Sincerely,

A handwritten signature in black ink, appearing to read "Randal J. Williams". The signature is fluid and cursive, with a small flourish at the end.

Dear Dr. Greene:

As a physician with Graystone Ophthalmology Associates, I am writing this letter in support of Graystone Eye Surgery Center's petition for an adjusted need determination for one additional operating room in Catawba County. I perform surgery at Graystone Eye Surgery Center, so I have first-hand knowledge of the growing need for local OR access. Last year, Graystone Ophthalmology surgeons performed over 6,000 surgical cases at the facility. The Center's two operating rooms currently operate above practical capacity. An additional operating room is needed to alleviate capacity constraints and to provide improved access for the elderly and other medically underserved residents.

Ophthalmic surgery is well utilized by individuals age 65 and older. Catawba County and the Unifour area have a large and growing elderly population. As this population continues to increase, and as employer/insurer incentives and technological advances continue to encourage patients to obtain services in more cost-effective outpatient settings, it is evident that a growing demand for outpatient ophthalmic surgical services will persist in our community.

Last year we petitioned the SHCC for this same adjusted need determination, and the Agency Report recommended approval of our petition. However, the Acute Care Committee encouraged us to reach out to the local hospitals to explore opportunities to better utilize their existing operating rooms. We have met with the Chief Executive Officers of both hospitals in Hickory. However, neither indicated interest in developing alternative solutions to better utilize the OR inventory in ways that will be more cost effective for patients.

My colleagues and I were disappointed that the revised Operating Room Methodology for the Proposed 2018 SMFP did not indicate a need for additional operating rooms in Catawba County. We maintain that there are unique circumstances in Catawba County with regard to ophthalmic surgical utilization which substantiate additional OR need. I encourage the SHCC to recognize these unique circumstances so that we may continue to provide appropriate outpatient surgical access for local residents.

Sincerely,

A handwritten signature in black ink, appearing to read "Patrick J. Kelty". The signature is fluid and cursive, with a long horizontal stroke extending to the right.

Patrick J. Kelty, MD
