# **The North Carolina VIPER Medical Network (VMN)**

## **Introduction**

Following is a description of the state operated medical radio system in North Carolina. This system is call the “VIPER Medical Network” (VMN). Generic information regarding the developing North Carolina VIPER (Voice Interoperability Plan for Emergency Responders) radio network is also included. These descriptions provide direction for the developing statewide medical radio systems as the systems continue to evolve.

North Carolina has implemented a statewide P25 trunked digital radio system. This radio system referred to as the “Viper Network” for Voice Interoperability Plan for Emergency Responders. As a sub-system within the VIPER trunked radio network is the "Viper Medical Network" or VMN, which establishes a digital talk group for every hospital, military hospital, veteran’s hospital, mobile hospital, SMAT II teams and a common community health center talk group within the state. Provisions are included for the temporary assignments of talk groups for special medical or disaster events. The VMN provides radio connection to any hospital, ambulance or field medical service unit from anywhere to anywhere in the state.

For interoperability compatibility, every radio that is functioning as part of the VMN must have a common group of channels or "talk groups" with standard channel names. The VMN radios must be equipped with a series of identical channels with standard channel names.

The standardized Talk Groups for the VMN radios are set up in eight classifications:

1. Statewide Medical Talk Groups used for medical and patient communication
2. Statewide Calling Talk Groups
3. Statewide Event Talk Groups
4. State Highway Patrol (SHP) Common and Mutual Aid Talk Groups
5. North Carolina Emergency Management Approved Talk Groups
6. Statewide Roamer Talk Groups
7. Statewide General Pool Talk Groups
8. Domestic Preparedness Regions (DPR) Talk Groups

## **STATEWIDE MEDICAL VMN TALK GROUPS**

The Viper Medical Network provides a talk group “channel” for every hospital in the state thus enabling VMN VIPER users the ability to contact hospitals for medical or patient care communication from anywhere in the state.

There are 208 statewide digital Viper Medical "VM" talk groups. Each of the hospital talk groups is identified by a 5-digit numeric address and/or hospital aliases that are grouped into thirteen radio zones or banks identified as the “VM” talk groups. These zones are established so the channels can be installed in mobile or portable radios which typically have 16 switch positions, as well as in the hospital control stations.

The hospital talk groups are identified by a three character zone such as “VMA,” “VMB,” “VMC,” “VMD,” “VME,” etc. ... up through to “VMM.” Within each of these thirteen VM zones there are sixteen numeric 5-digit addresses and/or hospital aliases that correspond to each hospital in the state. Each hospital has a pre-designated VM address which the hospital obtains by authorization when it installs a VIPER medical control radio. Active VM hospital addresses and aliases are listed in this VMN Guide as well as on the web at: <http://www.ncdhhs.gov/dhsr/EMS/pdf/dtmfref.pdf>

All VM mobile, portable and hospital control radios must have all of the VM talk group list programmed into the radio to insure operational compatibility when future hospitals are implemented or when temporary VMN talk groups are assigned for special events or disasters.

## **STATEWIDE CALLING TALK GROUPS**

The VIPER Statewide Calling Talk Groups allow VIPER radio users to make contact with the 9-1-1 Center or Public Safety Answering Point (PSAP) in properly equipped counties across the state. This enables any VIPER radio to contact either their home 9 - 1-1 Center when they are out of their home county or to contact the 9-1-1 Center in the county that they may be in at the time assistance is needed. Contact can be established by installing a station to monitor these talk groups.

There are FIVE Statewide Calling Talk Groups located within the radio in the zone identified as “SW”.

These are listed below with the standard channel name used for programming:

1. Statewide Call ..... SW CALL
2. Statewide Law.....SW LAW
3. Statewide Fire ..... SW FIRE
4. Statewide EMS ..... SW EMS
5. Statewide General Government ..... SW GEN

**NOTE:**

The Five Statewide Calling Talk Groups are ONLY FOR CALLING PURPOSES.

Each properly equipped county 9-1-1 center will have a control station set to monitor the Statewide Call (SW CALL) talk group at all times. The Statewide Call (SW CALL) talk group is essentially a large party line, similar in operation to the old “Inter-City” channel used between 9-1-1 centers. One of the most significant differences with the Statewide Call (SW CALL) talk group is that it allows VIPER users with mobile and portable radios to communicate with the 9-1-1 Centers statewide. The Statewide Law, Fire, EMS and General Government talk groups are to be utilized after communications with the center has been established and the VIPER user is switched to the appropriate talk group. If a VIPER user with either a mobile or portable radio needs to contact a 9-1-1 center using the Statewide Call (SW CALL) talk group, the following procedure should be followed:

- Adjust the radio to the “SW CALL” talk group.
- Give the name of the county 9-1-1 center that you are calling.
- Give your agency name and unit identifier, followed by the words “on Statewide Call.”
- For example: **“Carteret County 9-1-1, this is Wake County Sheriff Unit 301 calling on Statewide Call”**

This provides three important pieces of information:

1. **The name of the County 9-1-1 Center that you are calling.**
2. **Your Agency name, Unit number and Discipline, e.g. Law Enforcement, Fire, EMS, EM, etc.**
3. **The Channel that you are calling the 9-1-1 Center on, e.g. Statewide Call**

When the contacted 9-1-1 Center receives a call from a VIPER user, based on the information provided in the contact message, a determination will be made as to which of the four discipline specific Statewide Calling Talk Groups should be used for further the conversation. For example, if the calling user was a Sheriff or Police agency, then the 9-1-1 Center would recommend to the VIPER user that they move to Statewide Law (SW LAW) to continue the radio communications with that center. An example of this would be:

- The 9-1-1 Center would respond to the calling VIPER user:  
**“Wake County Sheriff Unit 311, this is Carteret County 9-1-1,  
switch to Statewide Law”**

This accomplishes three important things:

1. It provides calling VIPER user with clear direction about what channel they need to change to so that they can relay their request to the 9-1-1 center;
2. It removes the conversation between the 9-1-1 center and the calling VIPER user from the Statewide Call (SW CALL) talk group so that the “party line” is clear for further radio communications statewide; and,
3. Allows the 9-1-1 Center and the calling VIPER user to communicate on the discipline specific channel their request.

Once the communication between both the 9-1-1 Center and the VIPER user is complete, then the 9-1-1 Center would return its control station to the Statewide Call talk group, ready for future contacts and the calling VIPER user would return to the channel that they were operating on prior to initiating the Statewide Call.

## **STATEWIDE EVENT TALK GROUPS**

The VIPER Statewide Event Talk Groups are not assigned to any specific agency. They provide all VIPER users thirty-two (32) statewide talk groups which can be directed in the event of a multi -agency response that exceeds the scope of a normal occurrence or covers a larger than normal geographic area. The state EOC 24-Hour Center serves as the clearinghouse for assignment of these talk groups based upon location and need. The Statewide Event Talk Groups are in a zone or bank in the radio identified as “EVENT” or “EVT”. They have the standardized channel naming listed below:

- |            |              |             |             |
|------------|--------------|-------------|-------------|
| 1. Alpha 1 | 9. Charly 1  | 17. Echo 1  | 25. Golf 1  |
| 2. Alpha 2 | 10. Charly 2 | 18. Echo 2  | 26. Golf 2  |
| 3. Alpha 3 | 11. Charly 3 | 19. Echo 3  | 27. Golf 3  |
| 4. Alpha 4 | 12. Charly 4 | 20. Echo 4  | 28. Golf 4  |
| 5. Bravo 1 | 13. Delta 1  | 21. Fxtrt 1 | 29. Hotel 1 |
| 6. Bravo 2 | 14. Delta 2  | 22. Fxtrt 2 | 30. Hotel 2 |
| 7. Bravo 3 | 15. Delta 3  | 23. Fxtrt 3 | 31. Hotel 3 |
| 8. Bravo 4 | 16. Delta 4  | 24. Fxtrt 4 | 32. Hotel 4 |

## **STATEWIDE HIGHWAY PATROL MUTUAL AID TALK GROUPS**

The VIPER Statewide Highway Patrol Mutual Aid Talk Groups serve as a means for all VIPER users to have the ability to contact one of the State Highway Patrol’s eight (8) communications centers. They also allow VIPER users monitoring one of the eight (8) Troop Mutual Aid talk groups to hear emergency messages, referred to by the SHP as

“Signal 25” broadcasts. There are eight (8) SHP Troop Mutual Aid talk groups authorized for all VIPER users. They have the standardized channel naming listed below:

- Troop A Mutual Aid (Williamston) ..... TRPA MAID
- Troop B Mutual Aid (Elizabethtown) ..... TRPB MAID
- Troop C Mutual Aid (Raleigh) ..... TRPC MAID
- Troop D Mutual Aid (Greensboro) ..... TRPD MAID
- Troop E Mutual Aid (Salisbury) ..... TRPE MAID
- Troop F Mutual Aid (Newton) ..... TRPF MAID
- Troop G Mutual Aid (Asheville) ..... TRPG MAID
- Troop H Mutual Aid (Monroe) ..... TRPH MAID

In addition to the SHP Mutual Aid Talk Groups, there are eight (8) Troop Common Talk Groups designed to be utilized to communicate directly with a State Trooper without disrupting the SHP’s operation on its respective Troop and District Dispatch Talk Group. These same talk groups are used to provide “Car to Car” communications between SHP personnel. The talk groups are listed below with their standardized channel naming: These talk groups are not commonly available to all VIPER users.

- Troop A Common 2 ..... TRPA COM2
- Troop B Common 2 ..... TRPB COM2
- Troop C Common 2 ..... TRPC COM2
- Troop D Common 2 ..... TRPD COM2
- Troop E Common 2 ..... TRPE COM2
- Troop F Common 2 ..... TRPF COM2
- Troop G Common 2 ..... TRPG COM2
- Troop H Common 2 ..... TRPH COM2

## **NC EMERGENCY MANAGEMENT (NCEM) TALK GROUPS**

North Carolina Emergency Management (NCEM) has authorized certain talk groups to be provided to local emergency officials to facilitate coordination between state emergency management staff, the State Emergency Operations Center (EOC) and local agencies. These four talk groups are to be used primarily by local emergency management representatives, however they may be used on a secondary basis by any duly authorized representative of any federal, state or local emergency response agency for the same purpose: The NCEM talk groups are listed below along with their standardized channel naming:

- NCEM Eastern Branch Office Staff ..... NCEM-EBO
- NCEM Central Branch Office Staff ..... NCEM-CBO
- NCEM Western Branch Office Staff ..... NCEM-WBO
- NCEM State Emergency Operations Center (EOC) ..... NCEM-EOC

## **STATEWIDE ROAMER TALK GROUPS**

Six (6) statewide roamer talk groups have been established for the purpose of providing all agencies utilizing VIPER, either as a day- to-day user or as an inter-operability user, with a series of talk groups that may be used for communication with VIPER users that may be traveling outside of their home geographic area but do not require dedicated means of communications with their units. An example would be an ambulance on an out of county transport that desires to contact their home county with routine radio traffic concerning their unit status, destination and availability. These six (6) talk groups are statewide talk groups but are divided among the three areas of the state corresponding to the VIPER Operational “ZONES”. The roamer talk groups are listed below along with their standardized channel naming:

- VIPER East Roam 1 .....VEROAM1
- VIPER East Roam 2 .....VEROAM2
  
- VIPER Central Roam 1 ..... VCROAM1
- VIPER Central Roam 2 .....VCROAM2
  
- VIPER West Roam 1 ..... VWROAM1
- VIPER West Roam 2 ..... VWROAM2

## **STATEWIDE GENERAL POOL TALK GROUPS**

As a means for any agency using VIPER to have at its disposal a series of “AD HOC” talk groups, six (6) statewide general pool talk groups have been established for the purpose of providing all agencies utilizing VIPER, either as a day-to-day user or simply as an inter-operability user, with a series of talk groups that may be used for communication with other VIPER users on an “as needed” basis. These six (6) talk groups are statewide talk groups but are divided among the three areas of the state corresponding to the VIPER Operational “ZONES”. The general pool talk groups are listed below along with their standardized channel naming:

- VIPER East Pool 1 .....VEPOOL1
- VIPER East Pool 2 .....VEPOOL2
  
- VIPER Central Pool 1 ..... VCPOOL1
- VIPER Central Pool 2 .....VCPOOL2
  
- VIPER West Pool 1 ..... VWPOOL1
- VIPER West Pool 2 ..... VWPOOL2

## **NATIONAL PUBLIC SAFETY PLANNING ADVISORY COMMITTEE (NPSPAC) TALK GROUPS**

NPSPAC has designated national mutual aid channels to facilitate 800 MHz voice interoperability communications among local, state, and federal public safety agencies. The state currently has only a limited number of base stations or repeaters operating on the NPSPAC channels. Some counties have operational repeaters but in most areas of the state only “talk-around” operation is available for mutual aid communications. This generally limits the range of these channels to “at the incident scene.” There is one calling and four tactical NPSPAC Mutual Aid conventional channels. These have the national standardized channel naming listed below:

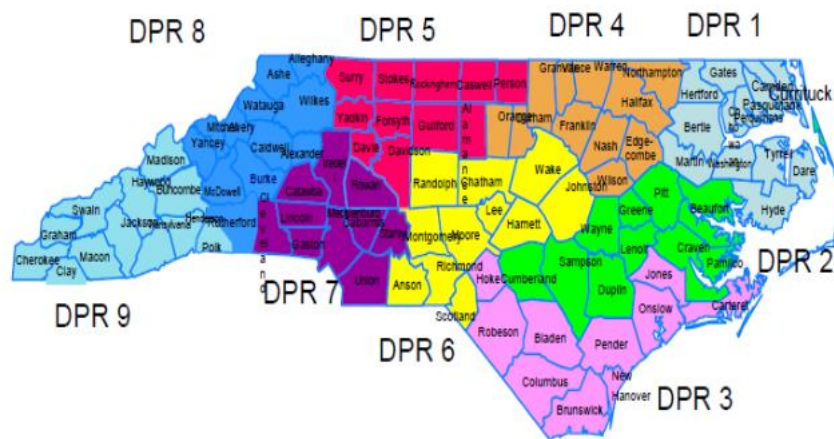

- NPSPAC Calling (conventional repeater) ..... 8CALL90
- NPSPAC Calling direct (talk around) ..... 8CALL90D
  
- NPSPAC tactical (conventional repeater) ..... 8TAC91
- NPSPAC tactical direct (talk around) ..... 8TAC91D
  
- NPSPAC tactical (conventional repeater)..... 8TAC92
- NPSPAC tactical direct (talk around) ..... 8TAC92D
  
- NPSPAC tactical (conventional repeater) ..... 8TAC93
- NPSPAC tactical direct (talk around) ..... 8TAC93D
  
- NPSPAC tactical (conventional repeater) ..... 8TAC94
- NPSPAC tactical direct (talk around) ..... 8TAC94D

## DOMESTIC PREDAREDNESS REGIONS (DPR) TALK GROUPS

The State of NC has been divided up into 9 Domestic Preparedness Regions (DPR). Each region has 10 DPR talk groups assigned. The DPR talk groups are additional interoperability resources that are typically reserved for planned events but can be utilized during an incident if needed. The DPR talk groups are located in the zone or bank within the radio identified “DPR” and have the standardized channel naming, for example DPR 1 TG 1 (thru 10), DPR 4 TG 1 (thru 10). DPR talk groups are normally assigned by the DPR coordinating county.

### Domestic Preparedness Regions (DPR) Map

## NC 700 MHZ STATEWIDE COMMON SIMPLEX FREQUENCIES

North Carolina has eight (8) 700 MHz channels set aside for statewide use. These channels operate in P25 conventional mode (except for the 2 analog DVRS channels listed). These simplex channels are means for any agency, to have at its disposal, a series of “AD HOC” radio to radio simplex channels for on-scene use, as well as, providing a standard pair of frequencies for DVRS use. These channels are listed below:

| 700 MHZ STATEWIDE |          |          |           |           |           |           |        |        |
