D 000	Initial Comments The Adult Care Licensure Section conducted an annual survey on October 04, 2017 and October 05, 2017.	D 000		
D 367	10A NCAC 13F .1004(j) Medication Administration 10A NCAC 13F .1004 Medication Administration (j) The resident's medication administration record (MAR) shall be accurate and include the following: (1) resident's name; (2) name of the medication or treatment order; (3) strength and dosage or quantity of medication administered; (4) instructions for administering the medication or treatment; (5) reason or justification for the administration of medications or treatments as needed (PRN) and documenting the resulting effect on the resident; (6) date and time of administration; (7) documentation of any omission of medications or treatments and the reason for the omission, including refusals; and, (8) name or initials of the person administering the medication or treatment. If initials are used, a signature equivalent to those initials is to be documented and maintained with the medication administration record (MAR). This Rule is not met as evidenced by: Based on observations, interviews and record reviews, the facility failed to assure medication administration records were accurate for 1 of 2 (Resident #1) sampled residents with a physician's order for sliding scale insulin (SSI). The findings are:	D 367

Review of Resident #1's current FL2 dated 08/28/17 revealed:
-Diagnoses included diabetes mellitus Type 2, acute and subacute endocarditis, and hypothyroidism.
-An order for Novalog (a fast acting insulin used to decrease elevated blood sugars) 4 units to be given daily at 8:00 am, 12 pm, and 5:00 pm.
-Another order for additional Novalog to be given daily at 8:00 am, 12:00 pm, 5:00 pm, and at 8:00 pm and according to the sliding scale insulin (SSI) parameters as follows:
Fingerstick Blood Sugar (FSBS) range 250 - 300 = give 1 unit.
FSBS range 300 - 350 = give 2 units.
FSBS range 351 - 400 = give 3 units.
FSBS range 401 - 450 = give 4 units.
FSBS range greater than 450 = give 5 units.
Call Medical Doctor (MD) if blood glucose is high and does not decrease after insulin. Recheck 30 minutes after insulin.

Review of Resident #1's August 2017 electronic Medication Administration Record (eMAR) revealed signed electronic entries for the 4 units of Novalog daily at 8:00 am, 12:00 pm and 5:00 pm.

Further review of Resident #1's August 2017 eMAR revealed:
-An entry for Novalog, use per sliding scale before meals and at bedtime (250 - 300 = give 1 unit, 300 - 350 = give 2 units, 351 - 400 = give 3 units, 401 - 450 = give 4 units, > 450 = give 5 units. Call MD if blood glucose is high and does not decrease after insulin. Recheck 30 minutes after insulin.
-The entry was transcribed on the the eMAR for FSBS daily and scheduled at 8:00 am, 12:00 pm, 5:00 pm and 8:00 pm.

D 367	Continued From page 2 -There was a space provided on the eMAR for the initials of the Medication Aide (MA) who did the FSBS. -There was not a space provided on the eMAR for the for the amount of additional insulin administered. -Insulin per SSI was not documented for 53 out of 58 opportunities with examples were as follows: -On 08/03/17 at 8:00 am, the FSBS was 258, no units were documented as administered, and 1 unit should have been administered. -On 08/07/17 at 8:00 pm, the FSBS was 329, no units were documented as administered, and 2 units should have been administered. -On 08/10/17 at 12:00 pm, the FSBS was 430, no units were documented as administered, and 4 units should have been administered. -On 08/13/17 at 8:00 am, the FSBS was 353, no units were documented as administered, and 3 units should have been administered. -On 08/20/17 at 8:00 pm, the FSBS was 296, no units were documented as administered, and 1 unit should have been administered. Interview on 10/05/17 at 11:55 am with a MA revealed: -She usually worked on Resident #1's hallway. -She was aware of the order for 4 units of Novalog before every meal and at bedtime. -She was also aware of the SSI order for Novalog for Resident #1. -She was not aware the eMAR system did not have an entry for the amount of Novalog insulin given per the SSI order. -She had not informed anyone at the facility about the lack of entry space, because she had not noticed it. -The eMAR indicated the amount of insulin to be given, based on the sliding scale order. -She knew Resident #1 received the SSI as	D 367

ordered, because she gave it to him.
-She said Resident #1 was very involved in his care and was informed of the FSBS result every time the result was collected by staff.

Interview on 10/05/17 at 11:45 am with a second MA revealed:
-She occasionally worked on the hallway where Resident #1 resided.
-She had administered the SSI as ordered when she had worked that hallway.
-She felt certain Resident #1 "always" received the SSI as ordered.
-She had not noticed there was no entry space on the eMAR to document the amount of additional Novalog administered as needed for Resident #1.
-She put her initials in the eMAR to indicate the insulin was given, but did not notice there was no space to document the amount of insulin given.
-She had not notified anyone at the facility about the "glitch" in the eMAR.

Interview on 10/05/17 at 10:50 am with the Clinical Support Specialist revealed:
-The facility was not aware the eMAR system did not allow the MAs to document additional Novalog as ordered for Resident #1.
-The facility was responsible for order entry into the eMAR system for SSI.
-The facility had failed to enter all the information necessary for documentation of the additional insulin given.
-She felt the Novalog was administered as ordered, even if the eMAR did not have a space for the entry.
-She had made the correction in the eMAR system, so the the entry was available for the additional Novalog for Resident #1.

Interview on 10/05/17 at 9:10 with Resident #1

D 367	Continued From page 4 revealed: -The staff at the facility check his FSBS four times every day. -The staff gave him 4 units of Novalog before meals and at bedtime. -The staff also gave him any additional Novalog needed, depending on what the FSBS was at that time. -"They always tell me what the reading is". -"They do a good job with my medicines". Interview on 10/05/17 at 11:30 am with the Resident Care Director (RCD) revealed: -The facility was not aware the eMAR system did not have a space to document the additional Novalog as ordered for Resident #1. -The error in the eMAR system had been corrected and now the staff administering the additional Novalog would have a space for the electronic entry. (So staff had not made her aware? Do they do eMAR audits? How often and who responsible?) -She was positive Resident #1 had received the additional Novalog as ordered, "because he would let us know if we missed anything". Interview on 10/05/17 at 11:35 am with the Administrator revealed: -She was was unaware the eMAR system did not have a entry for electronic documentation of the additional Novalog for Resident #1. -She was confident the staff administered the insulin as ordered by the physician. -The eMAR system had been corrected when the facility staff was aware of the omission.
