{D 358}	Continued From page 1 acting insulin used to stabilize blood glucose) inject 16 units subcutaneously daily. Review of a physician's order dated 11/02/21 revealed: -There was a physician's order to discontinue Lantus inject 16 units subcutaneously daily. -There was a physician's order to start Levemir (used to treat diabetes) inject 14 units subcutaneously at bedtime 30 days with two refills. Review of Resident #2's December 1-7, 2021 electronic Medication Administration Record (eMAR) revealed: -There was a computer-generated entry for Levemir inject 14 units subcutaneously at bedtime scheduled at 8:00pm. -The Levemir was documented as administered on 12/01/21 at 8:00pm. -There was documentation the Levemir was discontinued with a stop date of 12/01/21. -FSBS ranged from 94 to 223. Review of Resident #2's record revealed there was no physician's order to discontinue Levemir. Review of Resident #2's medications on hand on 12/07/21 at 12:35pm revealed there was no Levemir available to administer. Interview with Resident #2 on 12/07/21 at 9:35am revealed he did not remember getting his insulin recently. Telephone interview with a pharmacist from the facility's contracted pharmacy on 12/07/21 at 12:55pm revealed: -The physician's order for Levemir was "active" in the pharmacy computer system.	{D 358}

{D 358}	Continued From page 2 -The pharmacy did not have a physician's order to discontinue the Levemir. -Someone from the facility had called the pharmacy today and reported someone at the facility had changed the stop date for the Levemir to 12/01/21. -The pharmacy was not able to see any changes the facility made to the eMAR. Telephone interview with a medication aide on 12/08/21 at 9:47am revealed: -She did not know Resident #2's Levemir was discontinued off the eMAR. -The MAs were not responsible for approving orders for the eMAR or processing physician orders for the residents. -She did not remember what Resident #2's FSBS were in the past week. Interview with the Administrator on 12/07/21 at 1:35pm revealed: -She administered medications in the facility when needed. -The pharmacy had entered a discontinuation order on the eMAR for Levemir. -The discontinuation order for Levemir was approved by the previous Owner because the physician's order was for 30 days. -The previous Owner was working at the facility to help with processing physician's orders. -The pharmacy was responsible for entering all discontinuation orders before the facility could approve the order for the eMAR. -The only staff that could approve orders for the eMAR was the previous Resident Care Coordinator (RCC), the previous Owner, and herself. -The Levemir was sent back to the pharmacy because she thought it was discontinued. -She or the Owner were responsible for auditing	{D 358}

{D932}	Continued From page 16 -She made sure she used each resident's personal glucometer when she checked FSBS in the facility. -She did not know why there were extra FSBS readings in the glucometer or why all the documented FSBS readings on the eMAR were not on each resident's glucometer. Telephone interview with the Nurse Practitioner (NP) at 3:57pm on 12/08/21 revealed: -The facility staff should not be sharing glucometers between residents. -It was very dangerous to use the same glucometer on multiple residents because it increased the risk of infection and the risk of transmitting bloodborne pathogens. -She thought the facility had corrected this problem. -It was important for the facility to accurately document all FSBS to ensure the glucometers were not being shared. Interview with the Administrator on 12/07/21 at 1:35pm revealed: -The MAs should not be sharing glucometers between residents in the facility. -The MAs were responsible for making sure they used each resident's assigned glucometer when they checked a FSBS for a resident. -The MAs had recently been retrained by a nurse consultant from the pharmacy on the importance of not sharing glucometers. -The MAs were trained to check the name on the glucometer with the resident's name on the eMAR prior to checking a FSBS to ensure they were using the correct glucometer. -She or the Owner were responsible for auditing the glucometers. -The last audit of the glucometers was "about two weeks ago."	{D932}

{D932}	Continued From page 17 -They had found some readings on the glucometers that were not documented on a resident's eMAR. -She had the pharmacy add an entry on all diabetic resident's eMAR for the documentation of any additional readings that were checked on a resident. _____ The facility failed to implement infection control procedures consistent with the Centers for Disease Control (CDC) guidelines resulted in 3 residents having fingerstick blood sugar (FSBS) readings on their electronic Medication Administration Records (eMAR) that was not documented on their assigned glucometer showing glucometers were shared between residents increasing their risk of infection and contracting a bloodborne pathogen disease. This failure was detrimental to the resident's health, safety, and welfare and constitutes a Type B Violation. _____ The facility provided a plan of protection in accordance with G.S. 131D-34 on 12/08/21 for this violation.	{D932}
