soiled and dirty toilets, sinks, showers, bath tubs, shower chairs, and floors.

The findings are:

Review of the facility's current license effective 01/01/22 revealed the facility was licensed with a capacity of 122 beds including 72 beds for assisted living (AL) and 50 beds for a special care unit (SCU).

Review of the facility's census reports provided on 04/05/22 revealed:
-The facility's in-house census was 45 residents.
-There were 30 residents residing in the AL side of the facility.
-There were 15 residents residing in the SCU.

Review of the facility's current sanitation report dated 01/29/22 revealed:
-The facility's sanitation score was a 95.
-The flooring was badly cracked and hard to clean and there were holes in the walls in the spa bathrooms and storage rooms that needed to be patched.
-Many of the toilets, sinks, shower seats, and other fixtures of the communal bathrooms and showers were in need of cleaning and not in good repair.

1. Observation of left hall on the AL unit on 04/05/22 from 9:30am to 9:40am revealed:
-There was a strong urine smell in the hallway.
-There was a small living area mid-way down the hall on the left that also smelled of urine.
-One room on the hallway was occupied with two residents (#33); the remaining rooms were vacant.
-There were random piles of bedding and clothing on beds and on the floor in several unoccupied

rooms.
-All rooms on the left hallway, including the occupied room had mouse droppings in the closets, on the floors, on dressers/counters/nightstands, and in the vacant rooms on bedding and clothing.
-There were multiple places that the floors appeared dirty and with a thick dark sticky substance on them.

Observation of the occupied resident room #33 on the left hall of the AL unit on 04/05/22 at 10:02am revealed:
-There was a broom leaning against the wall with a pile of dirt and debris waiting to be cleaned up that appeared to have mouse droppings in it.
-There was a plastic food container on the counter above the dresser with a mouse dropping on it next to a daily pill box.
-There were three mouse traps along the walls spread out throughout the room that were empty.
-There was a film of brown grime along the base of a fan sitting on the floor of the room.

Observation on the left hallway in the AL side of the facility on 04/07/22 from 9:45am - 9:51am revealed:
-A gray mouse was observed running in the hallway and under the crack of the door to vacant resident room #31.
-Upon entering resident room #31, the mouse could not be seen in the room or the adjoining bathroom.
-The adjoining vacant resident room #32 had a large stack of plastic bags with clothing covering the middle of the floor and the mouse was could not be seen in the room.

Intermittent observations of the SCU on 04/05/22 from 9:32am to 3:48pm revealed:

D 079	Continued From page 3 -At 9:32 am, there was visible trash on floor in the common area and there was a sausage patty on the sofa in the TV room where 2 residents sat. -At 9:47 am, there was food on the floor in the dining room area, under the tables and on the tables and visible spider webs in the window of the dining room. -At 3:48pm, a recheck of SCU dining room revealed there was the same visible food on the floors and tables. Observation of the SCU dining room on 04/06/22 at 8:05am revealed: -There was food on the dining room floor. -The dining room floor was dirty with brown sticky patches intermittently dispersed around the room. -There was debris of an unknown source and food crumbs under most of the tables and in the walkways. -Residents were seated and personal care aides (PCAs) were serving residents breakfast. Observation of the kitchen and surrounding areas within the kitchen on 04/05/22 from 3:30pm to 4:30pm revealed: -There were cardboard boxes of food stored on the floor in the pantry and a sticky mousetrap on the floor under the pantry shelves. -There was a box of saltine crackers sitting on a shelf that had been chewed through with crumbs of debris and dried food that appeared to be okra and noodles sitting on the plastic container next to the box. -The floor had a black and brown thick sticky substance on it and there were copious amounts of mice droppings on top of containers of food and along the edges of the walls under the shelves of food in the entirety of the room. -The oven had a thick black substance caked to the inside of the door which appeared to be dried	D 079

cooked food that had spilled.
-The floors in the kitchen also had a brown sticky substance on them and there was a dead roach on the floor at the corner of the oven.
-The door leading out of the kitchen into the SCU dining room had a brown substance all over the middle portion of the door.
-There was a utility room off the kitchen before reaching the SCU dining room door with a computer and keyboard on the floor.
-There was a sticky mouse trap on the floor next to the computer covered in dirt, debris, and two dead mice.
-There was another sticky mouse trap on the floor behind the computer in the corner behind the door with six dead mice and two dead roaches on it.
-There were mice droppings and debris littering the entirety of the floor which also had a sticky brown substance on it in the utility room.

Interview with a resident in the occupied room #33 on the left hall on the AL unit on 04/05/22 at 9:40am revealed the housekeeping staff came in to clean his room once weekly.

Interview with the resident's roommate in the occupied room on the left hall on the AL unit on 04/05/22 at 9:53am revealed:
-He kept traps in his room to try and catch the rats and mice that were in the facility and came into his room.
-The purchased some of the traps himself and the exterminator provided the rest of the traps.
-Having pests in his room kept him from sleeping restfully and makes him not want to eat the food at the facility because he knew the pests were in the kitchen too and walked all over things.
-He kept snacks in his room in plastic food containers to keep the pests out of his personal

food.
-He could hear and sometimes see the rats and mice both during the day and at night; but around 7:00pm is when he most often encountered them.
-Staff did not clean their room often so he would routinely sweep the room and take the trash out a couple times per week to prevent the mice and rats.
-His roommate was mostly bed bound and sometimes, staff would leave his roommate's plates in the room overnight after dinner which he thought was contributing to the problem.

Interview with a resident on the right hall of the AL unit on 04/05/22 at 10:28am revealed:
-She was uncomfortable and did not like living at the facility.
-She saw a mouse in her room two nights ago when someone came in to assist her to the restroom.
-The staff member assisting her to the restroom also saw the mouse and opened the door to the bedroom to let it run out while she went to the restroom.

Interview with a resident's family member on the right hall on the AL unit on 04/06/22 at 10:12am revealed:
-She had not seen any mice or other pests at the facility.
-She was not sure how often the facility staff cleaned her family member's room, but she cleaned it last week.
-Sometimes when the facility cleaned her family member's room, they would mop without sweeping first making anything on the floor stick.

Interview with a second resident on the right hall on the AL unit on 04/06/22 at 10:51am revealed:
-She put clean sheets on her bed every day, but

the staff did not help her do it.
-She would sweep her room every day because housekeeping would only sweep the walkways of the room if she asked them to.
-She also had to dust and fold her laundry herself.

Interview with a resident on the SCU on 04/05/22 at 10:03am revealed:
-He had not seen any bugs or rodents in his room but had an issue with roaches in another room that he previously occupied.
-Housekeeping staff cleaned his room maybe 3 times a week and swept and mopped the room.

Interview with a housekeeper on 04/06/22 at 9:18am revealed:
-He started working at the facility 2 weeks prior and was responsible to maintain the building, clean resident rooms, fill hand sanitizers, and replace paper towels.
-He was not responsible to clean the kitchen or dining room areas; the kitchen staff were responsible to clean those areas.
-There were usually 1-2 housekeepers staffed each day from 7:00am to 3:00pm.
-He had not seen any mice or other pests and residents had not complained to him about seeing any mice or pests.

Interview with a previous employee on 04/06/22 at 10:13am revealed:
-She worked at the facility until February 2022.
-The facility was never kept clean while she worked there; there was always trash on the floor, dirty bathrooms, and a bad smell.
-There were also rats and mice all over the facility to include common areas, residents rooms, and the kitchen.
-It was frustrating because she reported her

concerns about the rats and mice to the previous Administrator, but nothing was ever done to get rid of them.
-She was always worried that the rats or mice might hurt residents or possibly be cooked in the resident's food.

Interview with a PCA on 04/08/22 at 10:36am revealed:
-She had not seen any mice herself, but she had noticed mice droppings around the facility, and some residents had complained to her about seeing mice in their rooms.
-It was concerning to have mice at the facility because they were scary, and residents should have the right to not have them in their home.
-Mice droppings could be dangerous to residents and transmit diseases.

Interview with a medication aide (MA) on 04/07/22 at 4:36pm revealed:
-The facility had mice and they would run around leaving droppings in the dining room and bathrooms.
-She had discussed the issue with a co-worker previously but did not report the issue to management because she was told they already knew about it.

Interview with the dietary manager on 04/05/22 at 10:48am and 3:30pm revealed:
-He started working at the facility 4 days prior on 04/01/22.
-He had never seen mice or other pests in the kitchen since he started working at the facility and he was unaware that the black droppings in the pantry were from mice activity.
-He was not aware there were dead mice in traps in the utility room next to the kitchen as he had not been in that room yet.

D 079	Continued From page 8 -He was not sure if the Administrator was aware of the pest issue in the kitchen or if there was a contracted exterminator to treat the issue. Second interview with the dietary manager on 04/08/22 at 11:30am revealed: -It was his responsibility to clean the kitchen and ensure food was protected from contamination. -He did not realize that resident food was contaminated. Review of the facility's contracted extermination receipts revealed: -On 10/19/21, the facility was treated for general pests in the kitchen and dining areas and resident rooms 1-8 (on the right hall). -On 11/22/21, the facility was treated for general pests in the kitchen and dining areas and resident rooms 1-8. -On 12/23/21, the facility was treated for general pests in the kitchen and dining areas and resident rooms 1-8. -On 01/20/22, the facility was treated for general pests in the kitchen and dining areas and resident rooms 1-8. -On 02/26/22, the facility was treated for general pests in the kitchen and dining areas and resident rooms 1-8 and rodent traps were placed in the Administrator's office and the back hall. -On 03/08/22, the technician completed spot treatment for termites using termicide. Interview with the facility's contracted exterminator on 04/08/22 at 9:10am revealed: -He was last at the facility on 03/22/22 and would come in between his monthly visits at the facility's request. -He had serviced the facility for the last several years and the recent construction at the facility had helped with the cleanliness of the facility. D 079	Continued From page 9 -Cleanliness and sanitation were going to be key for the facility to be rid of pests. -Mice infestations were reported to him 2 months ago and he laid bait outside and traps inside, but there were foundation issues that needed to be corrected if the mice were going to be controlled and there was nothing more he could do to treat them until the facility addressed the issue. -Rats and mice could be harmful to residents in that they could bite them or transfer diseases by crawling across surfaces that residents encounter. -He had made the facility management aware of the issues that needed to be corrected on multiple occasions. Interview with the Administrator on 04/05/22 at 5:23pm revealed: -She was aware there was mice activity in the kitchen and some resident's rooms. -She was told upon starting in February 2022 that mice had always been a problem in the kitchen the exterminator had tried different kinds of traps to control the issue. -The exterminator came once per month and as needed if she called him; he was last at the facility on 03/22/22 and he would laid new traps each time he came and also treated for other pests that had previously been an issue for on-going maintenance such as bed bugs along with the mice in resident rooms. -She was not aware that there were mice droppings in the vacant resident rooms as those rooms had recently been deep cleaned. -Some residents continued to complain of mice being in their rooms, but she had not heard any complaints about mice from the staff. -She was not aware of any dead mice on traps in the kitchen utility room or that mice were in the pantry where food was not being stored correctly.	D 079

-She trusted the new dietary manager to throw away food contaminated from mice but was unsure if the cook would know to throw the contaminated food away.
-She had not had a conversation about proper food storage or food contamination with the dietary staff yet, but she would train them on contamination and cleanliness.

Interview with the Administrator on 04/07/22 at 9:55am revealed:
-She saw a mouse in the facility "the other day".
-She screamed when she saw the mouse because she did not realize a mouse would come in an open or common area.
-She would not specify where she saw the mouse.
-She did not know why there were still bags of clothes stored on the floor in vacant resident room #32 but the clothing needed to be removed.

Interview with the Administrator on 04/07/22 at 5:00pm revealed:
-The housekeeping staff were responsible to ensure cleaning for the entire facility to include the common bathrooms, resident rooms, and removal of trash daily, sweeping, mopping, and dusting weekly, and linens as needed.
-The PCAs were generally responsible to change the linens on resident's beds and the kitchen staff were responsible to clean the kitchen and dining areas.
-The kitchen and dining areas were expected to be swept in between each meal and mopped after dinner daily.
-The dietary staff were also responsible to remove all cardboard from the storage areas and store food properly removing mice droppings and contaminated food as needed daily.
-It was important to keep the kitchen, pantry,

food, and resident's rooms clean daily from mice and their droppings to prevent a sanitation issue.

Interview with the Administrator on 04/08/22 at 9:37am revealed:
-She was not aware there was a foundation issue at the facility that needed to be corrected to treat the mice infestation.
-She would have to contact corporate to see if they had been made aware and if anything was being done to correct it.
-It was important to fix the root issue for resident safety and cleanliness because not one wanted to live in a home with mice or rats.

Telephone interview with the facility's contracted primary care provider (PCP) on 04/07/22 at 1:00pm revealed:
-She had noticed that general cleanliness of the facility had improved over the last couple of months after the current Administrator started.
-She would generally come to the facility early in the mornings when it was still dark outside as residents were waking up and was not aware there was an issue with mice at the facility but was aware of a previous infestation of bed bugs which she thought was under control.
-She expected the facility to control pest infestations and ensure trash was dumped daily, floors were cleaned daily and all crumbs and food were cleaned from floors to prevent pests from being attracted.
-Mice droppings could cause transmission of diseases through contamination to the residents.
-It was especially concerning that the resident's food could be contamination and she expected the facility to employ an exterminator and follow the recommendations to get rid of pests.

Telephone interview with the local health

department's sanitation inspector on 04/08/22 at 3:38pm revealed:
-The facility was last inspected in January 2022 and the facility was expected to correct issues noted on that report regarding vermin and ensuring holes in walls were fixed to prevent mice from being able to get in.
-She did not recall the facility having foundation issues, but she expected the facility to fix the issues at the exterminator's recommendations to help prevent further infestation as well.
-If mice continued to infest the facility, it could pose a health risk to residents, staff and visitors.
-She expected the facility to store food properly, throw contaminated food away, and ensure floors and surfaces were kept clean and free of crumbs that would continue to attract mice and other pests.
-Contact with mouse feces could transmit viruses and bacteria especially if it was ingested through contaminated food such as Listeria (a foodborne illness that could cause headache, stiff neck, and confusion) and Salmonella (a foodborne illness that could cause nausea, vomiting, and diarrhea).
-Residents who were elderly, on multiple medications, or immunocompromised were more at risk to issues that could result from mice dropping contamination and proper cleaning and food handling was imperative by the facility.

Attempted telephone interview with the facility's corporate representative on 04/08/22 at 1:16pm was unsuccessful.

2. Review of the facility's census reports provided on 04/05/22 revealed there were 15 residents residing in the special care unit (SCU).

-There was still a 24-oz. bottle of toilet bowl cleaner on top of a shower chair.
-There was still a 32-oz. bottle of body lotion sitting on the side of the tub.
-There were still personal care products on top of the half wall of the shower including: two 2-oz containers of antiperspirant/deodorant; a 11-oz. bottle of medication antidandruff shampoo; a 23-oz. bottle of 2-in-1 antidandruff shampoo and conditioner; and a 40-oz. bottle of conditioner.

Interview with a personal care aide (PCA) on 04/06/22 at 12:37pm revealed:
-Cleaning products should be locked in the housekeeping closet.
-No residents currently used the spa bathroom on the left hall in the SCU but it was open and accessible to the SCU residents.
-There were some residents with wandering behaviors in the SCU but no residents had tried to ingest any personal care or cleaning products to her knowledge.
-The razors were supposed to be locked in the medication room or the medication cart.
-It was not unusual for personal care products like shampoo and body wash to be left in the spa bathrooms.
-She had not been instructed by anyone to keep personal care products locked or secured in the SCU.

Second interview with the Administrator on 04/06/22 at 1:02pm revealed:
-She just reminded the medication aide (MA) in the SCU to tell the PCAs to remove the personal care products from the spa bathrooms in the SCU.
-She did not check behind staff in the SCU yesterday, 04/05/22, to make sure the personal care products had been removed.

D 079	Continued From page 17 Interview with the facility's contracted primary care provider (PCP) on 04/07/22 at 1:00pm revealed: -It was concerning that the SCU had hazards such as toiletries and items such as razors in common bathroom areas that residents with decreased cognition had access to. -Residents who did not have the mental cognition to know how to use hazards safety could hurt themselves by ingesting the toiletries, or cutting themselves and possible transmitting blood borne diseases such as HIV (human immunodeficiency virus) or Hepatitis B because the razors should be resident specific and supervised. 3. Observation of the living room on the right near the front entrance in the assisted living (AL) side of the facility on 04/06/22 at 8:39am revealed: -There was a straight back chair overturned on its back lying on the floor near the artificial fireplace. -There was a large white ceramic vase broken in multiple pieces with sharp jagged edges on the floor near the artificial fireplace. -There was a bunch of artificial flowers in green craft foam lying on its side on top of the artificial fireplace. -There was a broken clear glass candleholder with a candle lying on the floor behind the artificial fireplace. -There were two residents sitting on the sofas in the living room. Interview with the Administrator on 04/06/22 at 8:39am revealed: -Residents in the AL went into and sat in the living room every day. -The broken vase and candleholder and overturned chair had been that way in the living room since shortly after 6:45pm last night,	D 079

04/05/22.
-She saw it when she walked by the living room and turned on the light after 6:45pm on 04/05/22.
-One of the residents did it but she did not know which resident.
-Staff on duty at the time on 04/05/22 did not know what happened or who did it.
-She took a picture of the broken items last night and sent it to her corporate office.
-She had not instructed housekeeping staff to clean the living room yet.
-She was not concerned about the safety of the residents with the broken glass because residents did not usually go in the living room during the night.
-If she thought it was "detrimental" to the residents, she would have removed the broken glass last night.
-She would have the housekeeping staff to clean the living room.

Interview with a resident on 04/06/22 at 8:57am revealed:
-He went into the living room in the AL early that morning on 04/06/22 before 7:00am.
-There was broken glass on the floor and a chair was overturned.
-There was no one else in the room at the time.
-He reported it to the medication aide (MA).

Another observation of the living room on the right near the front entrance in the AL side of the facility on 04/06/22 at 9:23am revealed there was still a broken clear glass candleholder with a candle lying on the floor behind the artificial fireplace.

A second interview the Administrator on 04/06/22 at 9:23am revealed she was not aware the housekeeper did not clean up the broken glass

Observation of vacant resident room #2 on the left hall in the assisted living (AL) side of the facility on 04/05/22 at 9:55am revealed: -The room was open and accessible to residents. -There was a large oxygen canister unsecured on the floor in the corner near the window. -There was no gauge on the canister to determine how much oxygen was in the canister. Observation of resident room #11 on the right hall in the AL side of the facility on 04/05/22 at 10:17am revealed: -There was a small oxygen canister unsecured on the floor beside the resident's bedside table. -There was no gauge on the canister to determine how much oxygen was in the canister. -There was a second small oxygen canister in a carrying bag on the floor unsecured beside the resident's bedside table. Interview with the resident residing in resident room #11 on 04/05/22 at 10:17am revealed: -The small oxygen canister had been in her room for about 2 days. -She thought it was empty but she was not sure. -She used the portable oxygen tank when she went out of her room. -She did not recall having a crate to secure the oxygen tanks. Interview with the Administrator on 04/05/22 at 11:01am revealed: -Oxygen canisters were supposed to be stored securely in holders or crates in the residents' rooms to prevent tipping over. -She was not aware of any unsecured oxygen canisters in the facility. -There was a film of dirt and debris in the bottom of the spa whirlpool tub.
-There was an incontinence pad on the floor beside the whirlpool tub.
-There was a trash can near the sink overflowing with trash.
-There was dirt and debris in the sink and rust around the faucet fixtures.

Interview with a resident residing near the spa bathrooms near room #7 and room #8 on 04/05/22 at 9:48am revealed:
-The dried brown stains had been on the toilet for "a couple of months".
-There was some dried brown stains on the floor in front of the toilet that he cleaned himself with the shower wand about a month ago.
-He did not use the toilet in the spa bathrooms anymore because they were not clean.
-He had a toilet in a bathroom in his room and used that toilet most of the time.
-He did not know how often housekeeping staff cleaned the bathroom and he did not see housekeeping staff on a daily basis.

Interview with a housekeeper on 04/05/22 at 9:58am revealed:
-She had worked at the facility for about 2 months and she was responsible for cleaning the entire facility.
-She had been working Monday - Friday from 7:00am - 3:00pm and some weekends from 7:00am - 3:00pm.
-A second housekeeper was just hired on Friday, 04/01/22.
-She was currently cleaning resident rooms on the right hall of the AL side of the facility.
-She did not usually clean the spa bathrooms daily on the left hall of the AL side because there were only a few residents currently living on that

D 079	Continued From page 26 Interview with the Administrator on 04/05/22 at 6:28pm revealed: -The facility had two housekeepers but one of them called out today, 04/05/22. -The housekeepers were supposed to clean the bathrooms daily including the sinks, showers, tubs, toilets, floors, and empty the trash. -She did a daily walk through the facility but she had not noticed the spa bathrooms in the AL needed cleaning. A second interview with the Administrator on 04/07/22 at 4:10pm revealed: -She thought the housekeeper worked on cleaning the spa bathrooms on the AL side of the facility on Tuesday (04/05/22) and Wednesday (04/06/22). -She had not checked behind the housekeeping staff to see if the spa bathrooms had been cleaned. -The residents used the spa bathrooms and it was "not acceptable" for the bathrooms not to be clean. A third interview with the Administrator on 04/07/22 at 5:35pm revealed: -The housekeeping staff were responsible for keeping the entire facility clean. -The spa bathrooms should be cleaned daily and some needed to be cleaned more often because they had some "messy" residents. -Cleaning bathrooms should include the toilets, showers, tub, sinks, floors, and emptying the trash. A third observation of the spa bathroom beside resident room #8 on the left hall in the AL side on 04/08/22 at 1:23pm revealed: -There was still a build up of white soap scum on the floor and wall of the tiled shower. -There were still dark yellow and brown stains around the edge of the front of the toilet seat.
-There was still toilet paper with dark brown stains in the toilet bowl.
-There was still a bedside toilet with a white powdery substance on the bars and lid of the seat across from the sink.
-There was still dirt and debris in the sink and rust around the faucet fixtures.

A third observation of the spa bathroom beside resident room #7 on the left hall in the AL side on 04/08/22 at 1:26pm revealed:
-There was still a build up of white soap scum on the floor and wall of the tiled shower.
-There were still multiple dried brown stains on the front of the toilet.
-There was still a rust colored ring around the inside bowl of the toilet.
-There were still dried brown stains running down the wall beside the toilet.
-There were still two incontinence pads with brown stains in the bottom of the spa whirlpool tub.
-There was still a film of dirt and debris in the bottom of the spa whirlpool tub.
-There was still an incontinence pad on the floor beside the whirlpool tub.
-There was a bedside toilet near the whirlpool tub with bed coverings draped over it and lying on the floor around it.
-There was still dirt and debris in the sink and rust around the faucet fixtures.

A third observation of the spa bathroom beside resident room #11 on the right hall for the AL side on 04/08/22 at 1:36pm revealed the bathroom was occupied by a resident.

A third observation of the spa bathroom beside

resident room #12 on the right hall for the AL side on 04/08/22 at 1:31pm revealed:
-There was an incontinence brief with yellow stains on top of the trash can.
-There was still a shower chair with soiled and stained clothing on the seat of the chair and on the floor underneath the chair.
-There were still bed sheets with yellow stains on the floor on the left side near the tub.
-There was still an empty plastic soap dispenser bag on the floor beside the stained bed linens.
-The bath tub still had dirt, debris, and yellow stains.
-The shower chair with yellow stains on the seat was moved in front of the tub.
-There were still dried brown and yellow stains on the outside and inside of the toilet.
-There was still a build up of white soap scum on the floor and wall of the tiled shower.
-There were six broken wall tiles on the lower left wall of the shower.

Interview with two personal care aides (PCAs) working in the AL side of the facility on 04/08/22 at 1:31pm revealed;
-They were unsure how long the spa bathrooms in the AL side had not been clean.
-There were no housekeepers working today, (04/08/22), so no one was cleaning the facility today.

A fourth interview with the Administrator on 04/08/22 at 2:13pm revealed:
-It appeared no cleaning had been done in the spa bathrooms in the AL side of the facility.
-One housekeeper was off today, 04/08/22, because she was supposed to work this weekend.
-The other housekeeper "called out" today.
-There was no one assigned to do housekeeping

4 common spa bathrooms were maintained in operating condition in the assisted living side of the facility.

The findings are:

Review of the facility's current sanitation report dated 01/29/22 revealed:
-The facility's sanitation score was 95.
-Many of the toilets and other fixtures of the communal bathrooms and showers were in need of cleaning and not in good repair.

Observation of the spa bathroom beside resident room #8 on the left hall in the assisted living (AL) side on 04/05/22 at 9:37am revealed:
-There was toilet paper with dark brown stains in the toilet bowl.
-There was no water in the toilet bowl.

Observation of the spa bathroom beside resident room #12 on the right hall for the AL side on 04/05/22 at 10:32am revealed:
-The toilet had a large amount of toilet paper stuck in the bottom of the toilet bowl, clogging the toilet.
-There was yellow colored water in the toilet bowl.
-There was a urine odor in the bathroom.

Interview with a resident residing on the hall with the spa bathroom near room #12 on 04/05/22 at 10:50am revealed:
-He did not know how long the toilet had been clogged.
-He had a toilet in the bathroom in his room that he could use.

A second observation of the spa bathroom beside resident room #8 on the left hall in the AL side on 04/05/22 at 4:21pm revealed:

-The hot water temperature at the bathroom sink was 120 degrees F.
-There was no caution sign posted for the hot water temperature.

Interview with the Administrator on 04/05/22 at 1:25pm revealed:
-She was not aware of any water temperatures in the facility being greater than 116 degrees F.
-She asked if the required water temperature range was 116 degrees F.

A second observation of the adjoining bathroom for resident rooms #55 and #57 in the SCU on 04/05/22 at 3:27 pm revealed:
-There were three ambulatory SCU residents residing in the two rooms.
-Recheck of hot water temperature at the bathroom sink was 120 degrees F.
-There was no caution sign posted for the hot water temperature.

Based on observations, interviews, and record reviews, it was determined the two residents residing in room #55 were not interviewable.

Observation of the spa bathroom across from the beauty shop in the SCU on 04/05/22 at 3:10pm revealed:
-The hot water temperature at the bathroom sink was 126 degrees F with visible steam.
-There was no caution sign posted for the hot water temperature.

A second interview with the Administrator on 04/05/22 at 3:20pm revealed:
-She was not aware of the hot water temperatures in the spa bathroom in the SCU.
-The spa bathroom in the SCU was accessible to and used by the residents in the SCU including a

couple of SCU residents that used the bathroom independently and did not require staff assistance.
-A plumber came to the facility the week before last because the facility was having issues with a mixing valve on the hot water heater and the water was too cold.
-There were issues with not having hot water in the SCU and staff had to turn on the hot water at the sink and wait for the water at the shower to get warm.
-One shower could be taken in the spa bathroom in the SCU and then the water would be cold again.
-It had been that way since renovations were made to the floors in the SCU in January 2022 but the residents were living on the left hall in the SCU at that time due to the renovations.
-The residents were moved to the hall on the right in the SCU sometime in February 2022 so renovations could be made to the other hall in the SCU.
-When the plumber came to the facility the week before last, he replaced a valve on the hot water heater for the SCU because the facility had no way to adjust the water temperatures because the thermostat dials on the hot water heaters were "stripped" and could not be turned.
-The facility's Maintenance Person checked the water temperatures once a month.
-The facility's Maintenance Person was part-time and only came to the facility on Saturday or Sunday or as needed.
-The Maintenance Person did not check the water temperatures this past month because they knew there were water temperature issues.
-She was "guessing" the last time the hot water temperatures were checked was in February 2022 when she first started working at the facility.
-She did not know where the water temperature

logs were located but she would find them.
-No water temperatures had been checked since the part was replaced the week before last.
-There was a second part for the hot water heater for the AL side of the facility that needed to be replaced but it was on backorder.
-She did not know when the part for the hot water heater in the AL was expected to be received.
-She was concerned about the hot water temperatures because she would not want anyone to get burned by the hot water.
-A plumber was contacted today, 04/05/22, and would be coming to the facility today to check the hot water heaters.

Interview with the facility's Maintenance Person on 04/05/22 at 3:43pm revealed:
-He was part-time and had not been to the facility in a couple of weeks.
-He usually came to the facility one day every other week.
-There were 2 hot water heaters for the front hall in the AL side of the facility and 1 big hot water heater for the back hall, or the SCU.
-He was not aware of any current problems with the hot water temperatures until today, 04/05/22.
-There had been some construction work with renovations recently at the facility.
-A few months ago, there was a circuit pump that was not working in the SCU but a plumber came and it had been disconnected by a construction worker.
-He had not checked water temperatures "in a while" or "more than a month" but he usually documented and gave the water temperature logs to the Administrator.
-He did not keep a copy of the water temperature logs.
-He thought the water temperature was supposed to be between 110 degrees F - 116 degrees F.

D 113	Continued From page 39 -He did not remember if the water temperature was too high or too low when he last checked them prior to today, 04/05/22. -He checked the hot water temperatures today, 04/05/22, and got 120 degrees F on both the AL side and the SCU. -The thermostats on the hot water heaters for the SCU and the AL side were all set on 120 degrees F when he checked them today. -The dials on the thermostats on the hot water heaters were difficult to turn even with pliers so he had been unable to adjust the settings. -He called a plumber about 1 to 2 hours ago and the plumber was supposed to come to the facility today, 04/05/22. Review of an invoice from the facility's contracted plumbing company dated 03/22/22 revealed: -The invoice tasks included: replaced burnt up recirculating pump and connected the existing water lines; replaced a missing valve located on top of the water heater; and adjustment handle had been stripped out and broken. -Tankless heaters were flashing code "LC7" and it was recommended each unit be flushed as step 1 and that should "clean out" the code. -If not, the plumbing company would get technical support for help to determine the cause of further problem which could be at an additional charge for parts and labor. -A mixing valve replacement had been ordered and was expected to arrive on 04/06/22. A second observation of the spa bathroom across from the beauty shop in the SCU on 04/06/22 at 12:18pm revealed: -The hot water temperature at the bathroom sink was 128 degrees F with visible steam. -The hot water temperature at the shower was 118 degrees F. water temperature could now be adjusted by the facility.
-The current temperature reading on the valve was 115 degrees F.
-The hot water heater needed time to cool down in order to properly adjust the temperature.
-The water temperature would need to be regulated by the facility later in the day after the hot water heater had cooled down.
-He would speak with the Administrator before leaving to make her aware of how to regulate the water temperature later in the day.
-He would leave the printed instructions on how to properly turn the cap to adjust the water temperature with the Administrator.

A fourth observation of the spa bathroom across from the beauty shop in the SCU on 04/08/22 at 12:13pm revealed:
-The hot water temperature at the bathroom sink was 120 degrees F.
-There was a caution sign posted for the hot water temperature on the wall above the sink.

A fourth interview with the Administrator on 04/08/22 at 12:40pm revealed:
-The hot water temperatures had not been checked at the facility since the plumber made repairs yesterday, 04/07/22.
-She had not checked the hot water temperatures since the repairs were made because the plumber checked on 04/07/22 and the water temperatures were "okay".
-The plumber left instructions for her on how to regulate the water temperature but she had not done that yet.

Observation of thermometers being calibrated on 04/08/22 at 2:01pm revealed:
-The Administrator's thermometer and the

surveyor's thermometer were placed in a cup of ice water.
-The Administrator's thermometer temperature was 32.2 degrees F.
-The surveyor's thermometer temperature was 32 degrees F.

A fifth interview with the Administrator on 04/08/22 at 2:09pm revealed:
-She asked the plumber yesterday, 04/07/22, to come back to the facility because the water temperatures were still not in the required range.
-She had to get approval through the corporate office for the plumber to come back to the facility but she had not done that yet.

A second observation of the spa bathroom beside resident room #8 in the AL side with the Administrator on 04/08/22 at 2:12pm revealed:
-The hot water temperature at the bathroom sink was 118 degrees F with both thermometers.
-There was a caution sign posted for the hot water temperature on the wall.

A second observation of the spa bathroom beside resident room #7 in the AL side with the Administrator on 04/08/22 at 2:12pm revealed:
-The hot water temperatures at the bathroom sink and shower were 118 degrees F with both thermometers.
-There was a caution sign posted for the hot water temperature.

Observation of the spa bathroom beside resident room #11 in the AL side with the Administrator on 04/08/22 at 2:16pm revealed:
-The hot water temperature at the bathroom sink was 118 degrees F with the surveyor's thermometer and 117 degrees F with the Administrator's thermometer.

D 113	Continued From page 44 A sixth observation of the spa bathroom across from the beauty shop in the SCU with the Administrator on 04/08/22 at 2:28pm revealed: -The hot water at the sink was turned on and running. -The hot water temperature at the shower was 86 degrees F with the surveyor's thermometer and 84 degrees F with the Administrator's thermometer but did not rise any higher with the water continuing to be turned on and running. Telephone interview with the facility's contracted primary care provider (PCP) on 04/07/22 at 1:00pm revealed: -It was concerning that the facility had hot water temperatures above 116 degrees F, especially in the SCU, because those residents did not have the cognitive capacity to know the water was too hot to use. -If residents were exposed to water that was too hot for too long, the residents could get burned. -She expected the facility to routinely test water temperatures and adjust them accordingly to prevent injury to the residents. _____ The facility failed to ensure hot water temperatures for 9 of 18 fixtures sampled in the facility were maintained between 100 - 116 degrees F. This included 3 of 4 fixtures that were accessible to and used by the special care unit (SCU) residents with diagnoses of dementia or other cognitive disorders, including a sink in the SCU spa bathroom with a hot water temperature of 128 degrees F with visible steam. A water temperature of 118.4 degrees F could result in a first degree in 15 minutes and a second degree burn in 20 minutes. A water temperature of 127.4 degrees could result in a first degree burn in 30 seconds and a second degree burn in 60 seconds. This failure of the facility was	D 113

revealed:
-There were no personal care records or weekly task logs for 02/02/22 - 02/22/22.
-The most current weekly personal care task log was dated 01/26/22 - 02/01/22 for first, second, and third shifts.
-There was a section for documenting staff assistance with mouth/oral care.
-Providing mouth/oral care was not documented as completed on one occasion for first shift on 02/01/22 with no reason documented.
-There were no personal care records or weekly task logs for 02/02/22 - 02/22/22 so there was no documentation to indicate if mouth/oral care was provided to the resident.

Review of Resident #2's facility staff care notes dated 03/23/21 - 02/18/22 revealed no documentation of the resident refusing personal care including mouth care.

Interview with a medication aide (MA) on 04/06/22 at 2:17pm revealed:
-Resident #2 required total assistance with all personal care tasks.
-Resident #2 would bite down on the mouth swabs used to clean her mouth.
-She did not know if that had been reported to anyone or if the personal care aides (PCAs) documented it on the personal care logs.

Telephone interview with a former MA on 04/07/22 at 10:41am revealed:
-Resident #2 required assistance from staff for all personal care tasks.
-The resident's lips were peeling and dry.
-The resident's teeth were "brown looking" and her breath smelled "horrible".
-The PCAs had to swab her mouth.
-The resident would bite down on a tooth brush

when the PCAs tried to brush her teeth.
-She did not recall seeing blood in the resident's mouth.
-The PCAs were supposed to document on the personal care logs.

Interview with a PCA on 04/07/22 at 2:30pm revealed:
-Resident #2 required total assistance with personal care for all tasks, including mouth care.
-The resident was non-verbal but she could sometimes shake her head to indicate yes or no.
-When the resident started on hospice, she was not as alert and less interactive.
-Resident #2's teeth were yellowish brown and she had very bad breath.
-The resident would dig in her stool so her nails had to be cleaned "so many times".
-They used mouth swabs to clean the resident's mouth but if the resident was irritated, she would swat with her hand and turn her head.
-The PCAs documented on the personal care logs when a task was completed and they should also document if a resident refused.

Interview with a third MA on 04/07/22 at 5:17pm revealed:
-Resident #2 required total care for all personal care tasks.
-The resident's teeth were "bad"; they were brown.
-The facility staff used mouth swabs usually only on first shift once a day to clean the resident's mouth because the resident would bite down on the swab.
-The facility staff could not brush the resident's teeth because she would bite down on the tooth brush.

Interview with a fourth MA on 04/07/22 at 5:17pm

revealed:
-Resident #2 needed assistance with everything.
-The resident always had an odor to her mouth and her teeth were stained even in the past.
-The resident was combative with brushing her teeth.

Interview with the Administrator on 04/07/22 at 5:35pm revealed:
-She knew nothing about the condition of Resident #2's mouth.
-The PCAs were responsible for providing mouth care to Resident #2 because she was totally dependent for all personal care tasks.
-If a resident was refusing personal care, the PCAs should let her or their supervisor know about the refusals.
-The PCAs were supposed to document personal care assistance on the resident's personal care logs.

A second interview with the Administrator on 04/08/22 at 2:35pm revealed:
-She could not find any other personal care logs for Resident #2.
-The resident's personal care logs should have been in the closed record.

Telephone interview with Resident #2's PCP on 04/07/22 at 1:00pm revealed:
-Resident #2 had chronic issues with her teeth with a lot of plaque build up that could be seen on the teeth and bad breath.
-She did not know if staff had issues with the resident refusing mouth care.
-Mouth care was important to prevent plaque build up and issues with the gums.

Telephone interview with Resident #2's hospice nurse on 04/08/22 at 9:05am revealed:

shower chair and required assistance getting set up and washing his backside.
-The resident preferred to get dressed after breakfast and to wear pajamas or sweat suits requiring assistance getting his limbs into the clothing.
-The resident required incontinence briefs for toileting.

Review of Resident #3's current care plan dated 03/28/22 revealed:
-The resident had limited strength and was ambulatory with a wheelchair or walker.
-The resident was incontinent of bladder and bowel.
-The resident was sometimes disoriented, forgetful, and required reminders.
-The resident required his meat to be cut up and limited assistance with eating, ambulating, and transferring and extensive assistance with toileting, bathing, dressing, and grooming.

Review of Resident #3's primary care provider (PCP) note dated 02/24/22 revealed:
-The facility was to use the hoyer lift every day to assist in transferring the resident safely.
-The resident was unable to assist in pivoting or standing for transfer and required 2-3 people to assist with transferring.

Review of Resident #3's PCP note dated 03/24/22 revealed:
-The resident's body mass index (BMI) was above normal with the facility controlling meals and portions but the resident also consumed outside food and drink.
-She was unable to counsel the resident on his food and drink intake due to his inability to understand and retain information and would continue to monitor him.

D 269	Continued From page 55 Interview with Resident #3 on 04/05/22 at 9:40am revealed: -He required assistance with bathing, dressing, and incontinence care. -Staff were supposed to come in once daily to help him with bathing and dressing, but he was unable to say how often staff assisted him with incontinence care. -He was unable to identify what a call bell was and when prompted to pull it, he was unable to reach it. Observation of Resident #3 on 04/06/22 at 11:18am revealed the resident was in the same shirt he wore on the previous day and smelled of feces. Interview with Resident #3's roommate on 04/05/22 at 10:10am revealed: -Resident #3 was bedbound, unable to reposition himself on his own, and the staff did not get the resident out of bed each day as his family desired. -Resident #3 would often go as long a one month before staff would change his sheets. -Sometimes staff would not provide a bath or change Resident #3's clothes for up to 3-4 days at a time. -Staff would round on Resident #3 for his needs and incontinence care on an average of every 4 hours during the day and often not at all at night so he ended up with soaked incontinence briefs in the mornings. -If he was not in the room with Resident #3, the resident would be unable to reach the call bell and could not remember how to use the call bell if he needed help or assistance. -He would often pull the call bell for Resident #3 when in the room to ensure he got assistance with incontinence care as needed. passing medications and unable to assist in getting Resident #3 out of bed.
-Resident #3's family had requested that the facility ensure the resident got out of bed each day but because she was not allowed to touch the hoyer lift and often did not have enough help, the resident did not always get out of bed as requested.

Interview with Resident #3 on 04/06/22 at 11:18am revealed:
-No one had been in to assist him with bathing, changing clothes, or incontinence care yet that day.
-He wanted to brush his teeth because they were bothering him.
-If he did not have his roommate, he would not get the help or care that he needed.

Observation of Resident #3 on 04/06/22 at 1:30pm revealed:
-A PCA served him lunch and assisted him to eat his food over a 9-minute period.
-The resident stated his incontinence brief was wet when asked, but the PCA did not change his brief and left the room to continue handing out lunch trays.

Interview with a second PCA on 04/06/22 at 1:44pm revealed:
-She started her shift at 7:00am and first checked on Resident #3 around 9:00am but he was clean and did not need anything.
-She checked on Resident #3 again at 12:30pm right before lunch and provided him incontinence care at that time.
-She did not offer Resident #3 incontinence care when she served him lunch because she needed to finish handing out lunch trays to the other bedbound residents in their rooms, but would go

D 269	Continued From page 58 back and do it after all the lunch meals had been delivered. Interview with Resident #3's roommate on 04/06/22 at 2:15pm revealed he was in the room most of the morning around 9:00am and not had checked on Resident #3 until they changed him before lunch. Interview with Resident #3 on 04/06/22 at 2:16pm revealed: -His incontinence brief was still wet and needed to be changed. -It was uncomfortable to have to sit in a wet incontinence brief. Telephone interview with Resident #3's member on 04/06/22 at 8:35pm revealed: -Resident #3 was immobile and required maximum assistance in his care and transferring. -The facility lacked providing incontinence care, baths, and clothing changes to Resident #3. -She would visit the resident twice weekly and he seemed to always have the shirt on with dried food down the front and routinely looked like he had not been bathed. -There was an incident a few weeks ago, she could not recall when, when Resident #3 "passed out" and had to be sent to the hospital, it was upsetting to her when she arrived and he had arrived at the hospital with no clothing, just an incontinence brief. -Resident #3's roommate helped him do everything, more than the staff help the resident, such as brushing his teeth and helping the family make sure the resident gets enough water and fluids to drink. -She expected the resident to be clean and have fresh clothing on each day. -She bought the resident pajamas but was unsure	D 269

if he ever used them.
-She took her concerns about Resident #3's care to the office manager and Administrator approximately one month ago but had not received any follow up.
-She was not sure if there was enough staff at the facility to provide his care because when she visited it was difficult to find someone to help.

Telephone interview with Resident #3's legal guardian on 04/08/22 at 7:52am revealed:
-The resident was sometimes confused and needed a guardian because he was unable to always make appropriate decisions for himself.
-Due to his "state of mind", the resident was unable to remember to use his call bell when he needed assistance and the string for the bell was too short for him to reach on top of him being immobile.
-The resident was unable to transfer or walk and relied on the staff to check on him to meet his needs.
-It was hard to find staff for assistance when she visited and sometimes 4-5 hours would go by before anyone would check on the resident.
-The resident's skin was dry and flakey and he was oftentimes in the same clothing we wore the previous day.
-The resident did not always get a bath or have his incontinence brief changed like he was supposed to and they leave him in the bed a lot instead of using the hoyer lift to get him out of bed.
-She had discussed her concerns with the facilty's Administrator but had not received any follow-up.

Interview with a third PCA on 04/07/22 at 3:45pm revealed:
-Resident #3 was to be bathed every other day per the facility's bath book.

D 269	Continued From page 61 but there was usually not enough staff present to actually meet residents' needs and things often got missed on first and second shift because it was busier due to residents being awake and some residents required a lot of care such as Resident #3. -Tasks that often went undone due to not having enough time included making beds, offering hydration in between meals, and other things. Confidential interview on 04/08/22 at 1:18pm revealed some staff at the facility did not provide personal care to residents as they were expected to include incontinence care and changing resident's clothes. Interview with the Administrator on 04/07/22 at 5:00pm revealed: -She expected residents to receive incontinent care every two hours and as needed in between. -If incontinent care was not done as expected, it could cause residents to develop skin breakdown and it was important to change residents to keep them clean as often as they wanted and needed to ensure they were honored with respect and dignity. -It was reported to her by staff that there were concerns a single shift was not providing Resident #3 incontinence care as expected or needed, but she had already investigated the issue and corrected it. -She was not aware that Resident #3 and his family were concerned about him not being provided personal care as needed and expected the residents needs and desires to be honored. -Resident #3 never refused care and required more help than some other residents due to being immobile and staff were expected to ensure he had access to assistance in a timely manner. Review of Resident #1's Care Plan dated 11/29/21 revealed:
-Resident #1 wandered throughout the halls, in other resident's rooms and often stood at the door trying to get out.
-He was sometimes disoriented and forgetful.
-Resident #1 was able to read, write, speak and understand language.
-Resident #1 was ambulatory.
-He communicated his wants and needs, likes and dislikes and followed instructions.
-Resident #1 had no delusions, hallucinations or paranoia.
-He was referred to mental health services on 11/29/21 for wandering and aggressive behaviors.

Review of Resident #1's progress notes dated 01/01/22 revealed:
-Resident #1 tried to get out of the SCU exit door on 01/01/22.
-He constantly pushed up against the door until it released so he could get out.
-Resident #1 became combative and used profanity when staff tried to redirect him away from the door.

Review of Resident #1's progress note date 01/02/22 revealed:
-Resident #1 got out of the door on 01/02/22.
-The action taken by staff was to call the Primary Care Provider (PCP).
-On 01/02/22, the PCP ordered Resident #1 Clonazepam 0.5 mg as needed (a medication used to treat anxiety).
-There was no documentation in Resident #1's record that staff increased supervision as ordered by PCP.
-No incident report was completed for Resident #1 exiting the SCU.

pm.
-She assessed Resident #1 for injury and vital signs were checked.
-Resident #1 did not require medical attention.
-She called the resident's PCP and MHP.
-Resident #1 was placed on 30-minute checks by the PCP to monitor Resident #1 every 30 minutes for 24 hours.
-There was no documentation completed for 30 minute safety checks for Resident #1.
-Resident #1 was seen by the MHP on 02/04/22 for the elopement on 02/03/22.
-She completed an accident and incident report of the elopement on 02/03/22.
-She not aware of any other elopements.
-After Resident #1 eloped on 02/03/22, she was made aware by maintenance staff the locking system on the exit doors in the SCU would release in 15 seconds when pushed.

Interview with another MA/Supervisor on the SCU on 04/08/22 at 9:37 am revealed:
-Resident #1 wandered and stood by the rear exit door often.
-Staff attempted to redirect Resident #1 when he was near exit doors.
-She was not working on 02/03/22 the day Resident #1 eloped and left the facility grounds.
-When she returned to work Resident #1 had been placed on 1 hour safety checks for 48 hours by the MHP.
-She had witnessed other times Resident #1 got out outside from the SCU but was not sure of the dates.
-She did not complete an accident and incident report when Resident #1 exited the SCU and was brought back by staff because it was not considered an elopement according to the Administrator.
-Resident #1 knew how to hold the back-exit door

for 15 seconds to exit the facility, so staff would monitor his whereabouts when he was out of bed.
-On one occaasion, two PCAs were working along with her and Resident #1 got out of the SCU leading to the rear parking lot, however staff were able to return him back to the SCU.
-On on another date, the door was not alarming and Resident #1 got out of the facility but he was located in the rear parking lot of the facility.
-The Administrator was notified when Resident #1 got out of the building.
-The staff were instructed by the Administrator after he exited the SCU to watch doors and Resident #1 by sitting in the middle of the hallway to monitor all doors.

Telephone interview with a PCA on 04/08/22 at 1:42 pm revealed:
-She was working on 02/03/22 the day Resident #1 got out of the building.
-Resident #1 wandered a lot and would go into other residents' rooms.
-Resident #1 had exited the building other times and the door alarms alerted staff so he was found on the grounds.
-Resident #1 kept going to the exit door and he would also sit and watch people as they went to the exit.
-She kept an eye on him at all times while he was sitting in the living area.
-On 02/03/22, she left to assist another resident and there were only two staff on the hall at the time because the MA/Supervisor was up front.
-Resident #1 knew that holding the door, it would automatically release because Resident #1 had done it plenty of times.
-On 02/03/22, the door did not alarm but the green light was flashing to notify staff when Resident #1 exited the building.
-Staff were not aware the doors would

automatically release after 15 seconds until after the elopement on 02/03/22.
-Staff searched all of the rooms and the grounds however, they were unable to find Resident #1.
-Staff informed the Administrator once the incident happened.
-Resident #1 was brought back to the facility by the police about 30 minutes after he left the facility.
-Staff were told by the Administrator to monitor Resident #1 every 30 minutes to ensure he was safe.
-Staff on the SCU provided 30 minute safety checks for Resident #1 but did not document the safety checks.

Telephone interview with Resident #1's MHP on 04/07/22 at 10:19 am revealed:
-Resident #1 was seen by MHP monthly in-person and by telehealth as needed for behaviors.
-Resident #1's initial assessment was done on 12/08/21 at the facility.
-Resident #1 stared at the exit doors on the (SCU) and exhibited wandering, exit seeking behaviors.
-She ordered to increase medication on 12/08/21 to Seroquel 150 mg at bedtime for agitation.
-On a follow up visit on 12/23/21 with Resident #1, he was refusing medication, agitated and guarded, there were no medication changes made at that time.
-On a follow up visit on 01/12/21 with Resident #1 he was doing well. He was distracted and guarded on exam. There were no medication changes made at that time.
-On 01/16/22, the facility contacted the MHP to report Resident #1 was agitated and exit seeking.
-She ordered medication on 01/16/22 for Clonazepam 0.25 mg daily at 4:00pm for

required direction.

Attempted review of Resident #11's care plan revealed there was not one available.

Review of Resident #11's Primary Care Provider (PCP) note dated 12/16/21 revealed:
-The resident was seen by her PCP for an admission assessment to the SCU.
-The resident was alert, in no distress, oriented to person only, and with an unsteady gait.
-The family was to bring the resident a walker to assist her with her unsteady gait.

Review of Resident #11's January 2022 personal care record revealed:
-There was an entry for feeding assistance with breakfast, lunch, dinner, and 3 snacks per day.
-The feeding assistance was documented as completed daily on 01/01/22-01/07/22, 01/10/22-01/13/22, 01/15/22-01/22/22, and 01/24/22-01/31/22 on first shift (7:00am-3:00pm), 01/01/22-01/16/22 and 01/17/22-01/31/22 on second shift (3:00pm-11:00pm), and 01/01/22-01/06/22, 01/08/22-01/09/22, and 01/11/22-01/24/22, and 01/26/22-01/31/22 on third shift (11:00pm-7:00am).
-The resident was provided feeding assistance for 85 of 93 opportunities.
-There was no documentation of the amount the resident ate or drank at each meal or snack.

Attempted review of Resident #11's February 2022 personal care record revealed there was not one available.

Review of Resident #11's hospital emergency physician documentation note dated 02/11/22 revealed:
-The resident was sent to the emergency

department (ED) due to the resident's blood pressure being excessively low.
-The resident's family member reported the facility called him and told him that the resident had been refusing food and water for the previous week and had declined over the week to a point of being less responsive.
-When the family member had visited the resident at the facility that day, 02/11/22, he barely recognized the resident and after getting her to come around he finally got her to take a drink of water.
-At that point, the family member insisted that the facility call an ambulance and transport the resident to the ED for further evaluation.
-The resident appeared frail and obviously ill with dry oral mucosa, decreased breath sounds, diminished bowel sounds, and being otherwise unable to cooperate with the exam.
-The resident's blood pressure was 82/30 (normal range 90/60 - 120/80) at 6:02pm upon arrival with a pulse of 105 (normal range 60-100).
-The resident was diagnosed with dehydration, sepsis (a life-threatening response to infection), pneumonia, and a urinary tract infection (UTI) and was admitted as an in-patient to the hospital.

Review of Resident #11's hospital Admission and History and Physical report dated 02/12/22 revealed the resident remained hospitalized and sedated while being treated for diagnoses that included a UTI, acute renal failure syndrome, dehydration, pneumonia, and hypernatremia (a high concentration of salt in the blood often caused by not drinking enough water).

Review of Resident #11's hospital progress note dated 02/14/22 revealed:
-The resident was diagnosed with and being treated for poor oral intake, acute renal failure (a

condition of decreased blood flow to the kidneys preventing the filtering of waste from the blood), volume depletion (condition in which the liquid portion of the blood is too low), hypernatremia (too much sodium in the blood possibly causing strong feelings of thirst, weakness, confusion, and bleeding around the brain), UTI, pneumonia (infection of the air sacs in the lung that may fill with fluid or pus) secondary to aspiration (when food, liquid, or other material enters a person's airway), metabolic acidosis (a serious electrolyte disorder), elevated troponin secondary to myocardial demand ischemia (oxygen requirements of the heart are not met), and delirium (extreme confusion).
-The resident was receiving antibiotics for the UTI which was likely caused by acute renal failure secondary to volume depletion, which also caused hyponatremia.
-The resident was receiving intravenous fluids (IVF) to treat the volume depletion and sodium bicarbonate to treat the metabolic acidosis secondary to acute kidney disease.
-The resident required a speech therapy evaluation secondary to aspiration pneumonia when appropriate.

Review of Resident #11's hospital progress note dated 03/17/22 revealed:
-The resident remained hospitalized and despite being treated with IV antibiotics, volume resuscitation, and UTI, the resident remained confused requiring total assistance and 1:1 feeding assistance and requiring a gastrostomy tube (feeding tube).
-After discussion with the family, the resident's status was changed to comfort care only and her advanced directives were changed to a Do Not Resuscitate (DNR) status in the event of a cardiac arrest.

D 273	Continued From page 81 -The plan was to continue supportive care until the resident could be placed in a skilled nursing facility. Review of Resident #11's hospital discharge note dated 03/18/22 revealed the resident was cleared to discharge to a skilled nursing facility after 35 days of hospitalization in stable condition on comfort care. Review of Resident #11's hospital discharge planning summary dated 03/21/22 revealed the resident was discharge to a skilled nursing facility on 03/21/22 at 1:25pm. Interview with a personal care aide (PCA) on 04/07/22 at 3:45pm revealed: -Resident #11 resided on the Special Care Unit (SCU) and sometimes exhibited behaviors requiring redirection and patience by staff members. -Resident #11 required ambulatory assistance, sometimes had a good appetite, and would drink most of a beverage if offered to her but would not know to ask for them and would sometimes spit it out. -She was unsure how often Resident #11 was offered water with meals or if she was ever offered fluids between meals; she did not offer water between meals and was not aware residents were supposed to be offered water with all meals until being made aware. -She was not working the day that Resident #11 went to the hospital and did not recall how well the resident was eating or drinking in the days prior to her hospitalization because she had not cared for her during that time period. Confidential interview on 04/08/22 at 1:18pm revealed:	D 273

D 273	Continued From page 82 -Resident #11 would often refuse food, water, and medications but she was unsure if it had been reported to the resident's primary care provider (PCP) or the Administrator. -It was the medication aide's (MA) responsibility to report issues to the PCP. -A MA sent Resident #11 out to the hospital on 02/11/22 due to a change in the resident's status but she was not sure of the details. Interview with a MA on 04/07/22 at 4:36pm revealed: -She offered residents water with meals but not in between meals or with snacks unless they asked or spontaneously if she thought a resident might want it; she was able to look at residents and tell if they were thirsty; she did not recall Resident #11 looking thirsty. -She was not present when Resident #11 went to the hospital but noticed that the resident began sleeping a lot and her meal intake decreased from 100% to about 70% about two weeks prior to the incident. -She reported the decreased intake and increased sleep along with a heel wound to another MA one day, but not to the PCP or anyone else because she was not concerned about the behaviors since the resident was still eating some, and was not sure why Resident #11 became so sick so quickly. -If she had been concerned, she would have reported her concerns to the resident's PCP. Interview with a second supervisor/MA on 04/08/22 at 11:01am revealed: -She did not recall Resident #11 having any obvious changes in her status or behavior in the week prior to her hospitalization. -Sometimes Resident #11 did not eat or drink well and the staff would try to encourage her to take	D 273

more at the request of the resident's family member.
-Sometimes Resident #11 had behaviors in which she would refuse to eat or drink when she was first admitted to the facility, but that seemed to improve as time went on and her behaviors calmed down.
-She reported decreased intake of food and drink to the previous Administrator, but she had not reported it to the resident's primary care provider (PCP), she did not know why.
-It was the supervisor/MA's responsibility to report resident issues to their PCP and she was usually on top of that but could not find any documentation that she had done so on behalf of Resident #11.

Telephone interview with a previous MA on 04/08/22 at 11:53am revealed:
-Resident #11 was only at the facility for two months and she was feisty and talkative upon admission and would eat or drink water if it was offered but would not know to request it and she required encouragement to do so due to her cognitive status.
-Resident #11 would not realize she was hungry and would think she already ate when it was mealtime.
-She would try to ensure the residents were offered water when she worked as much as possible because she knew it was important from training she received when she worked at a different facility, but there were not enough cups in the kitchen to provide it to all residents along with their normal beverage.
-She had gone out of medical leave for 3-4 days and when she returned to work, she realized she had not seen Resident #11 and went looking for her and found her in her room asleep.
-Resident #11 was different and had slurred

speech being unable to complete a sentence with decreased interaction and was no longer able to walk, eat, or drink without complete assistance.
-She notified Resident #11's primary care provider (PCP) and sent the resident to the emergency department (ED) on 02/11/22 for the slurred speech and change in status.
-The previous shift had not reported any changes with Resident #11 when she came on shift that day but the resident had seemed normal on the previous shift she had worked and it was a significant change for the resident who was also wearing the same clothes (a green shirt and purple pants) that the resident was wearing when she had worked 3 or 4 days prior.

Review of the facility's census reports provided on 04/05/22 revealed:
-The facility's in-house census was 45 residents.
-There were 30 residents residing in the AL side of the facility.
-There were 15 residents residing in the SCU

Observation of the kitchen during preparation of lunch on 04/06/22 at 12:40pm revealed:
-There were not enough cups for each resident to have more than one beverage with the meal service.
-The office manager was in the kitchen helping the dietary manager prepare food and drinks.
-The dietary manager prepared 6 cups of water and 16 cups of sweet tea for the SCU cart and 9 cups of water and 13 cups of sweet tea for the AL cart.
-There were 23 other smaller cups on the shelf empty and not in use.

Interview with the Administrator on 04/07/22 at 5:00pm revealed:
-Documentation of feeding and beverage

assistance was documented on all residents' personal care records.
-Any change in resident condition was expected to be reported by the MA to the PCP as soon as possible to obtain orders and move forward.
-She could not recall if the staff reported any changes in Resident #11's status, but she expected staff to report any issues and was not sure why they did not prior to the day the resident was hospitalized.
-She did not recall being concerned about Resident #11 prior to her hospitalization, but she had just started on 02/02/22 and was still getting to know the residents at that time.
-She did not realize that Resident #11's PCP was unaware of any concerns that staff had for Resident #11.
-She expected all staff to push and encourage fluid intake to try and prevent dehydration.
-She expected staff to report residents with decreased intake to the PCP and she did not want residents to miss meals.

Interview with a second PCA on 04/07/22 at 4:22pm revealed:
-Resident #11 walked and talked independently when she began working at the facility 2 months ago.
-Resident #11 would sometimes refuse showers and did not always eat or drink well requiring encouragement when feeding her.
-Resident #11 only drank tea with her meals and residents were not offered water in between meals, at snack time, or before bed automatically, but some residents would ask for it.
-She did not recall if Resident #11 ever complained of being thirsty, she only offered the resident water with dinner, the resident did not like to drink water, and she did not offer the resident water between meals, with snacks, or

before bed.
-She was not present when the resident went to the hospital, but she was told the resident just stopped being responsive and she was not sure what happened.
-She noticed a decline in Resident #11 on second shift (3:00pm - 11:00pm) the day before she was hospitalized in the common area and the resident did not look happy and was not talking or interacting with anyone like she normally would; she figured the resident was just tired but reported the behavior verbally to the next shift.

Telephone interview with Resident #11's PCP on 04/07/22 at 1:00pm revealed:
-She saw the resident the day prior (02/10/22) to her going to the hospital for a wound of her foot at the request of the facility.
-It would have been hard to assess whether the resident was having issues during her assessment on 02/10/22 because she visited the facility between the hours of 5:45 am and 6:30 am on Thursdays and residents were usually still asleep or just waking up.
-It would have been hard to know if the resident was experiencing complications from decreased intake without being notified because of her diagnosis of dementia and diabetes; diabetic residents often compensated well and could become acidotic more quickly than a healthier resident until they crash and decline quickly and she may not have realized there was a change in the resident on that day, 02/10/22.
-Resident #11 would not have known to ask for food and water due to her cognitive decline and she would have expected the facility to encourage her intake of both.
-It was concerning that the resident had such severe diagnoses upon admission to the hospital and the length of her stay in the hospital indicated

revealed:
-All residents had the freedom of movement unless restricted by appropriate written orders by a physician.
-State regulation required that residents residing in an Assisted Living (AL) community be served 4 ounces of water along with the residents preferred 8-ounce beverage.

1. Review of the facility's weight loss policy revealed every resident was to receive a monthly weight and if there was any loss or gain of 5% or more within a 30-day period or 10% or more in a 6-month period the resident's primary care provider (PCP) would be notified and documented in the resident's chart and a reassessment of the resident's condition would be performed.

Review of Resident #13's current FL-2 dated 02/12/21 revealed:
-The resident resided on the Special Care Unit (SCU).
-Diagnoses included dementia, hyperlipidemia, hypertension, osteoporosis, edema, and venous insufficiency.
-The resident was constantly disoriented, had wandering behaviors, and was ambulatory.
-The resident was on a regular diet with no added salt and there was an order for supplemental shakes twice daily.

Review of Resident #13's current assessment and care plan dated 02/19/22 revealed:
-The resident was always disoriented and had significant memory loss requiring direction.
-The resident required supervision with eating and transferring and extensive assistance with toileting, ambulation, bathing, dressing and grooming.

April 2022 electronic medication administration record (eMAR) revealed:
-There was an entry for 50 ounces of fluid intake daily.
-The 50 ounces of fluid intake was documented as administered on first shift (7:00am-3:00pm) daily from 02/01/22-04/06/22.
-There was an entry for a supplemental shake at 7:30am, 12:30pm, and 4:00pm daily.
-The supplemental shakes were documented as administered at 7:30am, 12:30pm, and 4:00pm daily from 02/01/22-04/06/22.

Review of Resident #13's PCP visit note dated 01/28/22 revealed:
-The resident was taken to the emergency department (ED) 2-3 weeks ago due to being unresponsive.
-The resident's family member and caregiver were unable to provide details of the incident.
-It was reported that the resident ate well but would sometimes refuse to eat all of her food.
-The resident appeared thin, was alert but no communicative, and was not oriented to person, place or time.
-There was a plan to have the facility document the resident's food intake and to start feeding the resident if she ate less than 50% of her food.
-She was unable to access the resident's recent hospital records but there was a possibility that the incident was caused by lack of intake with hydration and/or food.

Review of Resident #13's PCP physician consultation report dated 01/28/22 revealed:
-The resident had a 16-pound weight loss in 6 months.
-There was an order to document the percentage of daily food intake for each meal.
-There was an order for supplemental shakes

three times daily.
-There was an order to assist and feed the resident if she began eating less than 50% of her meal.

Review of Resident #13's record revealed there was no documentation of food intake or notification of weight loss to Resident #13's PCP.

Review of Resident #13's hospital emergency department (ED) physician documentation note dated 04/08/22 revealed:
-The resident presented to the ED via ambulance with generalized weakness and dehydration.
-The resident was admitted to the hospital with diagnoses of altered mental status, hyperosmolality and hypernatremia (often caused by insufficient fluid intake), dehydration, hypokalemia (low potassium levels that could cause weakness, abnormal heart rhythms, or cardiac arrest), and adult failure to thrive.

Review of Resident #13's hospital progress note dated 04/09/22 revealed:
-The resident was being treated for hypernatremia, volume depletion, acute renal failure, metabolic encephalopathy, advanced dementia, severe malnutrition, and hypokalemia.
-The resident's metabolic encephalopathy was likely secondary to the advanced dementia, hyponatremia, and volume depletion.
-The resident likely had a poor prognosis due to advanced dementia.

Review of Resident #13's hospital progress note dated 04/10/22 revealed:
-The residents acute renal failure lab work showed improvement.
-The resident was to continue treatment of IVF over the next 24-48 hours until the resident was

D 276	Continued From page 94 able to eat by mouth. -The provider discussed placing a feeding tube in the resident's stomach or placing the resident on hospice due to the high probability the resident would have to be readmitted for the same issues. Interview with a PCA on 04/06/22 at 8:55am revealed: -She was taught to feed residents by sitting at eye level, talk to the residents during the meal, not to rush the meal, and to offer drinks in between bites. -Some days Resident #13 would eat well, sometimes not; she would usually drink more than she ate. -Resident #13 did receive mighty shakes with her medications as scheduled. -She was not aware Resident #13 was to eat 50% or more of her food and drink. Interview with a personal care aide (PCA) on 04/08/22 at 10:36am revealed: -She was taught to provide feeding assistance to residents by sitting with them at eye level in a comfortable setting, to encourage independence in eating as able or assist as needed, encourage drinks in between bites, and to allow the resident to take as much time as they needed to eat without rushing them. -She was also taught encourage, remind, and redirect residents to eat and ensure their intake was enough trying to get them to eat at least 50% of their meal which could often take up to an hour. Confidential interview on 04/08/22 at 1:18pm revealed: -Resident #13 was able to feed herself and eat independently until March 2022 when staff had to begin assisting her.	D 276

sure why the family became concerned about the resident.
-The staff had not reported any issues regarding Resident #13 to her, but she instructed the staff to send the supervisor/MA to send the resident out per the family's request.
-Resident #13 was still at the ED and when she talked to the family, they were concerned the resident was failing to thrive.

Telephone interview with the facility's contracted PCP on 04/07/22 at 1:00pm revealed:
-She expected resident who required feeding assistance to be fed with dignity to include offering drinks in between bites.
-She also expected staff to encourage residents to eat as much as possible over a one-hour time frame.
-She expected to be notified if a resident was having issues eating to prevent weight loss, but she was not notified of Resident #13's weight loss because she had never seen the resident before.

Telephone interview with Resident #13's PCP's registered nurse on 04/08/22 at 2:36pm revealed:
-The resident's family member had called the triage nurse that morning, 04/08/22, expressing concerns about dehydration, lethargy, and weight loss and the resident was sent to the ED.
-The resident was last seen by the PCP on 01/28/22 and weighed 103 pounds which was a 13-pound weight loss from her previous appointment 6 months prior.
-The PCP ordered for staff to assist the resident with eating if she ate 50% or less of her meals on 01/28/22 to increase intake due to concerns from the resident's weight loss.

Telephone interview with Resident #13's PCP on 04/08/22 at 4:17pm revealed:

when the facility did not communicate, provide documentation, or follow orders as written making it difficult to guide the resident's care and prevent deterioration and hospitalization.
-If she had received the documentation or notification that the resident was experiencing continued decreased intake or change in status, she would have assessed the resident to reevaluate her needs.
-Continued weight loss would increase the resident's frailty, which would lead to decreased movement, leading to an increased possibility of falls which could all potentially lead to the resident's demise.

Refer to interview with the Administrator on 04/07/22 at 5:00pm.

2. Review of Resident #3's current FL-2 dated 03/28/22 revealed:
-Diagnoses included heart failure, hypertensive heart disease, chronic obstructive pulmonary disease (COPD), anxiety, spondylosis without myelopathy or radiculopathy, and a history of pulmonary embolism.
-There was no other assessment information located on the document.

Review of a physician's note dated 11/11/19 revealed the resident had a history of a cardiovascular accident (CVA) with lasting hemiplegia and required the use of a walker to ambulate safely.

Review of Resident #3's current care plan dated 03/28/22 revealed:
-The resident had limited strength and was ambulatory with a wheelchair or walker.
-The resident was sometimes disoriented, forgetful, and required reminders.

-The resident required his meat to be cut up and limited assistance with eating, ambulating, and transferring and extensive assistance with toileting, bathing, dressing, and grooming.

Review of Resident #3's progress notes dated 02/26/22 revealed:
-The resident was sent to the emergency department (ED) that day due to being unresponsive.
-The resident became responsive when emergency medical services (EMS) arrived stating he did not feel well and was transported to the ED for further evaluation.

Review of a hospital discharge note for Resident #3 dated 02/26/22 revealed:
-The resident was diagnosed with syncope (passing out) and was to follow up with his primary care provider (PCP) in 1-2 days.
-The resident was to drink plenty of fluids and stay well hydrated.

Review of Resident #3's progress noted dated 02/26/22 at 4:00pm revealed the resident had returned to the facility from the hospital and was advised to drink plenty of fluids.

Review of a PCP order for Resident #3 dated 02/26/22 revealed there was an order for hydration with water by mouth regularly.

Review of Resident #3's record revealed there was not documentation of the resident's water intake.

Review of Resident #3's primary care provider (PCP) note dated 03/03/22 revealed:
-He was assessed as a follow-up to a visit to the ED in which he had a syncopal episode on

02/26/22 in which he was noted to have a heart rate of 55 on an EKG and 50 upon admission (normal 60-100).
-There was an order to change a blood pressure medication and to obtain a blood pressure and heart daily for two weeks alternating times on day and evening shifts.

Review of Resident #3's PCP note dated 03/24/22 revealed:
-The resident's daily heart rate and blood pressure values had been assessed as stable with a heart rate ranging from 61-80 after his medication change.
-The resident's body mass index (BMI) was above normal with the facility controlling meals and portions but the resident also consumed outside food and drink.
-She was unable to counsel the resident on his food and drink intake due to his inability to understand and retain information and would continue to monitor him.

Observation of breakfast on 04/06/22 from 8:01am to 9:08am revealed:
-Resident #3 was served his breakfast at 9:08am, over one hour later than residents in the dining room were served their breakfast.
-Resident #3's breakfast consisted of 1 piece of toast, 1 cup of oatmeal, 1 pat of jelly, 1 cheese omelet, 1 sausage link, and 8 ounces of orange juice.
-Resident #3 fed himself his breakfast consuming 50% of the meal and orange juice but was not offered or served any milk or water with the breakfast.

Interview with Resident #3 on 04/06/22 at 9:08am revealed:
-He normally received his breakfast late, but he

did not know why.
-He was still hungry after his breakfast but would not ask for more.
-Previously, when he asked for more food, he had been told there was no more or that he was only allowed one plate and would not offer to make him anything else.
-If he was given more to drink, he would consume it.
-He was bedbound and unable to get food and drink for himself.

observation of Resident #3 on 04/06/22 at 11:18am revealed:
-There was a water bottle on his bedside table with a pink liquid in it.
-The water bottle had a was open and had a straw in it and was ¾ full.

Interview with Resident #3 on 04/06/22 at 11:18 revealed:
-His roommate got him some lemonade to drink because he was thirsty.
-No one had been in his room to check on him since breakfast.
-If he did not have his roommate, he would not get enough to drink.

Interview with Resident #3's roommate on 04/05/22 at 10:10am revealed:
-Resident #3 was bedbound, unable to reposition himself on his own, and the staff did not get the resident out of bed each day as his family desired.
in the room with Resident #3, the resident would be unable to reach the call bell and could not remember how to use the call bell if he needed help or assistance.
-He looked out for Resident #3 to ensure the resident had what he needed.

-Resident #3 had never asked her for water and she was unsure if he would be able to know to ask.
-Resident #3's family provided water and snacks to him because they had been worried about dehydration.
-She did not recall Resident #3 having an order to administer water.

Interview with a medication aide (MA) on 04/07/22 at 4:22pm revealed:
-She did not recall Resident #3 having an order to administer water.
-Resident #3 did not use his call bell or request water that she could recall but thought he could if he wanted to.

Telephone interview with Resident #3's family member on 04/08/22 at 7:52am revealed:
-The family had been concerned the resident was not getting enough to drink after he was sent to the hospital on 02/26/22.
-It was hard to find staff for assistance when she visited and sometimes 4-5 hours would go by before anyone would check on the resident.
-The resident's skin was dry and flakey and the resident was not served water by the facility, only tea with meals.
-She had been buying water bottled for the last month and the resident's roommate was ensuring he got enough to drink.
-Since the resident had been drinking more water his skin had improved.
-The resident was unable to transfer or walk and relied on the staff to check on him to meet his needs.

Interview with a fourth PCA on 04/08/22 at 10:36 revealed:
-Resident #3 was dependent on facility staff to

assist him with dressing, bathing, and feeding and he was unable to get up or meet his own needs.
-Resident #3 was forgetful and disoriented much of the time and he would forget to consistently remember to use his call bell or reach it if he needed anything.
-She tried to check on Resident #3 every 30-minutes when she worked to see if he needed anything, but his family provided water to the resident and his roommate ensured he drank it.
-Tasks that often went undone due to not having enough time included making beds, offering hydration in between meals, and other things.
-She tried to offer water every 30-minutes if the resident requested it and it was available with every meal and snack in the dining room; the resident would have to request it or get it themselves.

Interview with the Administrator on 04/07/22 at 3:30pm revealed:
-She was unable to find an I/A report for Resident #3's syncopal episode on 02/26/22 and could not recall specific details about the event.
-She was not sure if the primary care provider (PCP) was notified of Resident #3's episode on 02/26/22 but expected the supervisor/MA to ensure the PCP was notified once the immediate needs of the resident were met.

Telephone interview with Resident #3's primary care provider (PCP) on 04/07/22 at 1:00pm revealed:
-She expected orders to be clarified and implemented as written and was not aware the facility was not offering Resident #3 water regularly.
-Not offering the residents water or other fluids could lead to dehydration, UTIs, acute renal

D 282	Continued From page 107 This Rule is not met as evidenced by: Based on observations, record review and interviews, the facility failed to ensure the kitchen was clean and protected from contamination related to a mice infestation and mice droppings in and around improperly stored food. The findings are: Review of the facility's current food establishment sanitation report dated 01/29/22 revealed: -The facility's sanitation score was a 97. -All food items were to be removed from the floor and stored at least 6 inches above the floor. Review of the facility's current sanitation report dated 01/29/22 revealed: -The facility's sanitation score was a 95. -The flooring was badly cracked and hard to clean and there were holes in the walls in the spa bathrooms and storage rooms that needed to be patched. Observation of the kitchen and surrounding areas within the kitchen on 04/05/22 from 3:30pm to 4:30pm revealed: -There were cardboard boxes of food stored on the floor in the pantry and a sticky mousetrap on the floor under the pantry shelves. -There was a box of saltine crackers sitting on a shelf that had been chewed through with crumbs of debris and dried food that appeared to be okra and noodles sitting on the plastic container next to the box. -The floor had a black and brown thick sticky substance on it and there were copious amounts of mice droppings on top of containers of food and along the edges of the walls under the shelves of food in the entirety of the room. -The oven had a thick black substance caked to	D 282

D 282	Continued From page 108 the inside of the door which appeared to be dried cooked food that had spilled. -The floors in the kitchen also had a brown sticky substance on them and there was a dead roach on the floor at the corner of the oven. -The door leading out of the kitchen into the special care unit (SCU) dining room had a brown substance all over the middle portion of the door. -There was a utility room off the kitchen before reaching the SCU dining room door with a computer and keyboard on the floor. -There was a sticky mouse trap on the floor next to the computer covered in dirt, debris, and two dead mice. -There was another sticky mouse trap on the floor behind the computer in the corner behind the door with six dead mice and two dead roaches on it. -There were mice droppings and debris littering the entirety of the floor which also had a sticky brown substance on it in the utility room. Interview with the dietary manager on 04/05/22 at 10:48am and 3:30pm revealed: -He started working at the facility 4 days prior on 04/01/22. -He had never seen mice or other pests in the kitchen since he started working at the facility and he was unaware that the black droppings in the pantry were from mice activity. -He was not aware there were dead mice on traps in the utility room next to the kitchen as he had not been in that room yet. -He was not sure if the Administrator was aware of the pest issue in the kitchen or if there was a contracted exterminator to treat the issue. -He was not completely aware of how food should be stored but was concerned that there was mice activity in a room where there was open food. D 282	Continued From page 109 Observation of the kitchen pantry on 04/06/22 at 12:02pm revealed there was no change from the previous day. Interview with the dietary manager on 04/06/22 at 12:02pm revealed: -He had not had time to clean the pantry because he was the only person working in the kitchen that day. -He asked the Administrator for permission to come in the following weekend on his day off to clean the pantry when someone else would be present to prepare food for the residents. -He was not aware of dead mice in the utility room; he had not gone in that room before. Interview with the Administrator on 04/05/22 at 5:23pm revealed: -She was aware there was mice activity in the kitchen and some resident's rooms. -She was told upon starting in February 2022 that mice had always been a problem in the kitchen and the exterminator had tried different kinds of traps to control the issue. -She was not aware of any dead mice on traps in the kitchen utility room and it was concerning that mice were in the pantry where food was not being stored correctly being left open or stored on the floor. -She was not concerned about food contamination from the mice with the open food that was not stored properly because she trusted the new dietary manager to throw it away if it had been contaminated. -She had not had a conversation about proper food storage or food contamination with the dietary staff yet, but she would train them on contamination and cleanliness. Interview with the facility's contracted primary	D 282

D 282	Continued From page 110 care provider (PCP) on 04/07/22 at 1:00pm revealed: -She would generally come to the facility early in the mornings when it was still dark outside as residents were waking up and was not aware there was an issue with mice at the facility but was aware of a previous infestation of bed bugs which she thought was under control. -She expected the facility to control pest infestations and store food to prevent contamination because mice droppings could cause transmission of diseases through contamination to the residents. -It was especially concerning that the resident's food could be contaminated, and she expected the facility to employ an exterminator and follow the recommendations to get rid of pests to prevent complications. Telephone interview with the local health department's sanitation inspector on 04/08/22 at 3:38pm revealed: -She expected the facility to store food properly, throw contaminated food away, and ensure floors and surfaces were kept clean and free of crumbs that would continue to attract mice and other pests. -Contact with mouse feces could transmit viruses and bacteria especially if it was ingested through contaminated food such as Listeria (a foodborne illness that could cause headache, stiff neck, and confusion) and Salmonella (a foodborne illness that could cause nausea, vomiting, and diarrhea). -Residents who were elderly, on multiple medications, or immunocompromised were more at risk to issues that could result from mice dropping contamination and proper cleaning and food handling was imperative by the facility. straightened out and was responsible to ensure all meals were prepared and served as ordered.
-There were only two dietary staff members hired at the facility; him and one other cook who came in at 1:00pm.
-He knew there were a lot of things that needed to be fixed but needed guidance and educated on how to go about doing things the right way per rules and regulations as he was unsure where to even find the rules for guidance.
-The Administrator had just updated the resident's therapeutic diet order list that day, 04/05/22, and posted it in the kitchen.
-To his knowledge, there were no therapeutic diet menus to match the therapeutic diets residents were ordered and he was unaware of where to find the guidance to prepare meals for residents on therapeutic diets.
-He was still in training and had not yet received any training on therapeutic diets for residents and was unsure what to do differently to ensure therapeutic diets were served correctly as ordered in regard to NCS, NATS, and renal therapeutic diets.

1. Resident #4's current FL-2 dated 01/27/22 revealed:
-Diagnoses included diabetes mellitus, hypertension, arthritis, gout, muscle weakness, congestive heart failure, hyperlipidemia, and Alzheimer's disease.
-There was an order for the resident to be served a renal diet (a diet commonly used for residents with kidney issues and/or requiring dialysis).

Review of Resident #4's record revealed she attended dialysis three times weekly.

Review of the facility's therapeutic diet list revealed Resident #4 revealed the resident was

Second interview with the dietary manager on 04/08/22 at 11:30am revealed:
-He was not aware to serve water until being made aware on 04/05/22.
-It was frustrating because he did not have enough cups in the kitchen to serve residents their normal beverage along with water/milk with each meal.
-He would have to report the need for more cups to the Administrator because he really wanted to do what was right for the residents.

Interview with the Administrator on 04/07/22 at 5:00pm revealed:
-She thought staff were offering water at every meal service.
-She expected staff to offer water with every meal because it was important for the residents to stay hydrated and no one should eat something without a drink.
-Water was not being offered as expected because staff should have been trained to offer water with meals.
-The facility's dietary manager was new and still in training so he might not have known to serve water.
-She also expected all staff to try to push and encourage water intake to prevent dehydration.

Interview with the facility's contracted primary care provider (PCP) on 04/07/22 at 1:00pm revealed:
-It was concerning that the facility was not offering water to residents regularly and she expected the facility to offer water with every meal and upon request to the residents.
-Not offering the residents water could lead to dehydration, UTIs, acute renal failure, syncope (passing out), decreased blood pressure - especially in residents who were on multiple

down tables after the breakfast meal service was completed.

1. Review of Resident #3's current FL-2 dated 03/28/22 revealed:
-Diagnoses included heart failure, hypertensive heart disease, chronic obstructive pulmonary disease (COPD), anxiety, spondylosis without myelopathy or radiculopathy, and a history of pulmonary embolism.
-There was no other assessment information located on the document.

Review of a physician's note dated 11/11/19 revealed the resident had a history of a cardiovascular accident (CVA) with lasting hemiplegia and required the use of a walker to ambulate safely.

Review of Resident #3's current care plan dated 03/28/22 revealed:
-The resident had limited strength and was ambulatory with a wheelchair or walker.
-The resident was sometimes disoriented, forgetful, and required reminders.
-The resident required his meat to be cut up and limited assistance with eating, ambulating, and transferring and extensive assistance with toileting, bathing, dressing, and grooming.

Interview with the dietary manager on 04/06/22 at 11:26am revealed:
-He was not going to be service the lunch meal posted on the menu for that day because he did not have the ingredients.
-The lunch meal to be served that day, 04/06/22, was going to be tea/water, Philly steak subs, vegetable medley, chicken noodle soup, and tropical fruit salad.

-He did not like to eat fast, but he did not mind too much that day, 04/06/22, because lunch was late and he was really hungry.
-If he had been offered fruit at lunch that day, he would have eaten it.
-Sometimes he did not get enough to eat and stayed hungry most days.
-If he were to ask for more to eat, the facility staff would tell him he was only allowed one plate or it was all gone.
-The last time he asked for more to eat when he was still hungry was a couple of days ago and they did not offer to get him anything else, so he just stopped asking.

Interview with a third PCA on 04/06/22 at 1:22pm and 1:44pm revealed:
-There were three residents on the AL unit who required assistance with eating and two were bedbound, one of which included Resident #3.
-Resident #3 required assistance eating small items and using utensils along with thin foods like soup; she would always ask him if he needed assistance prior to feeding him a meal.
-She did not realize that the bedbound residents had not been offered fruit as the residents in the dining room had been but assumed there was no more fruit left and that was why.
-She was trained to assist resident with eating by allowing them to take their time and not make the resident wait to eat, she was not trained to sit at eye level with a resident to feed them.

Second interview with a third PCA on 04/07/22 at 3:45pm revealed:
-There was no reason she did not serve fruit with lunch Resident #3 on the previous day (04/06/22) except she did not think about it and the kitchen did not provide it to her to offer it.
-It was her priority to ensure bedbound residents

insufficiency.
-The resident was on a regular diet with no added salt and there was an order for supplemental shakes twice daily.

Review of Resident #13's current assessment and care plan dated 02/19/22 revealed the resident required supervision with eating.

Review of Resident #13 primary care provider (PCP) visit note dated 12/17/21 revealed the resident had a 12-pound weight loss in the previous 6 months but did not appear to be dehydrated and was not alert to person, place, time, or communicative.

Review of Resident #13's PCP physician consultation report dated 12/17/21 revealed:
-The resident had a 12-pound weight loss in 6 months.
-There was an order to increase the resident's portion sizes.

Review of Resident #13's PCP physician consultation report dated 01/28/22 revealed:
-The resident had a 16-pound weight loss in 6 months.
-There was an order to document the percentage of daily food intake for each meal.
-There was an order to assist and feed the resident if she began eating less than 50% of her meal.

Observation of the breakfast meal service on the SCU on 04/06/22 from 8:09am to 9:00am revealed:
-A PCA was seated at eye level with Resident #13 who required feeding assistance and was served breakfast at 8:10am consisting of a cheese omelet, one sausage link, 1 cup of oatmeal, 1

slice of toast, and 8 ounces of orange juice.
-Resident #13 was fidgety and unable to sit still, mumbling, grabbed at the plate, and had to be reminded and redirected to eat.
-Resident #13 would willingly take bites when offered and would sometimes point to the plate when she was ready for another bite of food; the resident was not offered any of her orange juice and did not have any other drinks in front of her.
-At 8:27am, when the surveyor walked away, the PCA no longer redirected the Resident #13 to eat any more of her breakfast and escorted her out of the dining room; she consumed 50% of the breakfast and 0% of the orange juice she was served.

Observations of the lunch meal service on the SCU on 04/06/22 at 11:30am revealed:
-Staff began prepping and setting the tables for lunch at 11:49am while residents waited in the TV room across from dining room for lunch to be served.
-At 12:35pm, staff knocked on the kitchen door and asked Dietary Manager what time lunch would be served.
-Lunch was served to independent feeders at 12:54pm.
-Residents were served steak sandwiches with mixed vegetables and 8 ounces sweet tea.
-Staff began assisting and feeding Resident #13 at 1:04pm and ended at 1:17pm; she consumed 30% of her meal, 50% of her tea and she was not offered water.

Telephone interview with Resident #11's PCP's registered nurse on 04/08/22 at 2:36pm revealed the resident had been followed for weight loss and the PCP ordered for staff to assist the resident with eating if she ate 50% or less of her meals on 01/28/22 to increase intake due to

D 311	Continued From page 136 concerns from the resident's weight loss. Telephone interview with Resident #11's PCP on 04/08/22 at 4:17pm revealed: -The resident had lost 13 pounds over a 6-month period when she last saw her in January 2022 and the facility failed to provide the meal and fluid intake logs to her as requested and ordered. -She expected the facility provide enough staff to feed the resident if the resident was taking 50% or less of her food encouraging her to eat and drink as much as possible, minimum of 40 ounces of fluid per day, and keep accurate logs for her to assess at follow up appointments. -If the resident began taking less than 50% of her meals or expected fluid intake, she expected to be notified within one week so she could assess her. -Continued weight loss would increase the resident's frailty, which would lead to decreased movement, leading to an increased possibility of falls which could all potentially lead to the resident's demise. Attempted interview with Resident #11's family member on 04/07/22 at 10:17am and 11:51am were unsuccessful. Refer to interview with a PCA on 04/06/22 at 7:40am. residents who required assistance, and provide feeding assistance to residents who could not eat independently.

Interview with a second PCA on 04/06/22 at 8:50am revealed:
-There had been no dietary wait staff at the facility for approximately one month.
-It was the PCAs responsibility to set up, serve, and clean up at each meal service daily.

Interview with a third PCA on 04/07/22 at 3:45pm revealed:
-Lack of kitchen staff contributed to delays in resident's receiving food on time.
-There were several residents who required feeding assistance there was not enough staff to assist everyone at the same time and she could not do two things at once.

Interview with a fourth PCA on 04/08/22 at 10:36 revealed:
-Staffing at the facility was appropriate on paper, but there was usually not enough staff present to actually meet residents' needs and things often got missed on first and second shift because it was busier due to residents being awake and some residents required a lot of care.
-Tasks that often went undone due to not having enough time included making beds, offering hydration in between meals, and other things.

Interview with a medication aide (MA) on 04/06/22 at 1:00pm revealed:
-It was difficult not having any dietary wait staff because the PCAs had to fulfill those duties which sometimes prevented them from being able to assist resident who required help eating or helping residents on the floor as needed.
-Residents sometimes had to wait to eat or be

assisted on the floor.
-She was not sure why the facility no longer had dietary wait staff, but it was frustrating because she was only able to assist and help when she was not passing medications and there was not enough staff to do everything in a timely manner.
-Bedbound residents who ate in their rooms did not always get served late, only when the shortage of dietary staff became an issue.

Interview with a second MA on 04/07/22 at 4:22pm revealed:
-The staffing numbers had been decreased since she began working at the facility one and a half years ago and it affected resident care because it was difficult to supervise and assist everyone and complete tasks such as laundry, showers, baths, and feeding assistance at the same time.
-Sometimes residents who required feeding assistance would have to wait to be fed until there was a staff member available to do so.

Interview with the dietary manager on 04/05/22 at 10:48am revealed:
-He started working at the facility 4 days prior on 04/01/22.
-He was in the process of getting everything straightened out and was responsible to ensure all meals were prepared and served as ordered.
-There were only two dietary staff members hired at the facility; him and one other cook who came in at 1:00pm.

Second interview with the dietary manager on 04/06/22 at 7:30am revealed one of the personal care aides (PCAs) was helping him in the kitchen that morning because there was no other kitchen staff available that day and he could not prepare and serve all the meals on his own.

D 311	Continued From page 140 Interview with the Administrator on 04/07/22 at 5:00pm revealed: -She expected residents to be fed at eye level in an unrushed manner and to be served at the same times as the rest of the residents, being offered all the same foods and drinks that were offered to everyone else, and being offered drinks in between bites of food. -It was also important for residents who required assistance with feeding to be supervised for safety and to have company for socialization, especially if they were unable to come to the dining room for the meal on their own. Interview with the facility's contracted primary care provider (PCP) on 04/07/22 at 1:00pm revealed: -Residents who required assistance to eat should not have to wait until a staff member was available to assist them. -Residents who had to wait for feeding assistance could lose interest in wanting to eat due to having to wait which could contribute to weight loss. -She expected the facility to have enough staff to feed all residents who required assistance in a timely manner within the same hour that all other residents were served meals, for resident's food to not get cold because they had to wait to eat, and expected all residents to be served the same meal options despite being bed bound or requiring feeding assistance. -She expected resident who required feeding assistance to be fed with dignity to include offering drinks in between bites. -She also expected staff to encourage residents to eat as much as possible over a one-hour time frame. him, he would not get what he needed.
-He did not like to eat fast, but he did not mind too much that day, 04/06/22, because lunch was late and he was really hungry.
-If he had been offered fruit at lunch that day, he would have eaten it.
-Sometimes he did not get enough to eat and stayed hungry most days.
-If he were to ask for more to eat, the facility staff would tell him he was only allowed one plate or it was all gone.
-The last time he asked for more to eat when he was still hungry was a couple of days ago and they did not offer to get him anything else, so he just stopped asking.

Interview with the PCA on 04/06/22 at 1:44pm revealed:
-She assisted the resident with lunch by standing at his bedside as she normally did that day.
-The resident would have told her if he did not want her help with eating.
-She was never taught to assist resident to eat any other way.

Second interview with the PCA on 04/07/22 at 3:45pm revealed:
-She fed all residents who required feeding assistance as needed and should allow them to take their time to eat offering drinks in between bites.
-She was never trained to sit down with residents at eye level, not to rush them, or make a resident wait to eat but realized after being made aware how not doing those things might make a resident feel rushed.

Interview with a second PCA on 04/06/22 at 8:55am revealed she was taught to feed residents by sitting at eye level, talk to the

residents during the meal, not to rush the meal, and to offer drinks in between bites.

Interview with a third PCA on 04/08/22 at 10:36am revealed:
-She was taught to provide feeding assistance to residents by sitting with them at eye level in a comfortable setting, to encourage independence in eating as able or assist as needed, encourage drinks in between bites, and to allow the resident to take as much time as they needed to eat without rushing them.
-She was also taught encourage, remind, and redirect residents to eat and ensure their intake was enough trying to get them to eat at least 50% of their meal which could often take up to an hour.

Interview with a medication aide (MA) on 04/07/22 at 4:22pm revealed:
-Staff were trained and expected to assistance residents who required feeding assistance without rushing them while sitting at eye level.
-Sometimes residents would have to wait to eat until a staff member was available to assist them, but it was important to encourage food intake and to feed them as trained out of respect.

Interview with the Administrator on 04/07/22 at 5:00pm revealed:
-She expected all PCAs and MAs to assist in feeding residents who required assistance.
-All staff had been trained to and were expected to feed residents as eye level, in a non-rushed manner, offer drinks in between bites, and encourage increased food intake.
-She also expected all staff to push water intake to help prevent dehydration.

Interview with the facility's contracted primary

received were for prn. Do they need to be scheduled?"
-There was no response documented on the verbal order sheet.

Review of Resident #2's physician's orders and care notes for February 2022 revealed no documentation the hospice provider was contacted to clarify the Lorazepam orders.

Review of Resident #2's hospice note report dated 02/20/22 revealed:
-The resident was lying in bed supine with eyes closed, nonresponsive and peaceful.
-The resident was breathing very shallow at 24 breaths per minute.
-The resident was tachycardic and tachypneic.
-The resident's family reported the resident would moan out in pain if touched but seemed to be more comfortable with the increased medications.

Review of Resident #2's hospice note report dated 02/21/22 revealed:
-The resident was lying in bed supine with eyes closed, nonresponsive and peaceful.
-The resident was breathing very shallow.
-The resident was bradycardic (slow heart rate) at 33 beats per minute and tachypneic at 30 breaths per minute.

Review of Resident #2's hospice provider orders dated 02/21/22 revealed there was a prescription hardcopy order for Lorazepam 1mg take 1 tablet every 2 hours as needed for terminal anxiety.

Review of Resident #2's February 2022 electronic medication administration record (eMAR) revealed:
-There was an entry dated 02/15/22 for Lorazepam 0.5mg take 1 tablet by mouth or

under tongue every 4 hours prn for anxiety or agitation or restlessness.
-Lorazepam 0.5mg was documented as administered prn on 4 occasions for anxiety: 02/15/22 at 2:17pm; 02/17/22 at 7:58am and 11:50pm; and 02/18/22 at 2:11pm.
-There was an entry dated 02/18/22 for Lorazepam 0.5mg take 1 tablet by mouth or under tongue every 2 hours prn for anxiety, agitation, or restlessness.
-Lorazepam 0.5mg was documented as administered prn on 02/19/22 at 10:39am for "shortness of air".
-There was an entry dated 02/19/22 for Lorazepam 1mg take 1 tablet by mouth every 2 hours prn for terminal anxiety.
-No prn Lorazepam 1mg was documented as administered and this entry was documented as discontinued on 02/21/22 at 8:25am.
-There was an entry dated 02/21/22 for Lorazepam 1mg take 1 tablet by mouth every 2 hours prn for terminal anxiety.
-No prn Lorazepam 1mg was documented as administered and this entry was documented as discontinued on 02/22/22 at 1:29pm.
-There was a total of 4 Lorazepam 0.5mg tablets and 1 Lorazepam 1mg tablet documented as administered in February 2022.
-There was no entry for a scheduled dose of Lorazepam to be administered.

Review of Resident #2's controlled substance (CS) records for Lorazepam revealed:
-There was a CS record for 6 Lorazepam 0.5mg tablets dispensed on 02/15/22.
-All 6 doses were documented as administered prn from 02/15/22 at 2:17pm through 02/18/22 at 2:11pm.
-There was a CS record for 24 Lorazepam 0.5mg tablets dispensed on 02/15/22 and 1 dose was

documented as administered on 02/18/22 at 3:00 (am or pm not specified).
-There was a CS record for 30 Lorazepam 0.5mg tablets dispensed on 02/18/22.
-There were 29 doses documented as administered prn from 02/19/22 at 10:30 (am or pm not specified) through 02/20/22 at 4:30 (am or pm not specified).
-There was a CS record for 30 Lorazepam 1mg tablets dispensed on 02/19/22.
-There were 14 doses documented as administered prn from 02/20/22 at 6:30 (am or pm not specified) through 02/22/22 at 5:30 (am or pm not specified).
-There was no CS record for any scheduled doses of Lorazepam being administered.

Observation of a video of Resident #2 on 02/19/22 at 10:40am revealed:
-The resident was extremely thin and frail.
-The resident was lying on her back in bed with her mouth open.
-The resident moaned constantly during the video with the moaning becoming a distressful louder moan at times.
-The resident's eyes and mouth would open wider when her moaning became louder.
-The resident was taking shallow breaths.

Review of Resident #2's hospice note report dated 02/22/22 revealed a hospice nurse pronounced the resident deceased at 1:26pm on 02/22/22.

Interview with the Administrator on 04/07/22 at 4:10pm revealed:
-The MAs were responsible for clarifying medication orders.
-She did not know why the 02/19/22 order for scheduled Lorazepam was not on the eMAR.

20mg/1ml dispensed on 02/20/22 and received by the facility on 02/20/22 at 3:37am.
-There were 60 prefilled syringes of Morphine 20mg/1ml dispensed on 02/21/22 and received by the facility on 02/22/22 at 3:37am.

Review of Resident #2's pharmacy dispensing records from the facility's back up pharmacy for Morphine for February 2022 revealed a 30ml bottle of Morphine Sulfate 20mg/ml Concentrate was dispensed on 02/21/22.

Observation of a video of Resident #2 on 02/19/22 at 10:40am revealed:
-The resident was extremely thin and frail.
-The resident was lying on her back in bed with her mouth open.
-The resident moaned constantly during the video with the moaning becoming a distressful, louder moan at times.
-The resident's eyes and mouth would open wider when her moaning became louder.
-The resident was taking shallow breaths.
-Narration with the video indicated the date and time was 02/19/22 at 10:40am and the resident had just received Morphine at the family's request.

Telephone interview with Resident #2's family member on 04/06/22 at 7:18pm revealed:
-The facility ran out of Resident #2's Morphine (02/21/22) and when she got to the facility, the Administrator said she was working on getting some Morphine for the resident.
-The facility got a supply of Morphine in a bottle from the back up pharmacy because the back up pharmacy did not provide prefilled syringes.
-The resident could not speak but she frowned, moaned, and screamed all the time when she was out of Morphine.

-On 02/18/22, the MA was spacing out the Morphine so the resident would not run out.
-She would have to remind the MAs to administer the Morphine because they waited too long between the doses.

Interview with a MA on 04/06/22 at 2:17pm revealed:
-Resident #2 was supposed to be administered Morphine every 30 minutes.
-Resident #2 could not talk but she would make a moaning or groaning noise.
-The resident would hum and moan and sometimes it changed to a "distress" moan.
-The "distress" moan would get better after the resident received Morphine.
-Resident #2 ran out of Morphine on 02/21/22, the day before the resident passed.
-She thought the hospice nurse was made aware when the resident ran out of Morphine.
-The facility's contracted pharmacy sent an order to the back up pharmacy and the facility staff picked up some Morphine from the back up pharmacy.
-A supply of Morphine also came later that night (02/21/22) from the facility's contracted pharmacy.

Telephone interview with a former MA on 04/07/22 at 10:41am revealed:
-About a week before Resident #2 passed, the resident was in bed breathing hard and gasping for air.
-The resident's family wanted the MAs to give Morphine to the resident every time the resident moaned.
-The resident was started on hospice and the resident had an order from the PCP to administer Morphine every hour.
-She was off for 2 days and when she came back

the order had changed to every 30 minutes.
-The resident ran out of Morphine for "a whole day" (could not recall the date) so she called the pharmacy and the Administrator picked up a bottle of Morphine from the back up pharmacy.
-The MAs were responsible for ordering medication when the supply got "low" (could not specify a time frame).
-They documented the administration of Resident #2's Morphine on the eMAR and on a paper MAR and the CS record.
-She was not sure why Morphine was documented on a paper MAR and eMAR.
-The resident's family would come out of the room every 30 minutes and reminded her to administer the Morphine.
-There was one night another resident was acting up in the SCU dining room and Resident #2's family member came in and said Resident #2 needed her medication.
-She told the family member she could not come to administer it at that time.
-About 10 minutes later, the family member came back and said Resident #2 was dying and needed her medication.
-She was late administering the medication that night (could not say how late).
-The resident usually made a moaning and high-pitched screaming noise, "a horrible noise".
-When the resident was administered Morphine, the resident would stop making the noise.

Interview with the Administrator on 04/07/22 at 11:26am revealed:
-Resident #2 ran out of Morphine on Monday, 02/21/22, because the dosage had increased.
-The MAs should have ordered the Morphine on Saturday, 02/19/22.
-On Monday morning (02/21/22), the MAs realized the resident would run out of Morphine at

lunch time around 12:00pm or 1:00pm.
-The MAs ordered the Morphine from the facility's contracted pharmacy but it would not be delivered to the facility until later that night.
-The Administrator contacted the hospice provider and an order from the hospice provider was sent to the back up pharmacy.
-The Administrator picked up a bottle of Morphine from the back up pharmacy on 02/21/22 around 5:30pm.
-As soon as the Administrator got to the facility with the Morphine, the MA administered it to the resident.
-The supply of Morphine with prefilled syringes from the contracted pharmacy was delivered to the facility that night, 02/21/22, so the MAs stopped using the bottled Morphine and started back using the prefilled syringes.
-She never observed the resident when she was out of Morphine so she did not know what effect the missed doses of Morphine had on the resident.
-The MAs should have ordered the Morphine sooner.

Interview with a third MA on 04/08/22 at 11:33am revealed:
-The resident's Morphine was always available when she worked.
-When a MA received a hard copy prescription for a controlled substance, the MA would fax the order to the pharmacy and attach confirmation to the hard script and put it in the resident's record.
-The medication usually came in the pharmacy tote that same night and the pharmacy entered the order into the eMAR system.
-The MAs were responsible for approving the orders in the eMAR system and making sure everything matched.
-When she documented 3 doses of Morphine

were administered at the same time on the CS record, she may have administered a scheduled dose and a prn dose to Resident #2 at the same time.

Telephone interview with Resident #2's PCP on 04/07/22 at 1:00pm revealed:
-Resident #2 had advanced dementia and had been declining for a long time.
-The facility had called her about the resident being less alert, her breathing was abnormal, and they were trying to get hospice services for the resident so she could get Morphine.
-It was her understanding that the family wanted to keep the resident comfortable.
-She ordered Morphine and another medication for the resident for respiratory distress, agitation, and restlessness.
-She was concerned if the resident was uncomfortable or in distress the resident would not be able to relay that information.
-Signs that the resident was uncomfortable, in distress, or in pain would include grimacing, gasping for breath, moaning, and rising her body.
-Morphine was administered to prevent distress and pain and provide comfort.
-The MAs were calling her multiple times a day because the family wanted the Morphine dosage increased.
-There were frequent changes in the dose of Morphine which could have contributed to the medication running out.
-She did not recall if the facility notified her about the resident's Morphine being unavailable.
-Not receiving the Morphine as ordered could have caused the resident to be in pain or distress and uncomfortable.

Telephone interview with Resident #2's hospice nurse on 04/08/22 at 9:05am revealed:

-The facility would immediately notify: a) law enforcement-call 911 b) the resident's family member/responsible person c) the county department of social services.

Review of Resident #1's current FL-2 dated 12/02/21 revealed:
-Resident #1 had diagnoses of dementia, disorientation, CVA, frontal lobe CVA and metabolic encephalopathy.
-His level of care was on the special care unit.

Review of Resident #1's progress notes dated 01/01/22 revealed:
-Resident #1 tried to get out of exit door 01/01/22.
-He constantly pushed up against the door until it releases so resident can get out.
-Resident #1 becomes combative and uses profanity when trying to redirect him away from the door.

Review of Resident #1's progress note date 01/02/22 for Resident #1 revealed:
-Resident #1 got out the door 01/02/22.
-Initial actions taken by staff were to call the contracted primary care provider (PCP).
-There was no incident report completed.

Review of Resident #1's Accident/Incident (A/I) report dated 02/03/22 revealed:
-Resident #1 eloped from the SCU and was discovered missing at 2:00pm.
-Staff searched the facility thoroughly and the grounds.
-Staff informed the Administrator and contacted the local police.
-Resident #1 was returned to facility at 2:40pm by local police.
-Resident #1's family was called but no answer.
-The contracted PCP and contracted Mental

Health Provider were notified.
-The Administrator notified The Department of Social Services on 02/07/22 at 10:25 am via fax.

Interview with the Administrator on 04/07/22 at 3:30pm revealed:
-If the local AHS was not aware of the incident, it had not been reported as it should have been.
-She expected the medication aides (MA) to ensure an I/A report was completed and reported to a resident's PCP, family member, and the local AHS per rules and regulations.

2. Review of Resident #3's current FL-2 dated 03/28/22 revealed:
-Diagnoses included heart failure, hypertensive heart disease, chronic obstructive pulmonary disease (COPD), anxiety, spondylosis without myelopathy or radiculopathy, and a history of pulmonary embolism.
-There was no other assessment information located on the document.

Review of Resident #3's progress notes dated 02/26/22 revealed:
-The resident was sent to the emergency department (ED) that day due to being unresponsive other than breathing.
-The resident became responsive when emergency medical services (EMS) arrived stating he did not feel well and was transported to the ED for further evaluation.

Review of a hospital discharge note for Resident #3 dated 02/26/22 revealed:
-The resident was diagnosed with syncope (passing out) and was to follow up with his primary care provider (PCP) in 1-2 days.

Review of Resident #3's record revealed there
