D 371

Interview with the MA on 05/24/22 at 9:24am revealed she should have disposed of the pill that was dropped and obtained a new one prior to administration.

Interview with the Administrator on 05/25/22 at 9:40am revealed it was the responsibility of the MA to dispose of the dropped pill and replace the pill.

2. Review of Resident #2's current FL-2 dated 06/15/21 revealed diagnoses included mild protein-calorie malnutrition, stroke and essential hypertension (HTN).

Observations of the morning medication pass on 05/24/22 from 8:21am - 8:48am revealed the medication aide (MA) removed four of Resident #2's medications from the medication package into her ungloved hands and poured them into the medication cup prior to administration.

Review of Resident #2's May 2022 electronic medication administration record (eMAR) revealed:

- There was an entry for Lisinopril 10mg scheduled for 8:00am and was documented as administered on 05/24/22. (Lisinopril is used to lower the blood pressure.)
- There was an entry for Pepcid 20mg scheduled for 8:00am and was documented as administered on 05/24/22. (Pepcid is used to treat GERD.)
- There was an entry for Plavix 75mg scheduled for 8:00am and was documented as administered on 05/24/22. (Plavix is used to prevent strokes.)
- There was an entry for Coreg 12.5mg scheduled for 8:00am and was documented as administered on 05/24/22. (Coreg is used to treat HTN.)

or gloves to accommodate such situations. The RN/MCC will complete weekly and PRN checks for 30 days to ensure that this process is being followed and that there is no risk for transmission of disease or infection and to prevent cross-contamination.

The ED or clinician will complete PRN checks for 30 days to ensure that this process is being followed and that there are no risk for transmission of disease or infection and to prevent cross-contamination.
