Interview with a second PCA on 03/08/23 at 5:07am revealed: -She was getting residents up and dressed beginning at 4:30am on 03/07/23. -She had dressed Resident #3 and moved her to the dayroom; she did not recall the time. -There was not a PCA in the dayroom as she brought other residents in the dayroom as she brought other residents in the room. -The first PCA to get all the residents up would sit in the dayroom with the residents. -At about 6:40am, she was outside of the dayroom in the hallway assisting another resident towards the dayroom when she saw Resident #3 through the doorway. Resident #3 was leaning forward in her wheelchair. -She knew Resident #3 was going to fall because she was leaning so far forward but she could not get to her fast enough to catch her before she fell. -Resident #3 was laying on the floor when she entered the dayroom; another PCA went to get the MA while she stayed with Resident #3. -Resident #3 was bleeding above her left eye and had a "mark" on her left eye and nose, she also had a spot on her right knee and her left hand had a spot on her right knee and her left hand had a spot as sessed Resident #3 was considered a fall risk. She had never been told the resident was a fall risk. -She was not sure if Resident #3 was considered a fall risk. She had never been told the resident was a fall risk. -She felt Resident #3 was a fall risk because she leaned forward so much, and she was afraid the resident would fall out of her wheelchair. -Before the fall she always did 30 minutes to one-hour checks on Resident #3.

-When she administered Resident #4's	
Levothyroxine "the other day" she disposed of two	
tablets in the multidose package and	
administered a Levothyroxine 112mcg from the	
individual package.	
-She did not recall what day she disposed of the	
medication but that was the only time she had	
disposed of any of Resident #4's Levothyroxine.	
-Both the Levothyroxine 112mcg and Omeprazole	
"popped" on the computer to be administered at	
6:00am; she did not know the medication should	
not be administered together.	
Interview with the Resident Care Coordinator	
(RCC) on 03/08/23 at 7:15am revealed:	
-When the primary care provider (PCP) wrote	
new orders, she discontinued the medication out	
of the system and pulled the medication off the cart.	
-If a medication was in a multidose package, she	
would put a discontinue sticker on the package.	
-Orders were sent to the pharmacy, they input the	
information and then she or another care	
manager (CM) would approve the order on "our	
end."	
-They were not supposed to add anything to the	
computer system as they were supposed to reach	
out to the pharmacy and let them make the	
change.	
-Resident #4's Levothyroxine 112 was approved	
on 03/02/23 and the first administration should	
have been on 03/03/23.	
-She would have expected the MAs to look at the	
computer screen and verify the correct order and	
administer the Levothyroxine 112mcgThere should have been 4 tablets of	
Levothyroxine 112mcg administered.	
-She was concerned 4 tablets of Levothyroxine	
112 were documented as administered and only	
one tablet had been dispensed from the punch
