(d) The clinical skills validation portion of the competency evaluation shall be conducted by a registered nurse or a licensed pharmacist who has a current unencumbered license in North Carolina. The registered nurse or licensed pharmacist shall conduct a clinical skills validation for each medication administration task or skill that will be performed in the facility. Competency validation by a registered nurse is required for unlicensed staff who perform any of the personal care tasks related to medication administration listed in Subparagraphs (a)(4), (a)(7), (a)(11), (a)(14), and (a)(15) as specified in Rule .0903 of this Subchapter.
(e) The Medication Administration Skills Validation Form shall be used to document successful completion of the clinical skills validation portion of the competency evaluation for those medication administration tasks to be performed in the facility employing the medication aide. The form requires the following:
(1) name of the staff and adult care home;
(2) satisfactory completion date of demonstrated competency of task or skill with the instructor's initials or signature;
(3) if staff needs more training on skills or tasks, it should be noted with the instructor's signature; and
(4) staff and instructor signatures and date after completion of tasks.
Copies of this form and instructions for its use may be obtained at no cost on the Adult Care Licensure website, https://info.ncdhhs.gov/dhsr/acls/pdf/medchklst.pdf. The completed form shall be maintained and available for review in the facility and is not transferable from one facility to another.

This Rule is not met as evidenced by:
Based on observations, interviews, and record reviews, the facility failed to ensure 2 of 5 sampled staff who administered medications, completed a medication clinical skills checklist and had successfully passed the written state medication administration examination (Staff D), and completed the 5, 10, or 15-hour medication aide training course or had verification of previous employment (employee verification form) as a medication aide (MA) (Staff D and Staff E) before administering medication to residents.

The findings are:

1. Review of Staff D's, medication aide (MA), personnel record revealed:
-Staff A was hired on 12/21/22.
-There was no documentation Staff A had completed the medication clinical skills checklist.
-There was a certificate dated 05/26/22 for completion of a 15-hour medication aide training from a previous employer.
-There was no documentation Staff A completed the 5, 10, or 15-hour medication aide training since being hired on 12/21/22.
-There was no documentation of previous employment verifications Staff A had worked as a MA.

Telephone interview with Staff D on 08/02/23 at 6:08pm revealed:
-She had not had anyone complete a medication clinical skills checklist on her through observing

her administer medications.
-She had a 15-hour medication class at a previous facility but had not completed a 15-hour class at this facility.
-She had passed medications at the previous facility but had not taken the medication exam before she changed jobs.
-She had not taken the state medication administration exam; she needed to schedule that.

Review of residents' May 2023-July 2023 electronic medication administration records (eMAR) revealed:
-There was documentation Staff D administered medications on 7 days from 05/01/23-05/31/23.
-There was documentation Staff D administered medications on 8 days from 06/01/23-06/30/23.
-There was documentation Staff D administered medications on 7 days from 07/01/23-07/31/23.

Interview with the Licensed Practical Nurse (LPN) on 08/02/23 at 5:21pm revealed:
-Staff D was hired before she started to work at the facility in April 2023.
-She knew Staff D needed to take the state medication administration exam.
-She had not seen a medication clinical skills checklist for Staff D.

Refer to the interview with the Administrator on 08/02/23 at 6:12pm.

2. Review of Staff E's, medication aide (MA,) personnel record revealed:
-Staff E was hired on 05/14/23.
-There was documentation Staff E had passed the state medication administration exam on 03/20/17.
-There was no documentation Staff E completed

the 5, 10, or 15-hour medication aide training.
-There was no documentation of previous employment verifications Staff E had worked as a MA.

Review of residents' May 2023-July 2023 electronic medication administration records (eMAR) revealed:
-There was documentation Staff E administered medications on 7 days from 05/23/23-05/31/23.
-There was documentation Staff E administered medications on 20 days from 06/01/23-06/30/23.
-There was documentation Staff E administered medications on 20 days from 07/01/23-07/31/23.

Telephone interview with Staff E on 08/03/23 at 2:03pm revealed:
-She had been a MA for five years.
-She independently administered medications to the residents.
-She had her 15-hour medication aide training at another facility, but no other medication administration training had been provided since she began working at the facility.
-She did not know if verification of her work as a MA had been obtained from her previous employer, but she had provided the facility with the information for her previous employers.

Interview with the Licensed Practical Nurse (LPN) on 08/02/23 at 5:21pm revealed:
-Staff E was supposed to bring her 15-hour training class from another facility where she had received the training because she had recently taken the 15-hour class.
-Staff E had completed the medical clinical skills checklist.

Refer to the interview with the Administrator on 08/02/23 at 6:12pm.

Interviews with the Wellness Coordinator on 08/02/23 at 9:04am and 9:44am revealed:
-She had received notification from a medication aide (MA) that Resident #2's Cephalexin was not on the cart, and it had been a couple of days, so she reached out to Resident #2's PCP by email.
-She had not seen Resident #2's hospital discharge summary until today, 08/02/23, when she asked Resident #2's PCP's office to send a copy of the discharge summary.
-When she came into work on 07/27/23 she was handed Resident #2's hospital discharge summary and she handed it to Resident #2's PCP before she had a chance to review them.
-Today, 08/02/23, was the first time she had seen the order for Resident #2's antibiotic had been sent to the wrong pharmacy.

Review of Resident #2's electronic medication administration record (eMAR) for July 2023 from 07/26/23-07/31/23 revealed:
-There was an entry for Cephalexin 500mg take four times a day for UTI for 7 days until finished with a scheduled administration time of 9:00am, 1:00pm, 5:00pm, and 8:00pm; the start date was 07/27/23.
-There was no documentation Cephalexin had been administered from 07/27/23-07/29/23 and 07/30/23 at 9:00am and 1:00pm.
-There was documentation Cephalexin was administered for the first time on 07/30/23 at 5:00pm.

Review of Resident #2's progress notes from 7/26/23-07/31/23 revealed:
-On 07/27/23 at 8:54am and 1:17pm, there was documentation that Resident #2's Cephalexin was not in the facility.
-On 07/27/23 at 7:25pm, there was

documentation the medication had not arrived from the pharmacy, and at 8:55pm there was documentation that the Cephalexin was not on the medication cart and should arrive tonight, 07/27/23.
-On 07/28/23 at 8:06am, 1:19pm, 4:09pm, and 7:36pm, there was documentation the Cephalexin had not arrived at the facility.
On 07/29/23, at 8:18am, 12:39pm, and 7:56pm there was documentation that the Cephalexin was not in the facility and was waiting on the pharmacy.
-On 07/30/23 at 8:08am and 12:39pm, there was documentation that the Cephalexin was not in the facility.
-There was no documentation the pharmacy had been notified.

Review of Resident #2's eMAR for August 2023 for 08/01/23 revealed:
-There was an entry for Cephalexin 500mg take four times a day for UTI for 7 days until finished with a scheduled administration time of 9:00am, 1:00pm, 5:00pm, and 8:00pm.
-There was documentation Cephalexin was administered at 9:00am on 08/01/23.

Observation of Resident #2's medications on hand on 08/01/23 at 11:33am revealed:
-There was a punch card for Cephalexin 500mg dispensed on 07/30/23 for 28 tablets.
-Twenty-one tablets remained in the medication card.

Telephone interview with a pharmacy technician at Resident #2's pharmacy on 08/01/23 at 3:02pm revealed:
-An order for Resident #2 was received on 07/29/23 for Cephalexin 500mg four times daily for 7 days; the medication was not dispensed.

Telephone interview with Resident #2's family member on 08/01/23 at 5:52pm revealed:
-She brought Resident #2 back to the facility on 07/26/23 after she had been at the ED "for hours."
-She gave Resident #2's hospital discharge summary to a MA, but she did not know the MA's name.
-When she visited Resident #2 on 07/29/23, she was told there was "the biggest mix-up" with Resident #2's medication and it had been sent to the wrong pharmacy by the hospital.
-She was told the medication would be ordered immediately.
-On Sunday, 07/30/23, the medication had finally been delivered and administered to Resident #2.
-She was frustrated there had been a delay in Resident #2 receiving her antibiotic.
-She told the MA if Resident #2's "gets worse and becomes septic, you are going to hear from me."

Telephone interview with a representative at Resident #2's PCP's office on 08/02/23 at 9:12am revealed:
-They received notification on 07/27/23, Resident #2 had returned from the ED, and Resident #2 was then scheduled to be seen by her PCP on 07/27/23.
-There was no documentation in Resident #2's electronic record anyone had called about Resident #2's Cephalexin until 07/29/2023.
-On 07/29/23, there was documentation the triage nurse had been called requesting a prescription for Cephalexin for Resident #2.
-On 07/30/23, another call was received, the pharmacy needed the prescription for Cephalexin written for capsules, and the prescription for Cephalexin was rewritten.

Review of Resident #2's PCP's triage note dated

07/29/23 revealed:
-The reason Resident #2 was sent to the ED was listed as low blood pressure, gait was off, and the resident was confused.
-Resident #2 returned from the hospital with an order for Cephalexin 500mg four times daily for 7 days and the resident had not received any.
-An order was written for Cephalexin 500mg four times daily for seven days.
-The triage note was electronically signed at 4:18pm by a medical assistant and at 7:22pm by a nurse practitioner.

Review of Resident #2's PCP's triage note dated 07/30/23 revealed:
-The pharmacy would not fill the order for Cephalexin 500mg four times daily unless the order was written for capsules and not tablets.
-The insurance was rejecting the prescription due to not being written for capsules.
-A prescription was written for Cephalexin 500mg one capsule four times daily as directed for 7 days.
-The triage note was signed at 2:32pm.

Interview with a MA on 08/02/23 at 9:46am revealed:
-When she worked on 07/28/23, she saw Cephalexin listed on Resident #2's eMAR, but the antibiotic was not on the medication cart.
-When she worked on 07/29/23, Resident #2's Cephalexin was still not available to be administered so she called Resident #2's PCP's office and spoke to someone in triage to have the order sent to the pharmacy.
-When she worked on 07/30/23, Resident #2's Cephalexin was still not available, and she spoke to someone at the pharmacy and was told they needed a prescription specifying what was needed as the order did not specify tablet or

capsule.
-Resident #2 had a progressive decline for about a week before going to the ED, and the week of 07/24/23 she declined further.
-On 07/26/23, Resident #2 was having difficulty speaking, and her blood pressure was so low she had to sit down and was then sent to the ED to be evaluated.

Telephone interview with Resident #2's PCP on 08/02/23 at 10:09am revealed:
-Resident #2 had not been herself for a few weeks at the facility and she placed an order for staff to collect a urine sample to rule out a UTI on 07/13/23; staff had difficulty in obtaining a urine sample from the resident.
-She saw Resident #2 on 07/27/23 and knew the resident had returned from the ED with a diagnosis of UTI and was started on an antibiotic.
-She was given Resident #2's hospital discharge summary on 07/27/23 but was not given an original prescription for Cephalexin.
-She did not know the discharge summary she was given had not been reviewed by the facility staff.
-She did not know Resident #2 had not started on the Cephalexin when she saw the resident on 07/27/23.
-No one had reported to her any issues with starting Resident #2's Cephalexin.
-She could see in Resident #2's electronic record someone from the facility had called in to triage with the PCP's office on 07/29/23 and requested a prescription for Cephalexin 500mg and an order was sent to the pharmacy.
-On 07/30/23, she could see someone had called back to triage with the PCP's office because Resident #2's insurance was rejecting the order for tablets and a new prescription for capsules was needed.

{D 358}	Continued From page 13 -She was concerned Resident #2 had a UTI and needed to be treated. -Because Resident #2 did not receive the Cephalexin until 4 days after the medication was ordered, it extended the time Resident #2 had the UTI and delayed the resident from feeling better. -An ongoing UTI also increased the resident's risk of falls. Telephone interview with another MA on 08/02/23 at 1:15pm revealed: -She worked on the third shift on 07/26/23. -She did not see or talk to Resident #2's family member on 07/26/23 when the resident returned from the ED. -She saw Resident #2's discharge summary laying on the desk at the nurse's station. -Whoever received the discharge summary was responsible for faxing it to the pharmacy. Interview with the facility's Licensed Practical Nurse (LPN) on 08/02/23 at 5:21pm revealed: -When a resident returned from the hospital, the discharge summary should be reviewed by the MA who received it and if no new orders, the discharge summary would be scanned to her or her assistant and scanned to the resident's electronic record. -Original prescriptions should be faxed to the pharmacy by whoever received the prescription. -She knew Resident #2 had returned from the hospital with an antibiotic order and had been diagnosed with a UTI. -No one had told her there was an issue receiving Resident #2's Cephalexin. -When a resident went to the ED, a medication list was sent with the resident, and the list should have the resident's pharmacy listed. -If the pharmacy was not listed, the hospital should have called to see which pharmacy to	{D 358}

send the prescription to.
-She did not know Resident #2's prescription had been sent to the wrong pharmacy.
-She worked as a MA in the SCU on 07/27/23 and did not see Resident #2's Cephalexin on the medication cart and thought it had not been delivered.
-She asked the other MA when medications were usually delivered and was told the medications were delivered on the third shift.
-She assumed Resident #2's Cephalexin would be delivered during the third shift on 07/27/23.
-She worked again on Friday, 07/28/23, and saw Resident #2's Cephalexin was still not on the medication cart and assumed it would be delivered that night as sometimes it would take a couple of days depending on what time the order was received by the pharmacy.
-She was not notified over the weekend, 07/29/23-07/30/23, the Cephalexin had not been received.
-She would have expected the MA on the first shift to have called the pharmacy the next morning after returning from the hospital to make sure the prescription had been received.
-When she returned to the facility on 08/01/23 she saw a preauthorization form for Resident #2's Cephalexin, and she checked with the MA and was told the medication had been delivered.
-She was concerned there was a delay in Resident #2's receiving the Cephalexin and her UTI could have gotten worse.

Interview with the Administrator on 08/02/23 at 6:12pm revealed:
-Discharge summaries need to be given to the MA upon return to the facility.
-The MA should give the discharge summary to the LPN the next day if received after hours.
-The MA was responsible for looking over the

discharge summary for new orders and then process, which included faxing the orders to the pharmacy and entering the new order into the eMAR.
-She did not know there was an issue with Resident #2's Cephalexin until 08/01/23 when she was told there had been an issue with insurance coverage but was told the medication had arrived and had been administered to Resident #2.
-If there was an issue with the insurance, the MA should immediately contact the resident's PCP to let them know because they may want to send an alternative medication.
-The MAs should have used the medication tracking form and when the Cephalexin did not come in the next day they should have been trying to find out why the medication had not been delivered.

Based on observations, interviews, and record reviews, it was determined Resident #2 was not interviewable.

Attempted interview with the Wellness Coordinator on 08/02/23 at 4:22pm was unsuccessful.

b. Review of Resident #2's physician's triage order dated 06/15/23 revealed an order to stop Fluoxetine (an antidepressant) 20mg/5ml and begin Fluoxetine 20mg one tablet daily.

Review of Resident #2's physician's communication form dated 07/05/23 revealed:
-The communication was initiated by a medication aide (MA).
-There was a handwritten note that Resident #2's Fluoxetine had not arrived at the facility.
-Pharmacy stated insurance would not cover

administered daily from 06/01/23-06/27/23 at 2:00pm.
-There was documentation Fluoxetine 5ml was not administered on 06/28/23-06/29/23 with the exception as other and on 06/30/23 it was marked with an X.
-There was no entry for Fluoxetine 20mg tablet daily and no documentation Fluoxetine 20mg tablet had been administered.

Review of Resident #2's progress notes from 06/28/23 and 06/29/23 revealed there was documentation Resident #2's Fluoxetine 20mg/5ml was not administered because the medication was not in the facility.

Review of Resident #2's eMAR for July 2023 revealed:
-There was an entry for Fluoxetine 20mg tablet with a scheduled administration time of 8:00am.
-There was documentation Fluoxetine 20mg was administered on 07/01/23-07/02/23 at 8:00am.
-There was documentation Fluoxetine 20mg was not administered on 07/03/23-07/06/23 with an exception documented as other.
-There was a second entry for Fluoxetine 20mg capsule with a scheduled administration time of 2:00pm.
-There was documentation Fluoxetine 20mg was not administered on 07/06/23-07/11/23 and 07/13/23 with an exception documented as other.

in the facility.
-On 07/06/23, there was documentation the medication was a new order and the medication had not arrived from the pharmacy.
-On 07/10/23, there was documentation the medication was not in the facility and the pharmacy, and the PCP would be notified.
On 07/13/23, there was documentation the medication was not in the facility and the PCP had been notified.

Observation of Resident #2's medications on hand on 08/01/23 at 11:32am revealed 30 capsules of Fluoxetine 20mg was dispensed on 07/11/23; 14 tablets were available to be administered.

Telephone interview with a pharmacy technician at Resident #2's pharmacy on 08/01/23 at 1:58pm revealed:
-Resident #2 had been on liquid Fluoxetine and a new order was received on 06/15/23 to change the medication to tablets.
-Seven tablets of Fluoxetine 20mg were sent to the facility on 06/15/23 with documentation the insurance would not cover the tablets.
-The documentation included a prior authorization for the tablets or other alternatives for the medication, capsules instead of tablets.
-On 07/11/23, an order was received for Fluoxetine 20mg capsules, and a 30-day supply was sent to the facility.

Telephone interview with the Pharmacist at Resident #2's pharmacy on 08/01/23 at 2:27pm revealed:
-Fluoxetine should not be stopped abruptly.
-The resident could experience worsening mood and withdrawals from the medication including increased heart rate and blood pressure,

{D 358}	Continued From page 20	{D 358}		

-She went out of town the week of 06/26/23 but would have expected the facility staff to have called before she left town if there was a problem with obtaining the medication.
-When she returned to the facility for her weekly visits on 07/06/23, there was a note in her folder related to Resident #2's Fluoxetine.
-If there was an issue that needed to be addressed, she would prefer the issue to be addressed immediately and not put in her folder for her to review the next time she was at the facility.
-She did not know what the facility's policy was to notify the PCP, but it seemed like they would have notified her before the following week.
-On 07/13/23, she called the pharmacy herself about Resident #2's Fluoxetine and was told the medication had been delivered, but she wrote the order again just to make sure there was no further confusion about the order.
-Her electronic orders showed that equivalent substitutions could be made, so she did not know why the pharmacy did not substitute the tablets with capsules, to begin with.
-Her concern was Resident #2's Fluoxetine was abruptly stopped, and the resident went without the medication.
-Even though the resident would still have some effects of the medication in her system, it would be at a lower dose and would not be as effective and the resident could have some breakthrough depression and altered thoughts, which Resident #2 had experienced.
-She was not sure if the changes Resident #2 was having were because of medication not being as effective or because the resident had a urinary tract infection (UTI).
-It would take 4-6 weeks to get the full benefit of the Fluoxetine.

Interview with the facility's LPN on 08/02/23 at 5:21pm revealed:
-She was not aware Resident #2's Fluoxetine was not started when the order changed from liquid to tablet.
-The MA who was working when the new order was received would have been responsible for processing the order, sending it to the pharmacy.
-As soon as the medication was changed from one form to another, the new order should have been implemented.
-If the new form of the medication was not in the facility, the MA should have called the pharmacy to see why the medication had not been delivered.
-Sometimes it would take a day or two to get the medication to the facility, but a resident should not go without medication for 3 days.
-If there was an issue with getting the medication and the MA was having difficulty getting the issue resolved she should have been told so she could have worked on it.
-Resident #2's Fluoxetine should not be stopped abruptly because the resident could experience withdrawals.
-She had seen a change in Resident #2 because she had always been really pleasant but was refusing to take her medications and she seemed more depressed.
-She thought the changes with Resident #2 were because the resident had a UTI.

Interview with the Administrator on 08/02/23 at 6:12pm revealed:
-If there was an issue with the insurance, the MA should immediately contact the resident's PCP to let them know because they may want to send an alternative medication.
-The MAs should have used the medication tracking form and when the Fluoxetine did not

come in the next day they should have been trying to find out why the medication had not been delivered.

Based on observations, interviews, and record reviews, it was determined Resident #2 was not interviewable.

c. Review of Resident #2's current FL-2 dated 06/08/23 revealed an order for Aspirin (used to prevent heart attack or stroke) 81mg daily.

Review of Resident #2's electronic medication administration record (eMAR) for July 2023 revealed:
-There was an entry for Aspirin 81mg with a scheduled administration time of 8:00am.
-There was documentation Aspirin had been administered from 07/01/23-07/16/23, 07/21/23, and 07/26/23-07/31/23.
-There were exceptions documented for 07/17/23-07/2023 and 07/22/23-07/25/23 as other.

Review of Resident #2's progress notes from 7/01/23-07/31/23 revealed on 07/17/23-07/20/23 and 07/22/23-07/25/23 there was documentation Resident #2's Aspirin was not available to be administered; there was no documentation the pharmacy had been notified.

Observation of Resident #2's medications on hand on 08/01/23 at 11:32am revealed 30 tablets of Aspirin 81mg were dispensed on 07/24/23; 23 tablets were available to be administered.

Telephone interview with a pharmacy technician at Resident #2's pharmacy on 08/01/23 at 1:58pm revealed:
-Resident #2's Aspirin 81mg was dispensed on

05/08/23, 06/12/23, and 07/24/23, and each was a thirty-day supply.
-The request for Resident #2's Aspirin was on 07/24/23 and was sent out for delivery on 07/25/23.
-Resident #2's medications were not cycle filled and would need to be requested for a refill.

Telephone interview with the Pharmacist at Resident #2's pharmacy on 08/01/23 at 2:27pm revealed:
-Aspirin was used to prevent heart attacks and stroke by keeping the blood thinned out.
-Missing 8 doses of Aspirin 81mg in a row would be concerning and put the resident at an increased risk of a mini-stroke.

Telephone interview with Resident #2's Primary Care Provider (PCP) on 08/01/23 at 3:21pm revealed:
-She was not notified Resident #2 had missed doses of Aspirin 81mg.
-She did not write the initial order for Resident #2's Aspirin, but the medication was used to prevent cerebellar vascular or cardiac events.
-If Resident #2 missed her Aspirin it put the resident at a higher risk for a cardiac event or stroke.
-She expected Resident #2's Aspirin to be administered as ordered.

Interview with a Medication Aide (MA) on 08/02/23 at 9:46am revealed:
-She did not recall anything about Resident #2's Aspirin not being available on the medication cart for administration on 07/07/17/23-07/25/23.
-Typically, if a medication was not on the medication cart, she would call the pharmacy to see what was going on and if there were no refills, she would leave a communication form for

the PCP to request a refill.
-Medication should be reordered when there was a one-week supply left of the medication.

Interview with the facility's Licensed Practical Nurse (LPN) on 08/02/23 at 10:37am and 5:21pm revealed:
-Medications should never run out.
-The MAs were responsible for reordering medication.
-She expected medications to be reordered before the medication ran out to ensure the resident did not have to go without the medication until it was delivered.
-Medication should be reordered when there was a 7-10-day supply remaining of the medication.
-The MAs should be tracking to see when the medication had been delivered by keeping an eye on the medication cart and ensuring the medication had been delivered.
-They usually did not have any issues with medication being available if it was ordered 7-10 days before it ran out.
-It was usually only an issue when the medication was ordered at the last minute.
-She expected medications to be re-ordered early, so if there was an issue, it could be figured out before the medication ran out.

Interview with the Administrator on 08/02/23 at 6:12pm revealed:
-There was no written policy as to when the MA should reorder the medication, but she expected it to be ordered 7days before the last dose because you had to allow time for the medication to get to the facility.
-She expected medication to be available and to be administered as ordered.

Based on observations, interviews, and record

reviews, it was determined Resident #2 was not interviewable.

d. Review of Resident #2's current FL-2 dated 06/08/23 revealed an order for Acetaminophen (used to treat mild pain) 325mg take 2 tablets twice daily.

Review of Resident #2's electronic medication administration record (eMAR) for June 2023 revealed:
-There was an entry for Acetaminophen 325mg take two tablets twice daily with a scheduled administration time of 8:00am and 7:00pm.
-There was documentation Acetaminophen 325mg was administered twice daily from 06/01/23-06/30/23.

Review of Resident #2's eMAR for July 2023 revealed:
-There was an entry for Acetaminophen 325mg take two tablets twice daily with a scheduled administration time of 8:00am and 7:00pm.
-There was documentation Acetaminophen 325mg was administered twice daily from 07/01/23-07/31/23 except for four exceptions.
-Exceptions documented were on 07/10/23 for both the 8:00am and 7:00pm dose as refused, the 8:00am dose on 07/24/23 as refused, and the 7:00pm dose on 07/26/23 due to the resident being at the hospital.

Review of Resident #2's eMAR for 08/01/23 revealed :
-There was an entry for Acetaminophen 325mg take two tablets twice daily with a scheduled administration time of 8:00am and 7:00pm.
-There was documentation that Acetaminophen 325mg was administered on 08/01/23 at 8:00am.

Observation of Resident #2's medications on hand on 08/01/23 at 11:33am revealed:
-There was a medication card for Acetaminophen labeled as dispensed on 07/03/23 for 30 tablets and the card was card one of four; twenty-three tablets remained on the card.
-There was a second medication card for Acetaminophen labeled as dispensed on 07/03/23 for 30 tablets and the card was card two of four; thirty tablets remained on the card.

Telephone interview with a pharmacy technician at Resident #2's pharmacy on 08/01/23 at 1:58pm revealed:
-Resident #2's Acetaminophen was dispensed on 04/20/23, 05/25/23, and 07/03/23 for a 30-day supply.
-Resident #2's Acetaminophen was not requested to be refilled in June 2023 and therefore was not dispensed.

Based on observations, interviews, and record reviews, Acetaminophen was documented as administered 53 times from 07/03/23-08/01/23. There should have been no more than 14 tablets of Acetaminophen remaining on 08/01/23 and 53 tablets were remaining.

Telephone interview with the Pharmacist at Resident #2's pharmacy on 08/01/23 at 2:27pm revealed:
-If Resident #2's Acetaminophen was not being administered as ordered, the resident was not being properly treated for pain.
-If the resident was having pain and did not receive the Acetaminophen, she would have increased pain, which could also increase the resident's agitation.

Telephone interview with Resident #2's Primary

Care Provider (PCP) on 08/01/23 at 3:21pm revealed:
-Resident #2 had a diagnosis of osteoarthritis
-If Resident #2's Acetaminophen was not administered as ordered, it could contribute to the resident's discomfort, especially in her knees and lower back.
-She scheduled Resident #2's Acetaminophen because she knew Resident #2 would not remember to ask for the medication.

Telephone interview with Resident #2's family member on 08/01/23 at 5:52pm revealed:
-Resident #2 often complained of pain when she was visiting.
-She would hear Resident #2 say "oooh and ahhh" when getting up from sitting and/or moving around and when she asked Resident #2 what was wrong, Resident #2 would say she was stiff or hurting.
-She would ask Resident #2 if she had asked for anything for pain and the resident would not remember if she did or not.
-She had been to the medication aide (MA) and asked if Resident #2 had been administered anything for pain and the MA would respond the resident had not asked for anything.
-She told the MA she did not think Resident #2 would ask for pain medication.

Interview with a MA on 08/02/23 at 9:46am revealed:
-She did not know why there was more Acetaminophen available to be administered than there should be based on dispensed dates and documentation.
-The facility did not use house stock for any medication.

Interview with the facility's Licensed Practical

Nurse (LPN) on 08/02/23 at 5:21pm revealed:
-Medications should never run out.
-The MAs were responsible for reordering medication.
-She expected medications to be reordered before the medication ran out to ensure the resident did not have to go without the medication until it was delivered.
-She expected Resident #2's Acetaminophen to be administered as ordered.

Interview with the Administrator on 08/02/23 at 6:12pm revealed she was concerned the MAs were documentation administering a medication that had not been administered and the resident could have been in pain and not received what she needed.

Based on observations, interviews, and record reviews, it was determined Resident #2 was not interviewable.

____

The facility failed to ensure medications were administered as ordered for a resident (#2) who had a history of Alzheimer's disease and mini-strokes, had a change in condition and was sent to the ED, received an order for an antibiotic to treat a UTI, and the resident missed 14 doses of the antibiotic before the medication was started; missed at least 11 doses of an antidepressant medication that was changed from a liquid to a tablet and should not be abruptly stopped because it could result in worsening mood and withdrawals from the medication including increased heart rate and blood pressure, agitation, and headaches; and missed 9 doses of a medication used to prevent mini-strokes. This failure was detrimental to the health, safety, and welfare of the resident and constitutes an Unabated Type B Violation.

9:30am, 11:15am, 1:05pm and 3:30pm revealed:
-Resident #5 was not in his room and the door was not locked.
-There was a bottle of antidiarrheal medication, a tube of triple antibiotic ointment and 2 tubs of joint/muscle cream on the dresser beside the bed.

Telephone interview with Resident #5's Primary Care Provider (PCP) on 08/02/23 at 3:44pm revealed:
-Resident #5 had a diagnosis of dementia and was not able to self-administer any medications.
-She did not know he had over the counter antibiotic ointment, muscle/joint creams and antidiarrheal medication in his room.
-She thought his family may have brought the medications into the facility, because that was a frequent problem.
-The medications he had in his room were harmless and she was not concerned if he had already taken/used any.
-The staff should have informed her whenever a resident had any medications that were not ordered and she would consider ordering them for staff to administer if appropriate.

Based on observation, record review and interview, it was determined Resident #5 was not interviewable.

Interview with a personal care aide (PCA) on 08/02/23 at 1:35pm revealed:
-She did not see medications in Resident #5's room.
-She would report to the MA if she saw medications in a room.
-She did not see Resident #5's medication sitting on the dresser by his bed.

Interview with a medication aide (MA) on 08/02/23 at 1:40pm revealed:
-She noticed Resident #5's medication on the dresser by his bed.
-She would not leave a prescription medication in Resident #5's room.
-She did not think Resident #5 had self-administration orders.
-She did not think residents needed orders for over-the-counter medications like antibiotic ointment, antidiarrheal liquid and lotions.

Telephone interview with Resident #7's Primary Care Provider (PCP) on 08/02/23 at 3:44pm revealed:
-She wrote a self-administration of medication order for Resident #7, and he was able to self-administer all his medications safely.
-He had a lock box to secure his medications and he understood he was to do so, though he would be stubborn and do what he wanted.
-She thought she wrote an order for a chewable antacid for him and believed him having it was not harm.
-The staff should have informed her whenever a resident had any medications that weren't ordered, and she would consider ordering them for staff to administer if appropriate.

Telephone interview with another MA on 08/02/23 at 3:50pm revealed:
-Residents who self-administered medications must have an assessment to administer and their medications should have been kept in their lock box.
-She did not know if Resident #5 had unsecured medications in his room.
-She worked third shift (11:00pm-7:00am) and did not have to give him medications at night unless he requested them, so she would not have seen

OTC medications on his dresser.

Interview with the Resident Care Director (RCD) on 08/02/23 at 5:20pm revealed:
-Residents who self-administered medications had to be assessed to determine if they were capable to safely administer their own medications and should keep the medications in a locked box.
-Resident #5 did not have a self-administration of medication order and should not have had any medications in his room.
-She did not know Resident #5's had OTC medications in his room and thought his family must have given them to him.
-Management had asked family/friends not to bring in medications without informing facility staff, but some continue to bring in medications they buy OTC.

Interview with the Administrator on 08/02/23 at 6:05pm revealed:
-Residents who self-administered medications should have medications stored in a locked box or locked drawer.
-Resident #5 did not have self-administration of medication orders.
-She did not know Resident #5 had OTC medications in his room and MAs should have removed any medications that were not ordered and from any resident that could not self-administer medications.

2. Review of Resident #7's current FL2 dated 06/01/23 revealed:
-Diagnoses included hypertension, atrial flutter and anxiety.
-Resident #7's orientation status was intermittently confused.
-Medication orders included aspirin (used to

-He did not put his antacid in the locked box in case he needed one before/after eating.
-He was out of his room frequently for meals, sitting on the porch or other activities.
-He understood other confused residents could wander into his room, but he did not think that ever happened.

Interview with the RCD on 08/02/23 at 5:20pm revealed:
-Residents who self-administer medications must be assessed to determine if they are capable to safely administer their own medications and should keep the medications in a lock box.
-Resident #7 had a self-administration of medication order and had a locked box.
-She had spoken to Resident #7's on several occasions regarding leaving his medications out of his box, but he still did as he pleased and would not always put all of his medications in his locked box when he would leave the room.
-MAs and PCAs should have reminded him to put his medication away each time they see any in view.

Interview with the Administrator on 08/02/23 at 6:05pm revealed:
-Residents who self-administer medications should have medications contained in a locked box.
-Resident #7 had self-administration of medication orders and was given a lock box to store his medications in.
-Resident #7 had been educated multiple times about keeping his medications out of site in his locked box, but he still just did whatever he wanted.
-She expected MAs and PCAs to monitor for medications when they were in rooms each shift and ask the resident to secure them properly.
