

## Review of Measuring Devices

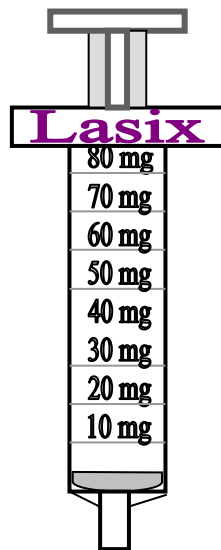

### Medication Cup

Use on a level surface  
when measuring

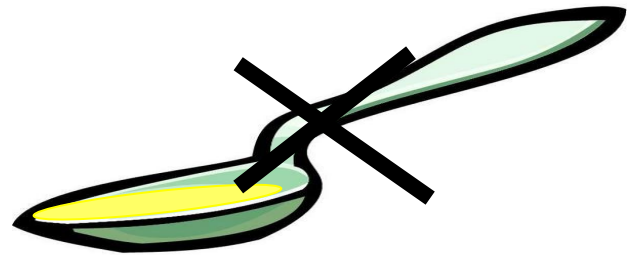

### Oral Dropper/Syringe

Use when measuring  
amounts less than 5 ml.

### Special Oral Measuring Device

This measuring device has  
measurements of **mg instead of ml**.  
The oral syringe above would be used  
for measuring Lasix Solution.

### Household Utensil

Do **NOT** use for measuring  
medications
