Exempt from Review - Replacement Equipment
Facility: Roanoke Valley Cancer Center
Project Description: Replacement of existing Linear Accelerator
County: Halifax
FID #: 130385

Dear Mr. Shenton:

In response to your letter of September 5, 2013, the above referenced proposal is exempt from certificate of need review in accordance with N.C.G.S 131E-184(a)(7). Therefore, you may proceed to acquire, without a certificate of need, the Varian Clinac iX linear accelerator, serial number 5528 to replace the existing Varian Clinac 6/100 linear accelerator. This determination is based on your representations that the existing unit will be removed from North Carolina and will not be used again in the State without first obtaining a certificate of need. Further please be advised that as soon as the replacement equipment is acquired, you must provide the CON Section and the Medical Facilities Planning Section with the serial number of the new equipment to update the inventory, if not already provided.

Moreover, you need to contact the Construction and Acute and Home Care Licensure and Certification Section to determine if they have any requirements for development of the proposed project.

It should be noted that this Agency's position is based solely on the facts represented by you and that any change in facts as represented would require further consideration by this Agency and a separate determination. If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

Bernetta Thorne-Williams
Project Analyst

RE: Replacement of Linear Accelerator at Roanoke Valley Cancer Center

Dear Mr. Smith and Ms. Frisone:

We are writing on behalf of North Carolina Radiation Therapy Management Services, Inc. ("NCRTMS") and the wholly-owned subsidiary of NCRTMS that will be formed soon ("New LLC") to provide advance notice of plans to replace the linear accelerator that has been in operation in Roanoke Rapids at the Roanoke Valley Cancer Center. You will recall that the CON Section issued a letter on August 27, a copy of which is attached as Exhibit A, confirming that New LLC may acquire the ownership interests in Roanoke Valley Cancer Center.

The purpose of this letter is to provide advance notification in order to get confirmation from the CON Section that the replacement of the linear accelerator that has been in operation at Roanoke Valley Cancer Center may also proceed without obtaining a certificate of need. In the interest of time, we presented the acquisition of the ownership interests first, while assembling the information required to demonstrate that the replacement of the current equipment should also be exempt. Before proceeding with the transaction, NCRTMS would like confirmation that the existing linear accelerator may be replaced without a certificate of need, after the acquisition of ownership interests is complete. This letter presents the basis for a determination that the replacement of the linear accelerator should be exempt under N.C. Gen. Stat. § 131E-184(a)(7).

THE EXISTING LINEAR ACCELERATOR

The existing linear accelerator at the Roanoke Valley Cancer Center is a Varian Clinac 6/100 linear accelerator. As noted in the letter of July 25 concerning the acquisition of the ownership interests, this linear accelerator was acquired late in 1995 as a refurbished machine and it has been in operation at Roanoke Valley Cancer Center since then, providing ionizing radiation to destroy cancer cells.
COST OF THE REPLACEMENT LINEAR ACCELERATOR

The replacement linear accelerator will be used for the same treatment purposes, and here are details about the linear accelerator and the associated purchase costs:

- The linear accelerator that is planned for installation at Roanoke Valley Cancer Center is a Varian Clinac iX (Serial Number 5528) which is currently in operation in Naples, Florida. It employs the same ionizing beam technology as the Varian 6/100 linear accelerator. Its present book value is $1,206,458.78, as documented in the attached Exhibit C.

- There is an additional cost of $35,000.00 for associated hardware and software bringing the machine-related costs to $1,241,459.00.

- After adding Halifax County’s seven per cent sales tax\(^1\) the total cost associated with acquisition of the Varian Clinac iX machine is $1,328,361.00.

A few other costs associated with relocating the Varian Clinac iX machine have been identified:

- Varian rigging and transportation costs of $36,238 (per Varian quote in Exhibit D);

- An additional $60,000.00 for internal costs to be incurred by NCRTMS, including the costs associated with removing the existing Varian 6/100 unit from North Carolina;

- Vault remodeling costs of $180,000.00, including installation of base frame; and

- Costs for installing additional shielding, estimated at $300,000.00.

No other costs will be necessary to deploy the Varian Clinac iX linear accelerator to replace the existing machine at the Roanoke Valley Cancer Center. When all of the above costs are summed the result is a grand total of $1,904,599.00. NCRTMS also has instructed us to confirm that as noted above, the Varian 6/100 linear accelerator will be moved out of state; and that its replacement by the Varian Clinac iX linear accelerator will not result in more than a ten percent increase in patient charges or procedure operating expenses within the first 12 months of its operation.

ANALYSIS OF RELEVANT PROVISIONS IN THE CON LAW AND RULES

Based on the above information, the proposed replacement of the linear accelerator meets all requirements of 10A NCAC 14C .0303(d)(3). The cost to buy the replacement linear accelerator and make it operational, including sales tax, is less than $2 Million and hence it qualifies as "Replacement Equipment" under the definition in the Certificate of Need Law. NC Gen.Stat. § 131E-176(22a). The proposal also meets each of the requirements set out in 10A NCAC 14C .0303. The existing machine has been in operation for more than three years. The replacement equipment has the same technology, is functionally similar, will be used for the same treatment purposes, and will not result in increases in patient charges or per procedure operating costs that exceed the 10 per cent level set in the rule.

CONCLUSION

Thank you for your attention to the information in this letter and we look forward to your confirmation that the proposed replacement of the Roanoke Valley Cancer Center linear accelerator is exempt under N.C. Gen. Stat. § 131E-184(a)(7).

Very truly yours,

William R. Shenton

  interests in the linear accelerator and other assets to New LLC
  o Acquisition of 100% of New LLC by NCRTMS
County: Halifax
FID #: 130385

Dear Mr. Shenton:

The Certificate of Need Section (CON Section) received your letter of July 25, 2013 regarding the above referenced proposal. Based on the CON law in effect on the date of this response to your request, the proposal described in your correspondence is not governed by, and therefore, does not currently require a certificate of need. However, please note that if the CON law is subsequently amended such that the above referenced proposal would require a certificate of need, this determination does not authorize you to proceed to develop the above referenced proposal when the new law becomes effective.

Moreover, you need to contact the Acute and Home Care Licensure and Certification Sections of the Division of Health Service Regulation to determine if they have any requirements for development of the proposed project.

It should be noted that this determination is binding only for the facts represented by you. Consequently, if changes are made in the project or in the facts provided in your correspondence referenced above, a new determination as to whether a certificate of need is required would need to be made by the Certificate of Need Section. Changes in a project include, but are not limited to: (1) increases in the capital cost; (2) acquisition of medical equipment not included in the

Section 1
Value Added Services

1 Year

- Relocation Services
  This service includes relocation of the Low Energy Clinac (LE Clinac), High Energy Clinac (HE Clinac) or the TrueBeam system. The relocation service includes the different components that are shown in this section of the quotation.

  The relocation service is provided to the customer under the standard Terms and Conditions of Sale included with this quotation. The following additional terms and conditions apply:

  TITLE TO THE USED EQUIPMENT
  CUSTOMER warrants and represents that CUSTOMER is the lawful owner of the Used Equipment and there are no restrictions preventing the removal of the Used Equipment such as security interests, liens, claims, UCC-1 financing statements, or encumbrances of any kind. Title shall remain with CUSTOMER at all times.

  TRANSPORTATION AND RISK OF LOSS
  All shipments are FOB CUSTOMER's site of origin (or Storage site in case of shipment from Storage) with all transportation and insurance at the expense of CUSTOMER. Risk of loss or damage to the Used Equipment shall remain with CUSTOMER.

  REMOVAL AND STORAGE
  Removal ("Removal") shall mean rigging the Used Equipment out of CUSTOMER's current site and transportation of the Used Equipment to CUSTOMER's new site or to Storage at a location mutually agreeable to both parties. VMS will be responsible for supervising the Removal and properly packaging the Used Equipment. Rigging amount listed on the VMS Quotation does not include special shoring of the floor to support the weight, room demolition for removal or if a crane is required to remove the Used Equipment. If the Used Equipment is transported to Storage, VMS is responsible for an inventory audit, using the list created in (1.) above. VMS shall provide CUSTOMER with a copy of the inventory list. CUSTOMER shall be responsible for all cost and expense of removal, freight and insurance for shipment, rigging and for any Storage fees as defined on VMS's Quotation.

  NO VARIAN WARRANTIES
  Notwithstanding VMS's possible Removal of the Used Equipment to Storage, if required, VMS disclaims (1) all warranties of title or warranties of right to transfer the Used Equipment; (2) all warranties that the Used Equipment will be free of any security interests, liens, claims, UCC-1 financing statements, or encumbrances of any kind, and (3) any warranty that possession of the Used Equipment will not be disturbed. These VMS disclaimers apply whether a warranty arises from Uniform Commercial Code section 2312 (1), from expressions of VMS, by implication, or from the common law.

  - Relocation/License Transfer for ARIA
  - Relocation/License Transfer for Eclipse
  - Test & Validation of Existing PV

  No upgrade involved. VMS will test and validate the proper functioning of the existing Portal Vision (PV) according to VMS specifications. This service requires an additional 1-2 days.
