Exempt from Review - Replacement Equipment  
Facility: Duke Regional Hospital  
Project Description: Temporarily replace MRI scanner with a mobile MRI scanner  
County: Durham  
FID #: 923142

Dear Ms. Cummer:

In response to your letter of January 13, 2014, the above referenced proposal is exempt from certificate of need review in accordance with G.S. 131E-184(a)(7). Therefore, you may lease, without a certificate of need, the Alliance Imaging, Inc. mobile MRI scanner to temporarily replace the existing MRI scanner prior to the installation of a permanent replacement MRI scanner. This determination is based on your representations that the existing unit will be removed from North Carolina and will not be used again in the State without first obtaining a certificate of need. Further please be advised that as soon as the replacement equipment is acquired, you must provide the CON Section and the Medical Facilities Planning Branch with the serial number of the new equipment to update the inventory, if not already provided.

Moreover, you need to contact the Construction Section to determine if they have any requirements for development of the proposed project.

It should be noted that this Agency's position is based solely on the facts represented by you and that any change in facts as represented would require further consideration by this Agency and a separate determination. If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

Michael J. McKillip  
Project Analyst

Re: Temporary MRI replacement at Duke Regional Hospital

Dear Mr. McKillip:

On behalf of the Duke University Health System, I am writing to seek confirmation that Duke Regional Hospital may proceed with a proposed arrangement with Alliance Imaging for the temporary use of a mobile MRI scanner without certificate of need review. As background, Duke Regional Hospital received an exemption for the replacement of an existing MRI scanner on its hospital campus by letter dated December 10, 2013. The renovation of the space for the new equipment will take several months during which time the existing scanner must be taken out of operation. In order to ensure continuity of care for patients during the renovation, Duke now proposes to enter into an operating lease with Alliance Imaging for the use of a mobile MRI scanner while the renovation necessary to accommodate the new scanner is underway.

Duke’s existing scanner will be removed some time in February 2014. Construction is estimated to last three months. During that time, Alliance will lease Duke a GE MRI 1.5T (with a fair market value of less than $2 million), which will be staffed by Duke Regional staff. Alliance will remove the equipment upon installation of the permanent replacement scanner, and will not operate it in North Carolina thereafter without approval of the Certificate of Need Section. At no time will Duke operate more than two MRI scanners (Duke has a second scanner that will be unaffected by this project).

3100 Tower Blvd Suite 1200 * Durham, NC 27707 * tel (919) 668-0575 * catherine.cummer@duke.edu
It is our understanding that this temporary replacement would be exempt from review under N.C.G.S. 131E-184(a)(7) and/or 184(f), and we would appreciate your confirmation of this understanding. If you have questions or need any further information, please let me know.

Very truly yours,

Exempt from Review - Replacement Equipment
Facility: Duke Regional Hospital
Project Description: Replace MRI scanner
County: Durham
FID #: 923142

Dear Ms. Cummer:

In response to your letter of September 16, 2013, the above referenced proposal is exempt from certificate of need review in accordance with G.S. 131E-184(f). Therefore, you may proceed to acquire, without a certificate of need, the GE 1.5T MRI scanner to replace the existing GE 1.5T MRI scanner [Serial # R0428]. This determination is based on your representations that the existing unit will be removed from North Carolina and will not be used again in the State without first obtaining a certificate of need. Further please be advised that as soon as the replacement equipment is acquired, you must provide the CON Section and the Medical Facilities Planning Branch with the serial number of the new equipment to update the inventory, if not already provided.

Moreover, you need to contact the Construction Section to determine if they have any requirements for development of the proposed project.

It should be noted that this Agency's position is based solely on the facts represented by you and that any change in facts as represented would require further consideration by this Agency and a separate determination. If you have any questions concerning this matter, please feel free to contact this office.

Sincerely,

Re: Equipment Replacement Project at Duke Regional Hospital

Dear Mr. McKillip:

On behalf of the Duke University Health System, I am writing to provide prior written notice of an equipment replacement project and to request the Section’s written confirmation that the project is exempt from certificate of need review. The project involves the replacement of an MRI scanner installed in 1999 at Duke Regional Hospital that is out of date and, due to its age, has experienced increasing downtimes.

This project satisfies the requirements under N.C.G.S. 131E-184(f) for “replacement equipment that exceeds the two million dollar ($2,000,000) threshold set forth in G.S. 131E-176(22) if all of the following conditions are met:

1. The equipment being replaced is located on the main campus.
2. The Department has previously issued a certificate of need for the equipment being replaced. This subdivision does not apply if a certificate of need was not required at the time the equipment being replaced was initially purchased by the licensed health service facility.
3. The licensed health service facility proposing to purchase the replacement equipment shall provide prior written notice to the Department, along with supporting documentation to demonstrate that it meets the exemption criteria of this subsection.”

Main campus

The existing and replacement MRI scanner are/will be located in the main Duke Regional Hospital building. This is on the “main campus” of the facility, as defined in 131E-176(14n), as “[t]he site of the main building from which a licensed health service facility provides clinical
patient services and exercises financial and administrative control over the entire facility, including the buildings and grounds adjacent to that main building" and "[o]ther areas and structures that are not strictly contiguous to the main building but are located within 250 yards of the main building."

Duke Regional Hospital is a licensed health service facility (see License attached as Exhibit A), and the main hospital building from which Duke Regional Hospital provides its inpatient clinical services and exercises financial and administrative control over all Duke Regional Hospital services is located at 3643 North Roxboro Road in Durham. (As it happens, Duke Regional Hospital’s chief executive office and chief financial officer also have their offices within this same building, in the annex labeled on the hospital map as "Watts.") Maps showing the campus and identifying the site of the proposed construction are attached as Exhibit B.

Previous Certificate of Need

The existing MRI scanner was acquired pursuant to a certificate of need issued for Project J-5589-97, attached as Exhibit C.

Replacement Equipment

The equipment qualifies as replacement equipment pursuant to the existing statutory and regulatory definition. A completed Equipment Comparison form enclosed as Exhibit D. Both the existing equipment and the replacement equipment are magnetic resonance imaging scanners used for diagnostic imaging procedures. The existing machine is currently in service and will remain so until the replacement equipment is operational, at which time it will be removed from service within the state unless the Certificate of Need Section otherwise approves its continued use in the state.

In addition to the cost of the equipment, project costs include the construction necessary to install it, renovations to support the provision of general anesthesia to MRI patients, and minor renovation of the existing prep, storage and waiting areas to improve patient comfort, safety and access control. The construction floor plan is attached as Exhibit E. The total project cost is approximately $2,722,000, of which approximately $1,353,543 reflects the net purchase price of the new scanner. A copy of the equipment quotation for the proposed GE Optima MR450w 1.5T GEM MR is available upon request. Total construction costs associated with this project are $787,656.¹ A capital cost form is attached as Exhibit F. Duke will not acquire any other major medical equipment or develop any other new institutional health services other than those described in Section 131E-176(16)(b).

¹ We would note that even if the renovations were undertaken separately, they would not require a certificate of need as the cost is well under $2 million, and would presumably be exempt from CON review in any event pursuant to Section 131E-184(g).
Michael J. McKillip
September 16, 2013

We would appreciate your confirmation that this project is exempt from CON review. Thank you for your attention to this request. If you have questions, please let me know.

Very truly yours,
