**K038**

- The special locking door release switch at the nurses' station #2 has been lowered below the 48 inch mark.
- All other special locking master door release switches were measured and are below the 48 inch mark.
- The Maintenance Director was educated by the Property Manager on 2/10/2015 on the proper height of the special locking master door release switches.
- The Maintenance Director will address to the PI committee that all the special locking master door release switches are at proper height from the floor.
### SUMMARY STATEMENT OF DEFICIENCIES

### PROVIDER'S PLAN OF CORRECTION

**K 067 Continued From page 2**

This STANDARD is not met as evidenced by:

Based on observations on 2/3/2014 at approximately 9:30 AM onward, the following deficiencies were noted:

The facility has a build up of dust and lint on the radiation dampers in the return air registers in the following locations:

1. Janitor's closet at nurses's station #1
2. 400 Hallway resident lounge
3. Laundry room soiled side

The facility could not verify that the integrity of the radiation damper fusible link was maintained to deploy at the proper temperature or the damper would close the opening completely to maintain the one hour rating of the ceiling as required.

The deficiency affected 2 of 8 smoke compartments.

Ref: 2000 NFPA 101 Sections 19.5.2.1, 9.2, NFPA 90A, 19.5.2.2

**K 067**

"This Plan of Correction is prepared and submitted as required by law. By submitting this Plan of Correction, Woodland Hill Center does not admit that the deficiency listed on this form exist, nor does the Center admit to any statements, findings, facts, or conclusions that form the basis for the alleged deficiency. The Center reserves the right to challenge in legal and/or regulatory or administrative proceedings the deficiency, statements, facts, and conclusions that form the basis for the deficiency."

The dust and lint on the radiation dampers in the return air registers in the Janitor's closet at nurses' station #1, 400 hallway resident lounge, and the soiled side of the laundry room, have been cleaned.

All other radiation dampers in the facility have been checked for dust and lint build up, and are cleaned as necessary.

The Maintenance Director was educated by the Property Manager on 2/10/2015 on maintaining the radiation dampers in the return air registers throughout the facility.

The Maintenance Director will conduct monthly audits of the radiation dampers in the return air registers and report to the PI committee his findings. Audits will be conducted monthly for three months.
