A Life Safety Code (LSC) survey was conducted as per The Code of Federal Register at 42CFR 483.70(a); using the 2000 Existing Health Care section of the LSC and its referenced publications. In the exit conference all deficiencies noted were discussed with administration.

Stories: One
Construction Type III (211)
Constructed: 1992
Fully Sprinkled - Yes
At time of survey the:
Certified Beds: Medicare/Medicaid - 154
Census - 133

The requirement at 42 CFR, Subpart 483.70(a) is NOT MET as evidenced by:

K 025
NFPA 101 LIFE SAFETY CODE STANDARD
Smoke barriers are constructed to provide at least a one half hour fire resistance rating in accordance with 8.3. Smoke barriers may terminate at an atrium wall. Windows are protected by fire-rated glazing or by wired glass panels and steel frames. A minimum of two separate compartments are provided on each floor. Dampers are not required in duct penetrations of smoke barriers in fully ducted heating, ventilating, and air conditioning systems.

19.3.7.3, 19.3.7.5, 19.1.6.3, 19.1.6.4

This STANDARD is not met as evidenced by:
42 CFR 483.70 (a)

**LABORATORY DIRECTOR'S OR PROVIDER/SUPPLIER REPRESENTATIVE'S SIGNATURE**

Electronically Signed

03/01/2015

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

**Date Survey Completed:**
02/10/2015

### Summary Statement of Deficiencies

Each deficiency must be preceded by full regulatory or LSC identifying information.

#### K 052

**Continued From page 2**

This STANDARD is not met as evidenced by:
42 CFR 483.70 (a)

Based on observations on 2/10/2015 at approximately 10:00 aM onward, the following deficiencies were noted:

The facility has a smoke detector within 3 feet of a return register at
The smoke door on the 500 hallway outside the dining room

The deficiency affected 1 of approximately 7 smoke detectors in that smoke compartment.
Ref: NFPA 72 (1999 edition) A-2-3.5.1

**Correction:**

K052

The identified smoke detector on the 500 hall was repaired to ensure the smoke detectors are 3 feet from the return register by Pye Barker HVAC & Sprinkler Company on 2/27/2015.

All other smoke detectors throughout the facility were checked by maintenance on 2/12/2015 to ensure all smoke detectors are 3 feet from a return register. Pye Barker HVAC & Sprinkler Co. checked and repaired, as indicated, all smoke detectors throughout the facility on 2/27/2015.

Using a QI Tool, the maintenance director will monitor all smoke detectors monthly to ensure the requirement that all smoke detectors are 3 feet from a return register.

The results of the monthly monitoring will be forwarded to the next monthly Executive QI Committee Meeting and quarterly thereafter for the identification of potential trends and follow-up as deemed necessary to determine the need for and/or frequency of continued monitoring.

#### K 067

**NFPA 101 LIFE SAFETY CODE STANDARD**

Heating, ventilating, and air conditioning comply with the provisions of section 9.2 and are installed in accordance with the manufacturer’s specifications. 19.5.2.1, 9.2, NFPA 90A, 19.5.2.2

**Completion Date:**
2/27/15
