**Summary Statement of Deficiencies:**
(Each Deficiency Must Be Preceded by Full Regulatory or LSC Identifying Information)

- **K 025 SS=D**
  - **NFPA 101 LIFE SAFETY CODE STANDARD**
  - Smoke barriers are constructed to provide at least a one half hour fire resistance rating in accordance with 8.3. Smoke barriers may terminate at an atrium wall. Windows are protected by fire-rated glazing or by wired glass panels and steel frames. A minimum of two separate compartments are provided on each floor. Dampers are not required in duct penetrations of smoke barriers in fully ducted heating, ventilating, and air conditioning systems. 19.3.7.3, 19.3.7.5, 19.1.6.3, 19.1.6.4
  - This STANDARD is not met as evidenced by:
    - 42 CFR 483.70 (a)
  - Based on observations, on 08/04/2015 at
  - The smoke barrier wall on 400 Hall was sealed and repaired by the Maintenance LABORATORY DIRECTOR'S OR PROVIDER/SUPPLIER REPRESENTATIVE'S SIGNATURE: Electronically Signed

**Date:** 08/21/2015

**Remarks:** Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

### K 062 Continued From page 2

This deficiency affected kitchen only.

Failure to comply with minimum standards as referenced increases the risk of death or injury due to fire and/or smoke.

**NFPA 101 LIFE SAFETY CODE STANDARD**

Heating, ventilating, and air conditioning comply with the provisions of section 9.2 and are installed in accordance with the manufacturer’s specifications. 19.5.2.1, 9.2, NFPA 90A, 19.5.2.2

This STANDARD is not met as evidenced by:

42 CFR 483.70 (a)

Based on observations, on 08/04/2015 at approximately 12:30 PM onward, the following deficiencies were noted:

1. emergency shut off switch at nurse station did not work on test.
2. facility could not provide documentation that a 4 year radiation test has been performed.
3. damper through out the facility have a white material on damper and link.
4. dampers in laundry room are not maintained in good condition.

NFPA 90A, 3.4.7

This deficiency affected all five smoke compartments.

Failure to comply with minimum standards as

**K067 SS=E**

1. The emergency shut off switch at the nurses station will be repaired on or before 9/19/15 by Commercial AC. Following this repair the emergency shut off switch will be tested weekly X 4, monthly X 3, and quarterly X 3 to ensure they remain in good repair.

2. The facility had the 4 Year Radiation Test performed by Commercial AC on 8/19/15. The Administrator will set up a schedule with Hillco Support Services to ensure that future 4 Year Radiation Tests occur timely.

3. The Maintenance Director completed a 100% audit of the facility dampers on 8/17/15. 100% of all dampers were also checked by Commercial AC on 8/19/15 with none found to be needing changed. Commercial AC stated that the ‘white...
