| C 189 | Continued From page 5 <br> This Rule is not met as evidenced by: <br> 1. Based on observation, the Building was not maintained in a safe and operating condition, by failing to ensure that egress from all areas can be done without the use of keys, tools or, special knowledge or effort. This could affect some staff and visitors if someone becomes trapped inside. Findings on July 13, 2016: <br> a. Left Whirlpool - the corridor door was equipped with hasp hardware and locked with a padlock. This locking system does not provide an override device allowing exiting from the area. <br> b. Employee Lounge - a corridor door was equipped with hasp hardware and locked with a padlock. This locking system does not provide an override device allowing exiting from the area. <br> 2. Based on observations, the Building fire safety was not maintained in a safe and operating condition. This could expose residents, staff and visitors to fire/smoke if not contained in Room or compartment of origin <br> Findings on July 13, 2016 : <br> a. Left Whirlpool- -the replacement corridor door hardware (handle) did not completely cover the previous hardware's opening through the door, allowing the spread of fire and smoke. <br> b. Left Whirlpool - there was a gap around a 1 $1 / 2$ inch opened ended sleeve not firestopped as it penetrates the fire-resistance-rated ceiling assembly, allowing the spread of fire and smoke. <br> c. Shower Room next to Bedroom 3 - in the water heater Closet there were gaps around two metal pipes not firestopped as it penetrates the fire-resistance-rated ceiling assembly, allowing the spread of fire and smoke. <br> d. Employee Lounge Corridor Closet - there was a gap around a cable not firestopped as it penetrates the fire-resistance-rated wall assembly, allowing the spread of fire and smoke. |  | C 189 |  |  |

| C 189 | Continued From page 7 <br> promptly find their way to an exit during an emergency. <br> Findings on July 13, 2016: <br> a. Left Exit - the exit sign did not work on backup power when tested. Exit signs must work on backup power to provide directions during power outages. <br> b. Exit near Bedroom 4 - the exit sign did not work on backup power when tested. Exit signs must work on backup power to provide directions during power outages. <br> c. Exit near Back Dining Room - the exit sign did not work on backup power when tested. Exit signs must work on backup power to provide directions during power outages. <br> d. Right Firewall right side - the exit sign did not work on backup power when tested. Exit signs must work on backup power to provide directions during power outages. <br> 5. Based on observation, the Building was not maintain in a safe manner. This could expose residents, staff and visitors to fire if there was enough fuel for fire to grow beyond the ability of the Building to contain it. <br> Findings on July 13, 2016: <br> a. Bedroom 1 - the room was being used to store combustible items, significantly increasing the fire load without any additional protection. <br> 6. Based on observation, the Building was not maintained in a safe and operating condition, because the corridor doors did not resist the passage of smoke due to the doors not positively/automatically latching into their frame under normal closing force. This could affect all residents, staff and visitors if the doors were not latched and did not contain smoke/fire in the room of origin. <br> Findings on July 13, 2016: | C 189 |  |  |
