This Life Safety Code (LSC) survey was conducted as per The Code of Federal Register at 42CFR 483.70(a); using the 2000 Existing Health Care section of the LSC and its referenced publications. This building is Type III construction, one story, with a complete automatic sprinkler system and using special locking. In the exit conference all deficiencies noted were discussed and acknowledged with administration.

At time of survey the:
Total Certified Bed Count 180 NH + 6 HA = 186 Census 90

The deficiencies determined during the survey are as follows:
