One hour fire rated construction (with one hour fire-rated doors) or an approved automatic fire extinguishing system in accordance with 8.4.1 and/or 19.3.5.4 protects hazardous areas. When the approved automatic fire extinguishing system option is used, the areas are separated from other spaces by smoke resisting partitions and doors. Doors are self-closing and non-rated or field-applied protective plates that do not exceed 48 inches from the bottom of the door are permitted. 19.3.2.1

This STANDARD is not met as evidenced by:

- 42 CFR 482.41(a)

Based on the observations, and staff interviews on 7/19/2016 at approximately 9:00 AM onward, White Oak Manor-Shelby does provide an approved automatic fire extinguishing system.
### SUMMARY STATEMENT OF DEFICIENCIES

(K 029) Continued From page 1

The following deficiencies were noted:

The facility maintenance and inspection of the rated ceiling in hazardous areas was non-compliant. The specific items include:

- The facility has unsealed penetrations in the rated ceiling of the mechanical room of the older section. The penetrations in this space must be maintained with approved materials to maintain the integrity of the rated ceiling in the space.
- Ref: 2000 NFPA 101 Sections 19.1.6.2, 8.2.3.2.4.2*

This deficiency affected one of approximately ten smoke zones in the facility. Failure to comply with minimum standards as referenced increases the risk of death or injury due to fire and/or smoke.

(K 029) The unsealed penetrations in the rated ceiling of the mechanical room of the main building were sealed on 7-21-16. The penetrations were sealed with Hilti firestop material.

The Maintenance Director has inspected the ceilings throughout the facility to identify and correct any other unsealed penetrations to ensure compliance to K029. This was completed on 7-22-16.

Monthly inspections of facility ceilings for any unsealed penetrations will be completed by the Maintenance Director (or Maintenance Assistant under the direction of the Maintenance Director). The inspection findings will be reported to the Administrator by the Maintenance Director. The inspection findings will also be reviewed at the monthly QA Committee Meeting.

The Maintenance Director and the Administrator are responsible for compliance to K029.

(K 038) NFPA 101 LIFE SAFETY CODE STANDARD

**SUMMARY STATEMENT OF DEFICIENCIES**

The following deficiencies were noted:
The facility maintenance and inspection of the sprinkler system in the A. BUILDING 01 - MAIN BUILDING 01 was non-compliant the specific items include:

1. The sprinkler system has dust and lint debris on the heat sensitive element of the sprinkler heads at the following locations:
   A. Laundry department
   B. Dietary department near the kitchen hood

2. The sprinkler heads at the required exit near room 216 were noted to be out of date and in need of replacement by the facility sprinkler contractor dated June 2016.

Ref: 2000 NFPA 101 Sections 19.3.5.1, 19.7.6; NFPA 25

These deficiencies affect the two smoke zones and the required exit egress. Failure to comply with minimum standards as referenced increases the risk of death or injury due to fire and/or smoke.

1.) The sprinkler heads at the A.) Laundry department and B.) Dietary department near the kitchen hood were cleaned by the Maintenance Supervisor on 7-21-16 and are free of dust and/or debris.

An audit of other sprinkler heads in the facility was completed by the Maintenance Director on 7-22-16 to ensure compliance to K062.

The Maintenance Director has implemented a quarterly preventative maintenance schedule for checking all sprinkler heads to ensure there is no dust and/or debris. This will be completed by the Maintenance Director (or Maintenance Assistant under the direction of the Maintenance Director). The inspection findings will be reported to the Administrator by the Maintenance Director. The inspection findings will also be reviewed at the Monthly QA Committee Meeting.

2.) The sprinkler heads at the required exit near room 216 that were noted to be in need of replacement were ordered and are scheduled to be installed by a qualified contractor on 8-9-16.

Any other sprinkler heads needing replacement were also reviewed and ordered on 7-28-16 and will also be installed on 8-9-16 to ensure compliance to K062.
