STATEMENT OF DEFICIENCIES AND PLAN OF CORRECTION

NURSING HOME FACILITY NAME
LUMBERTON HEALTH AND REHAB CENTER

ADDRESS
1555 WILLIS AVENUE
LUMBERTON, NC 28358

STANDARD
NFPA 101 LIFE SAFETY CODE STANDARD
K 012

SUMMARY STATEMENT OF DEFICIENCIES
Building construction type and height meets one of the following:
19.1.6.2, 19.1.6.3, 19.1.6.4, 19.3.5.1

THE STANDARD IS NOT MET AS EVIDENCED BY:
K 012 8/14/16
42 CFR 483.70 (a)

BASED ON OBSERVATIONS, ON 06/30/2016 AT APPROXIMATELY 10:30 AM ONWARD, THE FOLLOWING DEFICIENCIES WERE NOTED: THE STANDARD WAS NON-COMPLIANT, SPECIFIC FINDINGS INCLUDE: WALLS IN LAUNDRY ROOM BY THE WASHING MACHINES AND DRYER'S, ARE NOT MAINTAINED IN GOOD CONDITION (HOLES, SHEET ROCK OFF OF SEVERAL CORNERS).

2000 NFPA 101, 19.1.6.2

LABORATORY DIRECTOR'S OR PROVIDER/SUPPLIER REPRESENTATIVE'S SIGNATURE
Electronically Signed
07/14/2016

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
### K 012
Continued From page 1

This deficiency affected laundry room only. Failure to comply with minimum standards as referenced increases the risk of death or injury due to fire and/or smoke.

- **Criteria 3**
  - Maintenance Director and/or Executive Director, in his absence, will conduct weekly monitoring of the laundry department to ensure no structural damage to walls/corners. Monitoring will begin on or before 8/14/16.
- **Criteria 4**
  - The results of the monitoring will be brought to the monthly QAPI meeting to ensure compliance and quality improvement for a minimum of 3 consecutive months or longer if deemed necessary based on the results of the monitoring.

- **K 012**
  - Maintenance Director educated 6/30/2016 to ensure weekly rounds include monitoring for structural repairs, specifically rounding in the laundry department each week.
  - Laundry personnel will be educated on or before 8/14/16 by Executive Director to ensure any structural damage noted is reported to the Maintenance Director and/or Executive Director as soon as damage is noted.

### K 027
**NFPA 101 LIFE SAFETY CODE STANDARD**

- **SS=E**
  - Door openings in smoke barriers have at least a 20-minute fire protection rating or are at least 1-1/2-inch thick solid bonded wood core. Non-rated protective plates that do not exceed 48 inches from the bottom of the door are permitted.
  - Horizontal sliding doors comply with 7.2.1.14.
  - Doors are self-closing or automatic closing in accordance with 19.2.2.2.6. Swinging doors are not required to swing with egress and positive latching is not required.

- **K 027**
  - 19.3.7.5, 19.3.7.6,

Criteria 1  
Door to dry storage room, located in the  
dietary department corrected by  
Maintenance Director July 11, 2016 to  
ensure self closing and latching.  

Criteria 2  
Maintenance Director educated 6/30/16 to  
ensure doors deemed necessary are self  
closing and latching.  
All other doors audited 7/11/2016 by  
Maintenance Director to ensure self  
closing and latching, no other doors found  
to be affected.  

Criteria 3  
Maintenance Director will audit doors  
monthly to ensure self closing and  
latching, monitoring will begin on or before  
August 14, 2016.  

Criteria 4  
The results of the monthly monitoring will  
be brought to the monthly QAPI meeting  
for a minimum of 3 consecutive months to  
ensure compliance with quality  
 improvement and longer if deemed  
necessary.  

K 038  

Criteria 1  
Fence Gate located within the Alzheimer’s  
Care Unit corrected 6/30/16 to ensure  
gate would open with less than 15 lbs of  
pressure.  

Exit access is arranged so that exits are readily  
accessible at all times in accordance with section  
7.1.  

This STANDARD is not met as evidenced by:  
42 CFR 483.70 (a)  

Based on observations, on 06/30/2016 at  
approximately 10:30 AM onward, the following  
deficiencies were noted: The standard was  
non-compliant, specific findings include: door to  
dry storage room in kitchen did not close and  
latch.  

2000 NFPA 101.19.3.2.1  

This deficiency affected kitchen area only.  
Failure to comply with minimum standards as  
referreded increases the risk of death or injury  
due to fire and/or smoke.

## Summary Statement of Deficiencies

### K 045

**Failure to comply with minimum standards as referenced increases the risk of death or injury due to fire and/or smoke.**

**Criteria 1**

Based on observations, on 06/30/2016 at approximately 10:30 AM onward, the following deficiencies were noted: The standard was non-compliant, specific findings include: standing in corridor on East wing at nurse station, you can only see one directional sign to an exit. Must be able to see two directional signs any where in a corridor (Unless the exit is obvious i.e. Front Lobby).

**2000 NFPA 101, 19.2.10.1/7.10**

This deficiency affected three of nine smoke compartments

### K 047

**NFPA 101 LIFE SAFETY CODE STANDARD**

Exit and directional signs are displayed in accordance with 7.10 with continuous illumination also served by the emergency lighting system. 18.2.10.1, 19.2.10.1

(Indicate N/A in one story existing occupancies with less than 30 occupants where the line of exit travel is obvious.)

This STANDARD is not met as evidenced by:

42 CFR 483.70 (a)

Based on observations, on 06/30/2016 at approximately 10:30 AM onward, the following deficiencies were noted: The standard was non-compliant, specific findings include: standing in corridor on East wing at nurse station, you can only see one directional sign to an exit. Must be able to see two directional signs any where in a corridor (Unless the exit is obvious i.e. Front Lobby).

**2000 NFPA 101, 19.2.10.1/7.10**

This deficiency affected three of nine smoke compartments

**Criteria 4**

The results of the monitoring will be brought to the monthly QAPI meeting for a minimum of 3 consecutive months or longer if deemed necessary to ensure compliance.

**Criteria 5**

Maintenance Director added emergency directional signage to East wing nurse's station area to ensure 2 signs are visual within 1 corridor on July 8, 2016.

Maintenance Director educated 6/30/16 to ensure 2 directional emergency signage is visual within each corridor.

**Criteria 6**

Executive Director will monitor facility monthly to ensure 2 directional signage visual within each corridor. Monitoring will begin on or before August 14, 2016.
Continued From page 6
due to fire and/or smoke.

K 144 NFPA 101 LIFE SAFETY CODE STANDARD
SS=E Generators inspected weekly and exercised under load for 30 minutes per month and shall be in accordance with NFPA 99 and NFPA 110. 3-4.4.1 and 8-4.2 (NFPA 99), Chapter 6 (NFPA 110)
This STANDARD is not met as evidenced by:
42 CFR 483.70 (a)

Based on observations, on 06/30/2016 at approximately 10:30 AM onward, the following deficiencies were noted: The standard was non-compliant, specific findings include: facility could not provide proper documentation that a weekly electrolyte test is being performed.

Reference 1999 NFPA 110 6-3.6 Storage batteries, including electrolyte levels, used in connection with Level 1 and Level 2 systems shall be inspected at intervals of not more than 7 days and shall be maintained in full compliance with manufacturer's specifications. Defective batteries shall be repaired or replaced immediately upon discovery of defects.
Reference 1999 NFPA 110 A-6-3.6, NFPA 70, National Electrical Code, Section 700-4(c)
Maintenance of batteries should include checking and recording the value of the specific gravity.

This deficiency affected entire facility.

Criteria 1
Maintenance Director educated 6/30/16 to ensure weekly electrolyte test is performed on generator battery.
Criteria 2
Maintenance Director will conduct weekly electrolyte test on generator battery on or before August 14, 2016.
Criteria 3
The weekly electrolyte tests with specific gravity will be recorded, on or before August 14, 2016 with ongoing documentation available upon request.
Criteria 4
The results of the weekly electrolyte specific gravity tests will be brought to the monthly QAPI meetings for a minimum of 3 consecutive months to ensure compliance.
Failure to comply with minimum standards as referenced increases the risk of death or injury due to fire and/or smoke.
