C 189 Continued From page 7 activation of the fire alarm system and must automatically latch when closed. h. There was a 1/4 inch gap between the double doors to the exercise room on the 2nd floor. i. The door to the Transporting office will not latch when closed. j. The door to room 327 will not latch when closed. k. There were 6 holes through the top of door to room 310. l. The door to room 310 was hard to close and open because it drags against the frame. m. The door to the Administrator's office does not fit the opening properly to be resistant to the passage of smoke. n. The door to room 328 is sometimes wedged open. o. The door to room 117 was propped open with a trash can. p. The door to room 119 was wedged open q. There was a mechanical kick-down on the door to the med room. r. The door to the laundry supply room was wedged open. 3. Based on observation, the required one-hour fire rated walls and/or ceilings were compromised in several locations. Holes and penetrations that are not sealed with materials approved for use in one-hour fire rated construction present the possibility that a fire that begins in one space can quickly spread to other areas of the facility. Findings on 5-15-2019: a. Holes in the wall of the janitor's closet near room 321, b. Fire rated ceiling tiles were missing in many places throughtout the facility including the shower room on the 3rd floor, the 3rd floor water
