No deficiencies were cited as a result of the recertification survey. Event ID730D11

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See Instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

| K018 | 01B    | SS-D | **NFPA 101 LIFE SAFETY CODE STANDARD**
Doors protecting corridor openings in other than required enclosures of vertical open, exits, or hazardous areas are substantial doors, such as those constructed of 1/4 inch solid-bonded core wood, or capable of resisting fire for at least 20 minutes. Doors in sprinklered buildings are only required to resist the passage of smoke. There is no impediment to the closing of the doors. Doors are provided with a means suitable for keeping the door closed. Dutch doors meeting 19.3.6.3.6 are permitted. 19.3.6.3
Roller latches are prohibited by CMS regulations in all health care facilities. | K018 |        |     | Greendale Forest Nursing and Rehabilitation Center acknowledges receipt of the Statement of Deficiencies and proposes this plan of correction to the extent that this summary of findings is factually correct and in order to maintain compliance with applicable rules and provision of quality of care for the residents. The plan of correction is submitted as a written allegation of compliance. | 8-5-11 |

This STANDARD is not met as evidenced by:
A. Based on observation on 07/21/2011 the following doors failed to latch when closed, 702. NFPA 101 LIFE SAFETY CODE STANDARD

Exit access is arranged so that exits are readily accessible at all times in accordance with section 7.1. 19.2.1

This STANDARD is not met as evidenced by:

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See Instructions.) Except for nursing homes, the findings stated above are disclosable 90 days allowing the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

This STANDARD is not met as evidenced by: A. Based on observation on 07/21/2011 the fire alarm system with approved components, devices or equipment is installed according to NFPA 72, National Fire Alarm Code, to provide effective warning of fire in any part of the building. Activation of the complete fire alarm system is by manual fire alarm initiation, automatic detection or extinguishing system operation. Pull stations in patient sleeping areas may be omitted provided that manual pull stations are within 200 feet of nurse's stations. Pull stations are located in the path of egress. Electronic or written records of tests are available. A reliable second source of power is provided. Fire alarm systems are maintained in accordance with NFPA 72 and records of maintenance are kept readily available. There is remote annunciation of the fire alarm system to an approved central station. 19.3.4, 9.6.

The results of the monthly fire panel inspection will be included in the facility safety program to ensure ongoing compliance.

K 056

A protective enclosure with a heat light has been installed to protect the exposed six inch riser from freezing.

Maintenance will inspect the facility to ensure that there are no exposed pipes outside of the building.

Maintenance will inspect the protective enclosure around the outside six inch pipe to ensure that it is protected on a quarterly basis.
K 067

This STANDARD is not met as evidenced by:
A. Based on observation on 07/21/2011 the corridor is being used as a return air plenum. If a waiver is requested the following must be met;
(1) Air handling units must be equipped with smoke detectors. (2) There must be a complete corridor smoke detection system. (3) Smoke detectors must be wired to the fire alarm system. (4) Fire alarm system must shut down all air handling units when activated.
42 CFR 483.70(a)

K 067

A waiver request is attached to the plan of Correction. The provider certifies that the following conditions are met:

1. Air handling units are equipped with smoke detectors.
2. There is a complete corridor smoke detection system.
3. Smoke detectors are wired to The fire alarm system.
4. The fire alarm system will shut down all air handling units when activated.
K 018

The door to rooms 105, 106 and 109 have been repaired to close and latch correctly.

All doors in the facility have been inspected to ensure that they close and latch properly.

The maintenance supervisor or designee will inspect all doors in the facility on a monthly basis to ensure that all doors close and latch properly.

The results of the monthly maintenance inspection of all doors in the facility will be included for the review in the facility safety program to ensure continued compliance.

K 038

All staff have been inserviced on the operation of the master door release switch located at the nurses stations.

New staff will be inserviced at new employee orientation on the use of the master door release switch.

Staff will be inserviced on a quarterly basis on the use of the master door release switch to ensure compliance on an ongoing basis.

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See Instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

K 033

Exit access is arranged so that exits are readily accessible at all times in accordance with section 7.1. 19.2.1
