| K 018 | SS=E | **NFPA 101 LIFE SAFETY CODE STANDARD**

Doors protecting corridor openings are constructed to resist the passage of smoke. Doors are provided with positive latching hardware. Dutch doors meeting 18.3.6.3.6 are permitted. Roller latches are prohibited. 18.3.6.3

This STANDARD is not met as evidenced by:
Surveyor: 27671
Based on observation and staff interview at 8:30 am onward, the following items was observed as noncompliant; specific findings include: refreshment cart blocking door from closing for smoke tight seal (nourishment room at nurse station). Also resident bedroom door number 108 would not latch for smoke tight seal.

42 CFR 483.70(a)

42 CFR 483.70(a)

| K 038 | SS=E | **NFPA 101 LIFE SAFETY CODE STANDARD**

Exit access is arranged so that exits are readily accessible at all times in accordance with section 7.1. 18.2.1

This STANDARD is not met as evidenced by:
Surveyor: 27671
Based on observation and staff interview at 8:30 am onward, the following items was observed as noncompliant; specific findings include; exit access door on 200 hall would not release on activation of override switch located at nurse

Disclaimer
The statements made on this plan of correction are not an admission of nor constitutes an agreement with the alleged deficiency. To remain in compliance with all federal and state regulations, the facility has taken or will take the actions set forth in this plan of correction. The plan of correction constitutes the facility's allegation of compliance such that the alleged deficiency has been or will be corrected by the date or dates indicated or by November 28, 2011

K018
For the residents involved, corrective action has been accomplished by:
Refreshment cart was removed from blocking Nourishment room.

Resident Room # 108 was repaired by Maintenance ensuring a smoke tight seal.

Corrective action has been accomplished on all residents with the potential to be affected by the alleged deficient practice by:
All patient room doors have been inspected to ensure that they have a smoke tight seal.

Measures put into place or systemic changes made to ensure that the deficient practice does not occur:
Maintenance Director will monitor doors for smoke tight seal while doing weekly rounds of the building.

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are discloseable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are discloseable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
