**NAME OF PROVIDER OR SUPPLIER**

BAYVIEW NURSING & REHAB CENTER

**STREET ADDRESS, CITY, STATE, ZIP CODE**

3093 KENSINGTON PARK DRIVE
NEW BERN, NC 28560

**DISCLAIMER**

Bayview Nursing and Rehabilitation acknowledges receipt of the Statement of Deficiency and proposes the plan of correction to the extent that the summary of findings is factually correct and in order to maintain compliance with applicable rules and the provision of quality care to residents.

The below response to the Statement of Deficiency and plan of correction does not denote agreement with the citation by Bayview Nursing and Rehabilitation. The facility reserves the right to submit documentation to refute the stated deficiencies through informal appeals procedures and/or other administrative or legal proceedings.

**ALLEGATION OF COMPLIANCE**

The plan of correction is submitted as written allegation of compliance.

| F 241 | 483.15(a) DIGNITY AND RESPECT OF INDIVIDUALITY |

The facility must promote care for residents in a manner and in an environment that maintains or enhances each resident's dignity and respect in full recognition of his or her individuality.

This REQUIREMENT is not met as evidenced by:

Based on observations, record review, and staff interview, the facility failed to ensure a privacy bag was utilized for 1 of 6 residents with a urinary catheter. Findings include:

1. Resident #25 was admitted to the facility on 10/04/08 with a diagnosis of neurogenic bladder and urinary retention requiring placement of a suprapubic catheter. The annual Minimum Data Set (MDS) assessment of 1/2/12 indicated Resident #25 had severe cognitive deficits and required all aspects of care rendered by staff. Observations on 10/15/12 at 3:06 PM revealed Resident #25 lying in bed. The urinary catheter bag was attached to the bedframe on the side of the bed facing the door of the room. The uncovered catheter bag contained urine and was visible from the hall. Observations on 10/15/12 at 5:11 PM revealed Resident #25 being assisted from the bed to a wheelchair by Nursing Assistant (NA) #1. When Resident #25 was seated, NA #1 placed the urinary catheter bag into a privacy bag hanging from the back of the wheelchair. NA #1 stated a privacy bag was not used unless a resident was in a wheelchair. During an interview on 10/18/12 at 2:42 PM with the Administrator and the Director of Nursing (DON), the Administrator stated there was usually

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the Institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See Instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
### System Changes

- A column was added to the Admission Checklist indicating a catheter privacy bag was provided to all new residents who enter the facility with a catheter. The DON or designee is reviewing all New Admission Checklists on a daily basis to ensure a catheter privacy bag(s) has been provided.

  - 10.20.12

- The Restorative C.N.A. as provided with a list of all residents in the facility with catheters and this list will be updated for new/discontinued catheters each day during the Morning Stand-up meeting. Using this list, the Restorative C.N.A. is monitoring each resident with a catheter to ensure privacy bags are being utilized at all times, and is reporting results to the Director of Nursing on a daily basis.

  - 10.20.12

- Nursing staff were inservices on the importance of ensuring all residents who have catheters have a catheter privacy bag(s) and that the privacy bag is utilized at all times while the resident is in bed or in a chair. The importance of maintaining each resident's dignity was also reviewed.

  - 10.20.12

- Monitors
  
- The DON or designee is making rounds on a daily basis to ensure catheter privacy bags are being utilized for all residents in the facility with catheters. This audit will be done daily for two weeks; weekly for four weeks and then ongoing quarterly audits.

  - 10.20.12

- The DON or designee will continue to audit Admission Checklists on a daily basis to ensure catheter privacy bags have been provided to all residents with catheters.

  - 10.20.12

- Results of the audit will be reported to the QAPI Committee during their monthly meetings for three months, and changes to the plan will be initiated if improvement is not sustained.

  - 11.12.12

---

**F 241** Continued From page 1

- a privacy bag on both sides of the bed as well as on a wheelchair for a resident with a urinary catheter. The Administrator stated the catheter bag should be in a privacy bag whether the resident was in or out of bed. During the interview, the DON stated that utilizing a privacy bag was included in the instructions to staff on care of a catheter. The DON stated the expectation was for the urinary catheter bag to be covered.

- During an interview on 10/19/12 at 3:05 PM, the Staff Development Coordinator (SDC) stated that during orientation, new nursing assistants were instructed in dignity related to the use of privacy bags to cover urinary catheter bags whether the resident was in or out of bed.

---

**F 247** 483.15(e)(2) RIGHT TO NOTICE BEFORE ROOM/ROOMMATE CHANGE

- A resident has the right to receive notice before the resident's room or roommate in the facility is changed.

---

**F 247**

- This REQUIREMENT is not met as evidenced by:

- Based on record review and family and staff interviews, the facility failed to notify the responsible party when a resident was moved to a different room, for one of one resident (Resident #2). Findings include:

- Resident #2 was admitted 1/03/12 with a diagnosis of Alzheimers Disease. The Minimum Data Set (MDS) dated 9/12/12 noted resident as being severely cognitively impaired. She needed extensive assistance with all Activities of Daily Living (ADLs).
A review of the nurse notes revealed that on 9/2/12 Resident #2 was moved to a different room because of a medical condition. This move occurred on the 3PM to 11PM shift.

On 10/16/2012 at 9:30 AM, in a family interview, Resident #2's Responsible Party (RP) stated that the facility moved the resident into a different room due to a medical condition, and that she was not notified.

In an interview on 10/18/12 at 9:00 AM the Social Worker stated that she was the person who would go over the admission packet with the families, and explained that if there was a room change the RP must be notified. She stated that if a resident was moved in the middle of the night, the facility may wait until the next day and notify the RP, but otherwise the RP would be notified the same day. She stated that her expectation would be that the nurse would also chart that the RP was notified. The Social Worker stated that she was aware that the RP was not notified and that the RP came into the facility and spoke to the nurse.

On 10/18/12 at 10:45 AM, in an interview, the Director of Nursing (DON) stated her expectation was that the nurse should notify the RP and chart that she notified the RP. The DON also stated that the RP may not be notified until morning, but that it should be charted. She also stated that the nurse should notify the family.

On 10/18/12 at 11:40 AM, Nurse #1 stated that the floor nurse who was assigned to that resident

Infection.

This REQUIREMENT is not met as evidenced by:
Based on observations, record review, and staff interview, the facility failed to ensure a urinary catheter bag was kept off the floor for 1 of 6 residents (Resident # 25). Findings include:
1. Observations on 10/15/12 at 3:06 PM revealed Resident # 25 lying in bed. The bed was in the lowest position. A urinary catheter bag was attached to the bedframe and was touching the floor.
Observations on 10/15/12 at 5:11 PM revealed Resident # 25 being assisted from the bed to a wheelchair by Nursing Assistant (NA) # 1. The urinary catheter bag was attached to the bedframe, with the bottom of the bag lying on the floor. When Resident # 25 was seated, NA # 1 picked up the urinary catheter bag from the floor and placed it into a privacy bag hanging from the back of the wheelchair. When asked how the catheter bag was kept from touching the floor with the bed in the lowest position, NA # 1 stated, "We just hang the bag from the bedframe."
During an interview on 10/13/12 at 2:42 PM with the Administrator and the Director of Nursing (DON), the Administrator stated the urinary catheter bag should be positioned off the floor. During the interview, the DON stated, "We have conducted infection control inservices in the past that would have covered keeping the bag off the floor. That is included in the care of a catheter. The expectation is for the bag to be positioned off the floor."
During an interview on 10/19/12 at 3:05 PM, the

Staff Development Coordinator (SDC) stated that during orientation, new nursing assistants were instructed on infection control related to urinary catheter bags, and the bags should not be on the floor. |
### Initial Comments

Surveyor: 27871

This Life Safety Code (LSC) survey was conducted as per The Code of Federal Register at 42 CFR 483.70(a); using the Existing Health Care section of the LSC and its referenced publications. This building is Type III(21") construction, one story, with a complete automatic sprinkler system. Facility is using NCSBC/sprinkler locking system.

The deficiencies determined during the survey are as follows:

- **NFPA 101 LIFE SAFETY CODE STANDARD**
  - Door openings in smoke barriers have at least a 20-minute fire protection rating or are at least 1¾-inch thick solid bonded wood core. Non-rated protective plates that do not exceed 48 inches from the bottom of the door are permitted.

- **K 027 SS=E**
  - Horizontal sliding doors comply with 7.2.1.14.
  - Doors are self-closing or automatic closing in accordance with 19.2.2.2.6. Swinging doors are not required to swing with egress and positive latching is not required. 19.3.7.5, 19.3.7.6, 19.3.7.7

This STANDARD is not met as evidenced by:

Surveyor: 27871

Based on observations and staff interview at approximately 8:30 am onward, the following items were noncompliant, specific findings include: all cross corridor doors in smoke wall re-engaged to magnetize when fire alarm system was silenced.

### DISCLAIMER

Bayview Nursing and Rehabilitation acknowledges receipt of the Statement of Deficiency and proposes the plan of correction to the extent that the summary of findings is factually correct and in order to maintain compliance with applicable rules and the provision of quality care to residents.

The below response to the Statement of Deficiency and plan of correction does not denote agreement with the citation by Bayview Nursing and Rehabilitation. The facility reserves the right to submit documentation to refute the stated deficiencies through informal appeals procedures and/or other administrative or legal proceedings.

**ALLEGATION OF COMPLIANCE**

The plan of correction is submitted as written allegation of compliance.

- **K 027**
  - Actions to correct deficient practice
    - See System changes
    - Determine if the deficient practice affects other areas
      - All cross corridor doors will be checked to ensure proper closely and programming changes will be made as needed.
  - System changes
    - Programming changes will be made by the fire alarm company to ensure all cross corridor doors do not re-engage to magnetize when the fire alarm is silenced.
  - Monitors
    - Monthly fire drills will be conducted and appropriate closure of all doors will be verified.
    - Results of the audit will be reported monthly to the QAPI Committee for three months and changes to the plan will be initiated as needed.
