| F 000              | INITIAL COMMENTS  
The facility is in compliance with the requirements of 42 CFR Part 483, Subpart B for Long Term Care Facilities (General Health Survey). No deficiencies were cited as a result of the recertification survey. Event ID#OYVL11. | F 000         |                                                                                                 |                     |

**TITLE**

---

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.)  
Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
Plan of Correction K 047

Although all emergency exit signs within the area of inspection were continuously lit at the time of inspection, one light bulb in each of three fixtures was burned out. Repairs to the exit lights have been completed. At this time, all light bulbs in all exit fixtures are fully operational.

To ensure that this situation does not reoccur, the following procedures have been put in place:

1. Facility staff will report any and all lighting issues to Facility Services, through the computerized work request system. All records of any and all repairs will become a permanent record, and be reviewed by the Safety Committee.

2. Additionally, the facilities department will make daily rounds of the building as a preventive measure.
**K 000 INITIAL COMMENTS**

This Life Safety Code (LSC) survey was conducted as per The Code of Federal Register at 42 CFR 483.70(a); using the 2000 New Health Care section of the LSC and its referenced publications. This building is Type III(111) construction, fire retardant treated wood trusses, one story, with a complete automatic sprinkler system.

There were no deficiencies noted during survey:

**NFPA 101 LIFE SAFETY CODE STANDARD**

Exit and directional signs are displayed with continuous illumination also served by the emergency lighting system in accordance with section 7.10. 18.2.10.1.

This STANDARD is not met as evidenced by:

- Based on observation on 2/14/13 at approximately 11:00 AM onward the following was noted:
  - There are three exit lights on Olsen Hall that have one of two bulbs out and two other exit lights on adjoining halls have one of two bulbs not working.

**K 047 SS=F**

**K 052 SS=D**

**K 052 NFPA 101 LIFE SAFETY CODE STANDARD**

A fire alarm system required for life safety is installed, tested, and maintained in accordance with NFPA 70 National Electrical Code and NFPA 72. The system has an approved maintenance and testing program complying with applicable requirements of NFPA 70 and 72. 9.6.1.4

**Plan of Correction K 047**
