<td>INITIAL COMMENTS</td>
<td>K000</td>
<td>The statements made on this plan of correction are not an admission to and do not constitute an agreement with the alleged deficiencies. To remain in compliance with all federal and state regulations the facility has taken or will take the actions set forth in this plan of correction. The plan of correction constitutes the facility's allegation of compliance such that all alleged deficiencies cited have been or will be corrected by the dates indicated. Corrective Action K029 The Maintenance Director acquired a contractor on 6/7/13 and had the dry storage room door in the kitchen repaired so that it would close, latch and seal. Corrective action for Identifying other potential life safety issues All residents have the potential to be affected by this alleged deficient practice. Every door in the building was checked by the Maintenance Director to ensure the standard for one-hour fire rated construction and all doors are self-closing and latching that protect hazardous areas is functioning correctly. Systematic Changes Monthly the Maintenance Director will check all fire doors to ensure they meet standards for all life safety guidelines as evidenced by self-closing and latching properly. Quality Assurance The Maintenance Director will check all fire doors monthly to ensure they are functioning properly. This will be done monthly times 3 months and reported</td>

This STANDARD is not met as evidenced by:
Surveyor: 10904
Based on observation on Tuesday 6/4/13 at approximately 11:00 AM onward the following was noted:
1) The dry storage room door in the kitchen did not close latch and seal.

42 CFR 482.41(a)

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
NFPA 101 LIFE SAFETY CODE STANDARD
Exit access is arranged so that exits are readily accessible at all times in accordance with section 7.1.1.10.2.1

This STANDARD is not met as evidenced by:
Surveyor: 10904
Based on observation on Tuesday 6/4/13 at approximately 11:00 AM onward the following was noted:
1) When questioned the staff were not familiar with the master override switch for the mag lock door.

42 CFR 482.41(a)
NFPA 101 LIFE SAFETY CODE STANDARD
Medical gas storage and administration areas are protected in accordance with NFPA 99, Standards for Health Care Facilities.

(a) Oxygen storage locations of greater than 3,000 cu.ft. are enclosed by a one-hour separation.

(b) Locations for supply systems of greater than 3,000 cu.ft. are vented to the outside. NFPA 99 4.3.1.1.2, 18.3.2.4

This STANDARD is not met as evidenced by:

Corrective Action
The Maintenance Director, Director of Nursing and Administrator in served all staff on June 6, 2013 on the locations of emergency exit door override switch locations and their function.

Quality Assurance
The Maintenance Director will periodically and randomly ask staff the function of the override switch and how it would be used in an emergency. If any violations are found the maintenance director will conduct additional in-services. All findings will be reported to the QOL committee.
