LABORATORY DIRECTOR'S OR PROVIDER/SUPPLIER REPRESENTATIVE'S SIGNATURE: ____________________________

TITLE: Administrator

06/27/2013

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
Continued From page 1

office staff delivered mail and she also delivered mail to residents of the facility.

During an interview on 5/8/13 at 4:55 PM, the Business Office Manager revealed the facility had a mail delivery box at the facility and she went to the post office once a week to pick up mail from the post office box. She revealed that she put the mail in the Activity Director's box to deliver mail to residents. She explained that they delivered mail daily. The Business Office Manager stated there was no mail delivery on Saturday, however, mail was delivered on Monday morning. She stated mail was retrieved for activities to deliver the mail. She revealed sometimes a nurse would get the mail and put it inside the box to be delivered.

During an interview on 5/9/13 12:40 PM, the Administrator stated starting Saturday, 5/11/13 a manager would be responsible for ensuring mail delivery. He added this was something that had fallen through the cracks and he would ensure procedures were put in place to correct the problem.

483.15(e)(1) REASONABLE ACCOMMODATION OF NEEDS/PREFERENCES

A resident has the right to reside and receive services in the facility with reasonable accommodations of individual needs and preferences, except when the health or safety of the individual or other residents would be endangered.

This REQUIREMENT is not met as evidenced by:

F 246 1) On 5/8/13, the Assistant Maintenance Supervisor replaced the pull chain on the over bed lights to assure access for residents #95 and #49.
2) The Maintenance Supervisor, or his designee, will conduct a review of resident rooms to identify the need for over bed light pull chains. The Maintenance Supervisor will correct areas identified through this review.
3) The Maintenance Supervisor will perform random observation of resident rooms monthly to assure over bed light chains are in place and functioning.
4) The Maintenance Supervisor, or his designee, will monitor through observational

<td>Based on observations, record reviews, and interviews with residents and staff the facility failed to provide access to the over the bed light for 2 of 20 residents on the 200 hall. Residents #95 and #49. Findings Include: 1. Resident # 95 was admitted to the facility in 2008 and was readmitted in April of 2013. The latest Minimum Data Set (MDS) assessment completed for Resident #95 was his reentry in 4/2013. The resident was assessed to be alert and oriented but needed extensive assistance for bed mobility, transfers, dressing, toileting, and hygiene. He could not ambulate and required limited assistance with locomotion and set up for eating. The resident was dependent on staff for bathing. During the initial tour of the facility on 5/6/13 at 11:25 AM Resident # 95 was observed in his room. The resident was lying in his bed with the over the bed light on. The over the bed light pull string was observed to be absent. The only way to turn the light on or off was by a short metal chain approximately 6 inches long which extended from the light. During a second observation on 5/7/13 at 10:00 AM the over the bed light for Resident # 95 revealed no pull string. The resident was sitting up in his wheel chair on the opposite side of the bed from the 6 inch pull chain. A third observation on 5/8/13 at 1:12 PM revealed the resident in bed with the only the 6 inch metal chain attached to the over the bed light. The light</td>

Continued From page 3 was off.

A review of the medical record for Resident #95 revealed he had been assessed as a high risk for falls. His last falls assessment was completed 5/5/13.

A review of the care plans updated on 5/7/13 for Resident #95 revealed goals and interventions for potential for falls related to weakness, chronic pain, and adverse effects from psychotropic medications. Interventions included, place items frequently used by resident within easy reach to avoid resident reaching for items and give verbal reminders not to ambulate or transfer without assistance.

Resident #95 was interviewed during the initial tour of the facility. He stated he was not able to reach the pull cord on his over the bed light because the string had broken off from the short chain. The resident revealed he had to wait for someone to come by and catch their attention to turn the light on or off. The resident stated he had climbed up on the end of the bed and turned the light off or on himself. Resident #95 stated he was not steady on his feet and he should not stand up on the bed but he revealed he got tired of waiting for staff. The resident reported he had told two staff people about the light but no one had fixed it yet.

An interview was conducted with Nursing Assistant (NA) #1 on 5/9/13 at 10:55 AM. She stated she knew Resident #95 use to have a long string on his over the bed light chain. She revealed at some point the long pull string just disappeared. NA#1 stated she had turned the
Continued From page 4

light on for Resident #95 a few times but she indicated his light was usually on when she arrived for first shift. The NA revealed she knew how to report a needed repair to maintenance by placing a request slip in the black box at the nursing station.

An interview was conducted with the Assistant Maintenance Supervisor on 5/9/13 at 11: 40 AM. He stated all staff employees and department heads were asked to fill out a repair requisition form when they saw a needed repair or a problem. He revealed the requisition forms were kept at each nursing station and staff were to place them in the black mail box when completed. The Assistant maintenance Supervisor stated he checked the mail boxes at each nursing station the first thing each morning and at least twice more during the day. He removed an over the bed light pull chain with string kit from his maintenance cart. He stated he kept them on his cart at all times so he could replace the pull string as soon as he was made aware one was broken. The Maintenance Supervisor stated a new pull kit came with a prescribed chain and a string of about 36 inches. He revealed when he had to replace the string he used a heavy cording and asked the resident how long they wanted their cord to be. He indicated Maintenance makes the replacement cord the length the resident requested. The Maintenance Assistant Supervisor stated many residents could not reach their light chain if the string was broken.

During an interview with the Director of Nursing on 5/9/13 at 2:14 PM she stated it was her expectation nursing staff would make Maintenance immediately aware of any needed

<td>2) Resident # 49 was admitted to the facility in November 2012. The most recent quarterly Minimum Data Set (MDS) was completed on 4/20/13. Resident # 49 was assessed to be moderately impaired in daily decision making skills. He was independent with most activities of daily living and was not steady but could stand himself without human intervention. During the initial tour of the facility on 5/8/13 at 11:30 AM Resident # 49 was not in his room. The over the bed light pull string was observed to be absent. The only way to turn the light on or off was by a short metal chain approximately 6 inches long which extended from the light. The bed positioned so the left side of the bed was flush against the wall. The over the bed light chain was approximately 6 feet from the bed. During a second observation of 5/17/13 at 10:05 AM the over the bed light for Resident # 49 revealed no pull string. The resident was not in the room during the observation. A third observation was conducted on 5/30/13 at 11:30 AM. Resident #49 was observed sitting in his chair by the bed. There was no pull string attached to the 6 inch metal chain connected to his over the bed light. A review of the medical record for Resident # 49 revealed he had been assessed as a high risk for falls. Progress notes revealed the resident was getting weaker, losing weight, and a steady decline in health was anticipated. A review of the care plans updated on 12/5/12</td>

problem. He revealed the requisition forms were kept at each nursing station and staff were to place them in the black mail box when completed. The Assistant maintenance Supervisor stated he checked the mail boxes at each nursing station the first thing each morning and at least twice more during the day. He removed an over the bed light pull chain with string kit from his maintenance cart. He stated he kept them on his cart at all times so he could replace the pull string as soon as he was made aware one was broken. The Maintenance Supervisor stated a new pull kit came with a prescribed chain and a string of about 36 inches. He revealed when he had to replace the string he used a heavy cordling and asked the resident how long they wanted their cord to be. He indicated Maintenance makes the replacement cord the length the resident requested. The Maintenance Assistant Supervisor stated many residents could not reach their light chain if the string was broken.

During an interview with the director of Nursing on 6/13 at 2:14 PM she stated it was her expectation nursing staff would make Maintenance immediately aware of any needed repaired they observed.

F 253  SS=D  483.15(h)2) HOUSEKEEPING & MAINTENANCE SERVICES

The facility must provide housekeeping and maintenance services necessary to maintain a sanitary, orderly, and comfortable interior.

This REQUIREMENT is not met as evidenced by:

Based on observations and interviews the facility
Continued From page 8
failed to provide a mattress with an intact cover for 1 of 1 resident mattress observed. Resident # 49.

Findings include:

Resident # 49 was admitted to the facility in November 2012. The most recent quarterly Minimum Data Set (MDS) was completed on 4/20/13. Resident # 49 was assessed to be moderately impaired in daily decision making skills. He was independent with most activities of daily living and was not steady but could steady himself without human intervention.

Resident #49 was observed on 5/9/13 at 11:30 AM sitting asleep in his chair by the bed. The resident stated he did not like the mattress on his bed. Resident #49 revealed the mattress on his bed was torn and had been "patched" with tape. He stated he could feel the torn tape when he lay on his bed.

An observation was made of Resident #49's bed. The bed was observed to be positioned so the left side of the bed was flush to the wall. The resident pulled the bedding back and revealed the cover on the mattress was cracked in multiple places down the left side. An area approximately 8 inches long and the width of the mattress had been torn away and the inner foam of the mattress was exposed. No tape was observed on the mattress.

Resident #49 stated he slept on his right side and he could feel the cracked mattress cover while in bed. The resident revealed he had told several staff members his mattress was torn but he had
Continued From page 9

not been able to get a new mattress. The resident stated staff changed his sheets and made his bed every day so he knew they had seen the exposed "stuffing".

An interview was conducted with Housekeeper #1 on 5/9/13 at 1:42 AM. She stated she sprayed down Resident #49's mattress each day when she cleaned his room if the sheets were off the bed. She revealed she did that for every bed on the hall during her daily cleaning. The Housekeeper stated once a month each room was deep cleaned. She revealed during the monthly deep cleaning the mattresses were taken off the bed frames, disinfected, and the bed was dusted. The Housekeeper stated she was not aware the mattress was torn and she revealed Resident #49 had never told her his mattress was damaged. The Housekeeper stated her department was in charge of changing out mattresses and cleaning them.

During an interview with Nursing Assistant (NA) #1 on 5/9/13 at 2:35 PM she stated Resident #49 had never told her his mattress was torn on the left side. She revealed she changed the resident's sheets as needed and made his bed each day. The NA revealed she was routinely assigned to Resident #49 but she was not aware of any damage to his mattress. The NA stated when she was aware a mattress was damaged she reported it to Housekeeping so a new mattress could be exchanged out.

An interview was conducted with the facility Housekeeping Supervisor on 5/9/13 at 3:45 PM. She stated it was her expectation Housekeeping Staff would replace any damaged mattresses.

K 000 INITIAL COMMENTS

Surveyor: 27871
This Life Safety Code (LSC) survey was conducted as per The Code of Federal Register at 42 CFR 483.70(a); using the 2000 Existing Health Care section of the LSC and its referenced publications. This building is Type V construction, one story, with a complete automatic sprinkler system.

The deficiencies determined during the survey are as follows:

K 018 LIFE SAFETY CODE STANDARD

Doors protecting corridor openings in other than required enclosures of vertical openings, exits, or hazardous areas are substantial doors, such as those constructed of 1/4 inch solid-bonded core wood, or capable of resisting fire for at least 20 minutes. Doors in sprinklered buildings are only required to resist the passage of smoke. There is no impediment to the closing of the doors. Doors are provided with a means suitable for keeping the door closed. Dutch doors meeting 19.3.6.3.6 are permitted. 19.3.6.3

Roller latches are prohibited by CMS regulations in all health care facilities.

This STANDARD is not met as evidenced by:

K 018
1) "resident room door 405" hinge was adjusted for proper closure 6/5/2013
   "storage room door in kitchen" cam was replaced 6/5/2013
   "pantry room door in kitchen" repaired 6/5/2013
   "nurse station door on the 200 hall" repaired on 6/5/2013
2) Maintenance supervisor or designee will inspect doors for proper closure.
3) Administrator will monitor for compliance.
4) Monitoring will be reviewed at scheduled QAPI Committee meetings.
5) All repairs/replacements done on 6/5/2013

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosed 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosed 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
### Summary Statement of Deficiencies

**K018**
Continued From page 1
- Surveyor: 27871
- Based on observations and staff interview at approximately 8:30 am onward, the following items were noncompliant, specific findings include: doors that would not close and latch for smoke tight seal at time of survey.
  1. Resident room door 405
  2. Storage room door in kitchen.
  3. Pantry room door in kitchen.
  4. Nurse station door on 200 hall.

**K029**
- NFPA '101 Life Safety Code Standard
- One hour fire rated construction (with ¾ hour fire-rated doors) or an approved automatic fire extinguishing system in accordance with 8.4.1 and/or 19.3.5.4 protects hazardous areas. When the approved automatic fire extinguishing system option is used, the area is separated from other spaces by smoke resisting partitions and doors. Doors are self-closing and non-rated or field-applied protective plates that do not exceed 48 inches from the bottom of the door are permitted. 19.3.2.1

This STANDARD is not met as evidenced by:
- Surveyor: 27871
- Based on observations and staff interview at approximately 8:30 am onward, the following items were noncompliant, specific findings include: lounge room on 200 hall is being used as a storage room. Door is not self closing.

**K029**
1. Self closure hinge was placed on door on 6/5/2013
2. Maintenance supervisor or designee will inspect doors for proper closure.
3. Administrator will monitor for compliance.
4. Monitoring will be reviewed at scheduled QAPI Committee meetings.
5. All repairs/replacements done on 6/5/2013
