4R3 25 PROVIDE CARE/SERVICES FOR HIGHEST WELL BEING

Each resident must receive and the facility must provide the necessary care and services to attain or maintain the highest practicable physical, mental, and psychosocial well-being, in accordance with the comprehensive assessment and plan of care.

This REQUIREMENT is not met as evidenced by:
Based on observations, record reviews, and staff interviews, the facility failed to accurately complete a weekly skin assessment for 1 of 3 sampled residents reviewed for maintaining well being. (Resident #2).

The findings included:
Resident #2 was admitted to the facility 10/23/10 with diagnoses which included end stage renal disease, Parkinson’s disease, and debility.

A care plan dated 04/30/13 identified Resident #2 was at risk for skin breakdown. The goal was to keep skin patent through the next 90 day review. An intervention included skin checks weekly.

An Annual Minimum Data Set (MDS) dated 05/17/13 indicated Resident #2 was moderately cognitively impaired and required extensive staff assistance with transfers, dressing, and toileting. The MDS coded the resident with no impairment of range of motion of hands or skin breakdown.

A Care Area Agreement dated 05/17/13 identified Resident #2 was at risk for skin

Resident #2 was re-assessed, and a new head to toe skin assessment was completed on June 19, 2013 by a staff RN.

The facility recognizes the potential for this alleged deficient practice to affect other residents.

A full body skin assessment including hands was conducted on all residents per the weekly schedule. Any skin integrity concerns identified were addressed as appropriate.

Licensed Nurses were educated by:
The Staff Development Coordinator regarding the expectation that the weekly skin assessments are to be completed accurately, and are to include opening the resident’s hands to observe the condition of the palm.

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the Institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosed in the days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosed in the days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is required for continued program participation.

Education will be completed by July 15, 2013. Any nurse not completing the education by this date will be educated prior to next scheduled shift. Newly hired nurses will receive education during orientation.

Members of Nursing Management will randomly observe 2 nurses weekly for 4 weeks then 1 weekly for 2 months performing skin assessments to ensure that skin assessment are completed accurately to include assessment of hands. Re-education will be provided as necessary.

The Director of Nursing will monitor and report a summary of results of the observations to the Quality Assurance Performance Improvement

time line of how long the resident's right palm had been bruised. She stated she concentrated more on the resident's buttock area since skin breakdown was found there on 05/29/13.

An interview with the Director of Nursing on 06/17/13 at 5:52 PM revealed her expectation was for skin checks to be completed accurately and include all parts of the body.
