The facility must inform the resident both orally and in writing in a language that the resident understands of his or her rights and all rules and regulations governing resident conduct and responsibilities during the stay in the facility. The facility must also provide the resident with the notice if any of the State developed under §1919(e)(6) of the Act. Such notification must be made prior to or upon admission and during the resident’s stay. Receipt of such information, and any amendments to it, must be acknowledged in writing.

The facility must inform each resident who is entitled to Medicaid benefits, in writing, at the time of admission to the nursing facility or, when the resident becomes eligible for Medicaid of the items and services that are included in nursing facility services under the State plan and for which the resident may not be charged; those other items and services that the facility offers and for which the resident may be charged, and the amount of charges for those services; and inform each resident when charges are made to the items and services specified in paragraphs (6) (8)(A) and (B) of this section.

The facility must inform each resident, before, or at the time of admission, and periodically during the resident’s stay, of services available in the facility and of charges for those services, including any charges for services not covered under Medicare or by the facility’s per diem rate.

The facility must furnish a written description of legal rights which includes:

Preparation, submission and implementation of this Plan of Correction does not constitute an admission of or agreement with the facts and conclusions set forth on the survey report. Our Plan of Correction is prepared and executed as a means to continuously improve the quality of care and to comply with all applicable state and federal regulatory requirements.

**F 156 Notice of Rights, Rules, Services and Charges**

**Criteria I**

Resident #44 was educated on the State Agency contact information regarding complaint reporting on 7/19/13. The Administrator verified the Facility’s posting of State Agency contact information regarding complaint reporting on 7/1/13.

| F 157 Continued From page 4 doesn't produce enough Immunoglobulin (antibodies). | F 157

The quarterly MDS assessment dated 6/20/13 indicated that Resident #54 was cognitively intact.

On 6/25/13 at 7:50 AM, Resident #54 was interviewed. She stated that she had Ig G deficiency and she was supposed to receive IV IG treatment every month. She added that since she was admitted to this facility she had not received the IV IG and that she was worried.

Review of the admission orders dated 12/8/12, there was no order for IV IG to be given monthly.

On 4/25/13, there was a progress notes from the neurology clinic. Resident #54 was seen by the neurologist that day and the orders included: Gamunex-C (a replacement therapy for Ig G deficiency) 10 gram/100 ml (mlliliter) - Infuse 35 grams by intravenous route at a rate of 1 mg/kg/min (milligram/kilogram/minute) for 30 minutes, then may increase to 8 mg/kg/min every 4 weeks with Solumedrol (corticosteroid used to reduce allergic reactions) 40 mg's and Benadryl (antihistamine used to treat allergic reactions) 50 mg's per infusion. The notes indicated that the treatment would start at (name of hospital) on 4/27/13.

The MARs (Medication Administration Records) for April, May and June, 2013 were reviewed. Gamunex-C treatment was not transcribed to the MAR.

On 4/29/13, there was a physician's order which included: "Gamunex C 10% 35 gm (gram) IV
Continued from page 5:

Every 4 weeks via port a cath (a small device installed under the skin to give easy access to the vein); Ig G and subclasses every 3 months; solutedrol 40 mgs IV and Benadryl 50 mgs IV pre infusion.

There was no documentation in the records that Resident #54 had received the IV Ig (Gamunex-C) from 4/27/13 to 6/26/13.

On 6/26/13 at 10:45 AM, administrative staff #1 was interviewed. She stated that the facility did not receive the order for IV Ig treatment until 4/29/13 and the resident was scheduled to receive it at the hospital on 5/7/13. On 5/7/13, Resident #54 went to the hospital for IV Ig treatment but her porta cath was not working (would not flush) so the IV Ig was not administered. Administrative staff #1 further stated that on 5/9/13, Resident #54 was admitted to the hospital for nausea and vomiting and was re-admitted back to the facility on 6/13/13. Administrative staff #1 further stated that the facility does not administer blood products therefore IV Ig was not provided at the facility. She added that she had informed the physician about it but she forgot to document. Administrative staff #1 did not explain why other arrangements were not made for Resident #54 to receive the IV Ig treatment after 6/13/13 (re-admission).

On 6/27/13 at 1:39 PM, the physician was interviewed. The physician stated that he was not aware that Resident #54 was not receiving the IV Ig monthly as ordered. He indicated that the IV Ig was ordered by the infectious disease doctor.

Criteria 4

The results of the audits will be reported in the monthly Quality Assurance Performance Improvement meeting by the Director of Nursing for 3 months. The committee will evaluate and make further recommendations as indicated.

SUMMARY STATEMENT OF DEFICIENCIES
(EACH DEFICIENCY MUST BE PRECEDED BY FULL
REGULATORY OR LSC IDENTIFYING INFORMATION)

Continued From page 6
and he expected the facility to administer it. If
not, he should have been informed so he could
make other plans/arrangements.

483.15(h)(2) HOUSEKEEPING &
MAINTENANCE SERVICES

The facility must provide housekeeping and
maintenance services necessary to maintain a
sanitary, orderly, and comfortable interior.

This REQUIREMENT is not met as evidenced
by:

Based on observation, record review and staff
interviews, the facility failed to ensure that a lint
screen in 1 of 3 clothes dryers was cleaned
regularly to prevent a fire hazard.

The findings included:

On 6/27/13 at 6:33 am, a tour of the laundry room
was conducted. A housekeeper was present,
folding laundry and all three of the dryers had
clothes in them. She shared that they have a
schedule to clean the clothes dryers every two
hours and record the activity on a dryer log.

When asked to inspect the lint screens, she
opened each door to display them. The first two
lint screens were clean with minimum lint on the
floor. However, the third dryer had heavy white
lint on the screen and white lint on the floor of the
dryer. The housekeeper stated that her
supervisor monitored the dryer logs to ensure that
the screens were cleaned throughout the day.

On 6/27/13 at 7:44 am, the administrative staff #3
was interviewed. He brought in the completed

Criteria 1
The Lint screens for each
dryer were cleaned
immediately following

Criteria 2
All residents have the
potential to be affected by
this alleged deficient practice

Criteria 3
The Environmental Services
Director will
re-educate all
Laundry staff on the
procedures, frequency and
documentation of cleaning
the lint screens by 7/25/13.
The Environmental Services
Director or the Maintenance
Director will
randomly review the
documentation log and
validate accuracy 3 times per
week for 12 weeks and
document these audits on the
F 253
Continued From page 7

dryer log that he kept in his office and it revealed that the activity for 6/27/13 had already been filled out for the entire day. He stated that his expectation was for his staff to clean the lint screens every two hours and if the screen was last cleaned at 8:00 pm yesterday, it should have still been clean this morning at 6:00 am.

The administrative staff returned at 7:55 am, stating that he had in-serviced his staff not to "pre-chart the dryer logs and to clean the screens either after every 2 loads or 2 hours, whichever was lesser. His written guidelines, dated 6/27/13, emphasized that a clogged screen, preventing air from circulating, could create a fire hazard.

A follow up interview was conducted with the housekeeper at 6/27/13 at 11:22 am. She shared that she always filled out the log in advance. Yesterday she stated that she cleaned the lint screens and planned to clean them again when she arrived at 8:00 am, but didn't get the chance to complete the task, before they were inspected.

483.20(g) - (i) ASSESSMENT ACCURACY/COORDINATION/CERTIFIED

The assessment must accurately reflect the resident's status.

A registered nurse must conduct or coordinate each assessment with the appropriate participation of health professionals.

A registered nurse must sign and certify that the assessment is completed.

Each individual who completes a portion of the assessment must sign and certify the accuracy of monitoring tool Opportunities will be corrected by the Environmental Services Director or the Maintenance Director daily as identified during these random audits.

Criteria 4

The results of the audits will be reported in the monthly Quality Assurance Performance Improvement meeting by the Environmental Services Director for 3 months. The committee will evaluate and make further recommendations as indicated.

Date of Compliance:
July 25, 2013.
Continued From page 8
that portion of the assessment.

Under Medicare and Medicaid, an individual who willfully and knowingly certifies a material and false statement in a resident assessment is subject to a civil money penalty of not more than $1,000 for each assessment; or an individual who willfully and knowingly causes another individual to certify a material and false statement in a resident assessment is subject to a civil money penalty of not more than $5,000 for each assessment.

Clinical disagreement does not constitute a material and false statement.

This REQUIREMENT is not met as evidenced by:
Based on record review and staff interview, the facility failed to ensure that each section of the MDS assessments were signed by the individual who completed it prior to completion date on 3 (Residents #54, #123, and #67) of 17 sampled residents. Findings included:

1. Resident # 54 was admitted to the facility on 12/8/12. The quarterly Minimum Data Set (MDS) assessment was signed as complete by the MDS coordinator on 6/20/13. Section Z of the assessment contained only one signature from the MDS coordinator. The sections she completed were A, B, G, H, I, J, L, M, N, O and P. Sections C, D, E, and K were completed but there were no signatures from the staff that completed them.
Continued From page 9

On 6/26/13 at 12:30 PM, MDS coordinator #1 was interviewed. She stated that she was not aware that the staff had to sign their sections before she could sign the assessment as complete.

2. Resident #123 was admitted to the facility on 5/25/13. The admission Minimum Data Set (MDS) assessment was signed as complete by the MDS coordinator on 6/5/13. Section Z of the assessment contained only one signature from the MDS coordinator. The sections she completed were A, B, G, H, I, J, L, M, N, O, and P. Sections C, D, E, F, and K were completed but there were no signatures from the staff that completed them.

On 6/28/13 at 12:30 PM, MDS coordinator #1 was interviewed. She stated that she was not aware that the staff had to sign their sections before she could sign the assessment as complete.

3. Resident #87 was admitted to the facility on 1/12/07. The quarterly Minimum Data Set (MDS) assessment was signed as complete by the MDS coordinator on 6/25/13. Section Z of the assessment contained only one signature from the MDS coordinator. The sections she completed were A, B, G, H, I, J, L, M, N, O, and P. Sections C, D, E, F, K and Q were completed but there were no signatures from the staff that completed them.

On 6/26/13 at 12:30 PM, MDS coordinator #1 was interviewed. She stated that she was not aware that the staff had to sign their sections

Criteria 4

The results of the audits will be reported in the monthly Quality Assurance Performance Improvement meeting by the Resident Care Management Director for 3 months. The committee will evaluate and make further recommendations as indicated.

|             | The Director of Nursing, Staff Development Coordinator or Unit Manager will correct discrepancies as identified and Medication Variance Reports will be completed for opportunities identified by 7/25/13.
Continued From page 15

weight was 121.6 lbs, a weight loss of 10.2 lbs/7.7 % since admission/within 30 days. The resident had consumed 50-75% of her meal. The notes further indicated that an order for house supplement 4 oz (ounces) twice a day with medication pass was ordered on 5/23/13 to promote weight stability.

Review of the June, 2013 Medication Administration Record (MAR) revealed that the house supplement was transcribed to be given twice a day but the timing was written at 10:00 AM (once a day) only.

On 6/27/13 at 10:30 AM, CMA #3 was interviewed. She stated that she was assigned to administer the medications for Resident #53. She stated that she had administered the house supplement to Resident #53 once a day as it was written on the MAR. She was not aware that the order was twice a day.

On 6/27/13 at 10:35 AM, administrative staff #1 was interviewed. She stated that the nurse who signed off the MAR at the end of the month was not available for interview. She acknowledged that the house supplement was transcribed incorrectly.

483.25(1) DRUG REGIMEN IS FREE FROM UNNECESSARY DRUGS

Each resident's drug regimen must be free from unnecessary drugs. An unnecessary drug is any drug when used in excessive dose (including duplicate therapy); or for excessive duration; or without adequate monitoring; or without adequate indications for its use; or in the presence of adverse consequences which indicate the dose

Criteria 3

The Director of Nursing, Staff Development Coordinator or Unit Manager will re-educate all Licensed Nurses, including those working PRN and weekends, on accurate transcription of physician's orders including nutritional supplements by 7/25/13.

The Director of Nursing, Staff Development Coordinator or Unit Manager will audit the carbon copies of Physician's Orders and Medication Administration Records 4 times per week for 12 weeks to verify accurate transcription of Physician's orders, these audits will be documented on the monitoring tool. Opportunities will be corrected by the Director of Nursing, Staff Development Coordinator or unit Manager daily as identified during these audits.
**Criteria 4**

The results of the audits will be reported in the monthly Quality Assurance Performance Improvement meeting by the Director of Nursing for 3 months. The committee will evaluate and make further recommendations as indicated.

Date of Compliance:
July 25, 2013.

**F 329 Unnecessary medications**

**Criteria 1**

A TSH was collected for Resident #233 by 6/28/13 and was within normal limits.

**Criteria 2**

Residents receiving a thyroid replacement hormone have the potential to be affected by this alleged deficient practice. The Director of Nursing, Staff Development Coordinator or Unit Manager will complete an audit of all residents receiving a thyroid replacement hormone by 7/25/13 to verify a physician's order is in place for TSH monitoring.
Criteria 3

The Director of Nursing, Staff Development Coordinator or Unit Manager will re-educate all Licensed Nurses, including those working PRN and weekends, on requirements for laboratory monitoring via TSH for those residents receiving a thyroid replacement hormone by July 25, 2013. The Director of Nursing, Staff Development Coordinator or Unit Manager will audit the carbon copies of Physician’s Orders 4 times per week for 12 weeks to verify lab (TSH) monitoring is in place for residents receiving thyroid replacement hormones, these audits will be documented on the monitoring tool.

Opportunities will be corrected by the Director of Nursing, Staff Development Coordinator or Unit Manager daily as identified during these audits.
### Summary Statement of Deficiencies

<table>

<tr>
<th>ID TAG</th>
<th>Summary of Deficiencies (Each deficiency must be preceded by full regulatory or LSC identifying information)</th>
</tr>
</thead>
<tbody>
<tr>
<td>F 332</td>
<td>Continued From page 18</td>
</tr>
</tbody>
</table>

1. Resident #258 was admitted to the facility on 6/13/13 with multiple diagnoses including iron deficiency anemia. The June, 2013 physician's orders indicated that Resident #258 had an order for Ferrous Sulfate 325 mgs (milligrams) 1 tablet by mouth three times a day with meals for iron deficiency anemia.

On 6/25/13 at 5:45 PM, Certified Medication Aide (CMA) #1 was observed during the medication pass. CMA #1 was observed to prepare and to administer the medications for Resident #258 including the Ferrous Sulfate. The dinner tray had not been delivered yet to the resident.

On 6/25/13 at 6:00 PM, CMA #1 was interviewed. She stated that the dinner cart was always delivered on the hall between 6:00 - 6:15 PM. She added that she should have waited for the dinner tray before administering the Ferrous Sulfate.

2. Resident #251 was admitted to the facility 6/14/13. The June 2013 physician's orders indicated that Resident #251 had an order for potassium chloride 20 meq. (milliequivalents) one tablet three times daily. Take with food or milkshake.

On 6/25/13 at 5:23 PM, CMA #3 was observed during the medication pass. She was observed to prepare and to administer the medications for Resident #251 including the potassium chloride. Neither food nor a milkshake was given to the

### Criteria 4

The results of the audits will be reported monthly in the Quality Assurance Performance Improvement meeting by the Director of Nursing for 3 months then quarterly. The committee will evaluate and make further recommendations as indicated.

Date of Compliance: July 25, 2013.
**F 332** Continued From page 19

resident with the medication.

On 8/25/13 at 5:37 PM., CMA #3 stated the evening meal would arrive at 6:00 PM. She stated she knew the potassium chloride should be given with food or a milkshake and she just forgot it.

On 6/26/13 at 10:10 AM., Administrative staff #1 stated she expected all medications to be administered per physician’s order and the potassium chloride should have been given with food or a milkshake.

3. Resident #21 was admitted to the facility on 2/8/13. Cumulative diagnoses included a cerebrovascular accident (CVA). Resident #21 had a gastrostomy feeding tube and received all medications via the gastrostomy tube.

On 6/25/13 at 5:59 PM., Nurse #2 was observed during medication pass. Nurse #2 prepared the medications and administered the medications via the feeding tube. She gave the medications in approximately 90 ml. (milliliters) of water and did not give a water flush between the medications.

On 8/25/13 at 5:59 PM., Nurse #2 stated the policy was to flush the gastrostomy tube before and after medications had been administered.

On 6/26/13 at 10:10 AM., Administrative staff #1 stated she expected the nursing staff to administer the medications per the facility gastrostomy tube policy which stated to flush with 5–10 ml. of water between medications.

**F 356** 483.30(e) POSTED NURSE STAFFING

---

**If continuation sheet Page 20 of 38**
The facility must post the following information on a daily basis:
- Facility name.
- The current date.
- The total number and the actual hours worked by the following categories of licensed and unlicensed nursing staff directly responsible for resident care per shift:
  - Registered nurses.
  - Licensed practical nurses or licensed vocational nurses (as defined under State law).
  - Certified nurse aides.
- Resident census.

The facility must post the nurse staffing data specified above on a daily basis at the beginning of each shift. Data must be posted as follows:
- Clear and readable format.
- In a prominent place readily accessible to residents and visitors.

The facility must, upon oral or written request, make nurse staffing data available to the public for review at a cost not to exceed the community standard.

The facility must maintain the posted daily nurse staffing data for a minimum of 18 months, or as required by State law, whichever is greater.

This REQUIREMENT is not met as evidenced by:
Based on observations, record review and staff interview, the facility failed to post daily staffing with accurate information for 4 out of 4 days.

Criteria 1
The Director of Nursing updated the Daily Facility Staffing Posting by documenting the RN and LPN hours separately by 6/28/13.

Criteria 2
All residents have potential to be affected by this practice.

Criteria 3
The Administrator and Director of Nursing were re-educated regarding the daily staffing posting requirements by the Division Director of Education on 6/27/13. The Administrator or Director of Nursing will audit the daily staffing posting daily for 1 week, then weekly for 11 weeks to ensure posting is timely and accurate. Opportunities will be corrected by the Administrator or Director of Nursing daily as identified.
The findings included:

On 6/24/13 at 11:20 am, during the initial tour, the daily staffing was noted to list all licensed nurses together, at each shift and did not recognize the actual hours worked for the licensed practical and registered nurses.

On 6/25/13 at 9:05 am, the daily staffing was noted to list all licensed nurses together, at each shift and did not recognize the actual hours worked for the licensed practical and registered nurses.

On 6/25/13 at 3:11 pm, the daily staffing was noted to list all licensed nurses together, at each shift and did not recognize the actual hours worked for the licensed practical and registered nurses.

On 6/27/13 at 6:25 am, the Administrative Staff #5 was approached about the daily staff posting. He stated that he had three staff that were trained on to fill out the form and that he wasn't aware that it was done incorrectly. He shared that he would make sure that the form was fixed. At 10:38 am, the revised daily staff posting was observed on the bulletin board, however it did not separate the actual hours worked between the licensed practical and registered nurses.

The results of these audits will be reported to the monthly QAPI meeting by the Administrator and the committee will make recommendations for further action as needed.

Date of Compliance:
July 25, 2013.

Criteria 1
The Fryer and the Meal Tray Carts were cleaned by the Dietary Manager on 6/28/13.

Criteria 2
All residents have the potential to be affected by this alleged deficient practice related to the Fryer and the Meal Tray Carts.
Continued From page 22

(2) Store, prepare, distribute and serve food under sanitary conditions

This REQUIREMENT is not met as evidenced by:
Based on observation, staff interview and record review the facility failed to maintain a deep fryer free from greasy buildup and to maintain 1 of 2 open rack meal carts free from debris between scheduled cleanings. The findings included:

1. Review of the Daily Cleaning Schedule revealed that the Fryer/Floor/Wall was to be cleaned once a week by #4 Cook. The description stated “drain grease from fryer, use cleaner to thoroughly clean inside and outside of fryer, clean wall and floor around fryer.” The schedule indicated this was to be done on Tuesdays. The column for the initials of the person who completed the task was left blank.

On 6/24/13 at 11 AM the deep fryer was observed to have dark brown liquid (oil) in it with a build up of dark brown debris (approximately 1 - 2 inches in height) around all 4 sides of the interior of the deep fryer (1 - 2 inches above the level of the liquid). The outside of the deep fryer was observed to have greasy brown buildup on areas of the front and the one visible side panel.

On 6/26/13 at 12:20 PM the deep fryer was observed to have dark brown liquid (oil) in it with a build up of dark brown debris (approximately 1 - 2 inches in height) around all 4 sides of the...

Interior of the deep fryer (1 - 2 inches above the level of the liquid). The outside of the deep fryer was observed to have greasy brown build up on areas of the front and the one visible side panel. Observations of the tray line at this time revealed that fried chicken had been prepared for lunch.

On 6/27/13 at 11:15 AM the deep fryer was observed to have dark brown liquid (oil) in it with a build up of dark brown debris (approximately 1 - 2 inches in height) around all 4 sides of the interior of the deep fryer (1 - 2 inches above the level of the liquid). The outside of the deep fryer was observed to have greasy brown build up on areas of the front and the one visible side panel.

On 6/27/13 at 11:20 AM, interview with the Dietary Manager revealed that the fryer was to be cleaned weekly and that when staff completed the task they were to initial it off as completed. She added that at the end of the day she was to review that cleaning tasks had been completed but that she had not done it this week.

On 6/27/12 at 11:25 AM, interview with Administrative Staff #7 revealed that she believed staff were adhering to the cleaning schedule and just failed to document that the fryer had been cleaned. She indicated that she was not aware that the debris on the fryer continued to look as it had on 6/24/13.

2. Review of the daily cleaning schedule revealed the food carts were to be cleaned on Monday by Aide #3 and Friday by Aide #6. The description stated "spray carts with cleaner, spray carts down thoroughly, wipe spills or stains." The column for the initials of the person

**Provider's Plan of Correction**

- Opportunities will be corrected by the Dietary Manager daily as identified during these audits.

**Criteria 4**

The results of the audits will be reported in the monthly Quality Assurance Performance Improvement meeting by the Dietary Manager for 3 months. The committee will evaluate and make further recommendations as indicated.

**Date of Compliance:**

July 25, 2013.
Continued From page 24
who completed the task was filled in with initials for Monday. The Friday cleaning was not yet due.

On 6/26 at 12:15 PM 1 of 2 open rack meal carts used to take meal trays to the dining room was observed to have a build-up of yellowish beige colored debris on the vertical bars that staff grasp onto when pushing the food cart prior to and after delivering meal trays to residents.

On 6/27/13 at 11:13 AM 1 of 2 open rack meal carts used to take meal trays to the dining room was observed to have a build-up of yellowish beige colored debris on the vertical bars that staff grasp onto when pushing the food cart prior to and after delivering meal trays to residents.

On 6/27/13 at 11:27 PM interview with Administrative Staff #7 revealed that she acknowledged there was debris on the open rack meal cart. She indicated that this had been a problem she was aware of and that improvements had been made in keeping the meal carts clean.

The facility must provide routine and emergency drugs and biologicals to its residents, or obtain them under an agreement described in §483.75(h) of this part. The facility may permit unlicensed personnel to administer drugs if State law permits, but only under the general supervision of a licensed nurse.

A facility must provide pharmaceutical services (including procedures that assure the accurate acquiring, receiving, dispensing, and
continued from page 25

administering of all drugs and biologicals) to meet the needs of each resident.

The facility must employ or obtain the services of a licensed pharmacist who provides consultation on all aspects of the provision of pharmacy services in the facility.

This REQUIREMENT is not met as evidenced by:

Based on record review and staff, family and resident interview, the facility failed to ensure that medications were requested, received and administered as ordered as evidenced by missed dosages of medications due to unavailability for 1 (Resident #54) of 10 sampled residents.

Findings include:

Resident #54 was admitted to the facility on 12/8/12 and was re-admitted on 5/13/13 with multiple diagnoses including seizure disorder and insomnia.

The quarterly MDS assessment dated 6/20/13 indicated that Resident #54 was cognitively intact.

Review of the physician’s orders on admission (5/13/13) revealed that Resident #54 was on Ambien ER (a sedative helps with sleep) 12.5 mgs (milligrams) 1 tablet by mouth at bedtime for insomnia and Vmpet (anti seizure drug) 50 mgs - 4 tablets by mouth twice a day for seizures.

The MARs (Medication Administration Records) for May, 2013 were reviewed. The MAR revealed

Criteria 2

All residents have the potential to be affected by this alleged deficient practice. The Director of Nursing, Staff Development Coordinator or Unit Manager will conduct an audit of all medications storage rooms, refrigerators and medications carts to verify medications currently ordered are available for administration. The audit will be completed by 7/25/13.

Criteria 3

The Director of Nursing, Staff Development Coordinator or Unit Manager will re-educate all Licensed Nurses, including those working PRN and weekends, on the policy and procedure for ordering and receiving medications by 7/25/13. The Director of Nursing, Staff Development Coordinator or Unit Manager will audit all medication rooms and medication carts weekly for 12 weeks to verify medication currently ordered are available for administration, these audits will be documented on the monitoring tool.

Opportunities will be corrected by the Director of Nursing, Staff Development Coordinator or Unit Manager daily as identified during these audits.
**Continued From page 26**

that ambien was not administered to Resident #54 on 5/20/13, 5/21/13 and 5/23/13. The notes at the back of the MAR indicated that ambien was not administered due to being out of supply and was waiting for the pharmacy to deliver.

The MARs for May, 2013 revealed that vimpat was not administered for 5 doses, on 5/29/13 at 9:00 PM dose, 5/30/13 and 5/31/13 at 9:00 AM and 9:00 PM doses. The notes at the back of the MAR indicated that vimpat was not administered due to being out of supply.

Review of the nurse's notes revealed that Resident #54 had seizure activity on 6/4/13 at 12:45 AM (unwitnessed) and on 6/8/13 at 5:00 PM (witnessed).

On 6/26/13 at 4:10 PM, a family member was interviewed. The family member indicated that there were days that the facility was out of medications (ambien and vimpat) and therefore Resident #54 did not receive them for days. The family member was worried having to miss several doses of the seizure medication might have caused the resident to have seizure activity. The family member also stated that Resident #54 had missed several doses of her sleeping pill.

On 6/27/13 at 8:05 AM, CMA #2 was interviewed. She stated that when a resident was out of medication she informed the nurse, and the nurse was supposed to check the pxis, if not available, the nurse would call the pharmacy. She added that she normally faxed the sticker for refill to the pharmacy when 8 tablets/capsules were left on the punch card.

**Criteria 4**

The results of the audits will be reported monthly in the Quality Assurance Performance Improvement meeting by the Director of Nursing for 3 months then quarterly. The committee will evaluate and make further recommendations as indicated.

**Date of Compliance:**

July 25, 2013.

Continued From page 32

The facility must maintain all essential mechanical, electrical, and patient care equipment in safe operating condition.

This REQUIREMENT is not met as evidenced by:

Based on observation, resident, family and staff interviews, the facility failed to make repairs, over an extended period of time, on a non-working whirlpool tub, post a sign on a non-working appliance (clothes dryer), in order to prevent a fire hazard and to use a toaster in a safe manner.

The findings included:

1. On 6/27/13 at 9:25 am, Administrative Staff #2 was interviewed about any equipment needing repairs in the facility. He mentioned that the facility had one whirlpool tub that needed repairs. He shared that he had requested new parts to repair the seal on the door but encountered problems since the tub was old and the parts had been discontinued. He stated that the tub has needed this repair since prior to his employment, which began in 2009. For now, he explained that the residents do not use the tub; they only have access to the shower in the bathroom.

A. On 6/28/13 at 4:10 pm, the Responsible Party for Resident 54 stated that she was concerned that the tub on the 300 hall has not been working for a long time. She stated that Resident 54 preferred to have a tub bath and was not comfortable taking a shower.

Criteria 1

The toaster and clothes dryer were repaired by 6/28/13. The facility has obtained approval for replacement of the whirlpool tub and the order has been placed.

Criteria 2

All residents have the potential to be affected by this alleged deficient practice. The Maintenance Director or Administrator will complete an audit of essential equipment currently housed in the facility to verify the equipment is in working order, if not it is posted as “Out of Service”, and verify repairs are in process, by 7/25/13.
Continued From page 33

B.] On 6/27/13 at 9:55 am, Resident #38 stated that she would prefer to take two tub baths a week, but the option was not available.

C.] On 6/27/13 at 10:10 am, Resident #54 stated that due to her joint disease, it’s easier for her to take a tub bath, but the option was not available.

D.] On 6/27/13 at 10:40 am, Resident #23 stated that she always took tub baths at home, because she was always afraid that she would fall in the shower.

Administrative Staff # 4 was interviewed on 6/27/13 at 10:45 am. She stated that the whirlpool tub hasn’t worked in about five years and that the residents take showers.

2. On 6/27/13 at 6:30 am, a tour was conducted of the laundry room. The housekeeper was present and was folding towels while one of the three dryers was in operation. Upon closer examination it was noted that all three dryers had clothes in them. The housekeeper stated that all of their equipment was working and there were no signs observed on the dryers to indicate, any malfunctions.

On 6/27/13 at 9:20 am, Administrative Staff #2 was interviewed about any equipment needing repairs in the facility. He stated that the middle dryer (#2) was out of order and it had been out for a couple of days. At 10:35 am, he indicated that a technician came to fix the dryer, which had a damaged capacitor, which affected the drum working properly and that could create a fire hazard.

Criteria 3

The Dietary Manager will re-educate all Cooks on the safe use of the toaster by 7/25/13. The Administrator, Maintenance Director or Staff Development Coordinator will re-educate all staff on the process for reporting equipment in need of repair and labeling of inoperable equipment as “Out of Service” while awaiting repair by 7/25/13. The Maintenance Director or Administrator will ensure installation of whirlpool tub following delivery.

The Maintenance Director or Administrator will randomly monitor essential equipment weekly for 12 weeks to verify equipment is in working order, posted as “out of Service” if awaiting repair and repairs in progress, these audits will be documented on the monitoring tool.
F 456 Continued From page 34

He shared that he had disabled the dryer from the electrical panel, to "lock it out" but did not hang a sign to say that it was out of order. The Administrative Staff #2 stated that he told Administrative Staff #3 of his actions and expected him to inform his housekeeping staff.

The housekeeper was re-interviewed on 6/27/13 at 11:25 am. She stated that the dryer #2 had been working last Friday, (June 21), then it went down, but the staff was able to use it yesterday. She indicated that she did not know that it was out of order. Their protocol was if equipment malfunctioned, the staff reported this to their supervisor or Administrative Staff #2. A sign would be hung saying "Out of Commission" on the equipment. She wasn't sure who placed clothes in dryer #2, since the laundry room stayed unlocked during the night, so that third shift staff could access the equipment to launder clothes.

On 6/27/13 at 12:30 pm, Administrative Staff #3 provided documentation to demonstrate that he in-serviced his housekeeping staff about their policies and procedures.

3. On 6/27/13 at 3:00 PM during observation of the kitchen the conveyor toaster was observed. The toaster had a rack attached that was used to feed the bread into the conveyor of the toaster. This conveyor then passed the bread through the heating elements to toast the bread. The heating elements were in close proximity to the junction between the rack and conveyor. On the left side of the rack there was a wadded up napkin placed under the rack near the junction of the rack and conveyor belt. The napkin had brown markings on it that appeared to be singe or burn marks.

Criteria 4

The results of the audits will be reported monthly in the Quality Assurance Performance Improvement meeting by the Maintenance Director for 3 months then quarterly. The committee will evaluate and make further recommendations as indicated.

Date of Compliance: July 25, 2013.
F 456 Continued From page 35

On 6/27/13 at 3:10 interview with the Administrative Staff #5 revealed he had not previously been unaware of the placement of the napkin on the toaster but he indicated that it should not have been placed there and could be a hazard. The napkin was then removed.

On 6/27/13 at 3:15 PM interview with the Administrative Staff #7 revealed that she had not previously been aware of the placement of the napkin on the toaster. She then questioned the Dietary Manager (DM) who stated that the napkin had been placed under the corner of the toaster rack purposely in order to raise the height of the rack so the bread would feed into the toaster properly. The DM added that the old napkin was removed and replaced with a new one every morning.

On 6/27/13 at 3:17 PM the Administrative Staff #5 and #7 acknowledged that the napkin should not have been placed on the toaster as it was a hazard. They also stated that the problem should have been reported to maintenance and that maintenance would need to modify the toaster rack with a non flammable material such as metal.
**K 000**

**INITIAL COMMENTS**

Surveyor: 27871
This Life Safety Code (LSC) survey was conducted as per The Code of Federal Register at 42 CFR 483.70(a), using the 2000 Existing Health Care section of the LSC and its referenced publications. This building is Type III (211) construction, one story, with a complete automatic sprinkler system.

The deficiencies determined during the survey are as follows:

**K 045**

**SS=D**

Correction for the alleged deficient practice noted as “egress illumination, exit discharge from day room would leave area in darkness;” was to connect one of the room’s two light fixtures unswitched to emergency power to provide uninterrupted lighting in the room. The Maintenance Director will survey the remainder of the building to determine proper emergency lighting in all like areas and if need, correct upon discovery. All findings and corrections will be reported to and discussed during the next three monthly Safety Committee meetings with continued review quarterly thereafter until next annual survey. Correction date 8/6/2013

**K 067**

Correction for the alleged deficient practice noted as “all dampers in return vents throughout facility have excess lint build up on dampers,” was to check and clean all return vent dampers in facility. The Maintenance Director will continue monitoring dampers with spot checks during monthly air conditioner p.m. and filter changes and check and clean all as needed quarterly. All findings will be reported to and discussed during monthly.

---

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions). Except for nursing homes, the findings stated above are disclosable 80 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

<th>K 076</th>
<th>Correction for the alleged deficient practice noted as “overhead lights in rooms 206, 211, and 314 had objects stored on top of light fixture,” was immediate removal of the objects in those specified rooms. The Maintenance Director will survey the remainder of the building to locate any other like instances and correct upon discovery. An inserwice will be offered to all staff regarding storage and decorative objects located on top of light fixtures with an explanation of hazards associated with same. All results and findings will be reported to and discussed during monthly Safety Committee meetings for the next three months and continue with quarterly reviews until next annual survey.</th>
