On 8/17/15 through 8/20/15 a complaint investigation survey was conducted. There were no deficiencies as a result of the complaint investigation. Event #4PG911.

F 242 483.15(b) SELF-DETERMINATION - RIGHT TO MAKE CHOICES

The resident has the right to choose activities, schedules, and health care consistent with his or her interests, assessments, and plans of care; interact with members of the community both inside and outside the facility; and make choices about aspects of his or her life in the facility that are significant to the resident.

This REQUIREMENT is not met as evidenced by:
Based on family and staff interviews, and record reviews the facility failed to honor the choice for 1 of 3 sampled residents to receive showers as scheduled by the facility.
Resident #190.

Findings included:

Resident #190 was originally admitted to the facility on 5/13/15 with diagnoses which included: cerebrovascular accident with left sided hemiparesis, secondary Parkinsonism, anxiety state, muscle weakness, dementia with behavioral disturbances, hyperlipidemia, epilepsy, cataract, hypertension, and psychosis.

A review of the most recent quarterly MDS (Minimum Data Set) dated 6/18/15, indicated Resident # 190 received a shower on August 20, 2015. Resident is scheduled to receive a minimum of two showers every week; in the evenings, every Monday and Thursday. On Monday August 24,2015 and Monday August 31,2015 administrator met with resident #190s wife and was informed by wife that resident is receiving shower twice a week and is pleased with care resident is receiving at the facility.

On 8/20/2015 the DON began reeducating nursing staff to include: licenses nurses, C.N.As and medication aides on the following: 1) Residents should be receiving showers twice a week...

**F 242 Continued From page 1**

Resident #190 was severely cognitively impaired with no behaviors and was totally dependent on staff for his personal hygiene and bathing. The resident's Care Plan revealed he required assistance with the potential to restore or maintain maximum function of self-sufficiency for bathing related to his cognitive impairment, impaired mobility. Interventions included: approach in calm, patient manner; break tasks into segments, give steps one at a time to avoid overwhelming the resident.

Review of the facility's records revealed Resident #190 was scheduled to receive his showers during second shift on Mondays and Thursdays.

Review of the ADL (Activities of Daily Living) Flow sheets for Resident #190 dated from 7/21/15 through 8/19/15 indicated Resident #190 did not receive a shower as scheduled on: 7/23/15, 8/6/15, 8/10/15, and 8/17/15.

Facility records revealed Resident #190 was out of the facility on Leave with family on 7/25/15-7/28/15 and 8/2/15-8/4/15. Further review of the ADL Flow sheets revealed Resident #190 received a shower on Tuesday, 7/21/15 and Sunday, 7/30/15; but received a full bath on Monday, 8/10/15. There was no documentation in the resident’s clinical record or the facility’s records indicating the resident refused a shower or a bath during the reviewed time period (7/21/15-8/19/15).

On 8/18/15 at 10:30am, Resident #190 was observed in a wheelchair in front of nursing station. The resident appeared clean and well groomed, dressed for the day. The resident was nonverbal and calm.

F 242 and as needed per the shower schedule unless a specific schedule had been developed for them. 2) If a resident refuses a shower the primary nurse must be notified immediately. 3) The type of bath and any refusals must be documented in POC and on shower schedule. The reeducation was completed on 9/7/15.

A Shower Schedule Audit Tool was initiated on September 3, 2015 to monitor that showers are being given per shower schedule and documentation is complete in POC. The Shower Schedule Audit Tool will be completed for 10% of residents by the DON, ADON, and staff facilitator 4 x week x 4 weeks, then 2 x week x 8 weeks, then 1 x week x 12 weeks. On September 3, 2015 the administrator in-serviced DON, ADON, and staff facilitator on completing the Shower Schedule Audit Tool. The QI committee consist of administrator, DON, ADON, and staff facilitator will meet weekly x 8 weeks, then every other week x 8 weeks, then monthly x 2 months. Any inconsistencies will be immediately reported to the administrator for possible modification of quality improvement monitoring process.

The Executive Committee will meet quarterly x 2 quarters to discuss quality improvement process and evaluate effectiveness of residents receiving showers twice a week. Recommendations to continue, alter or modify will be discussed at this time. The

**Address:** 308 West Meadowview Road, Greensboro, NC 27406  
**Deficiency IDs:** F 242, F 248

#### F 242
**Summary Statement of Deficiencies:**

During an interview on 8/18/15 at 1:52pm, the resident's RP (Responsible Party) stated that her routine was to arrive at the facility everyday close to Resident #190's lunch time; leave the facility between 2:00p-2:30p; then return to the facility close to the resident's dinnertime, and stay with the resident until 8:00pm. The RP revealed the resident was to receive a minimum of two showers every week; in the evenings, every Monday and Thursday. The RP stated the nursing assistants frequently failed to give the resident his scheduled shower unless she (RP) made the request.

During an interview on 8/19/15 at 10:28am, SN#1 (Staff Nurse) confirmed that Resident #190's scheduled shower days were Mondays and Thursdays during second shift. After reviewing the "NA (nursing assistant) Book" where the NA daily assignments and shower schedule sheets were maintained, SN#1 acknowledged that there were only shower sheets for the following days in August 2015 for Resident #190: 8/3/15, 8/13/15, and 8/17/15 which were incomplete, indicating the resident did not receive a shower.

During a follow-up interview on 8/19/15 at 2:03pm, The RP revealed that prior to his admission to the facility, Resident #190 preferred taking a shower every day; but, would sometimes take a bath.

#### F 248
**Activities Meet Interests/Needs of Each Res:**

The facility must provide for an ongoing program of activities designed to meet, in accordance with 483.15(f)(1) ACTIVITIES MEET INTERESTS/NEEDS OF EACH RES.

the comprehensive assessment, the interests and
the physical, mental, and psychosocial well-being
of each resident.

This REQUIREMENT is not met as evidenced by:
Based on observations, resident and staff
interviews, and record reviews, the facility failed
to provide Activities for 1 of 1 resident with
impaired mobility. Resident #150.

Findings included:

Resident #150 was originally admitted to the
facility on 4/18/13 and re-admitted on 6/9/14 with
diagnoses which included: attention to
tracheostomy, chronic respiratory failure,
contractures, attention to gastrostomy, chronic
kidney disease stage II, pressure ulcers, and
muscle weakness.

Review of the Activity Progress (Interests) Sheet
dated 6/17/15 indicated Resident #150 was
interested and participated in Activities which
included: Bingo, socials at times with wife in
attendance; family and friends visits; television;
and pet therapy. In-room activities/projects were
also provided, and the resident assisted with
activities he could pursue independently.

The review of the most recent quarterly MDS
(minimum data set) dated 6/19/15 indicated
Resident #150 had moderately impaired cognition
with no behaviors or moods. Also, for the
assessment reference period, the MDS coded
transfers and locomotion as activities that did not
occur.

Resident #150 was reassessed to
determine need for 1:1 visits and
reassessed for the types of activities the
resident showed interest. Arrange for
activity aide to visit and encourage
resident to observe or designate activity,
assist resident in planning leisure-time
activities. Encourage resident to plan own
leisure-time activities. Engage resident in
group activities. Give resident verbal
reminders of activity before
commencement of activity. Offer schedule
of activities for resident to select choices.
Post personal activity schedule in
resident’s room. Provide supplies for
independent activities of resident choice
Care plan was modified accordingly.

A 100% audit was completed on August
21, 2015 for all residents that could have
been affected. Updated documentation
and care plans completed on identified
residents.

Activities Director in serviced by the
Administrator and Activities staff in
serviced by the Activities Director to
ensure 100% of staff participation. The
in-service consist of all residents will be
assessed appropriately to determine the

<td>F 248</td>
<td>Continued From page 5 approximately two feet from the right side of the resident's bed. The resident indicated that if the print on the Activity Calendar was larger and accessible to him, he would like to make the decision whether to attend any of the group Activities. When asked if the Pet Therapy group (which were observed entering the facility approximately 2:00pm that day) visited him, the resident replied with a shake of his head and said &quot;no&quot;. During an interview on 8/20/15 at 10:50am, the Activity Director indicated that Resident #150 used to receive one-on-one with Activity staff; then with therapy, the resident was able to be out of bed in his electric wheelchair. She stated that the Activity staff would visit the resident to encourage him to attend the facility's out of room activities. She revealed that the resident usually only attended group activities when his wife was in attendance and that the resident's family visited him everyday. She acknowledged that the resident was unable to read the Activity Calendar that was taped on his wall along the right side of his bed; but the resident's wife preferred the calendar in its' current location. She also revealed that the Pet Therapy Group that was observed on 8/18/15 at 2:00pm conducted one-on-one visits in residents' rooms. She also acknowledged that Resident #150 was alert and oriented, and able to make his needs known. Recommendations to continue, alter or modify will be discussed at that time. The executive Committee consist of; Medical Director, Administrator, Director of Nursing, Pharmacy consultant, Dietary manager, activities director and medical record director.</td>

Interventions included: approach in calm, patient manner; break tasks into segments, give steps one at a time to avoid overwhelming the resident.

Review of the facility's records revealed Resident #190 was scheduled to receive his showers

F 312

Resident #190 received a shower on August 20, 2015. Resident has received a shower or bed bath daily since August 20, 2015. Resident is scheduled to receive a minimum of two showers every week; in the evenings, every Monday and Thursday. If it is not a scheduled shower day, resident will receive a bed bath daily. On August 31, 2015, the administrator met with resident #190's wife and was informed that everything was going okay, and if she had any problems she would notify the administrator.

On 8/20/2015 the DON began reeducating nursing staff-licensed nurses, C.N.As and medication aides on the following: 1) Residents should be receiving showers twice a week and as needed per the shower schedule unless a specific schedule had been developed for them. 2) If a resident refuses a shower the primary nurse must be notified immediately. 3) The type of bath and any refusals must be documented in POC and on shower schedule. 4) Personal grooming is important for a positive self-image and every effort should be made to encourage and assist residents to maintain a pleasing and attractive appearance. The reeducation was completed on 9-7-15. On 9-2-2015

Resident was to receive a minimum of two showers every week; in the evenings, every Monday and Thursday. The RP stated the nursing assistants frequently failed to give the resident his scheduled shower unless she (RP) made the request. The RP revealed that she has discussed her concerns with Resident #190's ADL care during the resident's Care Plan Meeting.

During an interview on 8/19/15 at 10:28am, SN#1 (Staff Nurse) confirmed that Resident #190's scheduled shower days were Mondays and Thursdays during second shift. After reviewing the "NA (nursing assistant) Book" where the NA daily assignments and shower schedule sheets were maintained, SN#1 acknowledged that there were only shower sheets for the following days in August 2015 for Resident #190: 8/3/15, 8/13/15, and 8/17/15 which were incomplete, indicating the resident did not receive a shower. SN#1 revealed that at the beginning of each shift the facility's Charge Nurses would give the nursing assistants their "Daily Assignment" sheets with a copy of the "Shower Schedule" sheet. The nursing assistants were responsible for completing their assigned shower sheets. If a resident refused a shower, the nursing assistant was to immediately notify the Charge Nurse, who would also document the refusal on his/her copy of the "Shower Schedule" sheet.

During an interview on 8/19/15 at 3:00pm, NA#1 (nursing assistant) stated that Resident #190 required total assistance of one person with bathing. She revealed that the resident received a full bed bath which she (NA#1) documented as part of his ADL care.
During an interview on 8/19/15 at 3:26pm, NA#2 revealed that even though she was scheduled to work with Resident #190, she had not worked with the resident since late July 2015 because she and another nursing assistant (NA#3) switched residents (NA#3 preferred working with Resident #190). NA#2 indicated that this change in resident assignments was not usually documented on the Nursing Assistant Assignment Sheet because sometimes she and NA#3 would have different Charge Nurses. NA#2 revealed that when she worked Resident #190, part of her responsibility was giving him a shower twice a week and document each shower (she thought his shower days were Tuesday and Friday). NA#2 indicated that whenever the resident was not cooperative with transferring to the shower chair, she would give him a full bed bath instead of a shower, then report the resident’s behavior to the Charge Nurse, immediately. The ADL Flow record was documented indicating the resident received the full bath; but there was no area on the Flow record to document the resident being uncooperative.

During an interview on 8/19/15 at 3:46pm, NA#3 revealed that she had been working with Resident #190 for approximately two months. NA#3 stated that the resident required total assistance with bathing and received a shower every Thursday and another day. NA#3 indicated that she gave residents their showers as scheduled on the Shower Sheet that she obtained from the Charge Nurse. NA#3 revealed that all nursing assistants were given a copy of the Shower Sheet which showed all room and bed numbers of residents that were due for a shower that shift. NA#3 also revealed that if Resident #190's muscles were...
**F 312** Continued From page 10

stiff, making transferring to shower chair difficult, then she would give the resident a full bed bath per the resident's RP's request (the RP would visit with resident until 8:00pm every night). NA#3 would document the change of bathing type on the ADL Flow record, but did not record the reason for the change. NA#3 indicated that she would then report the change to the nurse.

This **REQUIREMENT** is not met as evidenced by:

Based on record review and staff interviews, the facility failed to collect and send a urinalysis with culture and sensitivity for 1 of 1 (Resident #144) sampled residents as ordered by the physician. Findings included:

- Resident #144 was admitted to the facility on 07/13/15 with cumulative diagnoses of dementia, hypertrophy of the prostate without obstruction, and psychosis.
- Resident #144's Admission Minimum Data Set (MDS) dated 07/19/15 revealed Resident #144 had short and long term memory problems and was moderately impaired in daily decision making.

**F 315**

**SS=D**

483.25(d) NO CATHETER, PREVENT UTI, RESTORE BLADDER

Based on the resident's comprehensive assessment, the facility must ensure that a resident who enters the facility without an indwelling catheter is not catheterized unless the resident's clinical condition demonstrates that catheterization was necessary; and a resident who is incontinent of bladder receives appropriate treatment and services to prevent urinary tract infections and to restore as much normal bladder function as possible.

This **REQUIREMENT** is not met as evidenced by:

Based on record review and staff interviews, the facility failed to collect and send a urinalysis with culture and sensitivity for 1 of 1 (Resident #144) sampled residents as ordered by the physician. Findings included:

- Resident #144 was admitted to the facility on 07/13/15 with cumulative diagnoses of dementia, hypertrophy of the prostate without obstruction, and psychosis.
- Resident #144's Admission Minimum Data Set (MDS) dated 07/19/15 revealed Resident #144 had short and long term memory problems and was moderately impaired in daily decision making.

On August 20, 2015 resident # 144 was sent to the ED for evaluation. Urinalysis obtained at hospital.

On August 26, 2015 a 100% lab audit was completed by the ADON, and phlebotomist using the daily census with no negative findings.

On, September 3, 2015 the DON, ADON and staff facilitator began reeducating licensed nurses on the following: 1) When a new laboratory order has been obtained,
### F 315

**Continued From page 11**

Making. Resident #144 was frequently incontinent of urine.

Review of the Nursing Progress Notes dated 08/09/15 revealed Resident #144 was noted to be tired and lethargic and sleeping through meals. The Nurse Practitioner (NP) was notified and laboratory (lab) work was ordered.

Review of the Physician Telephone Orders dated 08/09/15 showed an order from the NP for a urinalysis with culture and sensitivity, (a test used to determine a urinary tract infection), a complete blood count, and a comprehensive metabolic panel.

Review of the lab results dated 08/10/15 showed the complete blood count and comprehensive metabolic panel were completed as ordered. There were no results for the urinalysis or the culture and sensitivity that were ordered in the medical record.

In an interview on 08/20/15 at 4:30 PM the administrator stated the facility had been unable to locate the results of the urinalysis and culture and sensitivity. She indicated she had placed a call to the nurse who had written the order for the lab tests but the nurse was unavailable.

In an interview on 08/20/15 at 5:10 PM Medical Records Clerk #1 stated she had contacted the lab and they had no record of performing a urinalysis with culture and sensitivity for Resident #144 as requested by the order of 08/09/15.

In an interview on 08/20/15 at 5:15 PM the Director of Nursing stated it was her expectation the nurse would fill out the lab request slip and send the requested samples to the lab in a timely manner.

the laboratory slip must be completed by the licensed nurse. 2) Urinalysis/culture and sensitivity orders should be put on a separate laboratory sheet from A blood draw sheet to eliminate missed urinalysis / culture and sensitivity. 3) Nurses are responsible for obtaining all urinalysis / culture and sensitivity and any stat laboratory test ordered by doctor. The re education was completed 9/4/2015 MD orders will be reviewed during morning meeting using pink MD order slips to validate all labs have been obtained per MD orders. A Lab Log Tool was initiated on September 4, 2015 to monitor that labs are being obtained per MD orders. The Lab Log Tool will be completed by the DON, ADON, and/or staff facilitator 5 x week x 4 weeks, then 3 x week x 8 weeks, then 1 x week x 12 weeks. On, September 3, 2015 the administrator in-serviced the DON, ADON, staff facilitator, and phlebotomist on completing the Lab Log Tool. The QI committee consist of administrator, DON, ADON, and staff facilitator and will meet weekly x 8 weeks, then every other week x 8 weeks, then monthly x 2 months. Any inconsistencies will be immediately reported to the administrator for possible modification of quality improvement monitoring process. The Executive Committee will meet quarterly x 2 quarters to discuss quality improvement process and evaluate effectiveness of residents receiving showers twice a week. Recommendations to continue, alter or modify will be discussed at this time.

GREENSBORO, NC  27406
F 315 Continued From page 13

F 332 483.25(m)(1) FREE OF MEDICATION ERROR RATES OF 5% OR MORE

The facility must ensure that it is free of medication error rates of five percent or greater.

This REQUIREMENT is not met as evidenced by:
Based on observation, record review and staff interviews the facility failed to ensure that it was free of medication error rates of 5% or greater. Findings included:
The facility had a medication error rate of 10% following the Medication Administration Observation and Reconciliation of Physician Orders.
1. Resident #108 was re-admitted to the facility on 07/24/12 with cumulative diagnoses of hemiplegia, anxiety disorder and hypertension. Resident #108’s Quarterly Minimum Data Set (MDS) showed he was cognitively aware.
A medication administration observation for Resident #108 by Medication Aide #2 was conducted on 08/19/15 at 9:20 AM. A medication typically used to decrease the production of stomach acid was administered during the observation.
Review of the August 2015 Physician Orders revealed Resident #108 had orders for a medication typically used to decrease the production of acid in the stomach to be given on an empty stomach.
In an interview on 08/19/15 at 2:00 PM Medication Aide #2 stated Resident #108 had already eaten breakfast at the time the medication was administered.

F 332 On August 19, 2015 resident # 108 was immediately assessed by the ADON with no negative findings. Resident # 108 did not voice any complaints of discomfort. QI report was completed for resident #108. MD notified on August 19, 2015 of medication error.
On, August 19, 2015 an immediate in-service was completed by the DON with the medication aide involved regarding medication administration. The DON, and ADON began reeducating all licensed nurses and medication aides on the following: 1) Review resident¿s MAR carefully before administering medication. 2) All medications are to be administered according to physician¿s orders. 3) Any noted medication error warrants notification of physician to determine if further orders are necessary. 4) Observe the ¿Five Rights¿ of medication administration: right resident, drug, dose, route and time. The reeducation will be completed by 9-4-15.
On August 25, 2015 the DON, ADON, and staff facilitator initiated medication pass
medication was administered and the medication should have been given before breakfast on an empty stomach.

In an interview on 08/20/15 at 12:55 PM the Administrator stated it was her expectation that the facility medication error rate be below 5% and medications be given as ordered.

2. Resident #164 was re-admitted to the facility on 03/26/15 with cumulative diagnoses of diabetes, depression and a history of cataract extraction. Resident #164's Quarterly Minimum Data Set (MDS) showed he was cognitively aware.

A medication administration observation for Resident #164 by Medication Aide #1 was conducted on 08/19/15 at 9:41 AM. No eye drops were administered to Resident #164.

Review of the August 2015 Physician Orders revealed Resident #164 had orders for two different eye drops (used to treat dry eyes and corneal inflammation) to be administered four times each day.

In an interview on 08/19/15 at 1:55 PM Medication Aide #1 stated Resident #164 had been out of the facility on a leave of absence. She indicated Resident #164 had returned to the facility on 08/17/15 but had not brought the eye drops back to the facility. Medication Aide #1 stated she had been initialing and circling the correct spaces on the Medication Administration Record to signify the drops had not been administered. She indicated she had not informed the nurse, the pharmacy, or the physician that Resident #164 had not been receiving the eye drops.

In an interview on 08/20/15 at 9:54 AM Nurse #2 stated Resident #164 had been out of the facility on a leave of absence. She stated a family member brought Resident #164 back to the audits for all licensed nurses and medication aides. Staff must have less the 5% medication error rate. If medication rate is greater than 5% the staff will not be allowed to administer medication until medication error rate is less than 5%. The medication pass audits were conducted using the QI monitoring tool Medication Pass Audit Form with close emphasis on Right Resident, Right Medication and dose, Right time and frequency and Right route with nurses and medication aides.

All nurses /medication aides will be audited by the DON, ADON, and/or staff facilitator quarterly X4.

All new hires will have a <5% medication error rate on a medication pass audit before being assigned to work independently on a medication cart.

The QI committee consist of administrator, DON, ADON, and staff facilitator will meet weekly x 8 weeks, then every other week x 8 weeks, then monthly x 2 months to review all medication pass audits completed. Any inconsistencies will be immediately reported to the administrator for possible modification of quality improvement monitoring process.

The Executive Committee will meet quarterly x 2 quarters to discuss quality improvement process and evaluate effectiveness of residents receiving showers twice a week.

Recommendations to continue, alter or modify will be discussed at this time. The Executive Committee consist of: medical director, administrator, DON, pharmacy consultant, dietary manager, activities
F 332 Continued From page 15

facility and that she checked the resident back in. Nurse #2 stated she did not notify the physician or the pharmacy as she was not aware the eye drops were not in the medication cart. She indicated the Medication Aides had not informed her the eye drops were not available. Nurse #2 indicated the eye drops were for cataracts and if not administered the condition could worsen. In an interview on 08/20/15 at 12:55 PM the administrator stated it was her expectation that the facility medication error rate be below 5% and medications be given as ordered.

F 371 483.35(i) FOOD PROCURE, STORE/prepare/SERVE - SANITARY

The facility must -
(1) Procure food from sources approved or considered satisfactory by Federal, State or local authorities; and
(2) Store, prepare, distribute and serve food under sanitary conditions

This REQUIREMENT is not met as evidenced by:
Based on observations and staff interview the facility failed to ensure 148-bowls and 11-cooking pans were cleaned and stored under sanitary conditions.

Findings included:
During a meal tray line service in the kitchen on 8/19/15 at 12:15pm, 148-small plastic bowls were

Maple Grove Health and Rehabilitation Center acknowledges receipt of the Statement of Deficiencies and proposes this Plan of Correction to the extent that the summary of findings is factually correct and in order to maintain compliance with the applicable rules and provisions of quality of care of residents.

Maple Grove Health and Rehabilitation Center response to this Statement of
Continued From page 16

observed stacked wet onto the preparation table located across from the steam table. The Cook revealed the bowls were to be used for back up only and she probably would not need them. The Dietary Manager informed the Cook that the plastic bowls should not have been stacked wet.

During a kitchen observation on 8/19/15 at 12:20pm of the identified storage rack for the cleaned and dried pots and pans, the following were observed: 2 out of 5 stacked muffin pans contained brown debris; 2 of 2 stacked, large roasting pans were greasy with yellow debris; 6 out of 18 large sheet pans were wet and/or contained debris; and, 1 out of 5 small sheet pans contained white and brown dried debris.

During an interview on 8/19/15 at 12:37pm, the Dietary Manager revealed that he expected all plates, bowls, pots, pans, and other dishware to be washed thoroughly and dried completely before stacking.

Deficiencies does not denote agreement with the Statement of Deficiencies nor does it constitute an admission that any deficiency is accurate. Further, Maple Grove Nursing and Rehabilitation Center reserves the right to refute any of the deficiencies on this Statement of Deficiencies through Informal Dispute Resolution, formal appeal procedure and/or any administrative or legal proceedings.

F-371
11 cooking pans and 148 bowls were immediately assessed, removed and washed. Immediate re-education for the cook involved in stacking the bowls.

Corporate Dietary Consultant and Dietary Manager did a 100% audit of all pans in the kitchen for visible debris. 6 pans were removed due to worn appearance and new pans ordered at that time. All bowls that were stacked was washed and air dried in an appropriate rack.

An in service for 100% of the dietary staff was conducted on the procedure. Staff to scrape off excess food particles on pots and pans: assure that pans are washed in water at a temperature of 110 degrees with detergent: water will be changed frequently: rinse water clear and hot at 120-140 degrees: sanitize sink with solution pan to submerge for at least 60 s seconds: check for cleanliness re sanitize in dishwasher then allow to air dry. Dishes will be pre washed, rinsed and placed in a rack. The dishes will then be run through the dish machine. All bowls will be clean and left to air dry on the rack.

In an interview on 08/20/15 at 9:54 AM Nurse #2 indicated she oversaw the Medication Aides. She indicated if a medication was not available, the Medication Aides were supposed to notify her so the medication could be ordered from the pharmacy. The Medication Aides had not informed her the eye drops for Resident #164 were not available and were not being given. She stated since she did not know the medications were not being given she did not inform the physician or order them from the pharmacy. Nurse #2 indicated the eye drops were for cataracts and if not administered the condition could worsen.

### Provider's Plan of Correction

Reeducation will be completed by 9-4-15.

On, September 3, 2015 the ADON and staff facilitator began re-education with licensed nurses and medication aides on the following: 1) When a medication is not available the medication aide must notify the licensed nurse immediately. 2) Licensed nurses must notify the pharmacy regarding medication and back-up pharmacy can be utilized. 3) If the medication cannot be obtained for the resident during approved time frame, the MD must be notified for further orders.

On, August 21, 2015 a 100% medication availability audit was completed for all residents by DON, ADON, staff facilitator or and/or licensed nurses. Medication addressed as not being available was ordered from pharmacy and received on August 21, 2015.

On, September 8, 2015 a "Medication Availability Audit Tool" was initiated. The DON, ADON, staff facilitator will monitor medication availability utilizing the "Medication Availability Audit Tool" x 2 x week x 8 weeks, then 1 x week x 8 weeks, then every other week x 8 weeks. On September 3, 2015 the administrator in-serviced DON, ADON, and staff facilitator on completing the "Medication Availability Audit Tool". The QI committee consist of administrator, DON, ADON, and staff facilitator will meet weekly x 8 weeks, then every other week x 8 weeks, then monthly x 2 months and review the "Medication Availability Audit Tool". Any inconsistencies will be immediately reported to the administrator.
