COMPREHENSIVE ASSESS
AFTER SIGNIFICANT CHANGE

A facility must conduct a comprehensive assessment of a resident within 14 days after the facility determines, or should have determined, that there has been a significant change in the resident's physical or mental condition. (For purpose of this section, a significant change means a major decline or improvement in the resident's status that will not normally resolve itself without further intervention by staff or by implementing standard disease-related clinical interventions, that has an impact on more than one area of the resident's health status, and requires interdisciplinary review or revision of the care plan, or both.)

This REQUIREMENT is not met as evidenced by:

Based on record review, and staff interview, the facility failed to complete a significant change in condition assessment for 1 of 14 sampled residents (Resident #31).

The finding included:

Resident #31’s diagnoses included muscle weakness, spastic hemiplegia, and chronic pain.

The annual Minimum Data Set (MDS) dated 5/28/16, specified Resident #31 required limited assistance for transfers, only supervision for bed mobility and toileting and was always continent of bowel and bladder.

The quarterly MDS dated 8/26/16, specified Resident #31 required extensive assistance for transfers, bed mobility and toileting and was

Significant change MDS correction for resident #31 submitted and accepted on 11/22/2016.

100% audit on long term residents completed to assess others potentially affected by the need for a MDS correction for significant change. The audit will review the last two MDS completed. It will review the improvement or decline in ADLs, weight, wounds, and continence. A changed in two or more areas will trigger a significant change MDS to be completed. Audit completed on 11/23/2016. Two additional significant change MDS identified. Corrections to be completed and submitted by 12/6/2016.

Resident changes in condition will be

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

<td>frequently incontinent of bowel and bladder. The MDS also indicated the resident was cognitively intact. MDS Coordinator #1 and #2 were interviewed on 11/10/16 at 10:58AM, about this resident's significant change in activities of daily living. Both MDS Coordinators agreed the 8/26/16 assessment should have triggered a Significant Change in Condition assessment, but it had been missed. On 11/10/16 at 11:24 AM, the Director of Nursing said a Significant Change in Condition assessment should be done when there are two or more areas of decline or improvement.</td>

<td>reviewed in daily clinical meetings by the clinical team. The clinical team includes the Director of Nursing, Assistant Director of Nursing, MDS nurses, unit managers, and the wound nurse. All identified assessments and/or documentation will be assigned to be completed during the clinical meeting, and then reviewed at the &quot;stand down&quot; meeting at the end of the day. Weekly &quot;at risk&quot; meetings will include review of weights and wounds by the clinical team. Each resident will be reviewed no less than monthly. These meetings will open communication between the clinical team to ensure significant changes are assessed, and MDS assessments reflect these changes. MDS nurses will audit each other's assessments, including review of ADLs, continence, weights, and wounds to monitor that significant changes were completed when indicated. Three audits will be completed weekly for three weeks, and then one weekly for three weeks, and then randomly for three weeks. They will be turned into and reviewed by the Director of Nursing and/or Administrator at the end of each week. These audits will also be reviewed in the quality assurance meetings for three months, with the next one being scheduled on December 19, 2016.</td>

- Considered satisfactory by Federal, State or local authorities;
- Store, prepare, distribute and serve food under sanitary conditions

This REQUIREMENT is not met as evidenced by:
Based on observations and staff interviews the facility failed to properly secure, label and date opened reusable dry food items, and reusable food items stored in the freezer.

The findings included:

During the initial tour of the dietary department on 11/7/16 beginning at 9:23 AM with the Dietary Manager (DM) the following items were found to be opened and not secured, labeled or dated in the dry storage area:

- Instant grits
- Rotini pasta
- Graham cracker crumbs

In the freezer there was an opened bag of frozen burritos with 2 items left in the bag. The bag of burritos were not secured, labeled or dated.

An interview with the DM immediately following the tour revealed the identified food items were available for use in the dining room. The DM stated his expectation would be for food items to be secured after they were opened and properly labeled and dated per facility protocol. The DM went on to say the dietary staff had been trained...
