On 2/1/2018 at 10:08 AM, an observation was made of Resident # 92 by Nurse #5 while this surveyor was in the resident's room. Nurse #5	(X5) MPLETION DATE	
confirmed she worked with Resident #92 during the 7:00 AM to 3:00 PM on 1/30/2018 through 2/1/2018. Nurse #5 raised the resident's head of the bed to approximately 45 degrees. The nurse indicated awareness of the need for the head of the bed of tube fed residents to be elevated at 45 degrees to avoid aspiration. Nurse #5 reported she was unaware who left the resident's head of the bed lowered with the tube feedings infusing. An interview was conducted with Nursing Assistant (NA) #5 on 2/1/2018 at 10:19 AM. NA #5 confirmed she was the NA responsible for Resident #92 on the 7:00 AM to 3:00 PM shift. NA #5 reported she was aware of the need for tube fed resident's to be positioned with the head of the bed raised. She stated she was unsure how much the bed needed to be raised. NA #5 indicated she did not remember if the head of the bed was raised when she last checked on Resident #92. An interview was conducted with the Director of Nursing (DON) on 2/01/18 at 10:26 AM. The DON stated the expectation was for all tube feeding residents who were continually fed to be positioned in bed with the head of the bed as a solution of the bed interview as conflucted all direct care staff were aware of the expectation for required positioning of tube fed residents.
