**Summary Statement of Deficiencies**

E 000 Initial Comments

An unannounced Recertification survey was conducted on 7/8/2019 through 7/10/2019. The facility was found in compliance with the requirement CFR 483.73, Emergency Preparedness. Event ID #NGJ611.

F 641 Accuracy of Assessments

§483.20(g) Accuracy of Assessments. The assessment must accurately reflect the resident’s status.

This REQUIREMENT is not met as evidenced by:

Based on record review and staff interviews the facility failed to assess a resident for cognitive pattern on the admission Minimum Data Set for 1 of 12 sampled residents reviewed (Resident #11).

The findings included:

Resident #11 was admitted to the facility on 4/10/19 with diagnoses of left ankle fracture, coronary artery disease, congestive heart failure, chronic obstructive pulmonary disease, hypertension and diabetes mellitus.

A review of the admission Minimum Data Set (MDS) assessment dated 4/17/19 indicated Resident #11 as "not assessed" on section C0500 of the Brief Interview for Mental Status (BIMS). Section C0700 indicated the resident was "not assessed" for Short- Term Memory OK and as "not assessed" for section C0800 Long- Term Memory OK.

On 7/10/19 at 8:39 AM the Social Worker revealed she was responsible for completing.

Northampton Nursing and Rehabilitation Center acknowledges receipt of the Statement of Deficiencies and proposes this Plan of Correction to the extent that the summary of findings is factually correct and in order to maintain compliance with applicable rules and provisions of quality of care of residents. The Plan of Correction is submitted as a written allegation of compliance.

Northampton Nursing and Rehabilitation Center response to this Statement of Deficiencies does not denote agreement with the Statement of Deficiencies nor does it constitute an admission that any deficiency is accurate. Further, Northampton Nursing and Rehabilitation Center reserves the right to refute the deficiencies on this Statement of Deficiencies through Informal Dispute Resolution, formal appeal procedure and/or any other administrative or legal proceeding.

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 641 Continued From page 1 sections C, D and Q on the MDS. She stated she was off the week Resident #11 was admitted to the facility.

In an interview on 7/10/19 at 8:45 AM, the MDS Nurse stated Resident #11 was alert and oriented and had a BIMS of 13. She stated she had completed the MDS and the BIMS interview did not get done. The MDS Nurse stated that in the future when the social worker was off, either she or the Activity Director would need to complete the BIMS interview.

In an interview on 7/10/19 at 8:47 AM the Administrator stated if the Social Worker was out she would expect the MDS Nurse would complete the required BIMS interview.

F 641
Resident # 11 no longer resides at the facility.

A 100% audit of all residents' most current Minimum Data Set (MDS) assessments for section C0700 was reviewed by the Director of Nursing (DON) to ensure the residents' cognitive pattern were assessed on the MDS. This audit was completed on 7/19/19 and documented on a resident census sheet. There were no identified areas of concern.

An in-service will be completed on 7/25/19 for the MDS nurse, Social Worker (SW) and DON by the MDS Consultant regarding the proper coding of MDS assessments as indicated in the Resident Assessment Instrument (RAI) manual with emphasis that (1) all MDS assessments are completed accurately and coded correctly to include cognitive pattern (2) when a member of the interdisciplinary team (social worker, dietary, or activities) is out, it is the responsibility of the MDS nurse to complete that section of the MDS. All newly hired MDS nurses and social workers will be provided the in-service during orientation by the DON.

10% of all current residents completed MDS assessments will be reviewed by the DON to ensure completion of and for accurate coding of the MDS assessments, including cognitive pattern.

### Summary Statement of Deficiencies

**F 657 Continued From page 3**

**F 657**

(D) A member of food and nutrition services staff.

(E) To the extent practicable, the participation of the resident and the resident's representative(s).

An explanation must be included in a resident's medical record if the participation of the resident and their resident representative is determined not practicable for the development of the resident's care plan.

(F) Other appropriate staff or professionals in disciplines as determined by the resident's needs or as requested by the resident.

(iii) Reviewed and revised by the interdisciplinary team after each assessment, including both the comprehensive and quarterly review assessments.

This REQUIREMENT is not met as evidenced by:

Based on record review and staff interviews, the facility failed to update the care plan with splinting services for contracture management for 1 of 3 residents (Resident #20) reviewed for positioning/range of motion.

The findings included:

- Resident #20 was admitted to the facility on 6/1/2018 with diagnoses to include dementia.

- An Occupational Therapy (OT) progress and discharge summary note dated 9/11/2018, included an analysis of Functional Outcome that read in part: Gains in passive range of motion (PROM) and splinting tolerance have decreased contracture risk. An H flex splint was ordered, and resident now tolerates 4 to 6 hours. Nursing education and training provided for splinting management. Pictures of donned splint on display for visual aid for staff.

- An in-service will be completed by 8/7/19

Resident #20 Care Plan was reviewed and revised on 7/22/19 by the Minimum Data Set (MDS) nurse with oversite by the Director of Nursing (DON) to reflect splinting services for contracture management.

A 100% audit of all care plans was initiated on 7/22/19 by the Minimum Data Set (MDS) nurse with oversite by the Director of Nursing (DON), including care plans for residents #20 and residents with splinting services to ensure that all areas of the care plan reflect the resident's individual needs. Any care plan with areas of concern will be updated by the MDS nurse by 8/5/19 with oversight from the Director of Nursing, to reflect the splinting needs of residents.

The Occupational Therapist stated she trained staff on the use of the splint and put up the pictures of the splint as a visual reminder for staff. The Rehab Manager joined the interview and stated she was unable to find documentation on the in-service and did not know who would have been in-serviced. The Occupational Therapist then stated she was not sure if an in-service had been done, but the pictures in the room would probably have been the in-service. The Occupational Therapist stated she had not seen Resident #20 for a while, and she did not know if staff were putting the splint on her wrist as she had advised, but she would've expected staff to put the splint on for 4 to 6 hours per day.

On 7/9/2019 at 2:39 PM, an interview was conducted with the MDS nurse who stated she oversaw the restorative program. She stated the therapy staff sent communication via the electronic medical record (EMR) for restorative plans when a resident was discharged from therapy and was to be followed by restorative. She stated she had never received communication from OT via the EMR regarding a splint for Resident #20's hand. The MDS nurse stated the only time she knew Resident #20 had a hand splint was while she was actively receiving OT care, and stated she did not know of any FMP for the hand splint. The MDS nurse stated she did not know of a Physician order for the splint and was not aware of the pictures of the splint above the resident's bed. The MDS nurse stated she initiated and updated care plans for the residents, and further stated a wrist splint was not addressed in a care plan for Resident #20 because staff was not putting a wrist splint on frequency of monitoring.

Continued From page 5

#20 in 9/2018 and wrote a functional maintenance program (FMP) for use of the splint. The Occupational Therapist stated she trained staff on the use of the splint and put up the pictures of the splint as a visual reminder for staff. The Rehab Manager joined the interview and stated she was unable to find documentation on the in-service and did not know who would have been in-serviced. The Occupational Therapist then stated she was not sure if an in-service had been done, but the pictures in the room would probably have been the in-service. her.

On 7/9/2019 at 3:32 PM an interview was conducted with the Director of Nursing (DON) who stated she expected better communication between therapy staff and the MDS nurse, so the wrist splint care would have been carried out and the care plan updated for providing the care.

F 658 Services Provided Meet Professional Standards CFR(s): 483.21(b)(3)(i)

§483.21(b)(3) Comprehensive Care Plans
The services provided or arranged by the facility, as outlined by the comprehensive care plan, must-
(i) Meet professional standards of quality. This REQUIREMENT is not met as evidenced by:

Based on observations, record review and staff interviews the facility failed to follow a Physician order to provide splinting service for contracture management for 1 of 3 residents (Resident #20) reviewed for positioning/range of motion.

The findings included:

Resident #20 was admitted to the facility on 6/1/2018 with diagnosis to include dementia.

An Occupational Therapy (OT) progress and discharge summary note dated 9/11/2018, included an analysis of Functional Outcome that read in part: Gains in passive range of motion (PROM) and splinting tolerance have decreased contracture risk. An H flex splint was ordered, and resident now tolerates 4 to 6 hours. Nursing education and training provided for splinting

F 658

Resident #20 was referred to therapy on 7/9/19 by the Minimum Data Set (MDS) nurse for contracture management. A clarification order was written on 7/22/19 by the treatment nurse to discontinue the splint until therapy evaluation. The pictures of the splinted hand/wrist in resident #20 room was removed on 7/9/19 by the Director of Nursing (DON).

A 100% of all residents to include resident #20 physician orders from 9/11/18 to 7/22/19 will be reviewed by 8/7/19 by the Director of Nursing and Medical Records. This audit is to identify residents with orders for splinting. All residents identified with orders for splinting will be observed
F 658 Continued From page 7
management. Pictures of donned splint on display for visual aid for staff.

A signed Physician order dated 9/11/2018 read: "OT services completed. FMP (Functional Maintenance Program) established regarding right wrist splint". The order did not include a signature of the nurse receiving the order.

Review of the annual Minimum Data Set Assessment (MDS) dated 5/20/2019 revealed Resident #20's cognition to be severely impaired. She required total assistance from staff for activities of daily living (ADL), and had functional limitation in range of motion for bilateral upper extremities and bilateral lower extremities.

Her care plan last revised on 5/24/2019 included a focus of assistance for mobility related to contractures, with a goal of no worsening of lower extremity contractures. The interventions were as follows: 1) Dependent in Gerichair (reclining chair). 2) functional maintenance plan: wedge cushion to be placed under knees and pillows on side or between as needed for pressure relief. The care plan did not address a focus or have interventions for the upper extremity contracture. The care guide portion of the care plan did not address a splint to the right hand.

Review of the July 2019 Medication Administration Record/Treatment Administration Record MAR/TAR for Resident #20 revealed no order for a splint to the right hand.

On 7/8/2019 at 10:09 AM an observation was conducted of Resident #20 as she lay in her bed in her room. Her right hand was visible on top of the sheet, with no splinting device to her hand or by the Quality Improvement nurse by 8/7/19 to ensure the splints were provided to the resident per the physician's order. Therapy referrals and order clarification were completed by the DON for any identified areas of concern during the audit.

An in-service will be completed by 8/7/19 by the Director of Nursing (DON) with 100% of all nursing assistants (NA) to include NA #1, restorative aides, medication aides and nurses to include Nurse #1 regarding ensuring residents are provided splints per physician's order and resident care guide. All newly hired nursing assistants, restorative aides, medication aides, and nurses will receive the in-service during orientation by the Staff Facilitator.

An audit will be completed of 10% of physician's orders for residents that require splint services and observations of the resident to include resident #20 to ensure the splint is being provided per order. This audit will be completed weekly X 8 weeks then monthly X 1 month by the Quality Improvement nurse utilizing the QI Splinting Audit Tool. The nursing assistant and/or nurse will be retrained and the splint will be immediately provided during the audit by the Quality Improvement nurse for any identified areas of concern. The Director of Nursing will review and initial the QI Splinting Audit Tool weekly X 8 weeks then monthly X 1 month for compliance and to ensure all areas of concern have been addressed.
### Summary Statement of Deficiencies

**Wrist.** Two large pictures of a splint to an area that covered the hand and wrist were taped above her bed.

On 7/8/2019 at 12:09 PM an observation was conducted of Resident #20 as she lay in her bed in her room. Her right hand was visible on top of the sheet, with no splinting device to her hand or wrist. The two large pictures of a splinted hand/wrist remained taped above her bed.

On 7/8/2019 at 3:35 PM an observation was conducted of Resident #20 as she lay in her bed in her room. Her right hand was visible on top of the sheet, with no splinting device to her hand or wrist. The two large pictures of a splinted wrist/hand remained taped above her bed.

On 7/9/2019 at 9:22 AM an observation was conducted of Resident #20 as she lay in her bed in her room. Her right hand was visible on top of the sheet, with no splinting device to her hand or wrist. Two large pictures of a splinted wrist/hand were taped above her bed.

On 7/9/2019 at 9:48 AM an observation was conducted of daily morning care provided to Resident #20 with nursing assistant (NA) #1. The NA stated Resident #20 was alert at times but confused and very contracted with her extremities. The NA stated Resident #20 had boots for her feet and was positioned with pillows under and between her knees. The NA stated she did not know anything about a splint for the resident's wrist.

On 7/9/2019 at 11:41 AM an observation was conducted of Resident #20 as she lay in her bed.

The DON will present the findings of the QI Splinting Audit Tool to the Executive Quality Assurance (QA) committee monthly for 3 months. The Executive QA Committee will meet monthly for 3 months and review the QI Splinting Audit Tool to determine trends and/or issues that may need further interventions put into place and to determine the need for further frequency of monitoring.

§483.60(i)(1) - Procure food from sources approved or considered satisfactory by federal, state or local authorities. 
(i) This may include food items obtained directly from local producers, subject to applicable State and local laws or regulations. 
(ii) This provision does not prohibit or prevent facilities from using produce grown in facility gardens, subject to compliance with applicable safe growing and food-handling practices. 
(iii) This provision does not preclude residents from consuming foods not procured by the facility.

<td>§483.60(i)(2) - Store, prepare, distribute and serve food in accordance with professional standards for food service safety. This REQUIREMENT is not met as evidenced by: Based on observations and staff interviews the facility failed to maintain kitchen equipment clean and in a sanitary condition to prevent cross contamination by failing to clean the steam table under shelf for one of one steam tables observed. The findings included: Review of the Dietary Policy Manual (Version 8-20-13) under Cleaning Assignments indicated staff were to &quot;Clean and straighten steam table pan rack&quot; and &quot;clean and polish steam table&quot; weekly. During an observation on 7/9/19 at 11:59 AM the 6 well steam table was observed. The 6 foot underside of the steam table shelf was observed to be covered with dark dried food particles. A second observation on 7/10/19 at 9:31 AM the 6 foot underside of the steam table shelf was observed to be covered with dark dried food particles. On 7/10/19 at 2:47 PM the 6 foot underside of the steam table shelf was observed to be covered with dark dried food particles and was sticky to touch. In an interview on 7/10/19 at 3:41 PM the Dietary Manager stated that staff did clean the steam table weekly and must have missed the underside of the shelf. She indicated that staff would clean it that evening.</td>
