Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

transport linens so as to prevent the spread of infection.

§483.80(f) Annual review. The facility will conduct an annual review of its IPCP and update their program, as necessary. This REQUIREMENT is not met as evidenced by:

Based on observations, staff interviews and review of facility policies the facility failed to implement their policy requiring staff to wear gown and gloves for 1 of 3 nurse aides (NA #1) who failed to wear a gown and gloves when delivering meal trays to Resident #1 and Resident #2 in Room #34 when there was a sign for enhanced barrier precautions posted on the door. This failure occurred during a COVID-19 pandemic.

Findings included:

A review of the facility's policy titled, "Enhanced Barrier Precautions," effective date 02/06/2020 read in part; Policy: Employees providing high-contact patient care activities will follow Enhanced Barrier Precautions (EBPs). This level of precaution is indicated during the implementation of a containment strategy to prevent the potential transfer of a novel or targeted multi-drug resistant organism. Enhanced Barrier Precautions ...refers to the use of gown and gloves during high-contact patient care activities. Procedure: 5. Post the Enhanced Barrier Precaution sign on the wall outside the patient(s) room. 6. Place PPE (gowns, gloves ...) so that it is readily available immediately outside the patient room.

A review of the education module titled,

The statements made in the following plan of correction are not an admission to and do not constitute an agreement with the alleged deficiencies nor the reported conversations and other information cited in support of the alleged deficiencies. The facility sets forth the following plan of correction to remain in compliance with all federal and state regulations. The facility has taken or will take the actions set forth in the plan of correction. The following plan of correction constitutes the facility’s allegation of compliance. All alleged deficiencies cited have been or will be corrected by the date or dates indicated.

F880

How corrective action will be accomplished for those residents found to have been affected by the deficient practice. A CNA was noticed not donning PPE before entering an Enhanced Droplet-Contact Precaution room. Staff member that was noncompliant was given re-education/corrective action as deemed necessary and the designated staff members were re-educated again on proper donning and doffing of PPE.

How the facility will identify other residents having the potential to be affected by the

<td>Continued From page 3 &quot;Preventing the Spread of Infection: Understanding Isolation Procedures,&quot; revealed Nurse Aide (NA) #1 signed and dated the education was completed on 3/27/20. The education read in part; Germs can cause infection by traveling through the air ...and by direct contact or on the surface of objects such as a door handle, TV remote control, phone, bed railing, or tabletop. To stop the infection from spreading, the healthcare workers may do the following: ...Wear a mask and eye protection, gloves, and gown ... An observation of Room #34 had signage on the door titled, &quot;Enhanced Droplet-Contact Precautions - Perform hand hygiene - Surgical mask when entering room - Eye protection when entering room - Gown when entering room - Gloves when entering room - Private room and keep door closed.&quot; An observation occurred on 9/2/20 at 12:10pm of NA #1 inside Room #34, where Resident #1 and Resident #2 resided. NA #1 was wearing a mask and face shield but not wearing a gown or gloves. Upon exiting Room #34, the NA headed toward the meal cart. An interview, conducted with NA #1 on 9/2/20 at 12:15pm, revealed she had entered Room #34 to deliver the lunch meal trays to Resident #1 and Resident #2. The NA stated she had not put on a gown or gloves because it took too long to get the trays to the residents when she put on a gown and gloves and changed between the resident's rooms. The NA stated when there is a sign on the resident's door for enhanced precautions, she was supposed to wear a face mask, face shield, same deficient practice. All residents have the potential to be affected by the alleged deficient practice. The facility designated (DON, SDC, Unit Manager, Nursing Staff) to audit 3 random employees daily that will include all shifts. The measures put into place or systemic changes made to ensure that the deficient practice will not recur. Designated staff members were educated on ensuring that proper donning and doffing of PPE when entering an isolation room. An audit will be performed on 3 employees daily on the proper donning and doffing of PPE. In addition, the buddy system has been implemented to help the CNA's pass trays during meal times. Signs have been placed throughout the facility as a reminder to don PPE before entering an isolation room. An audit will be completed on three designated staff members daily every shift x 2 weeks/three times a week x 2 weeks/ weekly x 1 month/ and quarterly x 2. How the facility plans to monitor its performance to make sure that solutions are sustained. The results of the audits will be reported daily to the Administrator and to the QAPI committee quarterly x 2 for analysis of patterns, trends, or need for further systemic changes. Any staff found to be non-compliant with the procedure will receive progressive discipline. Date of compliance for all plan of corrections is October 5, 2020</td>

Gown and gloves before she entered the resident's room for any reason, including delivering the meal trays.

An interview, conducted with the Staff Development Coordinator on 9/2/20 at 2:15pm, revealed enhanced precautions were being used for every resident in the facility to prevent the spread of Covid-19. All resident rooms had signage on the doors for enhanced precautions. All staff should be using the enhanced precautions before entering the rooms which included gown and gloves in addition to masks and face shields. A gown and gloves should be worn to deliver the meal trays.

An interview, conducted with the Director of Nursing on 9/2/20 at 2:30pm, revealed enhanced precautions were being used for every resident in the facility to prevent Covid-19 from spreading. All resident rooms had signage on the doors for enhanced precautions. All staff should have been using the enhanced precautions before entering the rooms which included gowns and gloves in addition to masks and face shields. NA #1 should have worn a gown and gloves when she delivered the meal trays to the residents in Room #34.
