SUMMARY STATEMENT OF DEFICIENCIES (EACH DEFICIENCY MUST BE PRECEDED BY FULL REGULATORY OR LSC IDENTIFYING INFORMATION)

ID PREFIX TAG

PROVIDER'S PLAN OF CORRECTION (EACH CORRECTIVE ACTION SHOULD BE CROSS-REFERENCED TO THE APPROPRIATE DEFICIENCY)

(X5) COMPLETION DATE 2/17/21

E 000 Initial Comments
The survey team entered the facility on 01/19/2021 to conduct an unannounced COVID-19 Focused Infection Control Survey and exited on 01/19/2021. Additional information was obtained offsite on 01/20/2021 and 01/21/2021. Therefore, the exit date was 01/21/2021. The facility was found in compliance with 42 CFR §483.73 related to E-0024 (b)(6), Subpart-B-Requirements for Long Term Care Facilities. Event ID# FU2411.

F 000 INITIAL COMMENTS
The survey team entered the facility on 01/19/2021 to conduct an unannounced COVID-19 Focused Infection Control Survey and Complaint Investigation and exited on 01/19/2021. Additional information was obtained offsite on 01/20/2021 and 01/21/2021. Therefore, the exit date was 01/21/2021. The facility was found in compliance with 42 CFR §483.80 infection control regulations and has implemented the CMS and Centers for Disease Control and Prevention (CDC) recommended practices to prepare for COVID-19. Two of the 11 complaint allegations were substantiated resulting in a deficiency. Event ID #FU2411.

F 686 Treatment/Svcs to Prevent/Heal Pressure Ulcer
CFR(s): 483.25(b)(1)(i)(ii)
§483.25(b) Skin Integrity
§483.25(b)(1) Pressure ulcers.
Based on the comprehensive assessment of a resident, the facility must ensure that-
(i) A resident receives care, consistent with professional standards of practice, to prevent pressure ulcers and does not develop pressure ulcers unless the individual's clinical condition

LABORATORY DIRECTOR'S OR PROVIDER/SUPPLIER REPRESENTATIVE'S SIGNATURE

Electronically Signed 02/09/2021

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.
F 686 Continued From page 1

demonstrates that they were unavoidable; and
(ii) A resident with pressure ulcers receives
necessary treatment and services, consistent
with professional standards of practice, to
promote healing, prevent infection and prevent
new ulcers from developing.
This REQUIREMENT is not met as evidenced
by:
Based on observation, staff, hospice nurse and
nurse practitioner interviews, and record review,
the facility failed to obtain treatment orders and
document assessments of a sacral pressure
ulcer for 1 of 3 sampled residents with pressure
ulcers (Resident #1). The findings included:

Resident #1 was readmitted to the facility on
01/07/2021 with diagnoses which included a
long-term mental disorder and hypertension.

Resident #1's hospital discharge summary dated
01/07/2021 documented Resident #1 developed
a sacral pressure ulcer during the hospitalization.
The necrotic sacral pressure ulcer was debrided.
The hospital discharge summary contained no
measurements or orders for treatment of the
sacral pressure ulcer.

A nursing admission data collection note dated
01/07/2021 documented Resident #1 was alert
with memory problems. The assessment
documented the presence of a sacral pressure
ulcer. There was no documentation of
description or measurements of the pressure
ulcer.

Resident #1's care plan revised on 01/07/2021
documented the presence of a pressure ulcer on

- the sacrum. Interventions included administration of treatments as ordered, assess, record monitor wound healing with weekly treatment documentation to include measurement of area of skin breakdown's width, length, depth, and type of tissue.

- Resident #1's readmission orders dated 01/07/2021 contained no orders for treatment of the sacral pressure ulcer. Resident #1 received admission to hospice care on 01/14/2021.

- Observation with the wound nurse on 01/19/2021 at 10:56 AM revealed Resident #1's sacrum covered with a dry clean dressing. The wound nurse removed the sacral dressing. Resident #1's sacral pressure ulcer was approximately 5 centimeters (cm.) by 7 cm. with a darkened center approximately 1 cm. by 2 cm.

- Interview with the wound nurse on 01/19/2021 at 11:20 PM confirmed the absence of treatment orders for Resident #1's sacral pressure ulcer. The wound nurse announced she obtained orders today (01/19/2021) for a wet to dressing sacral dressing daily. The wound nurse explained she did not obtain treatment orders since Resident #1 received hospice care and thought the hospice nurse obtained treatment orders. The wound nurse reported Resident #1's sacral pressure ulcer had not been measured since admission on 01/07/2021.

- Interview with Nurse Aide (NA) #1 on 01/19/2021 at 9:30 AM revealed Resident #1 required total assistance with care. NA #1 reported Resident #1 had a sacral dressing. If the dressing became soiled, NA #1 informed the nurse who changed the dressing. NA #1 reported the dressing was...

changed daily by the nurse.

During an interview with Nurse #1 on 01/19/2021 at 12:20 PM, Nurse #1 revealed she admitted Resident #1 on 01/07/2021. Nurse #1 reported she completed a full body assessment on Resident #1 and orally reported the presence of the sacral wound to the wound nurse. Nurse #1 explained she changed Resident #1's dressing daily and relied on the wound nurse to obtain orders for the dressing change. Nurse #1 reported Resident #1's sacral pressure ulcer appeared to slightly improve with the daily wet to dry dressing changes. Nurse #1 reported she did not measure or document a description of the pressure ulcer.

During an interview with the hospice nurse on 01/19/2021 at 12:35 PM, the hospice nurse reported Resident #1 was admitted to hospice care on 01/14/2021 and received the first skilled nurse visit on 01/15/2021. The hospice nurse reported he assessed the sacral wound as unstageable. The hospice nurse estimated the wound measured 12 cm. by 8 cm. with a dark eschar tissue center. The hospice nurse reported he cleansed and changed the sacral dressing. The hospice nurse explained Resident #1's hospice care consisted of pain management and end of life care. The hospice nurse reported the facility would be responsible for treatment and documentation of the sacral pressure ulcer.

Telephone interview with the Nurse Practitioner (NP) on 01/19/2021 at 12:58 PM revealed the NP was aware of Resident #1's sacral pressure ulcer and relied on the facility staff to obtain treatment orders and document assessments of the pressure ulcer.

week for 4 weeks, then weekly x 2 months, and then 1 x monthly for 3 months.
The Director of Nursing introduced the plan of correction to the Quality Assurance Performance Improvement Committee on 2/17/21. The Executive Director is responsible for implementing this plan. The Quality Assurance Performance Improvement Committee Members consist of but not limited to Executive Director, Director of Nursing, Staff Development Coordinator, Unit Manager, Social Services, Medical Director, Maintenance Director, Housekeeping Services, Dietary Manager, and Minimum Data Set Nurse and a minimum of one direct Care giver. Quality Improvement Quality Monitoring schedule modified based on findings.
