#### E 000 Initial Comments

An unannounced Recertification survey was conducted on 08/09/21 through 08/12/21. The facility was found in compliance with the requirement CFR 483.73, Emergency Preparedness. Event ID #OSLQ11.

#### F 655 Baseline Care Plan

§483.21 Comprehensive Person-Centered Care Planning  
§483.21(a) Baseline Care Plans  
§483.21(a)(1) The facility must develop and implement a baseline care plan for each resident that includes the instructions needed to provide effective and person-centered care of the resident that meet professional standards of quality care. The baseline care plan must-

(i) Be developed within 48 hours of a resident's admission.

(ii) Include the minimum healthcare information necessary to properly care for a resident including, but not limited to-

- (A) Initial goals based on admission orders.
- (B) Physician orders.
- (C) Dietary orders.
- (D) Therapy services.
- (E) Social services.
- (F) PASARR recommendation, if applicable.

§483.21(a)(2) The facility may develop a comprehensive care plan in place of the baseline care plan if the comprehensive care plan-

(i) Is developed within 48 hours of the resident's admission.

(ii) Meets the requirements set forth in paragraph (b) of this section (excepting paragraph (b)(2)(i) of this section).

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

---

**LABORATORY DIRECTOR'S OR PROVIDER/SUPPLIER REPRESENTATIVE'S SIGNATURE**

Eelectronically Signed 08/27/2021
F 655 Continued From page 1

§483.21(a)(3) The facility must provide the resident and their representative with a summary of the baseline care plan that includes but is not limited to:
(i) The initial goals of the resident.
(ii) A summary of the resident's medications and dietary instructions.
(iii) Any services and treatments to be administered by the facility and personnel acting on behalf of the facility.
(iv) Any updated information based on the details of the comprehensive care plan, as necessary.

This REQUIREMENT is not met as evidenced by:

Based on record review and staff interviews, the facility failed to develop a baseline care plan within 48 hours of admission related to physicians' orders and diagnosis for 2 of 8 residents reviewed for baseline care plans. (Resident #300 and 307).

Findings included:
1. Resident #300 was admitted to the facility on 07/15/21 with diagnoses that included obstructive sleep apnea which required continuous positive airway pressure (CPAP), diabetes, and congestive heart failure.

Record review of care plan revealed that the care plan was initiated on 07/19/21.

Most recent Minimum Data Set (MDS) dated 07/22/21 revealed that Resident #300 was cognitively impaired and required extensive assistance from staff for activities of daily living (ADLs).

During an interview with the Director of Nursing...

F 655 Baseline Care Plan
Corrective Actions for Resident #300:
A corrective action was taken in order to ensure that the care plan for resident #300 was complete and accurately reflected the resident’s current level of functioning, special needs and interventions to ensure that staff members would be correctly guided in providing appropriate and safe care for resident. This was completed on ___7__/___19_/2021 by the MDS Coordinator Gloria Howard, RN.

Corrective Actions for Resident #307:
A corrective action was taken in order to ensure that the care plan for resident #307 was complete and accurately reflected the resident’s current level of functioning, special needs and interventions to ensure that staff members would be correctly guided in providing appropriate and safe care for resident. This was completed on ___8__/___9_/2021 by the MDS Coordinator Gloria Howard, RN.
F 655 Continued From page 2
(DON) on 08/11/21 at 10:00 am revealed that the
MDS Nurse completed the baseline care plan for
all new admissions. She stated that the baseline
care plan was usually done within 48 hours. She
reported that the baseline care plan was to be
completed within 48 hours of admission.

During an interview with the MDS Nurse on
08/12/21 at 10:31 am revealed that Resident
#300's care plan initiated on 07/19/21 was the
baseline care plan. She reported that she was
responsible to complete the baseline care plan
and that it should be completed within 48 hours of
admission. She stated she would usually
complete the baseline care plan as soon as the
new admission came to facility but was unable to
determine why the baseline care plan was not
completed timely for Resident #300.

2. Resident #307 was admitted to the facility on
08/06/21 with diagnoses that included end stage
renal disease with dependence on hemodialysis,
diabetes, and obstructive uropathy with indwelling
foley catheter.

Record review of care plan revealed that the care
plan was initiated on 08/09/21.

During an interview with the MDS Nurse on
08/10/21 at 4:27 pm revealed that the care plan
dated 08/09/21 was the baseline care plan for
Resident #307. She revealed that Resident #307
admitted to the facility late Friday evening and the
baseline care plan was completed on Monday
when she returned to the facility. She stated that
the baseline care plan was not completed within
48 hours of admission.

During an interview with the DON on 08/11/21 at
Coordinator Gloria Howard, RN.
Corrective action for residents with the
potential to be affected by the alleged
deficient practice.
All residents have the potential to be
affected by the alleged deficient practice.
A 100% audit of all current residents who
were admitted to the facility during the
past 30 days was completed in order to
ensure that each resident has an
appropriate and up to date care plan in
place. This audit was completed on
08/26/2021 by the Regional Minimum
Data Set Nurse Consultant.
The results of the audit are as follows:
• 3 of 9 residents were identified as not
having a baseline care plan initiated within
the first 48 hours after admission to
facility. These 3 residents were noted to
have a complete care plan in place at the
time of this audit, even though they had
been initiated after the first 48 hours.
• 6 of 9 residents were identified as
having had a baseline care plan initiated
within the first 48 hours after admission to
facility.
Systemic Changes
On 08/27/21 the Regional Minimum Data
Set Nurse Consultant provided in-service
education to the facility Minimum Data Set
Nurse on the requirements for Baseline
Care Plan completion. This education
included the importance of ensuring that
data residents have a Baseline Care Plan
implemented within the first 48 hours after
admission to the facility. The Baseline
Care Plan must include the minimum
healthcare information necessary to
properly care for a resident including, but

| F 655               | Continued From page 3 10:00 am revealed that the MDS Nurse completed the baseline care plan for all new admissions. She stated that the baseline care plan was typically completed within the first two days of admission but reported that a weekend admission posed a problem for timely completion. The DON reported that the MDS Nurse would have completed the baseline care plan on Monday for those residents admitted late Friday or over the weekend. | F 655          | not limited to following:  
• Initial goals based on admission orders  
• Physician orders  
• Dietary orders  
• Therapy services  
• Social services needs  
• PASARR recommendation, if applicable  
The educational material included the fact that the care plan is a tool used to communicate resident’s condition, needs, preferences, strengths, special needs to the interdisciplinary team and primarily frontline staff, and that in order to provide the highest quality of care possible and to ensure residents’ needs are met, the care plans must be person-centered and an accurate and current reflection of resident’s condition and needs. This information has been integrated into the standard orientation training for new Minimum Data Set Nurses.  
Monitoring Procedure to ensure that the plan of correction is effective and that specific deficiency cited remains corrected and/or in compliance with regulatory requirements. The Director of Nursing or designee will conduct audits to ensure that all newly admitted residents have a Baseline Care Plan initiated within 48 hours of admission to facility. The Quality Assurance tool entitled “Baseline Care Plans QA Tool” will be completed weekly for 4 weeks then monthly for 2 months or until sustained compliance has been achieved. Reports will be presented to the weekly Quality Assurance committee by the Director of... |

 locked, permanently affixed compartments for storage of controlled drugs listed in Schedule II of the Comprehensive Drug Abuse Prevention and Control Act of 1976 and other drugs subject to abuse, except when the facility uses single unit package drug distribution systems in which the quantity stored is minimal and a missing dose can be readily detected. This REQUIREMENT is not met as evidenced by:

Based on observation and staff interviews, the facility failed to date an opened medication vial and discard expired medications in 1 of 1 medication rooms and failed to date opened liquid supplements and discard expired medications in 2 of 4 medication carts (100, 400 hall).

The findings included:

1 a. An observation was made on 08/12/21 at 10:20 AM of the facility’s medication room. An opened 5 milliliter multidose vial of influenza vaccine was in the refrigerator with no date indicating when it was opened. The manufacture’s label on the bottle instructed to discard thirty days after opening. The medication room refrigerator was observed to have 8 sealed boxes of influenza vaccine vials with the expiration date 06/30/21. Further observation revealed a bottle of 100-25 milligram tablets of diphenhydramine (an over-the-counter allergy medication) available for use with an expiration date of 03/2021 stamped on the bottle.

During an interview on 08/12/21 at 10:45 AM, the Assistant Director of Nursing (ADON) confirmed the influenza vaccine and diphenhydramine medications were expired and should have been discarded. She further indicated nursing staff should check for expired medications and the statements made on this plan of correction are not an admission to and do not constitute an agreement with the alleged deficiencies.

To remain in compliance with all federal and state regulations the facility has taken or will take the actions set forth in this plan of correction. The plan of correction constitutes the facility’s allegation of compliance such that all alleged deficiencies cited have been or will be corrected by the dates indicated.

F761

1. Corrective action for resident(s) affected by the alleged deficient practice:

The identified expired medications and flu vaccine were discarded on __8/12/21______ by the __DON______.

The undated protein supplement was discarded on __8/12/21______ by the __DON______.

2. Corrective action for residents with the potential to be affected by the alleged deficient practice:

All residents in the facility who take medications or supplements have the potential to be affected.
