This REQUIREMENT is not met as evidenced by: Based on record reviews, Nurse Practitioner, Home Health, family and staff interviews the facility failed to send an accurate discharge summary for the resident to the Home Health agency that included a stage 4 sacral pressure ulcer. This resulted in a delay of the recommended wound care after discharge when the Home Health staff were not aware of the severity and size of the wound, for 1 of 1 resident reviewed for discharge care. Findings included: Resident #1 was admitted to the facility on 4/29/22. The Quarterly Minimum Data Set (MDS) assessment was completed on 07/30/22. It noted he did not have any unhealed pressure ulcers or injuries. Resident #1 was assessed to have moderate cognitive impairment. The End of Stay MDS assessment completed on 08/11/22 indicated Resident #1 had no unhealed pressure ulcers or injuries.		F	661	How the corrective action(s) will be accomplished for those residents foun be affected by the deficient practice: Resident #1 was admitted to the facilit 04/29/2022 and was discharged 08/12/2022.
