c/o Division of Health Service Regulation
Medical Facilities Planning Branch
2714 Mail Service Center
Raleigh, NC 27699-2714

Dear Dr. Ullrich and Members of the State Health Coordinating Council:

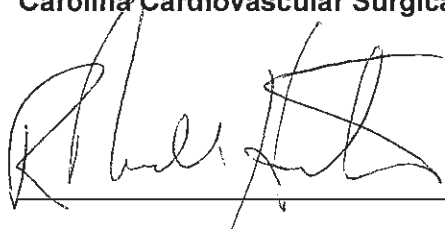

As cardiac surgeons who treat patients in Wake County, we would like to express our opposition to the petition filed by Rex Healthcare for an adjusted need determination for one additional unit of cardiac catheterization equipment for Wake County in the 2015 State Medical Facilities Plan.

When possible, it makes more sense for physicians to utilize the services already available in the community to help contain costs and avoid unnecessary duplication. Wake County already has an abundance of facilities and resources for cardiac catheterization at all its acute care hospitals, and an additional cath lab will only serve to duplicate existing resources.

Thank you for the opportunity to voice our concerns.

Respectfully,

Carolina Cardiovascular Surgical Associates

Dear Dr. Ullrich and Members of the State Health Coordinating Council:

This letter is to express my opposition to the petition submitted by Rex Hospital for an adjusted need determination for one additional unit of cardiac catheterization equipment for Wake County in the 2015 State Medical Facilities Plan. As a physician who practices in Wake County, I am aware that the county has an overall surplus of cardiac cath labs. Continuing to add cardiac catheterization capacity when a surplus exists is unnecessary, and will be a deterrent to cost containment efforts.

Thank you for your consideration.

Sincerely,

Medical Facilities Planning Branch
2714 Mail Service Center
Raleigh, NC 27699-2714

Dear Dr. Ullrich and Members of the State Health Coordinating Council:

This letter is to express my opposition to the petition submitted by Rex Hospital for an adjusted need determination for one additional unit of cardiac catheterization equipment for Wake County in the 2015 State Medical Facilities Plan. As a physician who practices in Wake County, I am aware that the county has an overall surplus of cardiac cath labs. Continuing to add cardiac catheterization capacity when a surplus exists is unnecessary, and will be a deterrent to cost containment efforts.

Thank you for your consideration.

Sincerely,
