W 288	Continued From page 3 This STANDARD is not met as evidenced by: Based on observations, record review and interviews, the facility failed to ensure a technique to address the inappropriate behaviors of 1 of 6 audit clients (#4) was included in an active treatment plan. The finding is: A technique to manage client #4's PICA behavior. During afternoon observations in the home on 10/15/18, staff used a key to unlock the door where the washing machine and dryer are located. Further observations revealed the staff removing a container of personal hygiene items. During an immediate interview, staff revealed the items belonged to client #4. Further interview revealed client #4 has PICA, so her personal hygiene items are kept in the locked laundry room. The staff reported she has been working in the home for almost two years and client #4's personal hygiene items "Have always been locked up." Review on 10/16/18 of client #4's record did not indicate her personal hygiene items should be locked up. Further review of client #4's behavior support plan (BSP) updated 8/10/16 did not indicate the locking up of her personal hygiene items. During an interview on 10/16/18, management staff revealed they were unaware client #4's personal hygiene items were being kept locked up.	W 288
