W 189	<p>STAFF TRAINING PROGRAM CFR(s): 483.430(e)(1)</p> <p>The facility must provide each employee with initial and continuing training that enables the employee to perform his or her duties effectively, efficiently, and competently.</p> <p>This STANDARD is not met as evidenced by: Based on observation, record review and interview, the facility failed to provide each employee with needed training to enable each employee to effectively and competently perform their duties relative to reporting injuries for 1 of 4 sampled clients (#4). The finding is:</p> <p>Observations conducted throughout the 1/22/19 - 1/23/19 survey revealed client #4 had numerous abrasions covering his left forearm between the elbow and wrist.</p> <p>Review of the record for client #4 conducted on 1/23/19, verified by interview with the qualified intellectual disabilities professional (QIDP), revealed no documentation related to the abrasions on client #4's left forearm was available in client #4's record and no incident report had been submitted regarding the abrasions.</p> <p>Interviews conducted on 1/23/19 with the QIDP and the nurse, revealed client #4 often bumps/scrapes his arm on the threshold of doorways as he is self-propelling his wheelchair. These interviews further indicated the team had discussed initiating the use of a protective sleeve to prevent injury to client #4's arms, however, this intervention had not been put in place and no documentation was available related to this intervention.</p>	W 189	<p>Staff will be re-trained about incident reports, including when to complete, timeframes. Management will review reports and ensure completed in timely manner. Team will ensure appropriate follow up is completed for recommendations.</p>	3/23/19

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

W 249	<p>Continued From page 2</p> <p>formulated a client's individual program plan, each client must receive a continuous active treatment program consisting of needed interventions and services in sufficient number and frequency to support the achievement of the objectives identified in the individual program plan.</p> <p>This STANDARD is not met as evidenced by: Based on observation, record review and staff interview, the team failed to assure sufficient interventions to address the behavioral needs for 1 sampled client (#1). The finding is:</p> <p>Observation of client #1 on 1/22/19 at 1:00 PM at his day program revealed the client to shred paper using a shred machine when the machine stopped working. Continued observation revealed client #1 to become agitated with the inability to use the shredder with yelling, getting up and down from his seat walking around the room he was in, returning to his seat and slapping another client beside him, kicking at a client that walked near client #1's chair space and chewing on his thumb. Staff were observed to address client #1's physical aggression with "No, that's not nice. We don't do that." Staff was further observed to verbally request client #1 to sit down when the client was observed to get up from his seat and walk around. Continued observations of staff revealed efforts to get client #1's shredder working again and offering the client paper to tear by hand until the shredder was working. Client #1 was observed to verbalize "no" and throw paper on a table with staff request to tear paper by hand. At 1:15 PM staff was observed to walk client #1 from the classroom to get a drink. Client</p>	W 249	<p>Staff will be retrained on consumers BSP and interventions. BSP will be updated to include intervention strategies to address physical aggression. W 249	<p>Continued From page 3</p> <p>#1 was observed to return to the classroom continuing to walk around, yelling various verbalizations to include "go home". No further activity choice was provided to client #1 until the day program director offered the client a piece of gum and a choice of folding papers at 1:20 PM. Client #1 was observed to engage in yelling, wandering behavior, physical aggression and chewing on his hands for 20 minutes before the client was provided an opportunity to engage in an activity that interested the client.</p> <p>Review of client #1's record on 1/23/19 revealed a behavior support plan (BSP) dated 10/24/18. Review of the BSP revealed client #1 to have target behaviors that included physical aggression, verbal aggression, property destruction, self injurious behavior, anxiety/agitation, habilitation refusal and attempted AWOL. Further review of the BSP revealed prevention and interaction strategies for client #1 to include: helping client #1 maintain attention due to a limited attention span and providing opportunities to participate in as many activities as possible; Staff should keep client busy. The BSP further identified self injurious behavior of client #1 as chewing on thumb, placing thumb in mouth. The BSP identified no intervention strategies to address physical aggression.</p> <p>Interview with the qualified intellectual disabilities professional (QIDP) verified client #1 should have been actively provided opportunities to keep the client busy after the shredder at the day program stopped working. Further interview with the QIDP revealed the client's BSP should include specific strategies for staff to address client #1's physical aggression.</p>	W 249	<i>see page 3</i>

The finding is:</p> <p>Observations conducted on 1/23/19 at 6:45 AM revealed client #1 entered the medication administration area located in the office of the home. Staff responsible for medication administration was then observed to remove client #1's medications from the locked medication closet and placed them on the counter. Further observation revealed the controlled drug box was unlocked and open on the counter as well. Continued observation at 6:47 AM revealed client #1 left the medication administration area, refusing to take his medications. Ongoing observation at 6:50 AM revealed staff left the medication area and walked down the hallway of the home to prompt another client to come to the medication administration area, leaving the office door open with client #1's medications as well as the open controlled drug box sitting on the counter unattended.</p> <p>Interview conducted with the nurse on 1/23/19 revealed staff responsible for administering medications were expected to assure all medications are kept locked at all times except when being prepared for administration.</p>	W 382	<p><i>Staff will be re-trained on medication administration and med storage. W 436	<p>Continued From page 6 one week.</p> <p>Further observations conducted throughout the survey revealed an attachment was present above the backrest of client #4's wheelchair, with a hard plastic knob on the end. Client #4 was observed to bump the back of his head on this knob at intervals throughout the survey. On-going observations, conducted on 1/23/19 at 7:35 AM, revealed client #4 was assisted to load onto the facility van for transportation to the day program with the right anti-tipping device missing from his wheelchair, as well as the hard plastic knob located on an attachment above the backrest of his wheelchair coming into contact with the back of client #4's head at intervals.</p> <p>Additional observation in the group home medication area on 1/22/19 revealed an unlocked cubicle with various pieces of adaptive equipment to include glasses for client #4. Observation on 1/23/19 at 7:15 AM revealed staff to prompt client #4 about his glasses and the client indicated he was going to wear his glasses on the current day to his vocational program. Client #4 was not observed at anytime during the 1/22-23/19 survey to wear glasses, even after indicating he would wear them on the current day.</p> <p>Review of the record for client #4, conducted on 1/22/19 and 1/23/19, revealed an individual support plan (ISP) dated 9/17/18. Continued review of the ISP revealed documentation stating client #4 was dependent on his wheelchair, and further documented his wheelchair included a tilting mechanism which should be utilized at intervals throughout the day to change client #4's position in his wheelchair in order to provide pressure relief.</p>	W 436	<i>See page 6</i>

W 436	<p>Continued From page 7</p> <p>Further review of the ISP revealed client #4 to have additional adaptive equipment that included glasses. Continued review of client #4's record on 1/23/19 revealed a health summary assessment dated 1/11/19 that further identified the client's need for glasses. Additional review of client #4's record revealed a dignity of risk consent by the guardian dated 9/17/18. Review of the dignity of risk consent revealed client #4 does not wear his glasses due to: "does not like to wear them; hurt". Review of training objectives for client #4 revealed no current or past training for client #4 to address desensitization or taking care of glasses.</p> <p>Interview with the QIDP on 1/23/19 following client #4's departure for the day program revealed the knob that was present above the backrest of client #4's wheelchair was intended to support a headrest. Subsequent observation on 1/23/19 revealed the headrest for client #4's wheelchair was located in his bedroom and had been inadvertently left behind. This interview further verified both the anti-tipping device and the headrest for client #4's wheelchair should be maintained and present on client #4's wheelchair to promote his comfort and provide safety when his wheelchair is in a tilted position.</p> <p>Additional interview with the facility nurse verified client #4 has vision deficits requiring the need for glasses. Interview with the facility QIDP revealed client #4 has had past training to address the need of wearing glasses although the client has not had training to address caring for adaptive equipment. Further interview with the QIDP verified past training programs for client #4 relative to adaptive equipment was not available.</p>	W 436	See page 6
