Client #1, admitted 4/22/19, was identified during her admission assessment to be non-ambulatory and required staff to transfer her using a hooyer lift, and ambulated using her motorized wheelchair. Client #2, admitted 1/11/19, required verbal and physical assistance during emergency evacuation drills and required 24 hour supervision. Client #2 was observed to not follow verbal commands and required staff to physically guide him away from the refrigerator for his safety. Client #1 reported staff documented fire drills, but had only evacuated her during a fire drill once since her admission, and she feared for her safety in the event of a real fire emergency. Staff #3 reported client #1 was already out of bed and in her wheel chair most of the time fire drills were held. According to the Group Home Manager, she would assist client #1 to evacuate first during a fire drill, then return to assist client #2 because he required assistance. This procedure would leave client #2 in the home unsupervised on the night shift or other times when there was only 1 staff on duty. Admitting 2 non-ambulatory clients to this facility operating and licensed for 3 ambulatory clients was detrimental to the clients's health, safety, and welfare if there was a need for emergency evacuation. This deficiency constitutes a Type B rule violation. If the violation is not corrected within 45 days, an administrative penalty of \$200.00 per day will be imposed for each day the facility is out of compliance beyond the 45th day.	V 289
