P.O.C. -V752 27G.0304 (b) (4) Hot Water Temperatures

10A NCAC 27G. 0304 Facility Design and Equipment:

(b) Safety: Jireh's Place has always checked the water temperature for Client per him taking his bath or shower. We have discussed with staff and natural support to always make sure the water for bathing or taking a shower by Marquis is checked.

The AFL home had a new hot water heater installed last summer and the temperature was adjusted by the installer. We have changed the temperature to meet the requirement of 100-116.

Completed on: 1/9/2020-approximately 6:15 p.m. prior to client shower for bedtime.

Completed by: Netta Vanderhorst, Executive Director
