An alarm and sensor were placed on client #5's door more than a year ago to alert staff of his movement. The alarm nor the sensor were operable. Management and staff were unsure of how long both had been inoperable. In the last 6 months, client #5 had fallen between 1 -3 times a month, however there were no consistent documentation of the falls. Management requested staff monitor client #5 closer due to the increase of falls, however, didn't give any clear instructions or training to staff regarding the increased supervision . Client #5 was being monitored at different times throughout the day. One staff monitored client #5 every 15 to 30 minutes and another staff every 1 - 2 hours. The QP was aware client #5 had a history of falls, however failed to ensure goals and strategies were implemented into his treatment plan. Client #5 was supposed to follow up with an orthopedic physician within 1 week of his fall on 12/22/19, however this did not happened. This deficiency constitutes a Type A1 rule violation for serious neglect and must be corrected within 23 days. An administrative penalty of $1,000 is imposed. If the violation is not corrected within 23 days, an	V 112	Safety goals implemented in person centered plans for those with high risk of falls.	1/23/20
