W 263	PROGRAM MONITORING & CHANGE CFR(s): 483.440(f)(3)(ii) The committee should insure that these programs are conducted only with the written informed consent of the client, parents (if the client is a minor) or legal guardian. This STANDARD is not met as evidenced by: Based on record review and interviews, the facility failed to ensure a restrictive Behavior Support Plan (BSP) was conducted with the written consent of both guardians. This affected 1 of 4 audit clients (#11). The finding is: Review on 3/23/22 of client #11's undated BSP revealed objectives to reduce the frequency of behaviors to 3 or less a month, 8 out of 12 months. The targeted behaviors were self-injurious, inappropriate touching and aggression. Client #11 would receive Ativan, Lithium, Trazadone, Zyprexa, Keppra and Inderall to manage her behaviors. The consent for restrictive behavior treatment plan for control of social behavior form was signed by one of the guardians on 1/27/22. The second guardian did not have a signature on file with the consent. Interview on 3/23/22 with the Director revealed that she only received a signed consent from one of the guardians. The other guardian was temporarily placed out of her home and was not available to return the consent. Interview on 3/3/22 with the qualified intellectual developmental professional (QIDP) revealed that she searched for a copy of both guardians consent but was unable to place it.	W 263

W 369	Continued From page 1 The system for drug administration must assure that all drugs, including those that are self-administered, are administered without error. This STANDARD is not met as evidenced by: Based on observations, record review and interviews, the facility failed to ensure that 1 of 4 audit clients (#3) received a full dose of medication. The finding is: During morning medication observations in House 2 on 3/23/22 at 8:00am, the med tech poured 30 ml of Lactulose syrup into a medicine cup for client #3. The med tech attempted a hand over hand technique to assist client #3 pour the medicine into his mouth. When client #3 tried to handle the cup, part of the contents spilled, leaving 2 big drops and 2 small drops on the floor. The rest of client #'3s medications were given to him and he left the room when done. The med tech was not observed to contact the nurse before starting medication administration with client #5 and stepped in the spilled medication on the floor, commenting that she needed to mop the sticky floor. An additional observation, revealed the med tech called the physician assistant (PA) on the phone at 10:40am, to inform him that client #3 accidentally spilled some of his Lactulose. Client #3 had already departed from the home and was at the vocational center. Interview on 3/23/22 with the med tech revealed that client #3 received 15 ml of Lactulose after the medication spilled. She had not given him anymore medication because she was waiting for the nurse to return her call. At 10:40am, the med tech informed the surveyor that she spoken to the PA and was advised that she did not have to give client #3 anymore Lactulose until his next dosage tomorrow.	W 369

W 369	Continued From page 2 Interview on 3/23/22 with the Director revealed that she was not aware that client #3 spilled the Lactulose during med pass until 10:30am. The Director revealed that if medication is spilled during administration, the nurse should be informed and give instructions on what to do. The director should be informed and if the nurse does not return the call in a timely manner, then the physician assistant should be advised. Interview on 3/23/22 with the qualified intellectual disabilities professional (QIDP) revealed that if the medication is spilled during medication administration, and not replaced; then the partial dosage would be considered a medication error. W 441	EVACUATION DRILLS CFR(s): 483.470(i)(1) and under varied conditions to- This STANDARD is not met as evidenced by: Based on document review and staff interview, the facility failed to ensure fire drills were conducted during varying times and conditions. This potentially affected all of the clients in the home (#1, #2, #3, #4, #5, #6, #7, #8, #9, #10, #11 and #12). The finding is: Review on 3/22/22 of facility fire drill reports for April 2021-February 2022, revealed fire drills were conducted at 5:17am, 5:23am, 5:31am and 6:56am on third shift. There were no drills conducted during deep sleep hours, from 1:00 - 4:00am. Interview on 3/23/22 with the Director revealed that she conducted onsite fire drills and did not realize that the times should be varied during third	W 441
